

FLY *The* GUIIS

CIS 497 SENIOR PROJECT

Airbus Contacts

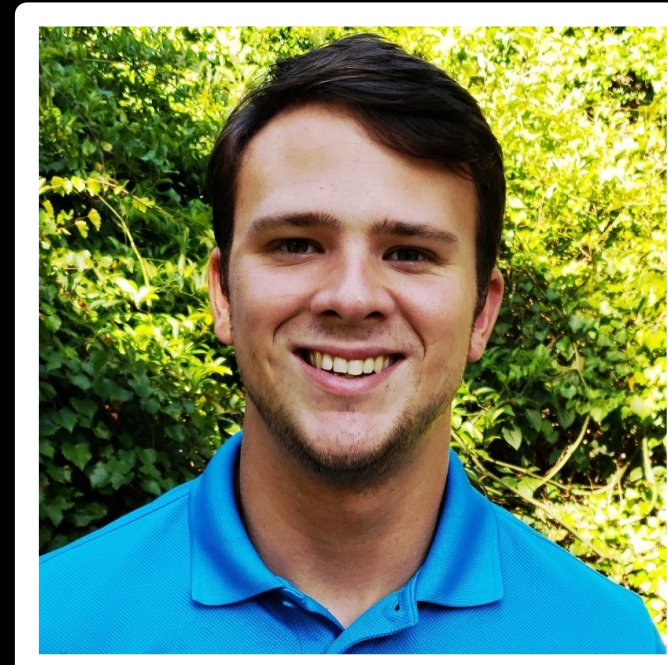

Jay Harikrishnan: OS Head
David Johnson: Management personnel

Airbus has recently developed a initiative to gather suggestions from it's floor workers on ways to improve the workplace. The improvements can be in either functionality or for the work environment. These improvements have the potential to save Airbus millions of dollars. They are eager to improve their workflow willing to compensate their employees handsomely. We have been tasked with finding a simple and efficient solution for polling their workers and updating them with the progress of their suggestion.

Jeff Hoiles
Information Technology Major
Networking Focus Track

Currently interning as a Jr. Sys Admin at Accureg Software. In my spare time I like to exercise, hang out with friends and family, and occasionally take road trips.

William Arthur
Information Systems
Business Minor

Currently working part time as a Computer Technician at the Probate Court of Mobile County. In my spare time I enjoy playing soccer, fishing, trying new restaurants, and traveling to new places.

Michael Williams
Computer Science Major
Mathematics Minor

Interning at Baheth Research & Development Labs as a technology consultant. My hobbies include making music, playing video games, and learning new skills.

Charles Logan
Computer Science Major

I love to play video games, cook and hike, especially at the beach in my spare time. I also love to travel when time allows.

Steven Hawke
Information Systems

Currently interning part-time for Mobile County Probate Court and working part-time as a Machine Programmer for Heartland Electronics and Cable Assembly. In my spare time I enjoy playing video games, playing music, and hiking.
