A study of international development and education in global and gender contexts that includes an examination of policy, structure, sociological issues (gender, religion, social class), and formal, adult and nonformal education. Major agency providers in the field and employment opportunities in the public and private sectors will be reviewed. Students will interact with individuals in the field through videoconferencing, face-to-face dialogues and other electronic interactions. Assessment will center on a guided project and experience specific to individual student interests. This course helps prepare students for a summer study abroad service learning experience in a developing country.

Prerequisite: EH 102 Minimum Grade of C

EDF 315 Living, Working, and Educating in a Diverse and Global Society 3 cr

Explores ones' understanding and acceptance of individuals perceived as culturally different in educational, work,, and social settings. Students collaborate with people of other cultures to negotiate and compromise across distances and cultures, create new ideas and products, reach common goals, exchange cultural ideas, and reflect on how cultural differences affect their thoughts and behaviors.

EDF 320 Compar & Intl. Gender & Fam 3 cr

The content will focus on comparative and international gender and family issues regarding non-formal adult health education and services. The student will do readings in this content area and compare human rights related to gender and family roles, woman's health issues and family planning services across the nations, how these relate to life opportunities for women and men. Programs providing related services and education will be analyzed. Students will dialogue with individual working in the field to gain a deeper understanding of contemporary real-world endeavors. Assessment will center on a guided project and experience specific to individual student interests and includes a service learning component at a local agency or an agency serving a developing country.

EDF 325 Global Gender Perpec in Ed 3 cr

An examination of gender and race, class, religion, language and ethnicity in formal and nonformal education in US and global contexts that develops cultural competencies and prepares students with an interest in international development/education careers. Students will interact directly with professionals in the field from various cultural backgrounds via videoconferencing and other modes of electronic communication. Assessment will center on weekly applications of course topics to real world situations and guided project or service learning specific to individual student interests.

EDF 330 Amer Ed Comp Global Framework 3 cr

An overview of education in its three aspects: formal, non-formal and informal. It will include the history, philosophy, sociology, policy and structure of the American education in comparison with other countries' systems. A regional approach will include northern Africa, the Indian Sub-continent, Asia, pacific Islands and Australia, Central America and the Caribbean, South America, Canada and Europe. Assessment will center on weekly applications of course topics to real world situations and a guided project or service learning experience specific to individual student interests.

EDF 335 Intern. Devel & Global Ed 3 cr

A study of current problems and issues in non-formal, informal and all levels of formal education. Includes poverty, inequality and human rights and related structures, policies and programs. Includes poverty, inequality and human rights and related structures, policies and programs. Major issue areas include health, gender, rural development, agriculture, civil society, economics, sustainability, politics and reform. Content may vary according to currently important issues. Assessment will center on weekly applications of course topics to real world situations and a guided project or service learning experience specific to individual student interests.

EDF 490 Special Topics 1-3 cr

Varies in content in one disciplinary area of educational foundations (e.g., history of education or anthropology of education) or in an interdisciplinary area (e.g., multicultural education). May be repeated for credit when course content varies.

EDF 494 Directed Studies 1-3 cr

Directed study. Prerequisite: Permission of Department. (No more than two directed studies can be counted toward the Bachelor's Degree and Class B Certificate.)

EDF 501 Cult Found of Education 3 cr

A presentation and investigation of basic concepts, issues, and principles of American education within a social scientific framework; particular emphasis is on multicultural concerns and strategies.

EDF 515 Multicultural Education 3 cr

In a multicultural society, teachers must be able to work with students from a variety of backgrounds—some quite differently from the teachers' own. Four cultural factors are the focus of this course: social class, race, gender, and ethnicity. Teachers sensitive to these factors can prepare students to survive and function in the dominant culture without sacrificing pride in the students' own cultures.

EDF 590 Sp Top - 1-3 cr

Course may vary in content or may be supervised study in one disciplinary area of educational foundations (e.g., history of education or anthropology of education) or in an interdisciplinary area (e.g., multicultural education). May be repeated for credit when course content varies.

EDF 594 Dir St and Research 1-3 cr

Students explore problems and issues of special interest or significance in educational foundations. Not more than three semester hours of any departmental 594 courses can be accepted toward a degree program.

EDF 610 History of American Educ 3 cr

Designed to give the student an historical perspective on important issues in American education. Among these issues are the influence of class, race, gender, ethnicity, and exceptionality on educational attainment; the control of public education; the debate over public schools versus private schools; the status and work of teachers; and the role of education in social change. The student will relate the past to the present in analyzing these issues.

EDF 615 Sem in Ed Policy Studies 3 cr

This course offers advanced graduate students the opportunity to examine educational policy and policy-making from sociocultural, political, historical, philosophical, and comparative and international perspectives. After analyzing a common core of issues, students will investigate a topic of their choice using research skills from the educational foundations disciplines.

EDF 620 Compar-Internat Educ 3 cr

Comparative and International Education will examine different world cultures and nations and their educational systems. The course will explore the various outcomes of education (achievement, status, employment, living conditions) and will examine the world crisis in education. In all, a study of education from a world-wide perspective will help illuminate the educational purposes, programs, and achievements of schools in the United States.

EDF 690 Sp Top - 1-3 cr

Course may vary in content or may be supervised study in one disciplinary area of educational foundations (e.g., history of education or anthropology of education) or in an interdisciplinary area (e.g., multicultural education). May be repeated for credit when course content varies.

EDF 694 Dir St and Research 1-3 cr

Exploration of problems and issues of special interest or significance for advanced students. No more than three semester hours of any departmental 694 courses can be accepted toward a degree.

Educational Media (EDM)**EDM 310 Microcomputing Systems 3 cr**

Basic understanding of current and emerging technologies for instructional purposes. Requires a special fee.

EDM 312 Ed Tech - 3 cr

Application of current educational technology in various instructional environments. Laboratory experience is given with selected software programs. May be repeated when technological application changes.

EDM 385 Methods Instr Comm 3 cr

Application of current concepts in communication and instructional system design to elementary and secondary teaching. Operation of basic mediaware and overview of literature related to media use are stressed.

EDM 430 Workshop in Educ Media 1-9 cr

In-depth study of operational experience in current trends and techniques in educational media research.

EDM 482 Prep Instr Materials 3 cr

Basic elements in the planning preparation, and evaluation of teacher-produced instructional materials.

EDM 490 Sp Top - 3 cr

Investigation of contemporary topics of interest in Educational Media. Requires permission of the department.

EDM 494 Dir St - 1-3 cr

Directed study in Educational Media. No more than two directed studies can count toward the Bachelor's degree. Required departmental approval.

EDM 510 Microcomputing Systems in Ed 3 cr

Application of current and emerging technologies that support and enhance instruction and can be used to improve student achievement.

EDM 520 Research in Ed Tech 3 cr

Introduction to history and theories of computer use in education.

EDM 530 Workshop in Ed Media 1-9 cr

In-depth study and operational experience in current trends and techniques in educational media research.

EDM 533 Curriculum Media for Children 3 cr

This course explores media used for learning and enjoyment with children in preschool through grade eight. Other topics include: the professional roles and responsibilities of a collection developer, the influence of child development and curriculum on collection development, an overview of the marketplace, strategies to encourage teachers to use media center materials in teaching, and related research.

EDM 540 Curr Media for Children & Yth 3 cr

This course initiates or extends a student's knowledge of how to identify, select, and use library media resources for students in grades 6 through 12. Other topics include: the role of a library media specialist in establishing and maintaining a collection of resources; steps that can be taken to encourage students and teachers to use the collection; related research; and ways professionals can keep abreast of the latest knowledge, practices, and resources.

EDM 552 Curr Media for Young Adults 3 cr

This course focuses on the role of the library media specialist in teaching students and instructional staff how to select, evaluate, and use information from print, non-print, and online sources. Emphasis is placed on information access, retrieval, and interpretation; advanced research techniques; copyright laws; and lessons and projects that utilize research information.

EDM 581 Media Center Management 3 cr

This course covers the procedures and routines for effective media center management, including acquiring, organizing, classifying, cataloging, maintaining, and inventorying a relevant collection. Other topics include: selecting resources to support the total curriculum and budget, responding to the needs of a school's demographic population, assisting students and teachers in the application of information skills, and applying the fundamentals of library design to achieve an effective environment for learning and leisure use.

EDM 582 Prod of Curriculum Media 3 cr

Provides instruction in the elements of planning, preparation and evaluation of professional circular materials for group and individual instruction.

Prerequisite: EDM 510 Minimum Grade of B or EDM 520 Minimum Grade of B

EDM 583 Library Media Programs 3 cr

This course covers the professional responsibilities for planning, implementing, and evaluating a library media program that serves a school program. Emphasis is placed on curriculum, leadership, environment, teaching and learning styles, a planning model, collaboration, staff development, program administration and evaluation activities, and ways in which research can be used to help shape an effective program.

EDM 584 Educational Technology Design 1-3 cr

Design and evaluation of information technology hardware, software, and networked information resources that support classroom pedagogy, educational administrative services, and student learning.

Prerequisite: EDM 520 Minimum Grade of B and ISD 581 Minimum Grade of B

EDM 585 Admin Educ Media Center 3 cr

General practices and procedures for establishing, organizing and operating the media center. Students submit plans for hypothetical or actual situations.

EDM 590 Sp Top - 3 cr

Presents topics of contemporary interest in the area of Educational Media.

EDM 591 Trends and Issues in Ed Tech 3 cr

Students will investigate current research as well as discuss emerging trends and developmental issues in the fields of educational media and instructional technology and their use as a pedagogical tool in P-12 schools.

Prerequisite: EDM 510 Minimum Grade of B or ISD 581 Minimum Grade of B

EDM 594 Dir St and Research - 1-3 cr

Students explore problems and issues of special interest or significance in Educational Media. Not more than three semester hours may be accepted toward degree programs.

EDM 595 Internship - 1-9 cr

The internship is a supervised learning experience in a work setting similar to that in which a media specialist eventually will be employed. Departmental approval is required.

EDM 595A Internship A 1 cr

The internship is a supervised learning experience in a work setting similar to that in which a media specialist eventually will be employed.

Prerequisite: EDM 581 Minimum Grade of B

EDM 595B Internship B 1 cr

The internship is a supervised learning experience in a work setting similar to that in which a media specialist eventually will be employed.

Prerequisite: EDM 580 Minimum Grade of B

EDM 595C Internship C 1 cr

The internship is a supervised learning experience in a work setting similar to that in which a media specialist eventually will be employed.

Prerequisite: EDM 583 Minimum Grade of B

EDM 599 Thesis 1-9 cr

A student selects a project, study or investigation related to the area of specialization in Educational Media. The project forms a basis for the thesis. A thesis committee provides direction during the investigation and during the writing of the thesis.

EDM 610 Adv Prod Curric Media 3 cr

The planning, design and preparation of photographic and audio instructional materials will form the basis of comprehensive, sophisticated, software systems.

EDM 685 Administering Ed Media Center 3 cr

Practices and procedures for administering the educational media center.

EDM 689 Info Storage and Retrieval 3 cr

Examination and application of computer systems to school library media centers.

EDM 690 Sp Top - 3 cr

Presents topics of contemporary interest in the area of Educational Media.

EDM 696 Adv Ref and Selection Resource 3 cr

Bibliographic organization and reference use of professional resources in education, including governmental documents, publications of educational associations, professional journals and indices, research reports and computerized bibliographies.

EDM 698 Advanced Cataloging 3 cr

Modern trends in cataloging with emphasis on standards for cataloging and educational media.

EDM 699 Research Project 3 cr

Provides an opportunity to synthesize and apply the various program components in a selected instructional setting. May be repeated for a total of 6 semester hours.

Educational Psychology (EPY)**EPY 251 Human Growth and Development 3 cr**

A study of the physical, mental, social and emotional development of young people from conception to late adolescence.

EPY 315 The Adolescent in School 3 cr

Assists future educators to understand adolescent development and behavior of students in the middle and high schools. Issues and problems include the school's role in the social, emotional, and intellectual development of middle and secondary school students from diverse multicultural backgrounds; student-teacher and peer relationships; and the academic and vocational planning process.

EPY 351 Human Growth & Development 3 cr

A study of the physical, mental, social and emotional development of young people from conception to late adolescence.

EPY 355 Eval of Teaching-Learning 3 cr

The application of formative and summative evaluative concepts in building and interpreting tests in the educational setting.

EPY 455 Eval of Teaching-Learning - W 3 cr

The application of formative and summative evaluative concepts in building and interpreting tests in the educational setting.

EPY 490 Sp Top - 3 cr

Study of a significant topic, theory, model or problem in behavioral studies. May be repeated once for credit when content varies.

EPY 494 Directed Study 1-3 cr

Directed individual study and research. Consent of department chair is required. (No more than two directed studies can be counted toward the Bachelor's degree and Class B Certificate).

EPY 502 Psy Prin Learning 3 cr

Psychology of learning as it pertains to education. Emphasis is on both the practical application of learning principles in educational and training classroom situations and theories of learning.

EPY 521 Human Dev and Behavior 3 cr

A study of the crucial developmental principles of human development and behavior focusing on: developmental tasks over the life span; growth patterns of the diverse subcultures emphasizing attitudes, values, and learning styles; family, school, and community impact on people of all ages living and growing in a multicultural society.

EPY 525 Assessment & Research in Educ 3 cr

This course is offered as part of the Alternative Masters Degree in Education. Upon completion of the course, students will be able to construct, evaluate, administer, and interpret classroom and school-related assessment. In addition, students will be prepared to be effective consumers of research reports, writings, and results in professional literature in their field.

EPY 555 Tests-Measurement and Eval 3 cr

Understanding and interpreting the meaning of test scores. Technical qualities desired in a test. Techniques for obtaining information about clients and/or students. Using this information in counseling, consulting, and teaching. Cultural bias in tests. Problems of testing and obtaining information about clients and/or students with diverse backgrounds.

EPY 556 Ed Testing - Wechsler Scales 3 cr

Includes basic theories of intelligence, basic concepts and principles of intelligence testing, extensive practice in administering, scoring and interpreting the Wechsler Adult Intelligence Scale, the Wechsler Intelligence Scale for Children and the Wechsler Preschool and Primary Scales of Intelligence in a wide variety of educational settings.

Prerequisite: EPY 555 Minimum Grade of B

EPY 557 Ind Intel Test -Stanford-Binet 3 cr

Includes basic theories of intelligence, basic concepts and principles of intelligence testing, extensive practice in administering, scoring and interpreting the Stanford-Binet Scale in a variety of educational settings. Competencies in consulting with professional personnel and with parents will be emphasized.

Prerequisite: EPY 555 Minimum Grade of B

EPY 558 Ed Testing - Kaufman Scales 3 cr

The Kaufman Assessment Battery for Children and the Kaufman Adolescent and Adult Scale are the basic instruments used for extensive practice in administering, scoring, and interpretation of intelligence. The various theories of intelligence, especially those of Horn and Cattell, Luria, Sperry and Neisser are emphasized.

Prerequisite: EPY 555 Minimum Grade of B

EPY 590 Sp Top - 3 cr

Guided supervision in the completion of learning tasks in educational psychology such as program design and revision, study of a significant topic, theory, model, and supervision of selected learning activities to acquire specific counseling and testing skills.

EPY 594 Dir St and Research 1-3 cr

Students explore through directed study of problems and issues of special interest or significance in Educational Psychology. Not more than three semester hours of any departmental 594 courses can be accepted toward a degree program.

EPY 602 Advanced Theories of Learning 3 cr

A study of the major psychological theories, models, research and principles that apply to the teaching and learning process. Special attention will be given to cognitivist approaches.

Prerequisite: EPY 502 Minimum Grade of B

EPY 610 Indiv Diff Among Learners 3 cr

Examination of individual and developmental differences as related to learning, performance and behavior. Intelligence attitudes, cognitive and learning styles, anxiety, prior knowledge, and locus of control are among the topics discussed. Models and methods for using learner characteristics in instructional design, teaching practices, and research are considered.

Interdepartmental Educ (IDE)**IDE 010 Reading Exam 0 cr**

IDE 010 is a one hour reading exam that tests students' current proficiency in communication skills. Failure to complete the exam as scheduled, with a passing score, will require the students to re-register for IDE 010.

IDE 101 Freshman Seminar in Education 2 cr

Assists freshman with maximizing the student's potential to achieve success and to respond responsibly to the individual and interpersonal challenges presented by college life. Emphasis will be placed on study skills, time management, and writing skills. The course also provides information on the functions and resources of the University that support student academic success. Special emphasis is placed on orienting the student to the special roles and responsibilities of being an educator in today's society.

IDE 400 Positive Classroom Mgt 3 cr

Emphasis is placed on ways to create a class and school environment that encourages responsible student behavior. William Glasser's concept of Reality Therapy as a process for successful teacher-student involvement is examined.

IDE 510 Educ Research and Evaluation 3 cr

Course will examine research and evaluation methodology, its application to questions in education, and the application of research findings to problems in education. The students will read and evaluate research in education.

IDE 525 Fnds Teach Eng Sec Lang 3 cr

A comprehensive survey of current research, methodology and materials in the field of English as a Second Language.

IDE 540 Found of Career Education 3 cr

The underlying philosophies behind the career education movement and various approaches to career education are discussed. Ways to increase the career options available to individuals and to facilitate more rational and valid career planning and preparation, are explored through the career education phases: career awareness, career exploration, and career preparation.

IDE 590 Sp Top - 1-3 cr

Current topics of special concern to educators. Not more than 6 hours may be earned in Special Topics courses.

IDE 594 Dir St and Research 1-3 cr

Exploration of problems and issues of special interest or significance in education. Not more than 3 hours can be accepted for a degree.

IDE 597 Student Teaching - 3-6 cr

Observation and supervised teaching in selected schools with opportunity for study and discussion of problems and issues encountered. Prerequisite: Permission of advisor.

IDE 615 Assess & Eval for Leaders 3 cr

This course will focus on the assessment and evaluation skills needed by educational leaders. The course will provide students with the knowledge and skills to carry out, and utilize effectively, the evaluations of programs, organizations, personnel, and students. The course will also cover how to create, interpret, and evaluate the reliability and validity of assessments.

IDE 620 Quantitative Methods I 3 cr

Basic quantitative methods for decision making in the educational environment. Computer application of basic descriptive and inferential statistics.

Prerequisite: IDE 510 Minimum Grade of B or KIN 505 Minimum Grade of B

IDE 621 Quantitative Methods II 3 cr

Basic research designs, with appropriate statistical analysis. The course will consider strategies needed for, but not limited to, the following: N-of-One research surveys and needs assessments; ex-post-facto designs, and true experimental designs.

Prerequisite: IDE 620 Minimum Grade of B

IDE 630 Quantitative Methods III 3 cr

An extensive examination of the nature and character of experimental design in educational research. Includes the development of appropriate analytical techniques.

Prerequisite: IDE 620 Minimum Grade of B and IDE 621 Minimum Grade of B

IDE 631 Intro Qual/Mixed Methods Res 3 cr

Introduces students to the major kinds of qualitative research and mixed methods research. Attention is given to underlying philosophies, methods of data collection, theoretical perspectives, research design, sampling, data analysis and interpretation, validity types and strategies, and writing research reports.

Prerequisite: IDE 510 Minimum Grade of B or IDE 692 Minimum Grade of B

IDE 635 Adv Measurement and Eval 3 cr

Nature and function of measurement in instructional design and development environments. Approaches to reducing test error, including establishing validity and reliability estimates. Item analysis and discrimination. Test development for norm-based and criterion-referenced tests. Knowledge of descriptive statistics required.

Prerequisite: IDE 620 Minimum Grade of B

IDE 640 Instructional Development 3 cr

Preparation of a modular program of instruction which incorporates all elements of the instructional-design process.

Cross-Listed: EDU 640

IDE 645 Adv Human Perform Improvement 3 cr

This course provides students with knowledge and skills related to human performance improvement in relation to instructional design profession. It provides an overview of foundational theories of industrial-organizational psychology, organizational behavior, and organizational development and change in relation to instructional design and performance improvement practices.

IDE 650 Instructional Techniques 3 cr

This course assists teachers in becoming more professional in instructional skills through the use of micro-teaching techniques and analysis of research in teaching.

Cross-Listed: EDU 650

IDE 660 Program Research and Eval 3 cr

Course strives to increase the effectiveness of instructional personnel in their use of research and evaluative techniques in instructional environments. Three major areas of focus are: the conceptualization of research and evaluative models appropriate for the population; the application of basic assessment concepts to the teaching-learning environment; and the analysis of basic applied research in evaluation.

Prerequisite: IDE 510 (may be taken concurrently) Minimum Grade of B

IDE 665 Inter Techniques Instr Envrmts 3 cr

This courses concentrates on developing three major areas: the examination of psychological underpinning of various communicative models and concepts; the practicing of interactional skills, such as active listening, congruent sending, and conflict resolution; the building of a communication model for the student's instructional environment.

IDE 685 Ed Simulation and Games 3 cr

Teaches the role and function of simulation and games as effective instructional and learning devices.

IDE 690 Special Topics - 1-3 cr

Current topics of special concern to educators. Not more than 6 semester hours may be earned in Special Topics courses.

IDE 692 Research Project Seminar 3 cr

Survey of both current and classic research in education. Students will identify a research problem of significance in their area of specialization and develop a strategy or research design to solve this problem.

Prerequisite: IDE 510 Minimum Grade of B

Cross-Listed: EDU 692

IDE 694 Dir St and Research 1-3 cr

Exploration of problems and issues of special interest or significance in education. Not more than 3 semester hours can be accepted for a degree.

IDE 696 Internship-Masters/Doctoral- 0 cr

The internship is a supervised learning experience in an actual or similar setting to that in which instructional designers or medial administrators are employed. Prerequisite: Approval of internship coordinator.

IDE 700 AU-USA Doctoral Program 1 cr

Provides an opportunity for advanced graduate students and professors to pursue cooperatively selected concepts and theoretical formulations. May be repeated as necessary.

IDE 710 Research Seminar I 1-6 cr

This course provides an introduction to doctoral study in IDD. Topics include graduate student socialization, nature of scholarship and scholarly writing, epistemology, sociology of knowledge, and systems theory as a meta-theory. Admission to doctoral program is required. 3 credit hours.

IDE 711 Research Seminar II 1 cr

This course is designed to help doctoral students think about their dissertation research, understand the process of reviewing the literature, and organizing and writing a dissertation-level research proposal.
Prerequisite: Approval of student's dissertation advisor. 1 credit hour per semester for 3 semesters.

Prerequisite: IDE 710 Minimum Grade of S

IDE 790 Sp Top - 1-3 cr

Current topics of special concern to educators. Not more than 6 semester hours may be earned in Special Topics courses.

IDE 792 Research Proj Seminar 3 cr

Survey of both current and classic research in education. Students will identify a research problem of significance in their area of specialization and develop a strategy or research design to solve this problem.

Prerequisite: IDE 510 Minimum Grade of B

IDE 794 Dir St and Research 1-3 cr

Exploration of problems and issues of special interest or significance in education. Not more than 3 hours can be accepted for a degree.

IDE 799 Research-Dissertation 1-9 cr

Independent research by the student under the sponsorship of the graduate faculty. Students are required to achieve doctoral candidacy before enrolling in the course. Requires faculty advisor approval.

Instructional Sys Design (ISD)**ISD 301 Trends & Issues in IDPI-W 3 cr**

This is an introductory course that provides an overview of current trends, technology and issues in instructional design and performance improvement.

Prerequisite: EH 101 Minimum Grade of C and EH 102 Minimum Grade of C

ISD 310 Instructional Design 3 cr

Instructional Design is a project-based course that includes step-by-step strategies to create instruction using the design models, instructional strategies, and technology applications. Students will explore the processes of analysis, design, development, implementation, and evaluation in order to apply real-world training solutions to actual instructional problems.

ISD 320 Training Interventions 3 cr

This course will provide students with experience in designing and developing facilitator-lead training interventions focused on improving performance in various contexts. Students will interact with a client in a professional manner and create a professional training session incorporating motivational strategies, instructional delivery methods, and appropriate assessment measures from initial contact needs assessment to final session evaluations.

ISD 340 Analysis, Assessment & Eval 3 cr

Students will learn how to make assessments of human attitudes, knowledge, and performance, analyze empirical data, and evaluate training and human performance programs.

ISD 350 Emerg Learning Technologies 3 cr

This course provides students with the skills and knowledge necessary to develop technology-based modules using different delivery methods for application in non-instructional and instructional training solutions.

Prerequisite: ISD 310 Minimum Grade of C

ISD 360 Communication Skills in Org 3 cr

This course is designed to utilize theory and practice of communication in the processes of analysis, design, development, implementation and evaluation of instruction. Communication skills will be developed and applied in a practical setting.

ISD 370 Distance and Mobile Learning 3 cr

This course will identify and utilize innovative technologies related to distance and mobile learning in various job sectors and learning environments.

Prerequisite: ISD 310 Minimum Grade of C

ISD 400 Portfolio Development 1 cr

Students will create an online portfolio to showcase projects, assignments, and collaborations related to instructional design and performance improvement.

Prerequisite: ISD 310 Minimum Grade of C

ISD 410 Org/Coordination Training 3 cr

This course is designed to develop knowledge and competencies in the coordination of large-scale, comprehensive training programs.

Prerequisite: ISD 320 Minimum Grade of C and ISD 340 Minimum Grade of C

ISD 420 Cultural Factors in IDD & HPI 3 cr

This course will focus on the interaction of multicultural aspects of learning and teaching. Students will enhance their cognitive and affective awareness and understanding, as well as their personal acceptance of differences associated with the learning/teaching process. The ultimate goal is to prepare multiculturally competent designers of instruction for a global society.

ISD 430 Psych of Learning in Organ-W 3 cr

The course covers major theoretical perspectives in organizational psychology based on empirical research and case studies. Students will explore learning theory, group dynamics, and change in different types of learning organizations.

ISD 440 Human Develop. Interventions 3 cr

Students will learn and apply various human development theories and interpersonal skills related to the effective design of training interventions to improve learning and performance. A special area of emphasis will focus on students' own development experiences.

ISD 450 Human Performance Tech 3 cr

This course includes conducting various types of analysis in order to solve human performance problems by design on non-instructional interventions.

Prerequisite: ISD 340 Minimum Grade of C

ISD 480 Learn Train & Perf Project 3 cr

Students will complete a supervised field project on a topic related to instructional design and/or performance improvement.

ISD 490 Special Topics 3 cr

This course will allow faculty to work with students to explore current topics related to instructional design and performance improvement. Scholarly articles and current trends will be the basis for the designated learning outcome and end product.

Prerequisite: ISD 310 Minimum Grade of C and ISD 350 Minimum Grade of C and ISD 360 Minimum Grade of C

ISD 495 Internship 3 cr

The internship is a supervised learning experience in an actual or similar setting in which instructional design or performance improvement related professionals are employed.

Prerequisite: EH 102 Minimum Grade of C

ISD 581 Digital Media Tools 3 cr

This course helps students learn to use computers to design instruction.

ISD 582 Evaluation of Digital Media 3 cr

An advanced course in the development, use and evaluation of multimedia instruction.

ISD 583 Interactive Video 3 cr

This course involves digital editing and includes basic instruction in shooting, lighting and composing video sequences.

ISD 584 Animation 3 cr

An introductory course that provides students with an opportunity to acquire the skills necessary to develop animated interactive modules for use in instruction.

ISD 585 Integr Tech in Teaching 3 cr

The purpose of this course is to enable students with some technology background in computers to focus the use of a variety of technologies onto a specific content area of instruction. Students will demonstrate cognitive competency of curriculum integration, instructional design, and production techniques. Specific attention will be given to videodisc technology, AV and computer technology.

ISD 590 Sp Top - 3 cr

Topics of contemporary interest in the area of Educational Media will be presented, discussed and investigated.

ISD 594 Dir St and Research 1-3 cr

Students explore problems and issues of special interest or significance in Instructional Design and Development. Not more than three semester hours may be accepted toward degree programs

ISD 595 Internship - Masters 1-6 cr

The internship is a supervised learning experience in an actual or similar setting to that in which instructional designers or media administrators are employed

ISD 598 Research and Dev Project 1-6 cr

A supervised field project, study or investigation on a topic related to Instructional Design and Development. Students will conduct an investigation which applies skills learned during the Instructional Design and Development Masters program.

ISD 599 Thesis 1-3 cr

A student selects a project, study or investigation related to the area of specialization in Instructional Design and Development. The project forms a basis for the thesis. A thesis committee provides direction during the investigation and during the writing of the thesis.

ISD 600 Learning Tools 1 cr

This one-credit-hour course is designed to introduce students to some of the basic media tools that will help them with their coursework and in the work place. The course will typically be a series of two-hour class periods scheduled at somewhat regular intervals.

ISD 601 Sem Instruct Design-Dev 3 cr

Discussion and investigation of particular topics related to Instructional Design and Development.

ISD 602 Writing For Instruction 3 cr

Course serves as an overview and review of essential written communication skills needed by instructional design professionals.

ISD 610 Trends and Issues in IDD 3 cr

Discussion and investigation of history, current trends, and issues in instructional design and their implications for education and training.

ISD 611 Macro Lvl Trning & Perform Sys 3 cr

Course provides an overview of concepts and current issues related to the design and development of training and performance systems at the macro-level. Rather than focusing on specific, small-scale instructional or non-instructional interventions, students in this course will study learning and performance from a broad organizational perspective.

Prerequisite: ISD 621 Minimum Grade of B and ISD 641 Minimum Grade of B

ISD 612 Alternate Instructional Models 3 cr

A comprehensive course detailing conventional and alternative instructional-design models. It is intended for advanced IDD students to further develop their skills and knowledge about ID models and to formulate their own epistemological beliefs as to how ID should occur.

Prerequisite: ISD 622 Minimum Grade of B

ISD 613 Instructional Strategies 3 cr

In this course, students explore the use of an assortment of instructional strategies to meet diverse learning needs.

ISD 614 Human Cognition for IDD 3 cr

A survey course of the cognitive science literature that is especially relevant for instructional designers and human performance technologists. The course covers major theoretical perspectives in cognitive science and has students read original empirical research. The goal is to enable IDD students to utilize the cognitive science literature in their careers.

Prerequisite: EPY 502 Minimum Grade of B

ISD 620 Research in Instr Tech 3 cr

Students collaborate with a graduate faculty member who is conducting research in the area of instructional design and development. May be repeated for credit.

ISD 621 Instructional Design 3 cr

Introductory course that focuses on a recognized model of instructional design. Includes emphasis on instructional analysis, instructional objectives, performance assessment, instructional strategies and sequences, and formative evaluation.

ISD 622 Adv Instructional Design 3 cr

Application of advanced instructional design models and procedures for needs assessment, instructional development, and evaluation in various instructional and learning environments using current learning tools.

Prerequisite: ISD 621 Minimum Grade of B

ISD 623 Adv Research Methodology 3 cr

A comprehensive course detailing advanced research methods and research. This course is specifically geared toward advanced IDD students who wish to develop the skills to properly design, propose, carry out, and critique scholarly research. The course covers the specifics of advanced research design and methods through a thorough analysis of empirical research. The goal is to equip IDD students with the research design skills to become successful scholars and researchers in their field.

Prerequisite: IDE 510 Minimum Grade of B or IDE 620 Minimum Grade of B

ISD 640 Needs Assessment 3 cr

The course focus is on conceptualization of needs analysis related to instructional and performance improvement issues in selected settings. Students collaboratively apply a needs assessment model to determine needs, causes, and solutions and report findings and recommendations.

ISD 641 Performance Systems Tech 3 cr

This course provides students with practical methods of analyzing and solving human performance problems. Emphasis is placed on development of both non-instructional and instructional interventions.

ISD 642 Project Coordination 3 cr

This course will develop knowledge and competencies in the coordination of large instructional projects. It is designed to enhance skills in the basic functions of instructional project coordination: planning, organizing, controlling, and directing.

ISD 650 Computer-Based Training 3 cr

A course for persons interested in the use of the computer to present instructional materials to students. Current learning theory as it pertains to authoring will be discussed.

ISD 651 Learning Theory and Technology 3 cr

This course will present techniques for the integration of instructional design theory and practice into the newer delivery systems including those using video and digitized media.

ISD 652 Technology-Based Instruction 3 cr

This course is a continuation of ISD 651. It concentrates on the additional skills and software necessary to develop and produce an original interactive instructional product.

ISD 653 Developing Online Instruction 3 cr

Developing online instruction using course management tools, multi-media technologies, and instructional design principles.

Prerequisite: ISD 621 Minimum Grade of B

Cross-Listed: IDE 640

ISD 655 Print and Screen Courseware 3 cr

Designing, producing and applying print and screen courseware. An analysis of graphic and instructional design principles and technologies, alternatives to conventional prose, learned capabilities, readability, formulate, and resource constraint analysis. Students design, develop, and apply print and screen courseware in instructional modules.

ISD 656 Training Interventions 3 cr

Practical experience in designing and implementing facilitator-led training in various large-scale organizations.

ISD 657 Teaching in Higher Education 3 cr

Theory and practice of pedagogy in higher education. Principles of the analysis, design, development, implementation, and evaluation of instruction will be addressed and then applied in a practical setting with a mentor instructor.

ISD 680 Emerging Technologies 3 cr

Course introduces students to emerging technological breakthroughs in education and training settings especially emphasizing the effects of future technologies.

ISD 682 Impact Emerging Technologies 3 cr

This course examines the impact of new digital technologies in education and training and prepares educators to use digital approaches in their institution.

ISD 694 Dir St and Research - 3 cr

Students explore problems and issues of special interest or significance in Instructional Design. Not more than three semester hours may be accepted toward degree program.

ISD 695 Internship - Doctoral 1-6 cr

The internship is a supervised learning experience in an actual or similar setting to that which instructional designers or media administrators are employed.

Faculty

Faculty Name	Faculty Department	Faculty Position	Degrees Held

Clinical Mental Health Counseling (MS)

Degree Requirements

The program described below is designed to provide for the acquisition of skills and competencies needed by counselors working in an agency setting.

A grade of "B" or better is required in all coursework counting towards the degree.

Counselor educators are ethically required to ensure that students meet academic requirements and demonstrate clinical competencies. Satisfactory progress will be predicated on a combination of factors

such as academic success, clinical competence, adherence to ethical standards, and appropriate interpersonal functioning. Students who do not demonstrate satisfactory competence within any of these critical areas of professional performance may be terminated from the program. Core faculty will evaluate students on a continuing basis to determine students' satisfactory progression through the program. Other policies, procedures, and guidelines are addressed in the Counselor Education Graduate Student Handbook.

Students who are not enrolled for three consecutive semesters must complete all admissions requirements again and be reviewed by the program admissions committee.

Comprehensive Examination: Counselor Education Comprehensive Exam (CECE)

Clinical Mental Health Counseling Graduate Certificate Degree Requirements

The Graduate Certificate in Clinical Mental Health Counseling at USA requires a minimum of five courses (15 hours) with grades of "A" or "B". The student may choose from a list of courses to meet requirements for the certificate that provides specific training in the individual's area of counseling emphasis. The student will work with the program director/ and or advisor to develop the best plan possible to meet career goals.

Counselor educators are ethically required to ensure that students meet academic requirements and demonstrate clinical competencies. Satisfactory progress will be predicated on a combination of factors such as academic success, clinical competence, adherence to ethical standards, and appropriate interpersonal functioning. Students who do not demonstrate satisfactory competence within any of these critical areas of professional performance may be terminated from the program. Core faculty will evaluate students on a continuing basis to determine students' satisfactory progression through the program. Other policies, procedures, and guidelines are addressed in the Counselor Education Graduate Student Handbook.

Students who are not enrolled for three consecutive semesters must complete all admissions requirements again and be reviewed by the program admissions committee.

Comprehensive Examination: Counselor Preparation Comprehensive Examination (CPCE).

Educational Media (M.Ed.) - Library Media

Degree Requirements

The Master of Education degree program in Education Media with a certificate in Library Media is designed to prepare students to plan, design, and administer library/media centers and qualify students to serve as School Library Media Specialists in a P-12 educational setting. This program is offered entirely online with two options:

Upon successful completion of the nationally recognized and accredited program, graduates may be able to qualify for certification in states other than Alabama. For certification as a library media specialist by the State Department of Education, one must have completed a basic program in a teaching field. Eligibility for certification requires two years of appropriate professional experience. See specific requirements for each program. The initial certificate is valid for five years.

Satisfactory progress in the program will be predicated on a combination of factors such as academic success, demonstration of competence in requisite skills, adherence to ethical standards, and appropriate interpersonal functioning. Students who do not demonstrate satisfactory competence with any of these critical areas of professional performance may be terminated from the program. Core faculty will evaluate students on a continuing basis to determine students' satisfactory progression through the program.

Master of Education Degree with Certification in Library Media

Students entering this program must have valid baccalaureate-level or master's level professional educator certification in a teaching field. Program requirements include:

1. Completing a minimum of 30 semester hours as outlined below, with a minimum grade-point average of 3.25 on all work attempted. A minimum grade of "B" is required for all EDM courses, and a satisfactory performance is required in each of the internship experiences.
2. Passing a written comprehensive and portfolio examination.
3. Passing the PRAXIS II test for Library Media Specialist.

Code	Title	Hours

⁴ Prerequisite EDM 583

⁵ If a survey course in Special Education was previously taken at the undergraduate or graduate level, EDU 567 must be taken in lieu of SPE 500.

Alabama Class "A" Certification in Library Media

To be eligible for admission to this program, students must have a valid Alabama master's level certification in a teaching field or a valid master's level certification in another area of instructional support and must have completed the equivalent graduate course work listed under Instructional Support Courses for the master's degree (9 semester hours).

Additional requirements for admission are found on the Program webpage at <https://www.southalabama.edu/colleges/ceps/cins/edmedia-med.html>

To apply - click here (<https://southalabama.liaisoncas.com/applicant-ux/#/login>) to get to the admissions login page.

Program completion requirements include:

1. Completing the Educational Media Core (21 semester hours) as outlined below, with a minimum grade point average of 3.25 in all core courses and a satisfactory performance in each of the internship experiences.
2. Passing a written comprehensive and portfolio examination.
3. Passing the PRAXIS II test for Library Media Specialist.

Code	Title	Hours

Total Hours		21

Footnote

¹ With the exception of EDM 510, enrollment is limited to Educational Media majors only.

² Prerequisite EDM 581

³ Prerequisite EDM 580

⁴ Prerequisite EDM 583

In addition, an ALSDE-Approved diversity course is required if not previously taken with the Class A certification.

Students will be required to accumulate a total of 300 contract hours during the three internships: A, B, and C (100 hours in each). Of the 300 contact total hours, 150 must be accumulated in a P-12 school library. Although it is preferred that all internship hours are accumulated in a P-12 school library, other settings may be approved such as a public or university library. Internship A MUST be conducted in a school library. Of the 300 total hours, at least 100 must be at the elementary level (K-6) and at least 100 at the secondary level (7-12); the remaining 100 may be at the level(s) of choice. It is the students' responsibility to initiate the internship experiences by: identifying potential sites and obtaining on-site administrative approval. Final approval of internship arrangements will be made by program faculty. The supervising library media specialist must be certified, currently employed as a media specialist, and have at least three successful years as a media specialist.

Educational Media and Technology (MS)

Degree Requirements

The University of South Alabama Master of Science degree in Educational Technology, a completely online program, prepares graduates to design, evaluate, and implement educational technologies. Through coursework and practical experiences, students will learn to use a diverse set of technological tools for the design and development of effective instruction. Students will also evaluate technological tools and resources designed to enhance teaching and learning and collaborate with educators and others to use technology to enhance learner experiences and outcomes.

Requirements for Degree

To qualify for the Master's Degree in Educational Technology, candidates must satisfactorily complete the following program with a minimum grade of "B" or better on all course work. Students must successfully complete a digital comprehensive exam portfolio which includes a thesis paper and an instructional technology project. The digital comprehensive exam portfolio may only be submitted two times.

ISD 642	Project Coordination	
IDE 660	Program Research and Eval	
Required Capstone Course		
ISD 611	Macro Lvl Trning & Perform Sys	3
Total Hours		15

Criteria

To be eligible, the student must meet the master's admission and applicant requirements of the IDD master's program. These include the following: a) hold a bachelor's degree or equivalent from a regionally accredited institution, and b) have a cumulative junior/senior undergraduate GPA of 2.5 or higher or 2.75 GPA or higher on the last 64 undergraduate credit hours.

Application Procedures and Requirements

The students would make application to the certificate program via University admissions application process and submit documents and fees as required by the Human Performance Improvement certificate program.

Requirements for admission are found on the Program webpage at <https://www.southalabama.edu/colleges/ceps/cins/hpi-cert.html>

Final admission decision involves evaluation of the following: grade-point average, letters of reference, applicant's statement of career goal(s) and purpose(s), professional experience, and program enrollment and availability.

Applicants are responsible to ensure that all materials arrive within the deadline. Incomplete applications will not be considered. Applications will be retrieved for review when all materials are received. An IDD program faculty admission committee will review applications, make admissions decisions and a written communication from the university will notify applicants about admissions decisions.

Requirements for Certificate Program

A minimum GPA of 3.0 on all program of study courses and all work attempted is required. A maximum of two Cs can be counted. No grades of D or F may be counted. If a third C or any grade below is earned, the student will be dismissed from the program.

Those enrolled in the Certificate program may also elect to pursue the master's degree and be allowed to apply the courses toward their degree program once admitted and upon approval of the IDD faculty admissions committee.

Students enrolled in an IDD graduate program may opt to complete a certificate program to earn the certificate in addition to completing their degree program.

Instructional Design and Development (MS) Degree Requirements

The Master of Science degree program in Instructional Design and Development provides students with the information and skill training to analyze instructional tasks, to design and deliver instructional programs, and to perform evaluative procedures on instructional products and services. The job market potential for graduates of the program includes the management of in-service education in business and industry, health-related institutions and agencies, military agencies, institutions of higher education, K-12 education, and related self-employed activities.

1. Each student will be assigned a major professor and will complete a course-of-study form by the end of the first semester of study.
2. A program committee will be appointed to work with the student.
3. A Master's Comprehensive Examination will be completed by each student during the student's last semester.

The Master's program in Instructional Design and Development (IDD) has both on-campus and on-line courses. Although not all courses are taught in both formats, students are able to complete the Master's program in one format or the other, or a combination of on-campus and on-line courses. Using the Internet and other distance learning technologies, the IDD on-line program provides an educational opportunity for those who

choose to use similar technology that they might employ for delivering educational and training courses after graduation.

Flexibility is the key to the program, and students can complete courses via the Internet following their individual learning schedules during the semester. Students are able to interact directly with their instructor and classmates to obtain subject information, to work on course and team assignments, and to complete assessments via the Internet. In addition, students have direct access to the University Library and advising services.

For more detailed information, please visit the ID&D website at <https://www.southalabama.edu/colleges/ceps/cins/> or contact: Telephone (251) 380-2861

Admission Requirements

Applications for the Instructional Design and Development program are reviewed throughout the year.

Requirements for admission are found on the Program webpage at <https://www.southalabama.edu/colleges/ceps/cins/idd/idd-ms.html>

To apply - click here (<https://www.southalabama.edu/departments/admissions/graduate.html>) to get to the graduate admissions page.

Final admission decision involves evaluation of the following: grade-point average, scores on the GRE, letters of reference, applicant's statement of career goal(s) and purpose(s), professional experience, and program enrollment and availability.

Internship

Many Instructional Design and Development students complete an internship of a minimum of 240 contact hours. Students must complete all foundational core courses prior to enrolling for the internship. The internship component is designed to give students practical experience in design, implementation, and/or evaluation of instructional systems and must have prior approval of the internship coordinator and the student's advisor.

Requirements for Degree

To qualify for the Master's Degree in Instructional Design and Development, candidates must satisfactorily complete the following program, maintain a minimum GPA of 3.0 on all program of study courses and all work attempted. A maximum of two Cs can be counted. No grades of D or F may be counted. If a third C or any grade below is earned, the student will be dismissed from the program. Students must complete a written course of study by the end of their first semester in the program.

Students must successfully complete a 1-hour oral comprehensive exam. The exam may be taken only two times.

Total Hours **33**

Instructional Design and Development (Ph.D.)

Degree Requirements

The Doctor of Philosophy degree in Instructional Design and Development consists of components in instructional systems design, instructional technology, learning theory, and research and evaluation. Program emphases are: applying instructional systems design procedures in educational program development; developing instructional models for a variety of subject matter areas and educational settings; matching instructional strategies to student learning styles; evaluating, selecting, and integrating new technologies into instructional systems; and utilizing formative and summative evaluation and research in the development and improvement of instructional systems. Graduates of the program will be prepared to function in school districts, colleges and universities, business and industry, health care organizations, and the military with responsibility for planning, implementing, and evaluating instructional programs.

Admission Requirements

Applicants for the doctoral program with a Bachelor's degree or without a Master's degree in Instructional Design and Development from a program deemed to be equivalent by the admissions committee will be required to complete the Foundational Core courses in the Master's degree in IDD and take a qualifying exam on the Foundational Core. Students must satisfy all Foundational Core requirements and maintain a minimum GPA of 3.0 on all program of study courses and all work attempted. A maximum of two Cs can be counted. No grades of D or F may be counted. If a third C or any grade below is earned, the student will be dismissed from the program. The student must pass the qualifying examination. In addition, the applicant's progress and preparation for advanced work will be reviewed by a committee that will make a decision for or against admission to the regular Ph. D. program.

Applicants with a Master's degree in Instructional Design and Development or equivalent may be admitted to the regular Ph.D. program. After transcript review, however, the admission committee may require additional coursework and/or successful completion of the Master's comprehensive exam. Any additional pre-requisite coursework will be indicated in the acceptance letter.

The Admissions Committee will select the most highly qualified candidates to be considered for admission to the program. A positive

effort will be made to identify and recruit minority students into the program.

Requirements for admission are found on the Program webpage at <https://www.southalabama.edu/colleges/ceps/cins/idd/idd-phd.html>

To apply - click here (<https://www.southalabama.edu/departments/admissions/graduate.html>) to get to the graduate admissions page.

The admission decision involves evaluation of the following: the grade-point average on undergraduate and graduate course work, scores on the GRE or the MAT, letters of recommendation, professional experience, the applicant's statement of purpose, and the program's current enrollment. Final decisions regarding admission will be based on the applicant's personal and professional qualifications as well as the program's ability to accommodate additional doctoral students. Upon acceptance by the College of Education and Professional Studies, the applicant will be recommended for admission. Admissions will notify all applicants in writing of the disposition of their applications.

Information about the Ph.D. program should be requested from:

The Coordinator, Instructional Design and Development Program
UCOM 3800, College of Education and Professional Studies
The University of South Alabama
Mobile, Alabama 36688-0002
(Telephone: (251) 380-2861)

All documents for admission review (i.e., transcripts, test scores or letters of recommendation) must be official and mailed from the home institutions or testing agency directly to the Office of Admissions. Once submitted, documents become the property of the University of South Alabama.

Program

The Doctor of Philosophy degree program in Instructional Design and Development is designed to provide persons with skills required in planning, implementing, and evaluating instructional programs in a variety of educational settings. The program consists of four major components:

1. the instructional design and development foundation core
2. research methods and statistics
3. supporting coursework
4. completion of a dissertation

A minimum of 60 semester hours of approved graduate course work is required in the program. Refer to the current Instructional Design and Development doctoral handbook for specific requirements.

The requirements for each of the components in the program in Instructional Design and Development are described below. (Any additional requirements will be determined by the student's doctoral advisory committee.)

Requirements for the Ph.D. in instructional design and development program (60 semester hours)

To qualify for the Doctor of Philosophy Degree in Instructional Design and Development candidates must maintain a minimum GPA of 3.0 on all program of study courses and all work attempted. A maximum of two Cs can be counted. No grades of D or F may be counted. If a third C or any grade below is earned, the student will be dismissed from the program.

Requirements

Select a minimum of 15 hours from the following:		15
IDE 620	Quantitative Methods I	
IDE 621	Quantitative Methods II	
IDE 630	Quantitative Methods III	
ISD 623	Adv Research Methodology	
IDE 631	Intro Qual/Mixed Methods Res	
IDE 635	Adv Measurement and Eval	
IDE 694	Dir St and Research	
Supporting Coursework		
Select 12 hours of supporting coursework (Courses must be approved by doctoral advisory committee)		12
Research/Dissertation		
Instructional Core and Research Core comprehensive examinations are required before enrolling in research/dissertation hours. No more than 9 research/dissertation hours count toward the semester hours requirement		9
Total Hours		78

Continuous Enrollment

Doctoral students must be continuously enrolled for one semester hour or more to remain active in the program. After admission to candidacy and until graduation, students must enroll each academic term for a minimum of one semester hour of IDE 799, Research and Dissertation. A minimum of 9 hours of dissertation credit is required.

Failure to enroll for any hours during any semester will result in a student being removed from the program. Students who voluntarily withdraw from the program may be considered for readmission. The student will be reviewed by the Admissions Committee under standards in effect at the time the student applies for readmission. The student will need to demonstrate that he or she is current with the research literature in the field. This may require additional work on the part of the candidate.

Residency

Students in the program will complete a minimum of one year of residency during their doctoral studies. Residency is defined as enrollment as a full-time student for a period of two consecutive semesters. Residency is a requirement for admission to candidacy.

Examinations

Doctoral students are required to successfully complete two major examinations before admission to candidacy.

Research Core Examination

This Research Core Examination is a one-day examination consisting of a written portion and the analysis of a data set using a computer program of the student's choice. The purpose of the examination is to verify that the student has developed an understanding of research, measurement, evaluation and statistical skills.

Instructional Core Examination

The Instructional Core Examination is a written and oral examination. The purpose of the two-day written portion is to assure that all Instructional Design and Development candidates are prepared in the core areas of the discipline. The two-hour oral examination is intended to review and extend the topics covered in the written parts of the examination. The written exam must be passed in order to sit for the oral exam. The Instructional Core Exam may be taken only two times.

Candidacy

Students will be admitted to candidacy for the degree of Doctor of Philosophy in Instructional Design and Development after successful completion of the following program requirements:

1. doctoral advisory committee appointed;
2. program of study established;
3. residency established;
4. Research Core Examination;
5. Instructional Core Examination; and
6. dissertation topic approved.

Transfer Credit

A maximum of 30 semester hours of graduate credit closely related to the required curriculum may be counted toward the Ph.D. plan of study. The credit is approved only after completion of a minimum of nine (9) semester hours of graduate credit at the University of South Alabama and the student must be in regular status. Recommendations concerning transfer credit will be made by the Doctoral Advisory Committee in light of a student's total program of study. All proposed transfer credit must be approved by the Director of Graduate Studies and the student's Doctoral Advisory Committee. Only courses with "A" or "B" grades are acceptable for transfer and must be from a regionally accredited institution.

IDD Doctoral Student Handbook

The Instructional Design and Development Doctoral Student Handbook provides additional information about the program. The latest version of the handbook is available from the Professional Studies department secretary or on-line. In addition to basic information about the program, the IDD Doctoral Handbook includes specific information on requirements doctoral students must complete.

Instructional Design and Development Graduate Certificate

Final admission decision involves evaluation of the following: grade-point average, letters of reference, applicant's statement of career goal(s) and purpose(s), professional experience, and program enrollment and availability.

Applicants are responsible to ensure that all materials arrive within the deadline. Incomplete applications will not be considered. Applications will be retrieved for review when all materials are received.

An IDD program faculty admission committee will review applications, make admissions decisions and a written communication from the university will notify applicants about admissions decisions.

Requirements For Certificate Programs

A minimum GPA of 3.0 on all program of study courses and all work attempted is required. A maximum of two Cs can be counted. No grades of D or F may be counted. If a third C or any grade below is earned, the student will be dismissed from the program.

Those enrolled in the Certificate program may also elect to pursue the master's degree and be allowed to apply the courses toward their degree program once admitted and upon approval of the IDD faculty admissions committee.

Students enrolled in an IDD graduate program may opt to complete a certificate program to earn the certificate in addition to completing their degree program.

School Counseling (M.Ed.)

Degree Requirements

The program described below is designed to provide for the acquisition of skills and competencies needed by counselors working in educational settings.

A grade of "B" or better is required in all coursework toward the degree.

Counselor educators are ethically required to ensure that students meet academic requirements and demonstrate clinical competencies. Satisfactory progress will be predicated on a combination of factors such as academic success, clinical competence, adherence to ethical standards, and appropriate interpersonal functioning. Students who do not demonstrate satisfactory competence within any of these critical areas of professional performance may be terminated from the program. Core faculty will evaluate students on a continuing basis to determine students' satisfactory progression through the program. Other policies, procedures, and guidelines are addressed in the Counselor Education Graduate Student Handbook.

Students who are not enrolled for three consecutive semesters must complete all admissions requirements again and be reviewed by the program admissions committee.

Comprehensive Examination: Counselor Education Comprehensive Examination (CECE).

The Alabama State Department of Education (ALSDE) now offers an expanded certification option for CACREP- accredited programs. Requirements under this option include "completion of a school counseling program that is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP), a passing score on the Praxis II test #0421, Professional School Counseling, and attainment of passing scores on the National Counseling Examination for Licensure and Certification. Note that certification in a teaching field or another area of instructional support is not required for admission to a CACREP-accredited program in school counseling".

Health, Kinesiology, And Sport

Department Information

(251) 460-7131

Department of Health, Kinesiology, and Sport website
<http://www.southalabama.edu/colleges/ceps/hks> (<http://www.southalabama.edu/colleges/ceps/hks/>)

Title	Name
Chair	Neil A. Schwarz
Professors	Holden, Kovaleski
Associate Professors	Forester, Hudson, Keshock, Schwarz, Woltring
Assistant Professor	Colquhoun, Hauff, Keller, Parkes, Stratton
Senior Instructors	Anastasio, Palombo
Instructors	Bates, Botsis, Montgomery

The Department of Health, Kinesiology, and Sport offers state and nationally-accredited undergraduate programs of study in Physical Education (P-12), Health Education (6-12), and a combined Health (6-12) and Physical Education (P-12) program that lead to Alabama Class B Educator Preparation and Certification. Graduate programs of study are offered in Physical Education (P-12) and Health Education (6-12) that lead to Alabama Class A Educator Preparation and Certification.

The Department offers a totally online graduate program in Sport Management and an optional totally online graduate program in Health Promotion. Undergraduate and graduate programs are available in Exercise Science and Health Promotion. Undergraduate programs are offered in Recreational Therapy and Sport Management and Recreation Studies with concentrations in Sport Administration or Coaching Administration. The Department also provides a physical activity instructional program for all university students through courses in physical fitness, lifetime sports, dance, and martial arts. An undergraduate Coaching Certificate program is also offered by the department as well as minors in Sport Management and Recreational Studies, Performance Nutrition, and Health and Wellness.

Undergraduate

Requirements for Admission to Candidacy in Teacher-certification Programs (Health and/or Physical Education)

All students must apply in the Advising Center (UCOM 3360), for admission to teacher candidacy. This is normally done during the final

semester of the sophomore year or first semester of the junior year. All previously listed requirements of the University and College must be met prior to application.

Teacher Candidacy Admission Requirements for Physical Education (P-12) & Health (6-12) majors, & merged Health (6-12) and Physical Education (P-12).

Hours

60 semester hours (48 must be in General Education). A minimum of 12 semester hours must be taken at USA.

GPA Requirements

- 2.5 Minimum Overall USA GPA (All work attempted at USA).
- 2.5 Minimum Program GPA (All courses used on this Advising Sheet, including transfer work).
- 2.5 Minimum Professional Studies GPA (All courses used in the Professional Studies area, including transfer work).
- 2.5 Minimum Teaching Field GPA (All courses used in the Teaching Field, including transfer work).
- No grade below a "C" will be accepted in Professional Studies courses.

Course Requirements

- Course requirements for PE P-12 Majors:

Code	Title	Hours
CA 110	Public Speaking	3
EH 101	English Composition I	3
EH 102	English Composition II	3
BMD 110 or BMD 251	Introduction to A & P I Human Anatomy & Physiology I	4
EDM 310	Microcomputing Systems	3
EDU 400	Edu Except Child and Youth	3
EPY 351	Human Growth & Development	3
KIN 100	Concepts of Health and Fitness	3
KIN 201	Orientation to Kinesiology	3
KIN 166	Movement-Rhythms and Dev Act	3

- Course requirements for merged Health (6-12) and Physical Education (P-12):

Code	Title	Hours
CA 110	Public Speaking	3
EH 101	English Composition I	3
EH 102	English Composition II	3
BMD 110 or BMD 251	Introduction to A & P I Human Anatomy & Physiology I	4
EDM 310	Microcomputing Systems	3
EDU 400	Edu Except Child and Youth	3
EPY 351	Human Growth & Development	3
KIN 100	Concepts of Health and Fitness	3
KIN 201	Orientation to Kinesiology	3
HS 262	Personal Health	3
KIN 263	Intro to Nutrition	3

- Course requirements for Health 6-12 Majors:

Code	Title	Hours
CA 110	Public Speaking	3
EH 101	English Composition I	3
EH 102	English Composition II	3
BMD 110 or BMD 251	Introduction to A & P I Human Anatomy & Physiology I	4
EDM 310	Microcomputing Systems	3
EDU 400	Edu Except Child and Youth	3
EPY 351	Human Growth & Development	3
KIN 100	Concepts of Health and Fitness	3
KIN 201	Orientation to Kinesiology	3
HS 170	First Aid	1
HS 262	Personal Health	3
KIN 263	Intro to Nutrition	3

Other Requirements

- Proof of clear SDE fingerprinting/background check and professional liability insurance.
- Completion of the Dispositions Survey and a signed teacher Candidacy application form.
- Completion of a satisfactory departmental interview with your assigned advisor. Recommendation of advisor, department chairperson and approval of the Candidacy Committee.
- Sufficient physical ability and emotional stability to perform as a teacher.

Application/Admission Information

- Candidacy applications are due the semester in which the student completes all candidacy requirements. The intent is for students to apply for Candidacy AND meet with their content area advisor prior to registration to enable appropriate planning decisions for upcoming semesters.
- Apply for Candidacy in the Advising Center (UCOM 3360)
- The College of Education and Professional Studies Candidacy Committee may recommend, defer or deny admission to the program.

Admission to Candidacy will remain deferred until all requirements have been met and grades are submitted at the end of the term. Once grades are available and all requirements are met, the Office of Student Services will notify students via their official JAG e-mail account when they have been admitted to Candidacy. Students will then be able to register for Candidacy courses.

Requirements for Admission to Candidacy Non-teacher-certification Programs

Exercise Science majors are not required to apply for candidacy.

All students must apply for admission to a program during the semester immediately following the completion of 60 semester hours of credit provided they meet the requirements listed below. Courses in progress during the semester the student makes application for candidacy may be used in the candidacy application process.

Admission to a non-teacher certification program requires that

1. The student:
 - a. declare a specialization
 - b. take any necessary tests

- c. submit to any needed evaluations
 - d. be available for necessary interviews
2. The student's application receives approval from the advisor and departmental chair. The application must be submitted to the College of Education and Professional Studies Advising Center by the second week of the semester in which the student is eligible to be admitted.
 3. The student's application receives approval from the Undergraduate Candidacy Committee
 4. The student's application receives the approval of the Dean or Associate Dean, College of Education and Professional Studies

Candidacy requirements are summarized on Departmental Advising Sheets.

The following are the criteria to be considered by the Undergraduate Candidacy Committee:

1. Completion of 60 semester hours of coursework, 48 of which must be in General Studies.
2. A minimum overall grade-point average of 2.2 in the major/ specialization (including transfer work) and a grade-point average of 2.2 on all work attempted at the University of South Alabama.
3. Sufficient physical ability and emotional stability to perform successfully as a professional. These and other factors could be determined in a departmental interview.
4. Recommendation of the advisor and department chair.
5. Completion of any departmental prerequisite courses.
6. Health Promotion majors must complete:

Code	Title	Hours
EH 101	English Composition I	3
EH 102	English Composition II	3
KIN 100	Concepts of Health and Fitness	3
KIN 201	Orientation to Kinesiology	3
HS 170	First Aid	1
HS 262	Personal Health	3
KIN 263	Intro to Nutrition	3
BMD 110	Introduction to A & P I	4
or BMD 251	Human Anatomy & Physiology I	
BMD 111	Introduction to A & P II	4
or BMD 252	Human Anatomy & Physiology II	
CA 110	Public Speaking	3

Any departmental prerequisite courses, in addition to the above.

7. Recreational Therapy majors must complete:

Code	Title	Hours
CA 110	Public Speaking	3
EH 101	English Composition I	3
EH 102	English Composition II	3
BMD 251	Human Anatomy & Physiology I	4
BMD 252	Human Anatomy & Physiology II	4
RTH 292	Outdoor Recreation-Adventure	3
RTH 295	Intro to Therapeutic Rec	3
Any departmental prerequisite courses, in addition to the above		

8. Sport Management and Recreation Studies majors must complete:

Code	Title	Hours
CA 110	Public Speaking	3
EH 101	English Composition I	3
EH 102	English Composition II	3
KIN 278	Sport and Human Behavior	3
SM 276	Introduction to Sport Mgt	3
SM 286	Sport Governance and Policy	3
SM 391	Leadership in SMRS	3
Any departmental prerequisite courses, in addition to the above		

The Undergraduate Candidacy Committee may recommend the admission of the student to the program, defer admission, or reject the student's application.

Internships in Non-teaching (NTC) Programs (Exercise Science, Health, Recreational Therapy, Sport Management and Recreation Studies)

Students enrolled in one of the following NTC Majors: Exercise Science, Health Promotion, Recreational Therapy, or Sport Management and Recreation Studies, must be admitted to candidacy in their program and attain senior status prior to enrollment in an internship. All internships must be completed at departmentally approved sites, and must be planned and approved at least one full semester in advance of the experience. No other academic courses may be taken during the internship without permission of the academic advisor. Health, and Exercise Science students enroll in KIN 495, Recreational Therapy students enroll in RTH 495, and Sport Management and Recreation Studies students enroll in SM 495. See advisor for details and internship planning.

Graduate

The Department of Health, Kinesiology, and Sport offers:

1. The Master of Education degree with specializations in:
 - Physical Education, Teacher Certification
 - Health Education, Teacher Certification

These programs are planned to lead to Alabama Class A Teacher Certification. An Alabama Class B certificate or the equivalent is required for students seeking the Master's level (Class A) certification.

1. The Master of Science degree in:
 - Exercise Science
 - Health Promotion (Fully Online Program)
 - Sport Management (Fully Online Program)

Degrees, Programs, or Concentration

- Coaching Certificate (p. 443)
- Exercise Science (BS) - Health And Fitness Concentration (p. 443)
- Exercise Science (BS) - Pre-Professional Concentration (p. 446)
- Exercise Science and Performance Nutrition (Ph.D.) (p. 450)
- Health & Wellness Minor (p. 451)
- Health (BS) - Health Education 6-12 Teacher Certification (p. 451)
- Health (BS) - Health Promotion (p. 455)
- Health-Physical Ed (BS) - Physical Education P-12 and Health Education 6-12 Teacher Certification (p. 458)
- Performance Nutrition Minor (p. 461)
- Physical Education (BS) - P-12 Teacher Certification (p. 461)

- Physical Education (M.Ed.) - Health Education 6-12 Teacher Certification (p. 465)
- Physical Education (M.Ed.) - P-12 Teacher Certification (p. 465)
- Physical Education (MS) - Exercise Science (p. 465)
- Physical Education (MS) - Health Promotion (p. 466)
- Recreational Therapy (BS) (p. 466)
- Sport Management (MS) (p. 469)
- Sport Management and Recreation Studies (BS) - Coaching Administration (p. 470)
- Sport Management and Recreation Studies (BS) - Sport Administration (p. 473)
- Sport Management and Recreation Studies Minor (p. 476)

Courses

Health and Safety (HS)

HS 170 First Aid 1 cr

The scope, needs, and limitations of first aid with laboratory training in the techniques and methods of injury care. Opportunity for American Red Cross or American Heart Association first aid and CPR certification.

HS 262 Personal Health 3 cr

Current health issues as related to the individual with emphasis on sociological, psychological, and economic factors.

HS 340 Health in the Sec Classroom 3 cr

A study of instructional practice and application in the secondary health classroom. Pre-requisite: Admission to teacher candidacy required.

Corequisite: HS 430

HS 351 Safety Education 3 cr

Traffic safety and safety at home, work, school, and play. Organization of safety education programs in the school and community. Methods and materials for teaching safety.

HS 352 Traffic Safety Education 3 cr

A survey of the highway transportation system and traffic problems designed to give the driver education teacher an opportunity to develop an understanding of the scope and background of the various agencies and systems involved in the management of vehicular traffic at the national, state, and local level.

HS 353 Driver Education I 3 cr

History, principles, problems and the inventory of skills in driver education.

HS 361 School Comm Health-Impl Curric 3 cr

Contemporary school health and public health issues. Epidemiological concepts and methods. Governmental and volunteer health agencies. Curriculum development based on epidemiological data. Incorporates reading into the curriculum.

HS 362 Drug Education 3 cr

A survey of substance abuse issues. Attention is given to specific drug classifications, use and abuse patterns, prevention, treatment, and future implications.

HS 365 HPE Curr/Methods-Elem Teachers 3 cr

The development and implementation of appropriate health and physical education curriculum for elementary teachers. Content knowledge and the application of methodological and assessment strategies are adapted for appropriate learning environments.

HS 429 School Lab Experiences-Health 3 cr

Professional laboratory observation and participation in health settings at local public schools. Prerequisite: Admission to teacher candidacy.

Corequisite: HS 460

HS 430 School Lab Exp- Health II 0 cr

Professional Laboratory observation and participation in classroom health settings at a local public schools. Requires Admission to Teacher Candidacy.

Corequisite: HS 340

HS 451 Driver Education II 3 cr

Methods and techniques, teaching aids, teaching resources and materials, and program and curriculum construction. Practical experience in teaching students to drive.

HS 452 Simulation in Driver Education 3 cr

Simulation as an audio-visual instructional method and designed to complement and supplement other instructional techniques used in the driver education program to prepare individuals to function safely and effectively in today's traffic.

HS 453 Range-Lab Prog in Driver Ed 3 cr

An examination of the aims, objectives, and role of laboratory programs in driver education. Directed laboratory experiences will be provided.

HS 460 Methods in Health Ed - W 3 cr

Topic selection and teaching unit preparation. Presentation and classroom practice of teaching methodologies. Practical mini-teaching experiences in local schools. Field experiences required. HE (6-12) and PE (P-12) majors only. Prerequisite: Admission to teacher candidacy. Co-requisite: HS 429.

Corequisite: HS 429

HS 463 Human Sexuality: Health Ed Per 3 cr

An exploration of human sexuality with implications for health education.

HS 473 Problems in Health Education 3 cr

Special problems are assigned to individuals and to groups of students.

HS 475 Public Health 3 cr

A study of public health organizations and available community health resources, including the official and non-official health agencies at various levels. An examination of causative community factors in disease, community diagnosis of and programs to combat these conditions.

Cross-Listed: HS 462

HS 490 Sp Top - 3 cr

A varying content course treating several aspects of Health Education. May be repeated for credit when course content varies.

HS 494 Directed Studies 1-3 cr

Directed research. No more than two directed studies can be counted toward the bachelor's degree and Class B certification. HPELS advisor approval required.

HS 510 Current Health Issues 3 cr

Identification, exploration, and definition of current health issues such as drug abuse, mental health, aging, death and dying, human sexuality, chronic and communicable diseases.

HS 560 Methods in Health Edu 3 cr

Development, selection, and implementation of classroom teaching strategies and classroom techniques in the Health Sciences area.

Cross-Listed: HS 520

HS 562 Drug Use and Abuse 3 cr

A study of the drug spectrum including legal and illegal drug use and abuse. Discussion of education and preventive strategies.

HS 565 Community Health 3 cr

An introductory course in Community Health. Includes a survey of contemporary health problems of both communities and schools. A review of school and community health programs.

HS 567 Aging and Health 3 cr

An overview of the normal aging process, including physical, psychological and social changes, myths, diseases, related community resources, and the team approach to meeting needs.

HS 575 Public Health 3 cr

A study of public health organizations and available community health resources, including the official and non-official health agencies at various levels. An examination of causative community factors in disease, community diagnosis of and programs to combat these conditions.

Kinesiology (KIN)**KIN 100 Concepts of Health and Fitness 3 cr**

An introductory course designed to show students to contributions of physical activity, nutrition, weight control, stress control, environmental conditions, and injury prevention to preventive health. Students learn how to evaluate themselves, their physical and nutritional needs and how to design individual programs for healthy living.

Cross-Listed: PE 100

KIN 166 Movement-Rhythms and Dev Act 3 cr

Movement exploration experiences, developmental games, rhythmic and dance activities are explained, developed and practiced. Clinical or field experience required.

Cross-Listed: PE 166

KIN 201 Orientation to Kinesiology 3 cr

An overview of the field of Health, Physical Education, and Exercise Science. An introduction to the Department of HKS followed by survey of philosophical and historical aspects, and professional preparations standards of the specific fields.

Cross-Listed: PE 201

KIN 231 ARC Lifeguard Training 3 cr

Prepares the student for American Red Cross Lifeguard, CPR for the professional rescuer, and first aid certification. Emphasis is placed on emergency action plans, lifeguarding techniques and all forms of victim rescue. Prerequisites: Strong swimmers ONLY.

Cross-Listed: PE 231

KIN 263 Intro to Nutrition 3 cr

The study of human nutrition and nutrients in food and of their ingestion, digestion, absorption, transport, metabolism, interaction, and storage. emphasis is placed on energy balance, weight control, nutrition across the life span, food safety, food insecurity, and the links between food, nutrition and health.

KIN 278 Sport and Human Behavior 3 cr

A study of the psychological and sociological aspects of sport and the relationship to human behavior.

Cross-Listed: PE 278

KIN 282 Intro to Athletic Training 3 cr

Survey of the basic techniques and practices of athletics training. Study includes prevention, recognition, care, and treatment of athletic injuries. Development of basic athletic training skills in the use of preventive and protective techniques of adhesive tape applications.

Cross-Listed: PE 282

KIN 351 Sports Skills 3 cr

The development of skills and the understanding of fundamentals and strategies in selected individual, dual, and team sports. Field experiences required. Proof of background check, fingerprinting and liability insurance is required. PE (P-12) majors only. Instructor permission is required.

Cross-Listed: PE 351

KIN 363 Sports Nutrition - W 3 cr

Basic nutritional principles are covered. Includes assessment of individual and/or group diets. The course is designed to optimize sport performance and/or body composition.

Prerequisite: (HS 263 Minimum Grade of D or KIN 263 Minimum Grade of D) and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C)

KIN 370 Basic Motor Learning 3 cr

Study of the psychological, experimental, and social aspects of learning in the psychomotor domain.

Cross-Listed: PE 370

KIN 372 Coaching Gymnastics 3 cr

History, theory, and fundamentals of coaching and officiating gymnastics.

Cross-Listed: PE 372

KIN 373 Coaching Volleyball 3 cr

History, theory, and fundamentals of coaching and officiating volleyball.

Cross-Listed: PE 373

KIN 374 Coaching Soccer 3 cr

History, theory, and fundamentals of coaching and officiating soccer.

Cross-Listed: PE 374

KIN 375 Coaching Football 3 cr

History, theory, and fundamentals of coaching and officiating football.

Cross-Listed: PE 375

KIN 376 Coaching Basketball 3 cr

History, theory, and fundamentals of coaching and officiating basketball.

Cross-Listed: PE 376

KIN 377 Coaching Baseball 3 cr

History, theory, and fundamentals of coaching and officiating baseball.

Cross-Listed: PE 377

KIN 378 Coaching Track and Field 3 cr

History, theory, and fundamentals of coaching and officiating track and field.

Cross-Listed: PE 378

KIN 380 Kinesiology 3 cr

Theory and application of the mechanical and anatomical principles of human movement.

Prerequisite: BMD 114 Minimum Grade of D or BMD 110 Minimum Grade of C or BMD 251 Minimum Grade of C

Cross-Listed: PE 380

KIN 381 Eval and Measurement in HPE 3 cr

Statistical procedures, evaluation, and interpretation, and use of tests and other measurement devices in health and physical education.

Cross-Listed: PE 381

KIN 429 School Lab Experience-PE 3 cr

Professional laboratory experiences involving observation and participation at local public schools. Admission to teacher candidacy required.

Corequisite: KIN 452

Cross-Listed: PE 429

KIN 450 Student Teaching-Hlth and PE 9 cr

Observation and supervised teaching with opportunity for study and discussion of problems and issues encountered in the 6-12 Health Education and P-12 Physical Education programs. Students will be placed with a person holding a valid teaching certificate in the appropriate field. Admission to teacher candidacy and completion of program and college prerequisites required.

Prerequisite: PRAXIS-Health Education 154 and PRAXIS-Phys Edu Cont Knowledge 149 and KIN 351 Minimum Grade of C and KIN 452 Minimum Grade of C and KIN 429 Minimum Grade of S and HS 460 Minimum Grade of C and HS 429 Minimum Grade of S and HS 340 Minimum Grade of C and HS 430 Minimum Grade of S

Cross-Listed: PE 450

KIN 452 Methods of Teaching PE-W 3 cr

Organizing materials and developing methods of teaching physical education in elementary, middle, and high schools. Field experiences required. Practical mini-teaching experiences in peer labs and local schools. Prerequisite: Admission to teacher candidacy. Co-requisite: KIN 429.

Corequisite: KIN 429

Cross-Listed: PE 452

KIN 460 Student Teaching Secondary 1-9 cr

Observation and supervised teaching with opportunity for study and discussion of problems encountered in secondary schools. Students will be placed with a person holding a valid teaching certificate in the appropriate field. Admission to teacher candidacy and completion of program and college prerequisites required.

Prerequisite: PRAXIS-Health Education 154 and HS 460 Minimum Grade of C and HS 340 Minimum Grade of C and HS 430 Minimum Grade of S

Cross-Listed: PE 460

KIN 461 PE for Atypical Child-Youth 3 cr

Principles and techniques for adapting physical education activities for children with special needs. Field experience required.

Cross-Listed: PE 461

KIN 462 Biochemical and Molecular Exer 3 cr

An advanced study of the biochemical and molecular aspects of exercise involving the bioenergetic pathways responsible for energy production. Concepts of cellular signaling pathways and gene expression associated with adaptations of skeletal muscle to exercise training are studied.

Prerequisite: KIN 476 Minimum Grade of D

KIN 463 Nutrition 3 cr

An in-depth study of educational concepts related to digestion, absorption, transportation and utilization of nutrients.

Prerequisite: KIN 263 Minimum Grade of D

Cross-Listed: KIN 563

KIN 470 Student Teaching P-12 Program 1-12 cr

Observation and supervised teaching with opportunity for study and discussion of problems encountered in the P-12 program. Students will be placed with a person holding a valid teaching certificate in the appropriate field. Admission to teacher candidacy and completion of program and college prerequisites required.

Prerequisite: PRAXIS-Phys Edu Cont Knowledge 149 and KIN 351 Minimum Grade of C and KIN 452 Minimum Grade of C and HS 460 Minimum Grade of C

Cross-Listed: PE 470

KIN 473 Problems in Health and PE 3 cr

Special problems in health and physical education are assigned to individuals and to groups of students.

Prerequisite: PRAXIS-Phys Edu Cont Knowledge 149 and KIN 351 Minimum Grade of C and KIN 452 Minimum Grade of C and KIN 460 Minimum Grade of C

Cross-Listed: PE 473

KIN 474 Sport and Fitness Conditioning 3 cr

Study of the theory, principles, methods, and techniques in the development, implementation, and evaluation of various strength and conditioning programs designed to enhance athletic performance and improve physical fitness. The conditioning needs of various populations with disease and degenerative conditions will be examined.

Prerequisite: (PE 102 (may be taken concurrently) Minimum Grade of D and KIN 380 (may be taken concurrently) Minimum Grade of D) and (BMD 110 Minimum Grade of C or BMD 114 Minimum Grade of D or BMD 251 Minimum Grade of C)

Cross-Listed: PE 474

KIN 475 Org-Admin Hlth and PE-W 3 cr

Planning, policies, administrative/management functions and duties in health and physical education programs.

Cross-Listed: PE 475

KIN 476 Exercise Physiology 3 cr

The study of the body's physiological responses and adaptations to exercise and training.

Prerequisite: (KIN 100 Minimum Grade of C and HS 170 Minimum Grade of C and BMD 251 Minimum Grade of C and BMD 252 Minimum Grade of C)

Cross-Listed: PE 476

KIN 476L Exercise Physiology Lab 1 cr

Laboratory component associated with KIN 476 that must be taken concurrently. Hands-on, practical experiences involving basic laboratory techniques and procedures used in exercise physiology are utilized in this course. It will emphasize the importance of following laboratory protocols and appropriately evaluating and interpreting results from health and fitness assessments.

Prerequisite: (KIN 100 Minimum Grade of C and HS 170 Minimum Grade of C and BMD 251 Minimum Grade of C and BMD 252 Minimum Grade of C)

Corequisite: KIN 476

KIN 477 Water Safety Instructor 3 cr

Trains prospective candidates for American Red Cross Water Safety Instructor certification. Candidates will learn how to teach all levels of swimming and basic diving to students of all ages. How to organize classes, use lesson plans and practice teaching skills. Prerequisite: Proficient swimmer in all seven strokes. See Instructor for specific skill requirements.

Cross-Listed: PE 477

KIN 478 Coaching Theory 3 cr

Introduction to profession of coaching. Topics include: physical, mental and organizational preparation, teaching strategies (individual and team aspects), legal liability, officiating, and national guidelines.

Cross-Listed: PE 478

KIN 479 Fit Assess-Exercise Prescript 3 cr

Through didactic study and laboratory participation, the student will develop to knowledge base and clinical skills to assess physical fitness and plan exercise prescriptions for apparently healthy individuals.

Prerequisite: KIN 476 Minimum Grade of D or PE 476 Minimum Grade of D

Cross-Listed: PE 479

KIN 479L Fit Assess-Exc Prescript Lab 1 cr

Laboratory component associated with KIN 479 that must be taken concurrently. Hands-on, practical experiences involving techniques and procedures used in selecting and administering exercise and fitness assessments, evaluating and interpreting results, and drafting exercise prescriptions for apparently healthy populations are provided.

Prerequisite: (KIN 476 Minimum Grade of D and KIN 476L Minimum Grade of D)

Corequisite: KIN 479

KIN 480 Therapeutic Exercise 3 cr

Theory, current research, principles, application and techniques of rehabilitation used to treat injuries to athletes and the physically active across the life span are studied. Psychological and physical parameters of rehabilitation and exercise conditioning are presented.

Cross-Listed: PE 480

KIN 482 Advanced Athletic Training 3 cr

Advanced and contemporary topics, issues, and applications in athletic training. Admission to candidacy required.

Prerequisite: KIN 380 Minimum Grade of D

Cross-Listed: PE 482

KIN 484 Apps in Sports Conditioning 3 cr

Through didactic study and physical activity participation, the student will develop the knowledge base and skills in fundamental and advanced exercise theory and techniques in sport and fitness conditioning with application to program design and periodization of training.

Prerequisite: KIN 474 Minimum Grade of D or PE 474 Minimum Grade of D

Cross-Listed: PE 484

KIN 486 Advanced Exercise Physiology 3 cr

Detailed analysis of the underlying principles of the physiological and biochemical responses of the human body to exercise and adaptations to exercise training.

Prerequisite: PE 476 Minimum Grade of C or KIN 476 Minimum Grade of D

KIN 490 Special Topics 3 cr

A varying content course treating different aspects of health, kinesiology, and sport. May be repeated for credit when courses content varies.

Cross-Listed: PE 490

KIN 494 Directed Studies 1-3 cr

Directed research and/or project. No more than two directed studies can be counted towards the bachelor's degree, HKS advisor approval required.

Cross-Listed: PE 494

KIN 495 Internship 1-12 cr

Observation and supervised practicum experiences in a professional setting. May be repeated for credit not to exceed 12 hours. HKS advisor approval required.

Prerequisite: (KIN 476 Minimum Grade of D)

Cross-Listed: PE 495

KIN 499 Senior Honors Thesis-H 3-6 cr

Experiences in planning, conducting, and reporting a research project relevant to the fields of Health, Kinesiology, and Sport. The project, mentored by HKS faculty, is required for Honors recognition and may be repeated for up to six credit hours. Prerequisites: Participant in Honors Program and approval of Department and Project Chairs required.

Cross-Listed: PE 498

KIN 500 Admin of Hlth & Phys Ed & Sprt 3 cr

A study of the principles, techniques, and methods used in management and supervision of health and physical education and sport in schools and colleges.

Cross-Listed: HPE 500

KIN 503 Evaluation of Teach and Learn 3 cr

Measurement and evaluation of student progress and teaching effectiveness in the psychomotor domain.

Cross-Listed: HPE 503

KIN 505 Research Methods - HKS 3 cr

This course provides opportunities for critical interdisciplinary evaluation of current research trends and controversies, research methodology and evaluation with emphasis on the elements of the research process, and the examination of landmark research studies in the fields of Health, Kinesiology, and Sport.

Cross-Listed: HPE 505

KIN 506 Physical Education Curriculum 3 cr

An overview of the physical education curriculum, its foundations, critical issues, and modern trends. It explores curriculum content areas of scheduling administration, teaching methods, and various standards and procedures for evaluation.

Cross-Listed: HPE 506

KIN 516 Exercise Physiology 3 cr

Advanced study of the theories, current research, and under-lying principles of the physiological responses and adaptations of the human body to exercise and training.

Cross-Listed: HPE 516

KIN 521 Motor Learning 3 cr

Theories and applications of the foundations of learning motor skills and presented .

Cross-Listed: HPE 521

KIN 530 Seminar in Health and Phys Ed 3 cr

Professional growth through in-depth experiences in the presentation of problems and formal papers, with emphasis on guided discussions and research criticism.

Cross-Listed: HPE 530

KIN 540 Cardiovas Resps Adapt Excerc 3 cr

Concentrated study of cardiovascular and respiratory systems including their structure, regulation, and integration with emphasis on physiological responses and adaptations to exercise and training, optimization of performance, overtraining and environmental influences, and aerobic exercise program design.

Cross-Listed: HPE 540

KIN 550 Perceptual-Motor Dev Children 3 cr

Designed to give the classroom teacher, special educator and physical educator a background in perceptual-motor development and training in infants and children.

Cross-Listed: HPE 550

KIN 552 Methods of Teaching PE 3 cr

Organizing materials and developing methods of teaching physical education in elementary, middle, and high schools. Field experience required. Practical mini-teaching experiences in peer labs and local schools.

KIN 562 Biochem & Molec Exer & Nutr 3 cr

This graduate level course is designed to provide study of the oxidative and non-oxidative pathways which provide energy during acute exercise within skeletal muscle. Emphasis will be placed on how these biochemical pathways utilize major fuel molecules (fat, carbohydrate, protein) to produce energy for work; how these pathways adapt to exercise training; and how the pathways are affected by exercise intensity, duration, and feeding state. The course will also include topics regarding lactate formation and utilization, whole-body metabolism, lipolysis within adipose cells, and blood glucose maintenance. Further, an overview of molecular biology concepts of gene transcription and protein synthesis in relation to exercise adaptation will be integrated into the course.

KIN 563 Nutrition 3 cr

An in-depth study of educational concepts related to digestion, absorption, transportation and utilization of nutrients.

KIN 571 Exer Mgt Chronic Disease/Disab 3 cr

This course is designed to provide a problem-oriented approach to exercise testing and prescription/programming for special needs populations.

Cross-Listed: HPE 571

KIN 572 Neuromuscular & Biomechanical Principles in Exercise 3 cr

An examination of the relationship of fundamental neuromuscular and mechanical principles of human movement as applied to sport performance, fitness, and injury prevention through observation of common activities.

Cross-Listed: HPE 572

KIN 574 Sport and Fitness Conditioning 3 cr

Advanced study of the scientific theory, principles, methods, and techniques in the development, implementation, and evaluation of various strength and conditioning programs designed to enhance athletic performance. Instructor permission is required.

KIN 579 Fitness Assessment-Exer Presc 3 cr

Fitness Assessment and Exercise Prescription reviews the advanced principles of exercise testing and prescription for at risk and health adult populations including health appraisal, risk assessment, and interpretation of data. Assessment results are utilized in designing training programs and recommending lifestyle changes for enhancing health, fitness, and performance. The ACSM Exercise Guidelines are emphasized. This course is dually listed with an equivalent 400 level course (KIN 479). Instructor permission is required.

Cross-Listed: HPE 579

KIN 583 Clinical Ex Test & Prescript 3 cr

The development of competencies necessary to administer graded exercise tests and prescribe appropriate exercise programs for various populations, based upon clinical observations and physiological data.

Cross-Listed: HPE 570, KIN 570

KIN 590 Special Topics- 3-6 cr

A varying-content course treating various aspects of health, kinesiology, and sport. May be repeated for credit when course content varies.

Cross-Listed: HPE 595

KIN 594 Directed Study and Research 1-3 cr

Students explore, through directed study and research, problems and issues of special interest or significance in Health, Kinesiology, and Sport. Not more than three semester hours of any departmental 594 courses can be accepted toward a degree program.

Cross-Listed: HPE 594

KIN 595 Internship 3-6 cr

A supervised learning experience in a health, kinesiology, or sport setting. Provides the student an opportunity to apply theories and concepts learned during the graduate program. No more than six semester hours may be taken. HKS advisor approval required.

Cross-Listed: HPE 595

KIN 599 Thesis 1-9 cr

A student selects a project, study, or investigation in health and/or kinesiology. Such project forms the basis for the thesis. A committee will give guidance during the investigation and the writing of the thesis.

Cross-Listed: HPE 599

KIN 601 Biomech Found Human Movement 3 cr

This course is designed to provide students with an understanding of how to use various technologies in a biomechanics lab for measuring kinematics. Along with making measurements, students will also learn how to perform the calculations involved in analysis.

Cross-Listed: HPE 601

KIN 602 Techniques of Supervision PE 3 cr

Course is designed to familiarize the student with the principles, problems, and techniques, involved in supervision.

Cross-Listed: HPE 602

KIN 603 Adv Measurement-Eval in HKS 3 cr

Measurement and evaluation in the areas of strength, body composition, flexibility, endurance, general motor capacity, perceptual motor-functions, and anthropometrics.

Cross-Listed: HPE 603

KIN 681 Current Topics in Exercise Science and Performance Nutrition 3 cr

Advanced study of current scientific literature in the area of exercise science and performance nutrition. A significant amount of reading and critical analysis of the most current peer-reviewed publications within the field is required. Emphasis is placed on demonstrating an understanding of the rationale for each study, methods and statistical analyses employed, and the results reported along with their application within the broader field of study.

KIN 694 Directed Study and Research 1-3 cr

Through directed study and research, problems and issues of special interest or significance in health and/or kinesiology are explored. No more than three semester hours of any department 694 courses can be accepted toward a degree program.

Cross-Listed: HPE 694

KIN 695 Internship 3-9 cr

A supervised field study investigation in a candidate's work setting. The student will conduct an investigation, apply concepts and skills learned during the program.

Cross-Listed: HPE 695

KIN 699 Research Project 1-6 cr

A supervised research project or investigation. The student will conduct a research project or investigation applying concepts and skills applicable to Health, Kinesiology, and Sport. May be taken more than one semester; total cannot exceed six semester hours.

Cross-Listed: HPE 699

KIN 799 Dissertation 1-6 cr

With the guidance of a faculty mentor and committee, doctoral students will select and carry out a research project, study, or investigation in exercise science and/or performance nutrition. such project forms the basis for the dissertation. The student will demonstrate the ability to become an independent researcher by successfully completing the project and formally presenting and defending a written dissertation to their committee.

PE-Activity Courses (PE)**PE 101 PE Activity - 1 cr**

Instruction and practice of basic sport and activity skills. A varying content course that gives students choices from designated semester offerings. May be repeated for credit.

PE 102 Weight Training 1 cr

A progressive resistance training course designed to improve muscular strength and endurance. May be repeated for credit.

PE 103 PE Activity - 1 cr

Instruction and practice of sport and activity skills. A varying content course that gives students choices from designated semester offerings. May be repeated for credit. An additional fee will be charged for these activities.

PE 104 PE Activity - 1 cr

Instruction and practice of basic sport and activity skills. A varying content course that gives students choices from designated semester offerings. May be repeated for credit. An additional fee will be charged for these activities.

PE 105 PE Activity - 1 cr

Instruction and practice of basic sport and activity skills. A varying content course that gives students choices from designated semester offerings. May be repeated for credit. An additional fee will be charged for these activities.

PE 106 Gymnastics 1 cr

Instruction and practice in gymnastic skills. A varying content course treating different skill levels in gymnastics. May be repeated for credit.

PE 107 PE Activity - 1 cr

Instruction and practice of basic sport and activity skills. A varying content course that gives students choices from designated semester offerings. May be repeated for credit. An additional fee will be charged for these activities.

PE 108 Ballroom Dancing 1 cr

Knowledge, skills, and techniques associated with various forms of ballroom dancing through demonstration, practice and partnering.

PE 109 Swing Dancing 1 cr

Knowledge, skills, and techniques associated with various forms of swing dancing through demonstration, practice, and partnering.

PE 110 Dance - 1 cr

Instruction and practice in dance. A varying content course treating different types of dance such as but not limited to social, folk, square, and dance performance. May be repeated for credit.

PE 112 Latin Dancing 1 cr

Knowledge, skills, and techniques associated with various forms of Latin dancing through demonstration, practice, and partnering.

PE 113 Creative Dance 1 cr

An introduction to dance as an art form; the vocabulary for movement as a means of self-expression. May be repeated for credit.

PE 114 Aerobics 1 cr

Aerobic exercise is a physical fitness program that offers complete and effective conditioning. It involves jogging, jumping, lunging, kicking, and stretching to music.

PE 115 Ballroom and Swing Dancing 1 cr

Knowledge, skills, and techniques associated with various forms of ballroom and swing dancing through demonstration, practice and partnering.

PE 116 Cajun and Swing Dancing 1 cr

Knowledge, skills, and techniques associated with various forms of Cajun and Swing dancing through demonstration, practice, and partnering.

PE 117 Ballet 1 cr

Instruction and practice in ballet. A varying content course treating the different skill levels of ballet with emphasis on correct body placement through barre and centre exercises. May be repeated for credit.

PE 118 Jazz Dancing 1 cr

Instruction and practice in jazz dancing. A varying content course treating the various skill levels of jazz with emphasis on correct body placement through isolation and locomotor techniques. May be repeated for credit.

PE 119 Modern Dance 1 cr

Instruction and practice in modern dance. A varying content course with exposure to various skill levels and modern dance styles. May be repeated for credit.

PE 120 Tennis - Basic 1 cr

Instruction and practice in beginning and intermediate tennis. May be repeated for credit.

PE 121 Golf - Basic 1 cr

Instruction and practice in beginning golf. May be repeated for credit.

PE 122 Bowling 1 cr

Instruction and practice in beginning bowling. Requires special fee. May be repeated for credit.

PE 123 Archery 1 cr

Instruction and practice in beginning archery. May be repeated for credit.

PE 124 Latin and Swing Dancing 1 cr

Knowledge, skills, and techniques associated with various forms of Latin and Swing dancing through demonstration, practice, and partnering.

PE 125 Badminton 1 cr

Instruction and practice in beginning and intermediate badminton. May be repeated for credit.

PE 126 Ballroom and Latin Dancing 1 cr

Knowledge, skills, and techniques associated with various forms of Ballroom and Latin dancing through demonstration, practice, and partnering.

PE 127 Country West/Partner Dancing 1 cr

Knowledge, skills, and techniques associated with various forms of Country Western/Partner dancing through demonstration, practice, and partnering.

PE 128 Dance Performance 1 cr

Knowledge, skills, and techniques associated with various forms of Dance Performance through demonstration and practice.

PE 129 Folk and Square Dancing 1 cr

Knowledge, skills, and techniques associated with various forms of Folk and Square dancing through demonstration, practice, and partnering.

PE 130 Beginning Swimming 1 cr

Instruction and practice in beginning swimming and water safety. Participation fee required. May be repeated for credit.

PE 131 Intermediate Swimming 1 cr

Instruction and practice in intermediate swimming and water safety. Participation fee required. May be repeated for credit.

PE 132 Step Aerobics 1 cr

A physical activity class which includes the instruction and practice of step aerobics. The course is designed to improve cardiovascular and muscular endurance and improve coordination.

PE 133 Muscle Toning and Conditioning 1 cr

Muscle Toning and Conditioning is a physical activity course in which the student, through active participation, will develop knowledge and skills sufficient to tone the body and improve cardiorespiratory fitness using weights, body bars, resistance tubes, and other equipment.

PE 134 Karate I 1 cr

A beginning course in Karate designed to develop physical fitness, self-discipline, the fundamentals and techniques of blocking, punching, striking, kicking, and stances.

PE 135 Karate II 1 cr

An intermediate course in Karate designed as a continuation of Karate I with the introduction of additional blocks, kicks, and footwork. Self-discipline and physical fitness continue to be stressed.

PE 136 Karate III 1 cr

An advanced course in Karate designed as a continuation of Karate II with the addition of more advanced and versatile concepts of speed, distance, timing, and footwork. Vigorous training methods are used and self-discipline is stressed.

PE 138 Tai Chi 1 cr

Tai Chi training presents basic concepts and techniques to enhance physical fitness and develop mental discipline for stress reduction and personal wellness.

PE 139 Yoga 1 cr

The purpose of this course is to introduce the basic concepts of yoga theory, to teach safe yoga posture, and to help participants in developing balance and fitness, as well as manage stress wisely.

PE 141 Softball 1 cr

Instruction and practice in softball. May be repeated for credit.

PE 142 Volleyball 1 cr

Instruction and practice in volleyball. May be repeated for credit.

PE 143 Basketball 1 cr

Instruction and practice in basketball. May be repeated for credit.

PE 144 Soccer 1 cr

Instruction and practice in soccer. May be repeated for credit.

PE 145 Jogging 1 cr

Instruction and practice in the activity of jogging designed to improve cardiovascular endurance.

PE 146 Bicycling 1 cr

An introductory course to bicycling for leisure and fitness emphasizing the selection and care of bicycles, safety concerns, apparel, route selection, bike handling skills, and development of a bicycle fitness program.

PE 147 Racquetball 1 cr

Instruction and practice in racquetball. May be repeated for credit.

PE 148 Intermediate Golf 1 cr

Instruction and practice in intermediate golf. Demonstrable beginner golf skills necessary.

PE 149 Ultimate Frisbee 1 cr

Fundamental skills, rules, and strategies with frisbees with opportunities for participation.

PE 155 Martial Arts - 1 cr

Instruction and practice in various forms of Martial Arts. A varying-content course treating different skill levels of karate, judo, kung-fu etc. Requires special fee. May be repeated for credit.

PE 157 ICA - Varsity Sports 1 cr

Restricted to members of South Alabama intercollegiate athletic teams by special permission of the respective coaches. Includes but not limited to basketball, soccer, baseball, track, golf, tennis, and volleyball. May be repeated for credit with exception of Education majors.

PE 158 Life Skills - Student Athletes 1 cr

This course is designed to help the student acquire specific tools and life skills necessary to be a successful student-athlete on the field, in the classroom, and in life. Modeled after the NCAA Champs/Life Skills program, the course explores and develops proficiency in the areas of: academic excellence, athletic excellence, personal development, career development, and community service. The structure will be a combination of class lectures, group discussions, speakers, and activities. Prerequisites: Students enrolled in PE 158 must be an NCAA varsity student-athlete at the University of South Alabama.

Recreational Therapy (RTH)**RTH 194 Leisure Crafts 3 cr**

Adapting various crafts media for use in recreational programs. Design and execution of creative crafts with emphasis on use of indigenous materials.

Cross-Listed: LS 194

RTH 292 Outdoor Recreation-Adventure 3 cr

A classroom introduction to a wide range of outdoor recreation pursuits with an emphasis on safety, minimum impact, and "how to get started" in outdoor activities like backpacking, canoeing, rafting, car camping, hiking, and others.

Cross-Listed: LS 292

RTH 295 Intro to Therapeutic Rec 3 cr

Introduces students to the field of therapeutic recreation including the history, foundations, and philosophy of the field. In addition, characteristics and leisure needs of numerous special populations will be introduced.

Cross-Listed: LS 295

RTH 298 Practicum in Ther Rec 3 cr

Supervised practical experience that provides observation, participation, and application of therapeutic recreation and leisure studies concepts. Includes classroom instruction and exploration of career opportunities. Minimum 90-hours of practical experience required.

Cross-Listed: LS 298

RTH 375 Mgmt in Therapeutic Recreation 3 cr

Management and organization of therapeutic recreation programs including professional and agency standards, staff development, internship and credential requirements, fiscal planning, continuous quality improvement, equipment maintenance, advocacy, and public relations.

Prerequisite: RTH 295 Minimum Grade of D or LS 295 Minimum Grade of D

Cross-Listed: LS 375

RTH 395 Therapeutic Rec Process (W) 3 cr

This course introduces the comprehensive program planning process and the elements of assessment and documentation in a variety of therapeutic recreation service settings. A field work component may be required.

Prerequisite: RTH 295 Minimum Grade of D or LS 295 Minimum Grade of D

Cross-Listed: LS 395

RTH 397 Intergenerational Rec/Wellness 3 cr

This course is an intergenerational experience combining theory and practice in aging and recreation. Students utilize the therapeutic recreation process (assessment, program planning, implementation and evaluation) with older adults who have special needs, to promote health, wellness, and rehabilitation.

Cross-Listed: LS 397

RTH 465 TR Prog Des & Interventions I 3 cr

This course provides an examination of Therapeutic Recreation interventions and the role of research and theory in influencing practice. Course topics include: activity analysis, programming techniques, scope of service, intervention descriptions, historical perspectives, current research, and theoretical foundations related to TR intervention. A field work component of 40 hours is required that will allow students to gain experience implementing TR programs.

Prerequisite: (RTH 295 Minimum Grade of D and RTH 298 Minimum Grade of C) or (LS 295 Minimum Grade of D and LS 298 Minimum Grade of C)

Cross-Listed: LS 465

RTH 466 TR Prog Des & Interventions II 3 cr

This course examines modalities and issues in therapeutic recreation practice with the primary emphasis on leisure education, scope of service, nature of populations served, systematic programming, activity analysis and documentation of results. The course also addresses contemporary problems and issues in therapeutic recreation, and acquiring knowledge of medical terminology and therapeutic drugs.

Prerequisite: (LS 295 Minimum Grade of D and LS 298 Minimum Grade of C) or (RTH 295 Minimum Grade of D and RTH 298 Minimum Grade of C)

Cross-Listed: LS 466

RTH 467 TR for Phys Disabilities 3 cr

This course will familiarize the student with the etiology, characteristics, and course of treatment provided to individuals with various physically disabling conditions, and promote awareness of the role of therapeutic recreation in the physical rehabilitation process. A field work component of 40 hours is required.

Cross-Listed: LS 467

RTH 468 Facilitation Techniques in TR 3 cr

Study of the concepts and intervention techniques used in the application and process aspects of therapeutic recreation. Content includes evidence-based practice, planning and leading interventions, instructional techniques, counseling theory and practice, implementing groups, communication techniques, and facilitation techniques. A practical leaning component is included.

Cross-Listed: LS 468

RTH 469 TR for Pysch Impairments 3 cr

This course will familiarize students with etiology, characteristics, and course of treatment provided to individuals with psychological impairments and developmental disabilities and promote awareness of the role of therapeutic recreation in the habilitation/rehabilitation process. A field work component of 40 hours is required.

Cross-Listed: LS 469

RTH 471 Evaluation & Research in HKS-W 3 cr

This course offers an overview of the research and evaluation process in health, kinesiology, and sport. The first part of the course will emphasize the scope, meaning, and basic concepts of scientific research including aspects of research design. The second part of the course will focus on the application of the basic skills in a practical context in the environment of health, kinesiology, and sport.

Cross-Listed: LS 471

RTH 479 Leisure and Aging 3 cr

This course will provide an overview of the changes affecting the psychomotor, cognitive and affective domains of the aged; implications of leisure and retirement; and institutional and community settings that provide leisure services for the older adult.

Cross-Listed: LS 479

RTH 490 Special Topics 3 cr

Selected topics in recreational therapy. Topics will vary according to needs and interests of students. Course may be repeated for credit when content varies.

Cross-Listed: LS 490

RTH 492 Outdoor Ed and Interpretation 3 cr

Theories, philosophies, and principles of outdoor education with emphasis on the development of interpretive programs.

Cross-Listed: LS 492

RTH 495 Internship in Rec Therapy 3-12 cr

Supervised experiences in an assigned recreation therapy or related agency. HKS advisor approval required.

Cross-Listed: LS 498

RTH 569 Leisure and Society 3 cr

An exploration of the economic, religious, political, and socio-cultural factors which influence leisure behavior in modern society.

Cross-Listed: LS 569

RTH 570 Procedures in TR I 3 cr

Procedures in Therapeutic Recreation I was designed to prepare the graduate student for the more complex areas of present day professional issues and service provision including: an in-depth analysis of historical and philosophical influences, therapy and facilitation techniques, quality management, ethics, standards of practice, clinical supervision, healthcare reimbursement and professional credentialing.

Cross-Listed: LS 570

RTH 571 Procedures In TR II 3 cr

This course is designed to familiarize the graduate student with the therapeutic recreation process. Content areas will include analysis of assessment procedures, sources and processes, treatment planning, interdisciplinary procedures, medical record documentation, activity-based interventions, and evaluation of program effectiveness.

Cross-Listed: LS 571

RTH 573 Issues and Trends in TR 3 cr

An in-depth examination of current issues and trends in recreational therapy with respect to their impact on the profession and society.

Cross-Listed: LS 573

RTH 576 Conceptual Foundations of TR 3 cr

Designed to introduce the student to the field of therapeutic recreation including philosophy, history, current issues and trends, administration and program development. The course will also provide an overview of various disabling conditions.

Cross-Listed: LS 576

RTH 585 Mgmt in Recreational Therapy 3 cr

An in-depth examination into the research, foundations, and functions in the delivery of recreational therapy, including current practices in management of fiscal procedures, budgeting, and grants.

Cross-Listed: LS 585

RTH 590 Special Topics 3 cr

A varying-content course treating various aspects of Leisure Studies. May be repeated for credit when course content varies.

Cross-Listed: LS 590

RTH 592 Outdoor Rec - Adventure Prog 3 cr

Study and practicum in popular adventure activities (e.g, shooting sports, angling, backpacking, orienteering, rock climbing, canoeing). Emphasis on attitudes, skills, environmental awareness, teaching methodology, and principles of group leadership as they relate to adventuresome activities.

Cross-Listed: LS 592

RTH 595 Internship in Recreational The 3-9 cr

An individually planned practicum experience in an approved recreational therapy setting. Requires a minimum of 150 work hours per 3 hours of credit. HPELS advisor approval required.

Cross-Listed: LS 580

RTH 596 Special Projects 3 cr

An individually planned experience whereby a student conceptualizes and researches a special problem relevant to the leisure services profession. Students will share their experiences in a weekly seminar (non-thesis option).

Cross-Listed: LS 596

Sports Management (SM)**SM 191 Intro to Sport Mgt/Rec Studies 3 cr**

An introduction to the Sport Management and Recreation Studies professions; its history and philosophies. Includes an orientation to community agencies.

Cross-Listed: LS 191

SM 276 Introduction to Sport Mgt 3 cr

A study of the activities, organizations, and businesses involved in producing, facilitating, and organizing sport, fitness, and recreation related products and services.

Cross-Listed: LS 276

SM 280 Hospitality Services 3 cr

A study of hotel/motel resort services. Includes an overview of recreation services, food and beverage, guest services, marketing, housekeeping, maintenance, and fiscal concerns.

Cross-Listed: LS 280

SM 286 Sport Governance and Policy 3 cr

A detailed analysis of power, decision making, oversight and control methods for sport and recreation programs at the community, scholastic, collegiate, professional, and international sport levels. Includes governance and authority of regulatory concerns related to legal, risk/safety, social, political, economic, geographical, and managerial policies, procedures and practices.

SM 297 Campus Recreation 3 cr

Planning, organization, and leadership of intramural recreation and community sport activities.

Cross-Listed: LS 297

SM 300 Global Tourism 3 cr

Examination of the impact of recreational socio-cultural, economic, physical environment and governmental factors on leisure travelers within the global tourism industry.

Cross-Listed: LS 300

SM 384 Sport Marketing 3 cr

An examination of marketing and media concepts and theories applied to the sport industry. Content areas include basic marketing, target marketing and segmentation, advertising and sponsorships, event marketing and promotions, branding, public relations, social media, consumer behavior research, sponsorship proposals, and sport marketing plans.

Cross-Listed: LS 384

SM 391 Leadership in SMRS 3 cr

Theories, principles, and philosophies of leadership as applied to sport management and recreation studies. Also includes a study of programming principles and techniques.

Cross-Listed: LS 391

SM 394 Sport and Business Finance 3 cr

This course provides undergraduate students with an introduction to investment valuation and key financial concepts of sport related entities. Students will develop revenue generating insight and budgeting knowledge of actual situations occurring in the sport and recreation industry. Topical areas covered include capital budgeting, facility financing, corporate sponsorship, salary structures, franchise valuations, and personal business transactions.

Cross-Listed: LS 394

SM 472 Legal Issues in Sports/Rec - W 3 cr

This course introduces students to the legal liabilities, negligence, contractual agreements, and risk management issues pertaining to the areas of sport, recreation, and physical activity.

Cross-Listed: LS 472

SM 480 Private/Commercial Operations 3 cr

A survey of private and commercial operations including a study of resort operations.

Cross-Listed: LS 480

SM 481 Tourism & Resort Development 3 cr

Tourism and recreational travel; nature of resort development and its effect on generating tourist flow to and within regions. Economic importance of both tourism and resort development.

Cross-Listed: LS 481

SM 483 Issues in HKS 3 cr

A study of major trends, problems, and issues in various areas of health, kinesiology, and sport.

Cross-Listed: LS 483

SM 486 Sport/Rec Facility Plan/Design 3 cr

This course will familiarize students with the basic methodologies, objectives, and principles applied to the design and strategic planning of sport and recreation service facilities. It includes the examination and implementation of guidelines used to create a facility planning brief.

Cross-Listed: LS 486

SM 490 Special Topics 3 cr

Selected topics in sport management. Topics will vary according to needs and interests of students. Course may be repeated for credit when content varies.

SM 495 Internship in Sport Management 3-12 cr

Supervised experiences in a sport management or related agency work setting. HKS advisor approval required.

Cross-Listed: LS 498

SM 496 Sport and Rec Resource Mgt 3 cr

A study of event and facility resource management in sport and recreation. Applies the functions of management to the supervision, operation, development, evaluation, and financing of sport and recreation facilities in public and private environments.

Cross-Listed: LS 496

SM 572 Sport Event Law and Risk Mgmt 3 cr

Analytical understanding of legal issues and risk management trends as they relate to sport event management. Legal systems, human resource management, operations management, and liability of managing sport events and facilities will be emphasized.

SM 575 Sport Ldshp and Org Behavior 3 cr

This course explores the essential functions of leadership in the management of sport organizations and sport events. Effective leadership in event operations will be studied, in addition to historical and current perspectives of organizational behavior. Students will gain an advanced understanding of practical leadership applications.

SM 584 Sport Event Marketing-Media 3 cr

Study of the unique features of sport event marketing and media. Examines the strategies and activities of organizations to promote and produce sporting events.

SM 585 Soc-Ethic Issues in Sport Mgmt 3 cr

A variety of social and ethical issues within the sport industry are presented. A value based approach to sport event decision making is emphasized using real-world examples and the application of ethical theories.

SM 586 Sport Event and Facility Mgmt 3 cr

Designed to provide students the opportunity to learn multiple aspects of sports event management and the operations of sports facilities. Emphasis toward how to plan, manage, implement and evaluate sports events at various host site venues.

SM 587 Sport Business and Finance 3 cr

This course provides sport managers with the skills to make effective financial management decisions in sport event settings. Students will apply appropriate investment, revenue generating, and budgeting concepts unique to the sport industry.

SM 591 Travel and Tourism 3 cr

A survey course designed to provide students with an overview of travel and tourism as an area of study. Discussions will center on tourism at the macro (regional and national) level. Tourist behavior, the social, environmental and economic impact of tourism will be highlighted.

Cross-Listed: LS 591

SM 594 Directed Study and Research 3 cr

Students explore through directed study and research, problems and issues of special interest or significance in sport management. Not more than three semester hours of SM 594 can be accepted toward a degree program. Program advisor approval required.

SM 595 Internship in Sport Management 3-6 cr

A supervised learning experience in a sport management or related agency work setting. Provides the student with an opportunity to apply theories and concepts learned during the graduate program. No more than six semester hours of SM 595 can be accepted toward a degree program. Program advisor approval required.

SM 599 Thesis 1-6 cr

Independent research by the student under the sponsorship of the graduate faculty. Approved formal research prospectus and approval by thesis committee chair required.

Faculty

Faculty Name	Faculty Department	Faculty Position	Degrees Held
ANASTASIO, RANDALL J. (ranastasio@southalabama.edu)	Health, Kinesiology and Sport	Senior Instructor	BS, University of Southern Miss MS, University of Southern Miss MS, University of Southern Miss
BATES, CAROLYN MICHELLE (bates@southalabama.edu)	Health, Kinesiology and Sport	Instructor	BS, University of Southern Miss MS, Clemson University
BOTSIS, ALINE ELIZABETH (abotsis@southalabama.edu)	Health, Kinesiology and Sport	Instructor	BS, University of South Alabama MS, University of South Alabama
COLQUHOUN, RYAN JAMES (rcolquhoun@southalabama.edu)	Health, Kinesiology and Sport	Assistant Professor	BS, Florida Atlantic U-Boca Raton MS, University of South Florida PHD, Oklahoma State University
FORESTER, BROOKE E. (bforester@southalabama.edu)	Health, Kinesiology and Sport	Associate Professor	BS, University of South Alabama MED, University of South Alabama PHD, Florida State University

HAUFF, CAITLYN ROSEANN (chauff@southalabama.edu)	Health, Kinesiology and Sport	Assistant Professor	BS, Baldwin-Wallace University MS, Georgia Southern University PHD, University of Wisconsin-Milwaukee
HOLDEN, SHELLEY LYNN (sholden@southalabama.edu)	Health, Kinesiology and Sport	Professor	BS, University of South Alabama MED, University of South Alabama EDD, University of West Florida
HUDSON, GEOFFREY MARCUS (ghudson@southalabama.edu)	Health, Kinesiology and Sport	Associate Professor	BS, University of Alabama MA, University of Alabama PHD, Baylor University
KELLER, JOSHUA LEE (jkeller@southalabama.edu)	Health, Kinesiology and Sport	Assistant Professor	BS, University of Cincinnati MS, University of Dayton PHD, University of Nebraska - Lincoln
KESHOCK, CHRISTOPHER M. (ckeshock@southalabama.edu)	Health, Kinesiology and Sport	Associate Professor	BSBA, Ashland University MBA, University of Central Missouri PHD, Florida State University
KOVALESKI, JOHN EDWARD (jkovales@southalabama.edu)	Health, Kinesiology and Sport	Professor	BS, Ohio University MA, Central Michigan University PHD, Ball State University
MONTGOMERY, SUSAN L (montgomery@southalabama.edu)	Health, Kinesiology and Sport	Instructor	BS, University of Montevallo MS, University of Tennessee-Knox
PALOMBO, ALEESHA S (apalombo@southalabama.edu)	Health, Kinesiology and Sport	Senior Instructor	BA, University of South Florida MED, University of South Alabama
PARKES, CRAIG A (cparkes@southalabama.edu)	Health, Kinesiology and Sport	Assistant Professor	BA, University of Wolverhampton MS, Ithaca College EDD, University of NC- Greensboro
SCHWARZ, NEIL ANDREW (neilschwarz@southalabama.edu)	Health, Kinesiology and Sport	Associate Professor	BS, Louisiana State University MS, University of South Alabama PHD, Baylor University
STRATTON, MATTHEW THOMAS (matthewstratton@southalabama.edu)	Health, Kinesiology and Sport	Assistant Professor	BS, University of New Mexico MS, Kennesaw State University PHD, Texas Tech University
WOLTRING, MITCHELL T. (mitchellwoltring@southalabama.edu)	Health, Kinesiology and Sport	Assistant Professor	BS, Minnesota St University-Mankato MS, Middle Tennessee State U PHD, Middle Tennessee State U

Coaching Certificate

Degree Requirements

The University of South Alabama Coaching Certificate is a 21 hour academic program that can be completed in two years. The program is intended to give students with coaching aspirations significant course work in coaching theory, sport behavior, basic athletic injury care, sport specific coaching strategies, and team management.

Program Requirements: Satisfactory completion of 21 hours with a minimum GPA of 2.0 required for certificate.

Combining the Coaching Certificate with the Class B Teaching Certificate prepares the individual for coaching in the high school setting.

Coaching Certificate

Code	Title	Hours
KIN 100	Concepts of Health and Fitness	3
KIN 278	Sport and Human Behavior	3
KIN 282	Intro to Athletic Training	3
KIN 478	Coaching Theory	3

Select three electives from the following: 9

KIN 373	Coaching Volleyball
KIN 374	Coaching Soccer
KIN 375	Coaching Football
KIN 376	Coaching Basketball
KIN 377	Coaching Baseball
KIN 378	Coaching Track and Field

Total Hours 21

Exercise Science (BS) - Health And Fitness Concentration

MA 237	Linear Algebra I
MA 238	Differential Equations I

B. Select 8-10 hours from the following: 8-10

AN 121 & 121L	Biological Anthropology and Biological Anthropology Lab
BLY 101 & 101L	Life Science I and Life Science I Laboratory
or BLY 121 & 121L	General Biology I and General Biology I Lab
BLY 102 & 102L	Life Science II and Life Science II Lab
or BLY 122 & 122L	General Biology II and General Biology II Laboratory
CH 101 & 101L	Survey of Inorg and Org Chem and Survey Inorg-Org Chem Lab
CH 131 & 131L	General Chemistry I and General Chemistry I Lab
CH 132 & 132L	General Chemistry II and General Chemistry II Lab
GEO 101 & 101L	Environmental Geography and Environmental Geography Lab

GEO 102 & 102L	Earth and the Environment and Earth and the Environment Lab
GY 111 & 111L	Physical Geology and Physical Geology Lab
GY 112 & 112L	Earth History and Earth History Lab
MAS 134 & 134L	Ocean Science and Ocean Science Lab
PH 101 & 101L	Introduction to Astronomy and Introduction to Astronomy Lab
PH 104 & 104L	Concepts of Physics and Concepts of Physics Laboratory
PH 114 & 114L	Physics with Algebra-Trig I and Alg-Trig Based Physics I Lab
PH 115 & 115L	Physics with Algebra -Trig II and Alg-Trig Based Physics II Lab
PH 201 & 201L	Calculus-Based Physics I and Calculus-Based Physics I Lab
PH 202 & 202L	Calculus-Based Physics II and Calculus-Based Physics II Lab

Area IV – History, Social & Behavioral Sciences see footnote table below (p. 446)¹

A. Select one of the following: 3

HY 101	HY of Western Civilization I
HY 102	HY of Western Civilization II
HY 121	World Civilization I
HY 122	World Civilization II
HY 135	US History to 1877
HY 136	US History since 1877

B. Select three of the following: 9

AN 100	Intro to Cultural Anthropology
AN 101	Intro Archaeology-Bio Anthro
CA 100	Intro to Communication
CA 211	Interpersonal Comm
CJ 105	Introduction to Criminal Justice
ECO 215	Prin of Microeconomics
ECO 216	Prin of Macroeconomics
GEO 114	People, Places, Environment
GEO 115	World Regional Geography
HY 101	HY of Western Civilization I
HY 102	HY of Western Civilization II
HY 121	World Civilization I
HY 122	World Civilization II
HY 135	US History to 1877
HY 136	US History since 1877
IS 100	Global Issues
IST 201	Seasons of Life
NAS 101	Intro Native American Studies
PSC 130	Intro to US Government
PSY 120	Introduction to Psychology
PSY 250	Life Span Development
SY 109	Introductory Sociology
SY 112	Social Problems

Area V

A. Complete the following:	
PE 102 Weight Training	1
B. Complete the following:	
PE 101 - PE 157 (No Repeats)	3
Total Hours	45-48

Footnote

¹ Students must complete a 6 credit hour sequence either in literature (Area II - EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV - HY 101 & HY 102 or HY 121 & HY 122 or HY 135 & HY 136).

All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major or minor

Additional Information

Minimum Grade Point Averages Required for Graduation: 2.20 Major GPA, 2.20 USA GPA

Exercise Science and Performance Nutrition (Ph.D.)

Degree Requirements

Doctor Of Philosophy In Exercise Science And Performance Nutrition

The Doctor of Philosophy (Ph.D.) Program in Exercise Science and Performance Nutrition provides trainees with a blend of formal coursework and the mastery of laboratory skills in order to design and implement high-quality research within the broad scope of exercise and nutritional sciences. The Ph.D. degree is awarded to students who demonstrate the ability to be independent researchers involving nutrition and/or exercise as they relate to human performance improvement and sport, exercise adaptations, and preventing disease.

Evaluation of candidates includes a comprehensive examination consisting of foundational knowledge of topics essential to success within the profession. Additionally, each candidate develops and completes a formal dissertation involving a research problem that contributes new knowledge to the field. The candidate serves as the principal investigator in an independent capacity with oversight from a research mentor and committee.

The Ph.D. program in Exercise Science and Performance Nutrition emphasizes experiential learning in laboratory and classroom settings to foster the development of well-rounded graduates capable of effective teaching, mentorship, and ethical research practices leading to preparation for a wide variety of positions, which may include academia, industry, and/or government entities.

Requirements For Admission

To apply to the Ph.D. in Exercise Science and Performance Nutrition degree program, please visit the University of South Alabama (USA) Graduate School website.

In addition to the general admission requirements of the USA Graduate School, admission requirements for the Exercise Science and Performance Nutrition Ph.D. program are:

1. A **master's degree in a related field** (i.e., exercise science, kinesiology, nutrition, physiology, or similar) from an accredited institution of higher education. Students with a degree outside of the discipline and/or deficiency in relevant coursework may be required to successfully complete additional prerequisite courses prior to admission.
2. **GPA Requirement:** A minimum overall grade point average (GPA) of 3.25 on a 4.0 scale on all graduate coursework.
3. A brief **personal statement** (1 to 2 pages) describing the applicant's research experience, related skills, and academic and career goals.
4. **One letter of recommendation (faculty advisor preferred)** attesting to the applicant's potential for developing into an independent researcher **and contact information for three references** (may include the letter writer).
5. A **writing sample (thesis/manuscript preferred)** as evidence of the candidate's capacity for scholarly written communication.
6. **Commitment from a program faculty member** to serve as a mentor to supervise the applicant's doctoral training and research.

7. A GRE score is not required. Voluntary submission of GRE scores will be accepted and considered with the application materials. An overall GRE score of 310 or greater along with an Analytical Writing score of 4.0 or greater can be used to replace the writing sample requirement.

8. **International Students:** If the applicant does not have a master's degree from a U.S.-accredited institution of higher education, a GRE score is required. Any additional admission requirements set forth by the USA Graduate School for international applicants must be met.

9. An **interview** with one or more program faculty member.

Admission is competitive and the decision is based on a review of all submitted admission materials.

Program Requirements

To qualify for the Ph.D. in Exercise Science and Performance Nutrition, a minimum of 60 semester hours of approved graduate credit is required and the following program of study must be completed with a grade of "B" or better in all course work.

Code	Title	Hours
Core Courses		15

KIN 799	Dissertation	
Total Hours		60

Academic Standards

Student must maintain a cumulative 3.0 GPA in order to be in good standing. Failure to maintain a cumulative 3.0 GPA will result in the student being placed on academic probation. The Director of Graduate

Programs may recommend the dismissal of a student who does not maintain good academic standing or is not making sufficient progress.

Graduate Assistantships

Graduate assistantships are available on a competitive basis and are awarded on the recommendation of the Department of Health, Kinesiology, and Sport.

Comprehensive Examinations

Doctoral students must pass a comprehensive examination. The format of the examination will be determined by the comprehensive examination committee. Normally the examination is based on the required coursework. Failure to pass the comprehensive examination within three attempts will result in dismissal from the program.

Candidacy

A doctoral student is admitted to candidacy upon successful completion of a comprehensive examination. Candidacy indicates the student has completed the required coursework and is eligible to begin the dissertation research project.

Dissertation Hours And Defense

Doctoral candidacy is required to enroll in KIN 799 Dissertation. While only 15 hours of KIN 799 may be counted toward the degree, a student must continuously enroll in at least 1 credit hour of dissertation during the fall and spring semesters until the dissertation is successfully defended. Failure to enroll continuously without the written approval of the Graduate Program Director may lead to dismissal from the program.

A doctoral candidate must successfully defend a dissertation prospectus. The final oral defense of the dissertation is scheduled after the dissertation study has been completed and prepared in written form. Revisions to the written dissertation may be required for final approval by the dissertation committee and as a result of a review by the Graduate School.

Transfer Credit

A maximum of 18 semester hours of graduate credit earned at an approved graduate school may be counted toward the Ph.D. program. Transfer credit may be approved after the completion of nine (9) semester hours of credit at the University of South Alabama. Transfer credit must be approved by the Health, Kinesiology, and Sport Department Chair and Graduate Program Director with the recommendation of the student's advisor.

Time Limit

All requirements for the PhD in Computing degree must be completed within seven (7) calendar years from the date of matriculation as an Exercise Science and Performance Nutrition Ph.D. student. This seven calendar year constraint also applies to all transfer credit.

After reaching candidacy, a student has a maximum of 3 years to complete the dissertation. A student may apply to the Graduate Program Director for an extension to complete the degree.

Teacher Candidacy – Health Education

This major contains a professional component comprised of upper level courses (300-400 levels), as shown on the graduation plan, and are only available to students who have gained admission to Teacher Candidacy.

Admission Requirements for Teacher Candidacy:

Courses and GPA

- Courses: BMD 110 or BMD 251; CA 110, EDM 310, EDU 400, EPY 351, EH 101, EH 102, HS 170, HS 262, KIN 263, KIN 100, and KIN 201
- Hours: 60 credit hours of degree requirements completed
- Minimum Grade Point Averages: 2.5 Program, 2.5 Professional Studies, 2.5 Teaching Field, and 2.5 USA GPA (all GPAs found in degree audit). No grade below a “C” is accepted in Professional Studies.

ALSDE Background Check

- https://www.alsde.edu/sec/ec/Pages/background_clearance-all.aspx

Application, Liability Insurance, and Interview

- Completed and scheduled in the UCOM Advising Center during the semester prior to beginning Teacher Candidacy

Prerequisites and Certification/Graduation Requirements:

- While in Teacher Candidacy, students must maintain GPAs at or above admission requirement levels
- Prior to Internship, students must pass the Health Education Praxis https://www.ets.org/praxis/al/al_teacher_ed/
- Prior to certification and graduation, students must pass edTPA

Note: Praxis tests requirements are subject to change as prescribed by the ALSDE. Prior to registering for any Praxis exam, please verify current requirements by going directly to the ALABAMA portion of the ETS Praxis website at <http://ets.org/praxis/al> (<http://ets.org/praxis/al/>).

Area III – Natural Sciences & Mathematics

A. Select 3-4 hours from the following: 3-4

MA 110	Finite Mathematics
MA 112	Precalculus Algebra

MA 113	Precalculus Trigonometry
MA 115	Precal Algebra-Trigonometry
MA 120	Calculus and Its Applications
MA 125	Calculus I
MA 126	Calculus II
MA 227	Calculus III
MA 237	Linear Algebra I
MA 238	Differential Equations I
B. Select 8-10 hours from the following: 8-10	
AN 121 & 121L	Biological Anthropology and Biological Anthropology Lab
BLY 101 & 101L	Life Science I and Life Science I Laboratory
or BLY 121 & 121L	General Biology I and General Biology I Lab
BLY 102 & 102L	Life Science II and Life Science II Lab
or BLY 122 & 122L	General Biology II and General Biology II Laboratory
CH 101 & 101L	Survey of Inorg and Org Chem and Survey Inorg-Org Chem Lab
CH 131 & 131L	General Chemistry I and General Chemistry I Lab
CH 132 & 132L	General Chemistry II and General Chemistry II Lab
GEO 101 & 101L	Environmental Geography and Environmental Geography Lab
GEO 102 & 102L	Earth and the Environment and Earth and the Environment Lab
GY 111 & 111L	Physical Geology and Physical Geology Lab
GY 112 & 112L	Earth History and Earth History Lab
MAS 134 & 134L	Ocean Science and Ocean Science Lab
PH 101 & 101L	Introduction to Astronomy and Introduction to Astronomy Lab
PH 104 & 104L	Concepts of Physics and Concepts of Physics Laboratory
PH 114 & 114L	Physics with Algebra-Trig I and Alg-Trig Based Physics I Lab
PH 115 & 115L	Physics with Algebra -Trig II and Alg-Trig Based Physics II Lab
PH 201 & 201L	Calculus-Based Physics I and Calculus-Based Physics I Lab
PH 202 & 202L	Calculus-Based Physics II and Calculus-Based Physics II Lab

Area IV – History, Social & Behavioral Sciences see footnote table below (p. 457) ¹

A. Select one of the following: 3

HY 101	HY of Western Civilization I
HY 102	HY of Western Civilization II
HY 121	World Civilization I
HY 122	World Civilization II
HY 135	US History to 1877

HY 136	US History since 1877	
B. Select three of the following:		9
AN 100	Intro to Cultural Anthropology	
AN 101	Intro Archaeology-Bio Anthro	
CA 100	Intro to Communication	
CA 211	Interpersonal Comm	
CJ 105	Introduction to Criminal Justice	
ECO 215	Prin of Microeconomics	
ECO 216	Prin of Macroeconomics	
GEO 114	People, Places, Environment	
GEO 115	World Regional Geography	
GS 101	Intro to Gender Studies	
HY 101	HY of Western Civilization I	
HY 102	HY of Western Civilization II	
HY 121	World Civilization I	
HY 122	World Civilization II	
HY 135	US History to 1877	
HY 136	US History since 1877	
IS 100	Global Issues	
IST 201	Seasons of Life	
NAS 101	Intro Native American Studies	
PSC 130	Intro to US Government	
PSY 120	Introduction to Psychology	
PSY 250	Life Span Development	
SY 109	Introductory Sociology	
SY 112	Social Problems	

Area V

A. Complete the following:

KIN 100	Concepts of Health and Fitness	3
---------	--------------------------------	---

B. Complete the following:

PE 101 - PE 157		1
-----------------	--	---

C. Select one of the following:

CIS 150	Intro to Computer Applications	3
EDM 310	Microcomputing Systems	
Elective with passing Computer Proficiency Exam - CIS 010		

Total Hours 48-51**Footnote**

¹ Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 121 & HY 122 or HY 135 & HY 136)

Additional Information**Candidacy – Health Promotion**

This major contains a professional component (Candidacy) comprised of upper level courses (300-400 levels), as shown on the graduation plan, and are only available to students who have gained admission to Candidacy.

Admission Requirements for Candidacy – Health:

- Courses: BMD 110 or BMD 251, BMD 111 or BMD 252, CA 110, EH 101, EH 102, HS 170, HS 262, KIN 263, KIN 100, and KIN 201

- Hours: 60 credit hours of degree requirements completed
- Minimum Grade Point Averages: 2.20 Major GPA, 2.20 USA GPA

Students should complete a Candidacy application in the CEPS Advising Center (UCOM 3360) the semester before they plan to enroll in Candidacy classes. The advisor, department chairperson, and dean review applications and make the decision to approve, defer, or deny admission. The decision to defer occurs when requirements are in progress at the time of application and reviewers select to defer with approval pending completion of requirements.

- Courses in Candidacy: KIN 381, RTH 471 (W), SM 472 (W), KIN 495

Additional Information

E-portfolio and Assessment

Students enrolled in education classes are required to purchase a LiveText membership.

- <https://www.southalabama.edu/colleges/ceps/livertext.html>

Teacher Candidacy – Merged Health and Physical Education

This major contains a professional component comprised of upper level courses (300-400 levels), as shown on the graduation plan, and are only available to students who have gained admission to Teacher Candidacy.

Admission Requirements for Teacher Candidacy:

Courses and GPA

- Courses: BMD 110 or BMD 251, CA 110, EDM 310, EDU 400, EPY 351, EH 101, EH 102, HS 170, HS 262, KIN 263, KIN 100, and KIN 201
- Hours: 60 credit hours of degree requirements completed
- Minimum Grade Point Averages: 2.5 Program, 2.5 Professional Studies, 2.5 Teaching Field, and 2.5 USA GPA (all GPAs found in degree audit). No grade below a "C" is accepted in Professional Studies.

ALSDE Background Check

- https://www.alsde.edu/sec/ec/Pages/background_clearance-all.aspx

Application, Liability Insurance, and Interview

- Completed and scheduled in the UCOM Advising Center during the semester prior to beginning Teacher Candidacy

Prerequisites and Certification/Graduation Requirements:

- While in Teacher Candidacy, students must maintain GPAs at or above admission requirement levels
- Prior to Internship, students must pass the Health and Physical Education Praxis tests https://www.ets.org/praxis/al/al_teacher_ed/
- Prior to certification and graduation, students must pass edTPA

Note: Praxis tests requirements are subject to change as prescribed by the ALSDE. Prior to registering for any Praxis exam, please verify current requirements by going directly to the ALABAMA portion of the ETS Praxis website at <http://ets.org/praxis/al> (<http://ets.org/praxis/al/>).

HY 121	World Civilization I
HY 122	World Civilization II
HY 135	US History to 1877
HY 136	US History since 1877
PSC 130	Intro to US Government
PSY 120	Introduction to Psychology
PSY 250	Life Span Development
SY 109	Introductory Sociology
SY 112	Social Problems

Area V

A. Complete the following:

HS 262	Personal Health	3
KIN 100	Concepts of Health and Fitness	3
PE 106	Gymnastics	1

B. Select 1-3 hours from the following: 1-3

PE 130	Beginning Swimming
--------	--------------------

PE 131	Intermediate Swimming
KIN 231	ARC Lifeguard Training
KIN 477	Water Safety Instructor
Total Hours	49-54

Footnote

¹ Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 121 & HY 122 or HY 135 & HY 136).

Additional Information

E-portfolio and Assessment

Students enrolled in education classes are required to purchase a LiveText membership.

- <https://www.southalabama.edu/colleges/ceps/livetext.html>

Teacher Candidacy – Physical Education

This major contains a professional component comprised of upper level courses (300-400 levels), as shown on the graduation plan, and are only available to students who have gained admission to Teacher Candidacy.

Admission Requirements for Teacher Candidacy:

Courses and GPA

- Courses: BMD 110 or BMD 251, CA 110, EDM 310, EDU 400, EPY 351, EH 101, EH 102, KIN 100, KIN 166, and KIN 201
- Hours: 60 credit hours of degree requirements completed
- Minimum Grade Point Averages: 2.5 Program, 2.5 Professional Studies, 2.5 Teaching Field, and 2.5 USA GPA (all GPAs found in degree audit). No grade below a "C" is accepted in Professional Studies.

ALSDE Background Check

- https://www.alsde.edu/sec/ec/Pages/background_clearance-all.aspx

Application, Liability Insurance, and Interview

- Completed and scheduled in the UCOM Advising Center during the semester prior to beginning Teacher Candidacy

Prerequisites and Certification/Graduation Requirements:

- While in Teacher Candidacy, students must maintain GPAs at or above admission requirement levels
- Prior to Internship, students must pass the Health and Physical Education Praxis tests https://www.ets.org/praxis/al/al_teacher_ed/
- Prior to certification and graduation, students must pass edTPA

Note: Praxis tests requirements are subject to change as prescribed by the ALSDE. Prior to registering for any Praxis exam, please verify current requirements by going directly to the ALABAMA portion of the ETS Praxis website at <http://ets.org/praxis/al> (<http://ets.org/praxis/al/>).

Area V

A. Complete the following:

KIN 100	Concepts of Health and Fitness	3
---------	--------------------------------	---

B. Complete the following:

PE 101-PE 157		2
---------------	--	---

Total Hours **46-49****Footnote**

¹ Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 121 & HY 122 or HY 135 & HY 136)

Notes:

- The following electives are recommended for Recreational Therapy students, but selections should be made with the advice and approval of the academic advisor.
- EMS 210, IST 201, KIN 380, PSY 416 (requires PSY 220 as a prerequisite), Courses may serve as prerequisites for OT/PT.

Additional Information**Candidacy – Recreational Therapy**

This major contains a professional component (Candidacy) comprised of upper level courses (300-400 levels), as shown on the graduation plan, and are only available to students who have gained admission to Candidacy.

Admission Requirements for Candidacy – Recreational Therapy:

- Courses: CA 110, EH 101, EH 102, BMD 251, BMD 252, RTH 292, RTH 295
- Hours: 60 credit hours of degree requirements completed
- Minimum Grade Point Averages: 2.20 Major GPA, 2.20 USA GPA

Students should complete a Candidacy application in the CEPS Advising Center (UCOM 3360) the semester before they plan to enroll in Candidacy classes. The advisor, department chairperson, and dean review applications and make the decision to approve, defer, or deny admission. The decision to defer occurs when requirements are in progress at the

time of application and reviewers select to defer with approval pending completion of requirements.

- Courses in Candidacy: RTH 465, RTH 466, RTH 471, RTH 495, SM 483

Area V

A. Complete the following:		
KIN 100	Concepts of Health and Fitness	3
B. Select two hours from the following:		
PE 101 - PE 157 (No repeats)		2

Total Hours 46-49

Footnote

¹ Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236 or history (Area IV – HY 101 & HY 102 or HY 121 & HY 122 or HY 135 & HY 136).

Additional Information

Candidacy – Coaching Administration

This major contains a professional component (Candidacy) comprised of upper level courses (300-400 levels), as shown on the graduation plan, and are only available to students who have gained admission to Candidacy.

Admission Requirements for Candidacy:

- Courses: CA 110, EH 101, EH 102, KIN 278, SM 276, SM 286, SM 391
- Hours: 60 credit hours of degree requirements complete
- Minimum Grade Point Averages: 2.20 Major GPA, 2.20 USA GPA

Students should complete a Candidacy application in the CEPS Advising Center (UCOM 3360) the semester before they plan to enroll in Candidacy classes. The advisor, department chairperson, and dean review

applications and make the decision to approve, defer, or deny admission. The decision to defer occurs when requirements are in progress at the time of application and reviewers select to defer with approval pending completion of requirements.

- Courses in Candidacy: RTH 471, SM 472, SM 483, SM 495, SM 496

Area V

A. Complete the following:		
KIN 100	Concepts of Health and Fitness	3
B. Select two hours from the following:		
PE 101 - PE 157 (No repeats)		2

Total Hours 46-49**Footnote**

¹ Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 121 & HY 122 or HY 135 & HY 136).

Additional Information**Candidacy – Sport Administration**

This major contains a professional component (Candidacy) of upper level courses (300-400 levels), as shown on the graduation plan, and are only available to students who have gained admission to Candidacy.

Admission Requirements for Candidacy:

- Courses: CA 110, EH 101, EH 102, KIN 278, SM 276, SM 286, SM 391
- Hours: 60 credit hours of degree requirements complete
- Minimum Grade Point Averages: 2.20 Major GPA, 2.20 USA GPA

Students should complete a Candidacy application in the CEPS Advising Center (UCOM 3360) the semester before they plan to enroll in Candidacy classes. The advisor, department chairperson, and dean review applications and make the decision to approve, defer, or deny admission. The decision to defer occurs when requirements are in progress at the time of application and reviewers select to defer with approval pending completion of requirements.

- Courses in Candidacy: RTH 471, SM 472, SM 483, SM 495, SM 496

Title	Name
Department Chair	Khaldoon Nusair
Assistant Professor	Min Hwang
Instructor	Amanda Donaldson

Vision

Improve the well-being of people along the Gulf Coast by producing hospitality, tourism and ecotourism professionals who possess fiscal, social, environmental and professional competencies through education and training, job placement and partnerships.

Mission

To advance the people of the Gulf Coast, and the global community through the creation and dissemination of knowledge and experience anchored in sustainable and best practices in the hospitality, tourism and ecotourism sectors.

Goal

Provide graduates with career and life competencies for sustainable employment, local and global leadership, engaged citizenry and research opportunities.

Program Educational Objectives

Develop learner-focused pedagogies that:

- Prepare students for global hospitality, tourism and ecotourism careers from an interdisciplinary perspective.
- Provide students with observational, situational, experiential learning and research opportunities.
- Apply and infuse sustainable and best hospitality, tourism and ecotourism practices.

Degrees, Programs, or Concentrations

- Hospitality and Tourism Management (BS) (p. 479)
- Hospitality and Tourism Management Minor (p. 481)

Courses

HTM 200 Intro to Hosp & Tour Ind 3 cr

This course provides students with a comprehensive introduction to the many entities that make up the hospitality industry, such as hotels, restaurants, clubs, cruise lines, and casino hotels. Students will learn about hospitality careers, the importance of service, and how hotels and restaurants are organized, as well as an overview of today's hot issues, including ethical challenges and management concerns.

HTM 210 Food & Bev Serv Mngt 3 cr

This course focuses on the tools necessary for managing food service operations in today's aggressive business environment. Students learn how to position, manage, and leverage a successful food service operation - commercial and non-commercial - in a variety of venues. Using a menu-driven approach, the course examines a variety of management tools, best practices, and techniques.

Prerequisite: HTM 200 Minimum Grade of D

HTM 212 Food Sanitation and Safety 3 cr

In this course students are introduced to food safety principles and applications, the Hazard Analysis Critical Control Point System (HACCP), microbiology of food safety, infection control, and safety and environmental issues related to the foodservice and hospitality industry. Students completing the course are eligible to take the ServSafe exam offered by the National Restaurant Association.

HTM 216 Fund. of Hosp. Financial Mgt. 3 cr

This course is designed to provide hospitality and tourism students with a solid foundation of accounting concepts and methods of financial analysis that is required to be successful in the hospitality industry. The course provides students with a fundamental understanding of using numbers to operate various departments and analyze management reports and financial statements.

Prerequisite: (HTM 200 Minimum Grade of D)

HTM 220 Mtgs., Inc., Conv., Events 3 cr

This course will introduce students to multiple component of events management, including planning, marketing, ticketing, budgeting, operations, and evaluation. Students will engage in instruction, observation, and analysis in order to apply knowledge and theory to a specific event. The course will be delivered in a blended format.

Prerequisite: HTM 200 Minimum Grade of D

HTM 310 Global Leadership for HTM 3 cr

This course examines principles of visionary global leadership in the hospitality industry by exploring leadership concepts, theories and fundamentals. Students begin to define their leadership paradigms, and identify leadership strategies that ameliorate personal and professional success.

Prerequisite: HTM 200 Minimum Grade of D

HTM 312 Hospitality Service Culture 3 cr

This course explores the dimensions of successful service environments, comprised of various factors, including the values, beliefs, norms, rituals and practices, within hospitality organization. In this course, students will learn the value a customer-centric approach brings to an organization through the creation of a positive consumer experience. The course focuses on hospitality service culture and methods for implementation, management and improvements within the service delivery process by making customer care part of the organization's mission, vision, values and goals to garner a competitive advantage in the marketplace.

HTM 315 Hospitality/Tourism Marketing 3 cr

This course is designed to provide a broad overview of essential marketing, promotion, and sales principles currently applied in the tourism and hospitality industries. It provides an introduction to marketing theories, principles, and concepts, and an exploration of the role of marketing within a globalized hospitality organization. Students will identify marketing strategies, differentiate services marketing, explain the role of customer expectation, analyze market segments, evaluate target marketing, and demonstrate the ability to effectively communicate using audio visual materials. The focus is on achieving a competitive advantage in a global market. Students will also examine the trends, issues and problems influencing tourism and hospitality marketing in a dynamic intercultural environment.

Prerequisite: HTM 200 Minimum Grade of D

HTM 318 Hospitality Industry Managerial Accounting 3 cr

The study of managerial accounting practices as they relate to the hospitality and tourism industry. Students will learn the skills to conduct analyses and make effective decisions based on a thorough understanding of financial statements. A variety of financial performance analytical models used to support decision making in the hospitality industry will be examined related to realistic budget development, forecast and plan cash flow.

HTM 320 Destination Mgmt. & Marketing 3 cr

The purpose of this course is to equip students with an understanding of the principles of destination management and marketing. Techniques for soliciting a variety of markets, planning presentations, and assessing economic impact of bookings, along with the role of convention bureaus as a catalyst to regional economic development will be important components of this course. The internal operations of a destination marketing organization organization, including stakeholder care, financial management, human resources management, and governance will also be explored.

Prerequisite: HTM 200 Minimum Grade of D

HTM 330 Cruise Operations Management 3 cr

The course provides an introduction to the cruise market and the reasons for its significant growth. The principles, practices, and philosophies of cruising, along with cruise line employee roles and responsibilities are examined. Strategies for management and marketing are explored.

HTM 350 Hospitality HR Management 3 cr

This course is an introduction to hospitality management, including an overview of management in the hospitality industry and professional opportunities. The concepts and practices of hospitality management are examined and discussed. The scope and forms of hospitality organizations (e.g. food and lodging, resorts, tourism enterprises, conventions, events, attractions, etc.) are reviewed, as well as local and global trends within these organizations.

Prerequisite: HTM 200 Minimum Grade of D

HTM 396 HTM Career Planning 3 cr

This course teaches students to perform a good-fit analysis by aligning career and employer choices with self-assessment, determine competencies gaps, and develop a strategic professional development plan. Three credit hours. Offered in web-enhanced and web-blended formats.

Prerequisite: HTM 200 Minimum Grade of D

HTM 397 Study Abroad - Culinary 3 cr

This course is designed to engage students in active learning related to international culture, cuisine, and culinary practice in settings outside the United States. Through participation in the course, students will explore the culture of the host country, cuisine as it is related to the culture, and common food preparation and service practices. Activities include readings, lectures, discussions, reflective journaling, tours, observations, and active engagement in food preparation and service.

HTM 398 Study Abroad - Intl Hosp Mgt 3 cr

This course is designed to engage students in active learning related to international hospitality management in settings outside the United States. Through participation in the course, students will explore the culture, management practices, and service standards in the host country related to the hospitality industry. Activities include readings, lectures, discussions, reflective journaling, tours, and observations.

HTM 400 Legal Issues in HTM 3 cr

This course will provide a comprehensive study of the legal aspects of the hospitality industry with an emphasis on compliance and prevention of liabilities. The course is not intended to replace the legal services of an attorney, but rather provide an overview of common legal issues in the field of hospitality and tourism management. 3 credit hours. Blended or online.

Prerequisite: HTM 200 Minimum Grade of D

HTM 410 Sustainable and Eco-Tourism 4 cr

Examine the interaction of ecotourism with social, natural and cultural environments as well as the impacts of ecotourism on the environment and global societies.

Prerequisite: HTM 200 (may be taken concurrently) Minimum Grade of D

HTM 435 Quality Service Management - W 3 cr

This course is designed to prepare students to understand, challenge, and refine the principles of guest-services management in an organization. Theories and concepts of service will be explored with emphasis on identifying customer preferences and a systematic process for organizations to design service delivery systems and implement a successful quality service environment that consistently meets and exceeds customer expectations. This course is a designated writing intensive course (W) and all major writing assignments must be satisfactorily completed in order to receive credit for the course. Prerequisites: EH 102 or EH 105, or placement; HTM 200 Introduction to Hospitality and Tourism Management.

Prerequisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C) and HTM 200 Minimum Grade of D

HTM 440 Lodging Management 3 cr

This course is an exploration of issues facing the hotel and lodging industry. The goal of the course is to prepare students for the hospitality industry with a specific focus on the hotel industry. It will introduce students to multiple components of lodging management, including: sales and marketing; front office, housekeeping, maintenance and accounting departments; food and beverage operations for full-and limited-service hotels; safety and securing; careers in the lodging industry. Students will engage in instruction, observation, and analysis in order to apply knowledge and theory to specific hospitality lodging situations. The course will be delivered in a blended format or online format.

Prerequisite: HTM 200 Minimum Grade of D

HTM 445 HTM Financial Reporting 3 cr

This course is designed to provide hospitality and tourism students with a solid foundation of accounting concepts and methods of financial analysis that is required to be successful in the hospitality industry. The course provides students with a fundamental understanding of using numbers to operate various departments and analyze management reports and financial statements.

Prerequisite: HTM 200 Minimum Grade of D

HTM 450 Non-Traditional Lodging 3 cr

This course will provide students with an in-depth study into the unique world of "non-traditional" lodging, the condominium resort and vacation ownership industry and other forms of non-traditional lodging. The course focuses on the hospitality aspects of the condominium resort, vacation ownership industry, and recreation and park lodging, and specifically on how non-traditional lodging operations differ from traditional lodging operations such as hotels, motels, and resorts.

Prerequisite: HTM 200 Minimum Grade of D

HTM 490 Special Topics 1-4 cr

This course is designed as an educational tool for college students to develop a theoretical understanding of the concept of servant leadership as it applies to the hospitality and tourism management industry, and to acquire and apply fundamental hospitality and tourism workplace competencies through "real-world" experiential learning activities that include "earning the right to lead" through engagement and visible leadership. Students will complete online learning modules related to theory and practice while also engaging in experiential learning activities in a hospitality organization.

HTM 494 Directed Studies 1-4 cr

Directed study on a topic of special interest or significance in the field of hospitality and tourism management. Course requirements can be met through research, reading, writing, or lab activities, as approved by the department chair and supervising instructor. May be taken for 1-4 credit hours. May be repeated, if content varies, for up to six hours of credit.

Prerequisites: Junior or Senior standing and approval of department chair and supervising instructor.

HTM 496 Internship I Capstone Exp - W 3 cr

This pre-internship course examines the impact of business environments on personal and career effectiveness in the Hospitality field. Topics include effective business communication, ethical decision making, and leadership development.

Prerequisite: EH 102 Minimum Grade of C or EH 105 Minimum Grade of C and HTM 200 (may be taken concurrently) Minimum Grade of D

Corequisite: HTM 498

HTM 498 Internship II 3 cr

This Internship II course provides students an opportunity to receive supervised, relevant, and practical experience in work that is related to the objectives of the Hospitality and Tourism Management (HTM) program.

Prerequisite: EH 102 Minimum Grade of C or EH 105 Minimum Grade of C and HTM 200 Minimum Grade of D

Corequisite: HTM 496

Hospitality and Tourism Management Minor

Degree Requirements

Students in other colleges may elect, with the approval of their department chair, an HTM minor in the College of Education and Professional Studies. A 2.0 GPA is required for the courses applied toward the minor. The HTM minor allows students to enhance their major degrees with exposure to a program that prepares students for local and global hospitality and tourism careers. The required courses provide students an overview of the foundational elements of the industry, while

the elective courses offer more in-depth exposure to the various sectors within the industry.

The minor consists of **18 credit hours**, comprised of one lower-division course (3 hours) (**HTM 200**), four upper-division courses (12 hours), and one elective (3 hours).

Code	Title	Hours
Required Courses (15 credit hours)		
HTM 200	Intro to Hosp & Tour Ind	3
HTM 310	Global Leadership for HTM	3
HTM 315	Hospitality/Tourism Marketing	3
HTM 350	Hospitality HR Management	3
HTM 435	Quality Service Management - W	3
Elective Courses (3 credit hours)		
Select one from the following:		
HTM 210	Food & Bev Serv Mngt	3
HTM 220	Mtgs., Inc., Conv., Events	3
HTM 312	Hospitality Service Culture	3
HTM 330	Cruise Operations Management	3
HTM 410	Sustainable and Eco-Tourism	4
HTM 440	Lodging Management	3
HTM 445	HTM Financial Reporting	3

Department of Integrative Studies Staff

Title	Name
Chair	Paige A. Vitulli
Assistant Professors	Manders, Moody
Associate Professor	Adams

The Department of Integrative Studies (INGGS) includes the Interdisciplinary Studies programs. Faculty are professionals from various backgrounds including business, political science, instructional design, teacher education, interdisciplinary studies, community counseling, educational research, and child development.

The **Interdisciplinary Studies degree** is a customizable program which can be taken fully online, offering a BA or BS which builds skills in communication, cultural competency, analytical thinking, leadership, and teamwork. Diversity is valued among learners and emphasis is on the importance of becoming an active leader, effective team member, and engaged global citizen.

The Interdisciplinary Studies (IST) degree is designed to give students a variety of options in earning a Bachelor's degree tailored to meet their needs and interests. The Department of Interdisciplinary Studies (IST) offers a fully on-line degree.

Degrees, Programs, or Concentrations

- Interdisciplinary Studies (BS or BA) (p. 485)
- Interdisciplinary Studies Minor (p. 488)
- Organizational Leadership (BS) (p. 489)

Courses

International Studies (IS)

IS 100 Global Issues 3 cr

This course introduces students to the basic structural components of the global system, including the nation-state system and the world economy, and explores the major schools of thought in such areas as security, economic prosperity and development, international law, gender and environmental studies. The course helps students understand the complex and interlinked issues facing global society, and current problems, and view the U.S. within a broader global context.

IS 193 Study Abroad 1-6 cr

This course is an introductory International Studies course taught as part of a faculty-led study abroad program. Topics and credit hours vary based on availability.

IS 200 People-Nations - 3 cr

Variable content course focusing on particular nation or region of the world. Course offers a multi-disciplinary introduction to the people, society and politics. May be repeated for credit when content varies up to a total of 6 hours.

IS 210 Global Engagement Orientation 1 cr

This course introduces students to international global issues, allows students to identify opportunities for active engagement in these issues, and provides the framework for successful completion of the Global Engagement Certificate.

IS 290 Special Topics - 3 cr

Study of selected topics within a particular Area Studies Concentration. May be repeated for credit when content varies.

Prerequisite: IS 100 Minimum Grade of D

IS 293 Study Abroad 1-6 cr

This course is an introductory International Studies course taught as part of a faculty-led study abroad program. Topics and credit hours vary based on availability.

IS 363 Crime and Politics in LatinAm 3 cr

An examination of the violent crime epidemic affecting many parts of Latin America, with specific focus on the themes of democratic transition, political economy, and foreign relations with the United States. Same as PSC 363 and CJ 363.

Prerequisite: (PSC 130 Minimum Grade of C or CJ 105 Minimum Grade of C or IS 100 Minimum Grade of C)

Cross-Listed: CJ 363, PSC 363

IS 371 Studies in Russia 3-6 cr

This course will cover specific topics in the history, politics, and culture of modern Russian civilization. May be repeated for credit when content varies.

IS 372 Studies in E. Europe & C. Asia 3-6 cr

This course will cover specific topics in the history, politics, and culture of modern Eastern European and Central Asian civilizations. May be repeated for credit when content varies.

IS 390 Sp Top- 1-3 cr

Advanced study of selected topics within a particular concentration. May be repeated for credit when content varies.

IS 391 Study Abroad - 18 cr

Study of selected topics within a particular Area Studies Concentration. May be repeated.

IS 393 Study Abroad 1-6 cr

This course is an advanced International Studies course taught as part of a faculty-led study abroad program. Topics and credit hours vary based on availability.

IS 410 Global Engagement Capstone 1 cr

Global Engagement Capstone is required for students completing the Global Engagement Certificate (GEC), and is a one hour course designed to help students reflect on the 16 hours of coursework and nine hours of globally engaged activities they have completed. Students will create a portfolio during the course, which will be presented to students and affiliated faculty at its conclusion.

Prerequisite: IS 210 Minimum Grade of P

IS 473 International Law 3 cr

This course covers major issues, cases and topics in public and private international law. Course coverage includes individuals and corporations, diplomatic relations, jurisdiction, human rights, economic relations, treaties, environmental law, and more.

Prerequisite: (IS 100 Minimum Grade of C or PSC 130 Minimum Grade of C or CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C)

Cross-Listed: CJ 473, PSC 473

IS 489 Leadership and World Leaders 3 cr

An overview of the definitions, characteristics, and typologies of leadership, with a focus on lives and legacies of global influential political leaders over the past century.

Prerequisite: PSC 130 Minimum Grade of D or PSC 250 Minimum Grade of D or IS 100 Minimum Grade of D

Cross-Listed: PSC 251, PSC 489

IS 490 Special Topics 3 cr

Advanced study of selected topics within a particular Area Studies Concentration. May be repeated for credit when content varies.

Prerequisite: IS 100 Minimum Grade of D

IS 491 Seminar on Terrorism 3 cr

Study of a terrorism from a sociopolitical perspective with an emphasis on causes, policy, tactics and operational characteristics and counter-terrorism operations. Cross-listed with CJ 491 and PSC 491.

Prerequisite: CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C or PSC 130 Minimum Grade of C or IS 100 Minimum Grade of C

Cross-Listed: CJ 491, PSC 491

IS 492 Seminar - 3 cr

Advanced study of selected topics in international studies from a comparative perspective. May be repeated for credit when content varies.

Prerequisite: IS 100 Minimum Grade of D

IS 493 Study Abroad 1-6 cr

This course is an advanced International Studies course taught as part of a faculty-led study abroad program. Topics and credit hours vary based on availability.

IS 494 Directed Studies 1-3 cr

Directed research in the field of international studies. May be repeated or credit up to a total of 9 hours. Prerequisite: permission of IS Director

IS 495 Senior Seminar - W 3 cr

The course seeks to provide an interdisciplinary and cross-regional overview of the fields and research opportunities within international studies.

Prerequisite: EH 102 Minimum Grade of C

IS 496 Prof St Internship - 3-9 cr

Practical learning experiences through occupational or professional work with an approved international organization, governmental agency, or international business Prerequisite: Permission of IS Director

IS 499 Senior Honors Thesis 3 cr

The course covers major theoretical perspectives in organizational psychology based on empirical research and case studies. Students will explore learning theory, group dynamics, and change in different types of learning organizations.

Prerequisite: (EH 102 Minimum Grade of D or EH 105 Minimum Grade of D)

IS 591 Study Abroad 12 cr

Graduate level international exchange programs for University of South Alabama students.

Interdisciplinary Stds (IST)**IST 100 Freshman Seminar 2 cr**

A course for first-time students that assists with maximizing the student's potential to achieve academic success and to adjust responsibly to the individual and interpersonal challenges presented by college life. The course provides an introduction to the nature of higher education and a general orientation to the functions and resources of the University. Extensive reading and writing assignments relevant to the student's first year experience are required.

IST 101 Foundations of Inter Studies 3 cr

This course will assist students with clarifying educational goals, understanding effective learning methods, and becoming acquainted with university resources, diversity, and culture. It introduces students to basic theories and principles of education and development, with emphasis on liberal education. The focus is to develop written and oral skills to enhance students' critical thinking and problem solving abilities. Assists students in defining competencies needed for success in academic study, professional leadership, and career opportunities. Students will develop a working knowledge of Sakai, Skype and WebEx.

Cross-Listed: AIS 101

IST 125 Professional Conduct 3 cr

Introduces students to primary sources in ethical theory and includes readings and discussions of theories of human nature. Provides a basis for understanding one's rationale for personal moral decisions and offers a foundation for an approach to the ethics of business.

Cross-Listed: AIS 125

IST 200 Clinical Observation 1 cr

Clinical Observations (Medicine, Dentistry, Optometry, and Veterinary Medicine). This course gives the student clinical exposure to various health-care services. It is designed to help students make informed decisions when selecting a career in the health professions. A written report on the clinical experience or a scenario dealing with a medical ethics case is required. May be repeated for a maximum of six hours credit. Prereq: Permission of Chair of Preprofessional Advisory Committee.

IST 201 Seasons of Life 3 cr

An interdisciplinary media-assisted course in which students study human development from the biosocial, cognitive, and psychosocial perspectives with special emphasis on the adult years. Through readings, audio, written exercises, and class discussions, students explore the theories and research findings of life span development which enable them to reflect on their own lives as well as the lives of others.

Cross-Listed: AIS 201

IST 210 Introduction to Disability 3 cr

This course will provide students from any discipline the opportunity to develop the knowledge and skills needed to effectively work with people with disabilities in a variety of settings. Disability is examined as a type of diversity. Topics include: the history and sociological context of disability; the impact of disability on the individual and family; advocacy and civil rights; current trends in services and supports for children and adults with disabilities; and respectful language and interaction. Students will actively engage in readings, discussions, and writing on disability issues.

Prerequisite: EH 102 Minimum Grade of C or EH 105 Minimum Grade of C

Cross-Listed: AIS 210

IST 250 Career Planning and Develop 3 cr

Principles, methods, and practice in career planning and development with an emphasis on career information, self-analysis, exploration of careers, career opportunities, and guidelines for goal achievement.

Cross-Listed: CP 250

IST 290 Special Topics - 1-3 cr

A variable topics course treating special themes. May be repeated for credit when course content varies.

Cross-Listed: AIS 290

IST 300 Global Orientn-Ed Abroad 1 cr

Study Abroad applicants will prepare for their study abroad experience through an examination of selected country-specific reading as well as cross-cultural orientation materials. Travel safety, University of South Alabama policies and procedures for study abroad, and advice for cultural adjustment will be covered during the course. IST 300 satisfies the requirements of LG 394.

Cross-Listed: AIS 300, LG 394

IST 302 Interdis and Critical Thinking 3 cr

Provides students an introduction to the field of interdisciplinary studies and an opportunity to critically reflect on the experience of self, education, and career and the relationship among these three phenomena.

Cross-Listed: AIS 302

IST 305 Issues in Human Services 3 cr

An interdisciplinary course for students who plan to work in the helping professions (counseling, social work, nursing etc.). Guest speakers from various disciplines present information about their fields. Discussion topics include: similarities and differences in the helping professions, the helping relationship, empathic communication, multicultural and legal issues, and stress and burnout management.

Cross-Listed: AIS 305

IST 310 Global Leadership 3 cr

This course helps prepare students to assume global leadership roles in their careers and the community at large. Students explore leadership theories and principles as well as investigate leadership qualities among historical and contemporary individuals. In addition, students confront present-day global issues and argue viewpoints orally, as well as through persuasive and technical papers. Students are expected to complete an interdisciplinary project based on global issues.

Prerequisite: (ACT English 27 or SAT Critical Reading 610 or University - EH101 Exempt P or EH 101 Minimum Grade of C or EH 110 Minimum Grade of C or EH 190 Minimum Grade of C or USA 010 Minimum Grade of S) and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C)

Cross-Listed: AIS 310

IST 315 Women's Issues in Wrkpl-Comm 3 cr

This course will examine contemporary issues faced by women in the workplace and the community from an interdisciplinary perspective. Some of the topics to be covered are gender communication issues, developing a leadership plan, playing the game, power talk, conflict management from a woman's point of view, international development, and women, sexuality and labor.

Cross-Listed: AIS 315

IST 320 Cultural Competency 3 cr

An interdisciplinary exploration of issues related to interactions between diverse groups in teams, communities, and organizations. Reviews research from a variety of disciplines, introduces the history and law of equal opportunity in the U.S., and examines the costs and benefits of diversity. Topics include prejudice, stereotyping, affirmative action, barriers to mobility, discrimination, marginalization, mentoring, cooperative teamwork, and international issues.

Cross-Listed: AIS 320

IST 330 Analytical & Info Lit.-W 3 cr

This course examines principles of qualitative and quantitative research methods and their application to interdisciplinary studies in the social sciences. Emphasis is on the development of functional literacy for information expressed quantitatively and thoughtful integration of such information into academic and practical research.

Prerequisite: (IST 350 Minimum Grade of C or AIS 350 Minimum Grade of C)

Cross-Listed: AIS 330

IST 350 Adv Verbal & Written Comm - W 3 cr

This course builds on the foundation laid in freshman composition, stressing critical thinking, analysis, and research. It aims to prepare students oral presentations, research and writing papers.

Prerequisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C)

Cross-Listed: AIS 350

IST 401 Adults in Society 3 cr

Adults in Society is a media-assisted course that uses print material, videos, written assignments, and class discussions to explore issues which relate to adult development. Using an interdisciplinary approach, students will examine the relationship of adults to their families, work and communities.

Cross-Listed: AIS 401

IST 420 Comm. Dev and Leadership 3 cr

Presents the conceptual foundations of community development and leadership, including basic concepts, methods and literature. Students will study theories of leadership, community development and human capital, investigate public relationships, examine community decision-making and responsible civic action. The course lays foundations for further study and practice in the field. Students will experience the interdisciplinary approaches to community development, leadership, politics, civic responsibility and teamwork.

Cross-Listed: AIS 420

IST 425 Workplace Learning & Dev 3 cr

This project-based course explores workplace learning and development. It will introduce students to interdisciplinary learning and motivational theories necessary to prepare them to be effective in today's changing workplace, and provide them with the skills to problem-solve, lead and work as part of a team.

Cross-Listed: AIS 425

IST 430 Senior Research Thesis - W 3 cr

An in-depth research project in the student's concentration. Provides an opportunity for the student to design a comprehensive research project, analyze and synthesize research data, and develop expertise in a particular subject.

Prerequisite: (IST 302 Minimum Grade of D and IST 330 Minimum Grade of D and IST 350 Minimum Grade of C)

Cross-Listed: AIS 430

IST 450 The Job Campaign 3 cr

Practical approach to career development designed to help students develop strategies for obtaining suitable employment and making career choices. Emphasis is on the principles, methods, and practice in achieving career goals through the study of careers, preparing resumes, writing letters of application, practicing job interview techniques, and identifying prospective employers.

Cross-Listed: CP 450

IST 490 Special Topics - 1-6 cr

A variable topics course treating special themes. May be repeated for credit when course content varies.

IST 494 Directed Studies 1-6 cr

Directed Study of a topic consistent with the student's individualized program under the supervision of a member of the university faculty.

Cross-Listed: AIS 494

IST 495 Prof Leadership & Teamwork 3 cr

Students will examine their skills, abilities, personality, attitudes, values, interests, and behaviors within the context of current scholarship on leadership to increase awareness of their leadership competencies.

Prerequisite: IST 302 Minimum Grade of D

Cross-Listed: AIS 495

IST 498 Internship I-Capstone Exp-W 3-9 cr

This internship course provides the student an opportunity to have an internship filed experience and to reflect on and critically evaluate that internship experience, particularly as it relates to the interdisciplinary course of study. Students will prepare reports, write papers, make presentations, and engage in group discussion that critically considers their internship experience.

Prerequisite: (IST 350 Minimum Grade of C or AIS 350 Minimum Grade of C) and (IST 302 Minimum Grade of D and IST 330 Minimum Grade of D)

Cross-Listed: AIS 498

IST 499 Honors Senior Thesis - H-W 3-6 cr

A substantial research project reflecting a commitment to genuine scholarship in the student's field of study. Provides an opportunity for the student to design a comprehensive research project, analyze and synthesize research data, and develop expertise in a particular subject. Fulfills the senior project requirement for the honors program.

Cross-Listed: AIS 499

IST 500 Global Orientn-Ed Abroad-Grad 1 cr

This is a pre-departure academic and orientation process course for all graduate students who plan on studying abroad in terms following their participating in this course. This course will facilitate the application, academic advising, pre-departure advising, and activities related to getting students ready for participation in their actual program abroad.

Notes:

- (W) Writing-Intensive Course - 2 Required

Major Milestones

Effective fall 2016, the Interdisciplinary Studies degree includes a Major Milestones guideline to help students stay on track for timely graduation. In order to remain on track, students must complete the Milestone requirements for each term. Requirements for Major Milestones apply only to full-time degree-seeking students who entered fall 2016 or later. These requirements are viewable on the Major Milestones table below.

- Students who earn an English ACT score of 27, or a written SAT score of 610, can opt out of EH 101.
- Must have one history elective and one literature elective. In addition, students must choose a second history or literature course to complete a two-part sequence.

Two designated writing courses are required with at least one course chosen from the student's major. Writing courses are identified in the University Bulletin by a (W) after the course title.

This Sample 4-Year Plan is designed as a guide for students preparing for their course selections and only provides only a suggested schedule. Actual course selections should be made in consultation with an academic advisor.

Interdisciplinary Studies Minor Degree Requirements

Students in other colleges may elect, with the approval of their department chair, an IST minor in the College of Education and Professional Studies. A 2.0 GPA is required for the courses applied toward the minor. Students must complete at least 50% of the courses counted towards the IST minor at the University of South Alabama. The minor consists of 18 credit hours, comprised of 4 upper-division courses (12 hours) and 2 electives (6 hours).

Title	Name
Chair	R. Allan Allday
Professors	Baxter, Giles, Green, Kent
Associate Professors	Allday, Ferguson, Johnson, Maulding Green, Morton, Parrish, Reeves
Assistant Professors	Brannan, Byrd, Carmouche, Delmas, Gossen, McCorrison, Morrison, Szatkowski
Senior Instructor	Simpson
Instructors	Holland

Undergraduate

The Department offers the Bachelor of Science degree in Education leading to Alabama Class B certification in the following areas: Elementary Education, Early Childhood Education, Secondary Education, and Special Education. The department offers the Bachelor of Science degree in Education with a major in Early Childhood Studies.

Graduate

The department offers the M.Ed. degree leading to Alabama Class A Certification in the following areas: Art Education, Instructional Leadership, Elementary Education, Early Childhood Education, English for Speakers of Other Languages, Secondary Education, and Special Education. The department offers the M.Ed. degree in Educational Administration with an emphasis in higher education leadership. The department also offers the Instructional Specialist degree (Ed.S.) leading to Alabama Class AA Certification in the following areas: Early Childhood Education, Elementary Education, Instructional Leadership, Reading Specialist, Secondary Education, Special Education and Teacher Leader. The department offers the Doctor of Education degree in Educational Leadership.

Courses

Art Education (AED)

AED 301 Visual Arts for Young Children 3 cr

Exploration of knowledge and skills in the arts appropriate for young children. Art techniques and media are explored.

AED 440 Arts for Learning 3 cr

Using the arts to promote physical, social, emotional, and cognitive development.

Prerequisite: SED 340 Minimum Grade of C and SED 341 Minimum Grade of C

Corequisite: AED 441

AED 441 Art in the N-12 Program 3 cr

Art and the intellectual, creative, and emotional growth of adolescents and youth. The study of appropriate techniques and materials for teaching studio art and crafts, art history, appreciation and aesthetics, and participation in humanities programs at the secondary level. Laboratory practice in the secondary school. Restricted to N-12 art majors. Prerequisites: Completion of two-thirds of teaching field.

Prerequisite: SED 340 Minimum Grade of C and SED 341 Minimum Grade of C

Corequisite: AED 440

AED 494 Dir St - 1-3 cr

No more than two directed study courses can be counted toward the Bachelor's degree and Class B Certificate. Prerequisite: Permission of department chair.

AED 501 Trn-Prac Tch Art Elem Sc 3 cr

Orients the student toward the artistic interests and creative abilities of children in the elementary school, and developing attitudes of respect for individuality and creativity. Included are laboratory experiences with art materials and research into appropriate techniques of teaching art

AED 502 Trn-Prac Tch Art Sec Sch 3 cr

Current trends and practices in curriculum, instruction, selection of materials, and derivation of procedures for guiding learning in art in the secondary school.

AED 540 Art in the N-12 Program 3 cr

Art and the intellectual, creative, and emotional growth of children. The role of art in the instructional program, examination of objectives in an art program, and the study of appropriate techniques and materials for teaching art and crafts at the elementary level. Restricted to N-12 art majors.

Prerequisite: SED 555 Minimum Grade of B and SED 559 Minimum Grade of B and EPY 525 Minimum Grade of B

AED 560 Grad Research Seminar 3 cr

Research in problems confronting American education. Selected topics are explored by students which provide the basis for seminar discussions. A seminar paper is presented by each student. This course also includes a field-based practicum. Prerequisite: Permission of department chair.

AED 590 Sp Top - 3 cr

Current topics of special concern to secondary educators. A different topic will be used each time the course is offered. No more than 6 hours can be applied toward a graduate degree. Prerequisite: Permission of department chair.

AED 594 Dir St - Research 1-3 cr

Students explore through directed study problems and issues of special interest or significance in Art Education. No more than 3 hours of any departmental 594 courses can be applied toward a degree program. Prerequisite: Permission of department chair.

AED 595 Internship 1-6 cr

The internship is a supervised learning experience in a work setting similar to that in which the educator will eventually be employed. The internship provides the students with an opportunity to apply the theories and concepts learned during the graduate program of study.

Prerequisite: (PRAXIS-Art Cont Knowledge 158 or PRAXIS-Art Cont Knowledge 158)

Educational Leadership (EDL)

EDL 410 Leadership Development 1 cr

This course is for undergraduates who are, or aspire to be, leaders. Faculty from throughout the University will direct weekly class sessions. Requires permission of the Dean of Students.

EDL 501 Theories Instructnl Leadership 3 cr

The need for instructional leaders to understand and be able to operate within the larger context of community effect on opportunities for all students is addressed. Cooperation among schools, the district, parents, and the larger community as essential to the success of instructional leaders and students and ethical practices are emphasized.

EDL 502 Data-Driven Instrucnl Leadrshp 3 cr

This course stresses the engagement of the school community in developing and maintaining a shared vision; planning effectively; using critical thinking and problem-solving techniques; collecting, analyzing, and interpreting data; allocation of resources; and evaluation of results for the purpose of continuous school improvement.

EDL 503 Supervision & Prof Development 3 cr

This course addresses how the instructional leader recruits, selects, organizes, evaluates, and mentors faculty and staff to accomplish school and system goals.

EDL 504 Ethical & Legal Dimens Sch Ldr 3 cr

Students completing this course will demonstrate understanding of the legal system of schools. Students will be able to relate constitutional, federal, state, and local requirements as they concern students, employees, teachers, and instructional program administration. The student will demonstrate an understanding of the concepts of honesty, integrity, and fairness.

EDL 505 Bus Mgmt of Lrng Organizations 3 cr

This course explores leadership skills related to group dynamics, problem identification, accountability, diversity, economic levels, and their relationship to financing schools. Internal and external public relations and political factors which impact the funding of school will also be presented.

EDL 506 Teaching and Learning Leaders 3 cr

Student will acquire the knowledge to ensure that decisions about curricular, instructional strategies, assessment and professional development are based on sound research, best practices, and other contextual information needed to align the curricula with student needs.

EDL 510 Theories of Adlt Tchg & Lrng 3 cr

This course is an introduction to the pedagogy of teaching adult learners. Topics will include basic instructional design, strategies to meet needs of adult learners, higher order questioning, student assessment, and mechanisms for providing feedback to students. The class will model effective teaching and assessment practices. Participants will be expected to demonstrate effective teaching in a summative class presentation.

EDL 512 Community Development 3 cr

Presents the field of community development, including basic terminology, concepts, methods and literature. Purposes are to present conceptual foundations of community development, provide some experiences in practical application, and lay foundations for further study and practice in the field.

EDL 513 Instr Lead and Curr Dev 3 cr

Students in this course will learn to participate in the process of instructional improvement, adaptation to the needs of children and local communities, and instructional leadership within schools. The course will include staff development, instructional evaluation and assessment, school effectiveness concepts, government requirements, cultural diversity, curriculum development, problem solving, small group leadership, conflict management, empowerment, professional ethics, and other interpersonal skills applied to instructional development situations.

Corequisite: EDL 595A

EDL 517 Education Law 3 cr

Students completing this course will demonstrate understanding of the legal system of schools. Students will be able to relate to constitutional, federal, state, and local requirements as they concern students, employees, teachers, and instructional program administration. Students will understand statutory rights of certified and non-certified personnel in Alabama, including due process, tenure, transfer, suspension, and termination, and will be able to investigate legal matters affecting the administration of schools.

Corequisite: EDL 595B

EDL 525 School Finance 3 cr

This course explores leadership skills related to group dynamics, problem identification, accountability, diversity, economic levels, and their relationship to financing schools. Internal and external public relations and political factors which impact the funding of school will also be discussed. Fiscal management, including the Alabama Local School Accounting and Reporting system, will be analyzed.

Corequisite: EDL 595C

EDL 530 School Dist Leadership 3 cr

This course describes the unique forces that shape the role and functions of the school superintendent. The management of conflict is explored as well as the management of all aspects of this school system. The concept of the administrative team is also explored and examined.

EDL 545 Secondary School Leadership 3 cr

Provides understandings and skills in the leadership and management of secondary schools. Emphases are placed upon the administrator's role in staff and student personnel administration, program development, and building operations.

EDL 546 Elem School Leadership 3 cr

Provides an understanding of the organizational and various other characteristics of a good elementary school with emphasis on leadership.

EDL 549 Practicum in Educ Supv 3 cr

The practicum is a supervised learning experience in several settings which simulates the work situations of educational supervision. An opportunity is provided to apply the theories and concepts learned during the student's graduate program.

EDL 550 Prin of School Lead 3 cr

This course provides understanding and skills in the leadership and management of schools, including elements of effective classroom management, monitoring student services, and school and community relations. Management skills associated with school facilities, transportation, and student records will be studied.

EDL 557 Supervisory Leadership 3 cr

Students completing this course will learn to work with teachers in improving classroom instruction. Students will demonstrate the ability to collect classroom information, including assessment and evaluative data; coordinate student service needs; direct teachers using leadership, motivational techniques, professional ethics, and school management; and use techniques such as personnel selection, stress management, conflict management, scheduling, and research in adapting instruction to the changing needs of the community.

Corequisite: EDL 595E

EDL 561 Dev of Postsecondary Education 3 cr

This course provides an overview of the organization, development and characteristics of postsecondary education.

EDL 562 Student in Higher Education 3 cr

This course focuses on the demographics and characteristics of the American college student today. Development theories applicable to the diverse population of students (e.g., race, ethnicity, age, gender, sexual orientation, disability) are introduced and examined.

EDL 573 Educational Gerontology 3 cr

Will introduce the students to the organization and administration of programs of instruction of and about older persons, instruction of general or specific audiences about aging, and instruction of professionals working with or on the behalf of older persons.

EDL 575 Org and Plan Postsec Educ 3 cr

Designed as an introduction to and an analysis of organizational and administrative features of postsecondary education.

EDL 578 Law and Postsecondary Educ 3 cr

Explores court decisions and federal and state laws relating to governance, student rights, and tort liability in postsecondary education.

EDL 590 Sp Top - 1-3 cr

Guided supervision in the identification and completion of educational tasks, such as program design, program revision, self study for accreditation visitation, supervision in the organization, and application of selected learning activities to acquire and enhance leadership skills.

EDL 594 Dir St and Research 1-3 cr

Exploration of problems and issues of special interest or significance in Educational Leadership. Not more than three semester hours of any departmental 594 courses can be accepted toward a degree.

EDL 595 Internship 1-6 cr

The internship is a supervised learning experience in several work settings which simulates the reality of Educational Leadership work situations. The internship provides an opportunity to apply the theories and concepts learned during the student's graduate program. Students are expected to complete no less than 50 hours for each semester hour earned.

EDL 595A Internship A 1 cr

The internship is a supervised learning experience in several work settings which simulates the reality of Education Leadership work situations. The internship provides an opportunity to apply the theories and concepts learned during the student's graduate program. Students are expected to complete no less than 50 hours for each semester hour earned.

Corequisite: EDL 513

EDL 595B Internship B 1 cr

The internship is a supervised learning experience in several work settings which simulates the reality of Educational Leadership work situations. The internship provides an opportunity to apply the theories and concepts learned during the student's graduate program. Students are expected to complete no less than 50 hours for each semester hour earned.

Corequisite: EDL 517

EDL 595C Internship C 1 cr

The internship is a supervised learning experience in several work settings which simulates the reality of Educational Leadership work situations. The internship provides an opportunity to apply the theories and concepts learned during the student's graduate program. Students are expected to complete no less than 50 hours for each semester hour earned.

Corequisite: EDL 525

EDL 595D Internship D 1 cr

The internship is a supervised learning experience in several work settings which simulates the reality of Educational Leadership work situations. The internship provides an opportunity to apply the theories and concepts learned during the student's graduate program. Students are expected to complete no less than 50 hours for each semester hour earned.

Corequisite: EDL 550

EDL 595E Internship E 1 cr

The internship is a supervised learning experience in several work settings which simulates the reality of Educational Leadership work situations. The internship provides an opportunity to apply the theories and concepts learned during the student's graduate program. Students are expected to complete no less than 50 hours for each semester hour earned.

Corequisite: EDL 557

EDL 595F Internship F - Related Topics 1 cr

The internship is a supervised learning experience in several work settings which simulates the reality of Educational Leadership work situations. The internship provides an opportunity to apply the theories and concepts learned during the student's graduate program. Students are expected to complete no less than 50 hours for each semester hour earned.

EDL 598 Residency - 1-6 cr

The internship is designed to place candidates in the cooperating school during critical times of instructional planning. The residency allows interns to experience leadership in as many of the Alabama Leadership Standard indicators as possible. Candidates shall prepare and maintain a comprehensive portfolio which indicates the level of experiences and knowledge gained in instructional leadership during the intern experiences.

Prerequisite: PRAXIS-Ed Lead Admin/Superv 146

EDL 603 Curr Prob and Iss Ed Adm 3 cr

Explores problems and issues at the federal, state, and local levels facing the administration and supervision of American educational institutions. Particular emphasis is on decision making affecting education.

EDL 607 Lead Schs/Multicultural Soc 3 cr

Students will examine the role of educational leaders in schools with diverse student populations and study strategies to address race, class and gender inequities that exist in schools.

EDL 611 Human Relations Skills 3 cr

Designed to assess and improve the student's level of competency in communication and group leadership skills, knowledge of socio-cultural influences and differences, and understanding of the developmental characteristics of human beings.

EDL 621 Sem Prog Curriculum Dev 3 cr

Designed to assess and improve the student's level of competency in program development skills, instructional strategies, systems analysis, and change innovation.

EDL 631 Sem Ed Management Skills 3 cr

Designed to assess and improve the student's knowledge of decision-making styles, problem-solving processes, leadership skills, implementation of organizational change, and physical environments which promote productivity. Additionally, when appropriate to the candidate's expected leadership position, current knowledge of law, finance, plant management, and professional negotiations will be stressed.

EDL 689 Quantitative/Action Research 3 cr

Basic principles of quantitative and action research for decision making and problem solving in the educational environment.

EDL 690 Sp Top - 1-3 cr

May be a content-varying course or may be guided supervision in the identification and completion of educational tasks as well as supervision in the organization and application of selected learning activities to acquire and enhance leadership skills. May be repeated for credit when course content varies.

EDL 694 Dir St and Research 1-3 cr

Students explore problems and issues of special interest or significance to advanced students. Not more than three semester hours of any department 694 courses can be accepted toward a degree.

EDL 695 Mentoring Leadership 3 cr

This course is a learning experience in mentoring relationships. The course provides an opportunity to apply the theories and concepts learned during the student's advanced graduate studies. The student will learn mentoring skills and serve as a mentor for students interested in educational administration or new to the field of administration.

EDL 699 Research Project 1-3 cr

A supervised field project, study, or investigation in Educational Leadership. The student will conduct an investigation and apply concepts and skills learned during the sixth-year program.

Prerequisite: IDE 692 Minimum Grade of B or EDU 692 Minimum Grade of B

EDL 699A Research Project 1-3 cr

A supervised field project, study, or investigation in Educational Leadership. The student will conduct an investigation and apply concepts and skills learned during the sixth-year program.

Prerequisite: IDE 692 Minimum Grade of B or EDU 692 Minimum Grade of B

EDL 699B Research Project 1-3 cr

A supervised field project, study, or investigation in Educational Leadership. The student will conduct an investigation and apply concepts and skills learned during the sixth-year program.

Prerequisite: IDE 692 Minimum Grade of B or EDU 692 Minimum Grade of B

EDL 699C Research Project 1-3 cr

A supervised field project, study, or investigation in Educational Leadership. The student will conduct an investigation and apply concepts and skills learned during the sixth-year program.

Prerequisite: IDE 692 Minimum Grade of B

EDL 701 Adv Organizational Theory 3 cr

An in-depth exploration of organizing in educational settings. Organizational theories and models are examined, as is their application to educational settings, particularly when challenges or changes are introduced.

EDL 702 School Finance 3 cr

General study of finance at local, state, and federal basis. Include principles of taxation, the concepts of equity and adequacy, acceptable practices in securing and administering school funds, and acceptable accounting and business procedures. Explores the unique characteristics of the Alabama Tax structure, its history, and impact on the funding of education.

EDL 703 Adv School Leadership 3 cr

This course explores research-based practices of effective leadership in P-12 education settings. The role of mission and vision in the leadership of an organization, decision-making models, and leadership styles will be explored.

EDL 720 Global Education 3 cr

This course focuses on similarities and differences in the ways various countries educate their citizens from early childhood to adult learners.

EDL 732 Ethics and Law for Ed Leaders 3 cr

An examination of ethical and legal issues present in educational settings, including primary, secondary, and postsecondary education.

EDL 798A Research Project 1-3 cr

A supervised field project, study, or investigation in Educational Leadership. The student will conduct an investigation and apply concepts and skills learned during the sixth-year program.

Prerequisite: IDE 792 Minimum Grade of B

EDL 798B Research Project 1-3 cr

A supervised field project, study, or investigation in Educational Leadership. The student will conduct an investigation and apply concepts and skills learned during the sixth-year program.

Prerequisite: IDE 792 Minimum Grade of B

EDL 798C Research Project 1-3 cr

A supervised field project, study, or investigation in Educational Leadership. The student will conduct an investigation and apply concepts and skills learned during the sixth-year program.

Prerequisite: IDE 792 Minimum Grade of B

EDL 799 Research/Dissertation 1-12 cr

Directed dissertation research in the field of educational leadership. Faculty advisor approval required.

Edu-K-6 and 6-12 Teacher (EDU)**EDU 100 Role of the Teacher 2 cr**

This course provides a broad overview of education, schools, and teaching as well as an orientation to the K-6 Teacher Education Program.

EDU 125 Step 1: Inquiry Approaches to Teaching 1 cr

The goal of Step 1: Inquiry Approaches to Teaching is to have undergraduate students explore teaching mathematics or science in an upper-elementary setting. This 1-credit hour course provides students with an introduction to inquiry-based science and mathematics instruction through experiencing inquiry-based instruction as a learner, and implementing inquiry-based instruction in a real classroom setting. Course objectives focus on learning to write an inquiry-based lesson plan, examining strategies for achieving instructional equity, and demonstrating use of instructional technology. Step 1 is a first course within the UTeach minor.

EDU 290 Special Topics 1-3 cr

Guided study of selected educational tasks (e.g. curriculum revision, classroom materials development, models of learning and teaching) and teaching problems and practices for improving student achievement. Not more than six hours may be earned in Special Topics courses.

EDU 300 Classroom Management 1 1-3 cr

An introductory course in classroom management with emphasis upon effective instructional practices that inhibit student behaviors incompatible with learning. The focus is upon PEPE and how it provides the framework for effective teaching practices through the use of rules and procedures.

Prerequisite: (EDU 311 Minimum Grade of C and EDU 332 Minimum Grade of C and EDU 335 Minimum Grade of C and EDU 337 Minimum Grade of C and EDU 345 Minimum Grade of C)

Corequisite: EDU 430

EDU 301 Arts in the Elementary School 3 cr

Knowledge and skills appropriate to the elementary school art program. Techniques in media for teaching art in the various grades.

EDU 302 Classroom Management 2 1 cr

An introductory course in classroom management with emphasis upon effective instructional practices that inhibit student behaviors incompatible with learning. The focus is upon PEPE and how it provides the framework for effective teaching practices through the use of rules and procedures.

Prerequisite: EDU 300 Minimum Grade of C and EDU 303 Minimum Grade of C and EDU 313 Minimum Grade of C and EDU 336 Minimum Grade of C and EDU 312 Minimum Grade of C and EDU 331 Minimum Grade of C and PRAXIS-Read/Lang Arts Subtest 157 and PRAXIS-Mathematics Subtest 157 and PRAXIS-Social Studies Subtest 154 and PRAXIS-Science Subtest 158

Corequisite: EDU 311, EDU 335, EDU 337, EDU 345, EDU 362

EDU 303 Field Experience SPE 1-3 cr

An in-field opportunity for early field-based practicum in a variety of placements.

Prerequisite: EDU 330 Minimum Grade of C

Corequisite: EDU 312, EDU 313, EDU 331, EDU 336, EDU 362

EDU 311 Partnerships in SPE 3 cr

Emphasis is on the special problems found in the home, community, and school of the exceptional child, the teacher, the family, and community resource agencies. Ways for the teacher to form teamships to work collaboratively with all human resources involved in the child's life are explored and ethical and moral standards examined.

Prerequisite: EDU 303 Minimum Grade of C and EDU 312 Minimum Grade of C and EDU 313 Minimum Grade of C and EDU 331 Minimum Grade of C and EDU 336 Minimum Grade of C and EDU 362 Minimum Grade of C

Corequisite: EDU 332, EDU 335, EDU 337, EDU 345

EDU 312 Intell and Physical Disabilit 3 cr

A study of the intellectual and physical disability which usually require substantial curriculum adaptations or ecological accommodation. Historical perspectives, etiology, definitions, classification, treatment, social aspects and interdisciplinary team work will be explored.

Prerequisite: EDU 330 Minimum Grade of C

Corequisite: EDU 303, EDU 313, EDU 331, EDU 336, EDU 362

EDU 313 Learning & Behav Disorders 3 cr

An examination of the definitions, characteristics, and prevalence of children with learning and/or behavioral disabilities. Emphasis is placed on the causes of problems in motor, perceptual, social, academic, affective and behavioral development. Students will be introduced to current service delivery models and the programming options for individuals with learning and behavioral disabilities.

Prerequisite: EDU 330 Minimum Grade of C

Corequisite: EDU 303, EDU 312, EDU 331, EDU 336, EDU 362

EDU 321 Field Experience in SpeEd Sett 1 cr

A series of in-field opportunities in Special Education. A variety of appropriate placements will be employed depending on each student's interest and needs. May be repeated for credit.

EDU 322 Field Experience in SpeEd Sett 1 cr

A series of in-field opportunities in Special Education. A variety of appropriate placements will be employed depending on each student's interest and needs. Students are placed in settings related to the student's major areas of study and co-requisites in progress. May be repeated for credit.

Corequisite: EDU 354

EDU 330 Foundations Read Instruct - W 3 cr

A course to orient the study to fundamentals in the teaching of reading and provides practice in basic skills. This course has a required field experience.

EDU 331 Teaching Reading 3 cr

A course focusing on methodology, materials, and techniques for developing systematic instruction and diagnosis appropriate for early childhood and elementary children. This course has a required field experience.

Prerequisite: EDU 330 Minimum Grade of C

Corequisite: EDU 303, EDU 312, EDU 313, EDU 336, EDU 362

EDU 332 Teaching Language Arts 3 cr

A course presenting methods of promoting meaningful language and literacy skills in early childhood and elementary school programs. This course has a required field experience.

Prerequisite: EDU 303 Minimum Grade of C and EDU 312 Minimum Grade of C and EDU 313 Minimum Grade of C and EDU 331 Minimum Grade of C and EDU 336 Minimum Grade of C and EDU 362 Minimum Grade of C

Corequisite: EDU 311, EDU 335, EDU 337, EDU 345

EDU 335 Teaching Mathematics - W 3 cr

A course which deals with effective methods of teaching mathematics to elementary school students. Emphasis will be on developing an understanding of numbers, teaching basic operations, and using teaching aids and materials to meet the various needs of elementary age children. This course has a required field experience.

Prerequisite: EDU 303 Minimum Grade of C and EDU 312 Minimum Grade of C and EDU 313 Minimum Grade of C and EDU 331 Minimum Grade of C and EDU 336 Minimum Grade of C and EDU 362 Minimum Grade of C and (PRAXIS-Mathematics Subtest 157 or PRAXIS-Mathematics Subtest 157) and (PRAXIS-Social Studies Subtest 154 or PRAXIS-Social Studies Subtest 154) and (PRAXIS-Science Subtest 158 or PRAXIS-Science Subtest 158)

Corequisite: EDU 311, EDU 332, EDU 337, EDU 345

EDU 336 Teaching Social Studies 3 cr

A course using problem solving and independent investigation as means as teaching the relationship of humans to their environment. Objectives, content and procedures are discussed. This course has a required field experience.

Prerequisite: EDU 330 Minimum Grade of C

Corequisite: EDU 303, EDU 312, EDU 313, EDU 331, EDU 362

EDU 337 Teaching Science 3 cr

A course using discovery, inquiry and problem-solving approaches as a means of teaching science. Relationships of science to entire early childhood and elementary curriculum is discussed. This course has a required field experience.

Prerequisite: EDU 303 Minimum Grade of C and EDU 312 Minimum Grade of C and EDU 313 Minimum Grade of C and EDU 331 Minimum Grade of C and EDU 336 Minimum Grade of C and EDU 362 Minimum Grade of C

Corequisite: EDU 311, EDU 332, EDU 335, EDU 345

EDU 340 Fundamentals of Teaching - W 3 cr

This course provides an introduction to effective instructional practices in the secondary classroom. The focus is on planning for instruction and classroom management. This course has both required class meetings and field experiences.

Prerequisite: EDM 310 Minimum Grade of C and EDU 400 Minimum Grade of C and EPY 351 Minimum Grade of C

EDU 341 Middle Level Education - W 3 cr

Philosophy, concepts, and issues of middle level education including the developmental stage of young adolescence, appropriate and responsive curricular, and meeting the physical, emotional, psychosocial, and cognitive needs of diverse learners.

Prerequisite: EDU 340 Minimum Grade of C and EDU 453 (may be taken concurrently) Minimum Grade of C or EDU 454 (may be taken concurrently) Minimum Grade of C or EDU 456 (may be taken concurrently) Minimum Grade of C or EDU 457 (may be taken concurrently) Minimum Grade of C

Corequisite: EDU 342, EDU 363, EDU 451

EDU 342 Secondary Field Experience 1-3 cr

Supervised practice in teaching curriculum areas in middle and high school classroom settings during the semester in which block courses are taken.

Prerequisite: EDU 340 Minimum Grade of C and EDU 453 (may be taken concurrently) Minimum Grade of C or EDU 454 (may be taken concurrently) Minimum Grade of C or EDU 456 (may be taken concurrently) Minimum Grade of C or EDU 457 (may be taken concurrently) Minimum Grade of C

Corequisite: EDU 341, EDU 363, EDU 451

EDU 345 Field Experience 1-3 cr

Supervised practice in teaching curriculum areas in the elementary or early childhood classroom setting during the semester in which sequence courses are taken.

Prerequisite: EDU 303 Minimum Grade of C and EDU 312 Minimum Grade of C and EDU 313 Minimum Grade of C and EDU 331 Minimum Grade of C and EDU 336 Minimum Grade of C and EDU 362 Minimum Grade of C

Corequisite: EDU 311, EDU 332, EDU 335, EDU 337

EDU 346 K-6 Education 3 cr

This course will introduce the roles of the teacher in working with children in the elementary grades.

EDU 348 P-3 Education 3 cr

This course will introduce the roles of the teacher in working with children during the early childhood years (preschool through 3rd grade)

EDU 352 Literature for Adolescents 3 cr

This course will introduce the roles of the teacher in working with children from pre-kindergarten through the primary grades. History, management, and parent education techniques are presented.

EDU 354 Serving Students Severe Disabilities 3 cr

Curriculum and methods for individuals who exhibit significant challenges in the areas of cognitive, motor, self care, communicative, and/or social behaviors. Emphasis is on physical management, class/individual scheduling, adapted aids and equipment, task analysis, and functional life skills.

EDU 362 Behavior Management of Exceptional Child 3 cr

Presentation of the principles and applications of behavioral modification, data collection procedures, and single-subject research designs as related to exceptional children and youth in special education environments.

Corequisite: EDU 303, EDU 312, EDU 313, EDU 331, EDU 336

EDU 363 Teaching Adaptive Curriculum Through Behavior/Classroom 3 cr

An examination of regular and special education K-12 curricula, materials, and procedures. Specific emphasis will be placed on the selection modification, and adaptation of curricula, materials, and procedures to meet the needs of individuals with learning and behavioral disabilities.

Prerequisite: EDU 340 Minimum Grade of C

EDU 372 Behavior Management of Exceptional Child 3 cr

Presentation of the principles and applications of behavior analysis, data collection procedures, and single subject research designs as related to exceptional children and youth.

EDU 373 Teaching Reading to Students with Disabilities 3 cr

Introduces the student to the curriculum, teaching the methodologies and instructional activities and materials associated with effective and appropriate developmental and functional reading instruction for students with disabilities.

EDU 398 P-3 Field Experience 1-3 cr

Observation and supervised teaching in an early childhood classroom setting prior to Internship

Prerequisite: EDU 348 Minimum Grade of C

EDU 400 Education of Exceptional Children and Youth 3 cr

Introduction to the field of exceptional children and youth, involving the study of various areas of exceptionality.

EDU 410 Formal and Informal Assessment 3 cr

Assesses developmental levels, academic and non-academic performance of exceptional individuals through the administration and interpretation of criterion-referenced instruments, and informal measures. Evaluation of classroom teaching and special education programs is also emphasized.

EDU 429 Opening School Lab Experience 1 cr

Professional laboratory experiences of observation and participation for a two-week period at the opening of school. (May be taken twice.)
Prerequisite: senior standing.

EDU 430 K-6 Internship 3-10 cr

Observation and supervised teaching in elementary or early childhood settings with the opportunity for study and discussion of problems and issues encountered.

Prerequisite: (EDU 311 Minimum Grade of C and EDU 332 Minimum Grade of C and EDU 335 Minimum Grade of C and EDU 337 Minimum Grade of C and EDU 345 Minimum Grade of C) and (PRAXIS-Mathematics Subtest 157 or PRAXIS-Mathematics Subtest 157) and (PRAXIS-Social Studies Subtest 154 or PRAXIS-Social Studies Subtest 154) and (PRAXIS-Science Subtest 158 or PRAXIS-Science Subtest 158) and (PRAXIS-Teaching Reading CB 159 or 190 200)

Corequisite: EDU 300

EDU 430L K-6 Internship Lab 3-9 cr

Observation and supervised teaching in elementary or early childhood settings with the opportunity for study and discussion of problems and issues encountered.

EDU 432 Impact of Typical and Atypical Development on Education 3 cr

An examination of typical child development and developmental characteristics of infants, toddlers, and young children with disabilities from the prenatal period through age eight. Characteristics of disabling conditions and their impact upon development are also discussed.

EDU 433 Issues in Education of Young Children with Disabilities 3 cr

This course prepares students to work with infants, toddlers, and young children with disabilities and their families. Topics covered include specific teaching and intervention techniques, special education laws and regulations, and service delivery models.

EDU 451 Content Area Literacy 3 cr

Methods and materials in the teaching of reading. Development of effective study and skills at the secondary level is stressed.

EDU 453 Teaching Language Subjects 3 cr

Assists the student in organizing materials and in developing methods of teaching language subjects in secondary schools

Prerequisite: EDU 340 Minimum Grade of C

Corequisite: EDU 341, EDU 342

EDU 454 Teaching Mathematics 3 cr

Assists the student in organizing materials and in developing methods of teaching mathematics in secondary schools.

Prerequisite: EDU 340 Minimum Grade of C

Corequisite: EDU 341, EDU 342

EDU 456 Teaching Science 3 cr

Assists the student in organizing materials and in developing methods of teaching science in secondary schools

Prerequisite: EDU 340 Minimum Grade of C

Corequisite: EDU 341, EDU 342

EDU 457 Teaching Social Studies 3 cr

Assists the student in organizing materials and in developing methods of teaching social studies in secondary schools

Prerequisite: EDU 340 Minimum Grade of C

Corequisite: EDU 341, EDU 342

EDU 465 Student Teaching Secondary Sch 3 cr

Observation and supervised teaching with opportunity for study and discussion of problems and issues encountered in the N-12 program. Students will be placed with a person holding a valid teaching certificate in the appropriate field. Prerequisite: Appropriate methods course.

Prerequisite: EDU 341 Minimum Grade of C

EDU 466 Internship-Language Arts 3-9 cr

Observation and supervised teaching with opportunity for study and discussion of problems and issues encountered in the 6-12 program. Students will be placed with a person holding a Masters degree and a valid teaching certificate in the appropriate field.

Prerequisite: (EDU 341 Minimum Grade of C and EDU 453 Minimum Grade of B and PRAXIS-Eng Lang Arts-Cont Know 167)

EDU 467 Internship - Social Studies 3-9 cr

Observation and supervised teaching with opportunity for study and discussion of problems and issues encountered in the N-12 program. Students will be placed with a person holding a valid teaching certificate in the appropriate field.

Prerequisite: EDU 341 Minimum Grade of C and EDU 457 Minimum Grade of B and PRAXIS-Soc St Cont Knowledge 155 or PRAXIS-Soc Stud Cont Knowledge 155

EDU 468 Internship - Science 3-9 cr

Observation and supervised teaching with opportunity for study and discussion of problems and issues encountered in the 6-12 program. Students will be placed with a person holding a Masters degree and a valid teaching certificate in the appropriate field.

Prerequisite: EDU 341 Minimum Grade of C and EDU 456 Minimum Grade of B and (PRAXIS-Gen Sci Cont Knowledge 152 or PRAXIS-Gen Science Cont Knowl 152 or PRAXIS-Chem Cont Knowledge 150 or PRAXIS-Chemistry Cont Knowl 150 or PRAXIS-Physics Cont Knowledge 138 or PRAXIS-Biology Cont Knowledge 150)

EDU 469 Internship - Math 3-9 cr

Observation and supervised teaching with opportunity for study and discussion of problems and issues encountered in the 6-12 program. Students will be placed with a person holding a Masters degree and a valid teaching certificate in the appropriate field.

Prerequisite: (EDU 341 Minimum Grade of C and EDU 454 Minimum Grade of B and 5165 159)

EDU 490 Special Topics 3 cr

Guided study of selected educational tasks (e.g. curriculum revision, classroom materials development, models of learning and teaching) and teaching problems and practices for improving student achievement. Not more than six hours may be earned in Special Topics courses.

EDU 494 Directed Research Studies 1-3 cr

No more than six hours can be accepted for a Bachelor's Degree and Class B Certificate.

EDU 495 K-6 Internship SPE 3-9 cr

Observation and supervised K-6 classroom teaching experience providing the opportunity to synthesize all previous instruction. This culminating activity provides opportunity for study and discussion of problems and issues encountered in the practicum situation.

Prerequisite: (EDU 302 Minimum Grade of C and EDU 311 Minimum Grade of C and EDU 335 Minimum Grade of C and EDU 337 Minimum Grade of C and EDU 345 Minimum Grade of C and EDU 362 Minimum Grade of C) and (PRAXIS-Read/Lang Arts Subtest 157 and PRAXIS-Mathematics Subtest 157 and PRAXIS-Social Studies Subtest 154 and PRAXIS-Science Subtest 158 and PRAXIS-Teaching Reading CB 159)

Corequisite: EDU 430

EDU 496 Internship 6-12 9 cr

Observation and supervised classroom teaching experience providing the opportunity to synthesize all previous instruction. This culminating activity provides opportunity for study and discussion of problems and issues encountered in the practicum situation.

Prerequisite: EDU 372 Minimum Grade of C and EDU 363 Minimum Grade of C

EDU 497 P-3 Internship 3-9 cr

Observation and supervised classroom teaching experience providing the opportunity to synthesize all previous instruction. This culminating activity provides opportunity for study and discussion of problems and issues encountered in the practicum situation.

Prerequisite: EDU 432 Minimum Grade of C and EDU 433 Minimum Grade of C

EDU 498 P-3 Internship 3-10 cr

Observation and supervised teaching experience providing the opportunity to synthesize all previous instruction. This culminating activity provides opportunity for study and discussion of problems and issues encountered in the practicum situation.

Prerequisite: EDU 348 Minimum Grade of C and EDU 398 Minimum Grade of C

EDU 499 Senior Honors Project - H 3-6 cr

Under the advice and guidance of a faculty mentor, honors students will identify and carry out a research project, relevant to the field of elementary/early childhood study, that will lead to a formal presentation at the annual Honors Student Colloquium. The senior project will be judged and graded by three faculty chaired by the honors mentor. This course is required for Honors recognition and may be repeated for up to six hours. Prerequisite: Participant in honors program and junior level status.

EDU 500 Capstone Portfolio 0 cr

The capstone portfolio is a 0 credit course for graduate students whose programs require a capstone portfolio as all or part of their comprehensive exam. Students will enroll in this course for their final semester. The portfolio will be developed under the guidance of the student's academic advisor and other departmental faculty, and will demonstrate mastery of content knowledge, professional dispositions and skills.

EDU 567 Multicultural Exp in Schools 3 cr

In an increasingly diverse society, teachers must be able to work with students with form a variety of backgrounds, some quite different from teachers' own cultural backgrounds. This course responds to the growing need for better training for teachers in how to work with a diverse population, increase academic achievement, and prepare students from a global workplace.

Cross-Listed: SED 567

EDU 640 Instructional Development 3 cr

Preparation of a modular program of instruction which incorporates all elements of the instructional-design process.

EDU 650 Instructional Techniques 3 cr

Cross-Listed: IDE 650

EDU 692 Research Proj Seminar 3 cr

Survey of both current and classic research in education. Students will identify a research problem of significance in their area of specialization and develop a strategy or research design to solve this problem.

Prerequisite: IDE 510 Minimum Grade of B

Cross-Listed: IDE 692

Elem-Early Childhood (EEC)**EEC 290 Special Topics - 3 cr**

Guided study of selected educational tasks (e.g. curriculum revision, classroom materials development, models of learning and teaching) and teaching problems and practices for improving student achievement. Not more than 6 hours may be earned in Special Topics courses.

EEC 300 Creating Envir for Lrng/Play 3 cr

A study of environments that promote learning through play in early childhood. Emphasis on materials, activities, equipment, and effective strategies that support and encourage young children's play, learning and creativity.

EEC 332 Teaching Language Arts 3 cr

A course presenting methods of promoting meaningful language and literacy skills in early childhood and elementary school programs. This course has a required field experience.

Corequisite: EEC 346, RED 330, RED 333

EEC 334 Lit for the Young Child 3 cr

A survey course dealing with methods of writing literary materials with children in preschool through the primary grades. It is designed to assist those who wish to become widely acquainted with books and related materials for today's young children.

Cross-Listed: RED 334

EEC 335 Teaching Mathematics - W 3 cr

A course which deals with effective methods of teaching mathematics to elementary school students. Emphasis will be on developing an understanding of numbers, teaching basic operations, and using teaching aids and materials to meet the various needs of elementary age children. This course has a required field experience.

Prerequisite: ((MA 181 Minimum Grade of D or MA 201 Minimum Grade of D) or (MA 202 Minimum Grade of D or MA 281 Minimum Grade of D)) and EEC 346 Minimum Grade of C and RED 330 Minimum Grade of C and EEC 332 Minimum Grade of C

Corequisite: EEC 336, EEC 337, RED 331

EEC 336 Teaching Social Studies 3 cr

A course using problem solving and independent investigation as means of teaching the relationship of humans to their environment. Objectives, content and procedures are discussed. This course has a required field experience.

Prerequisite: EEC 346 Minimum Grade of C and RED 330 Minimum Grade of C and RED 333 Minimum Grade of C and EEC 332 Minimum Grade of C

Corequisite: EEC 335, EEC 337, EEC 345, RED 331

EEC 337 Teaching Science 3 cr

A course using discovery, inquiry and problem-solving approaches as a means of teaching science. Relationships of science to entire early childhood and elementary curriculum is discussed. This course has a required field experience.

Prerequisite: EEC 346 Minimum Grade of C and RED 330 Minimum Grade of C and RED 333 Minimum Grade of C and EEC 332 Minimum Grade of C

Corequisite: EEC 335, EEC 336, EEC 345, RED 331

EEC 338 Curr App Music-Movement in EC 3 cr

Focus on planning, preparing, and guiding experiences for young children in musical play, movement, and creative dramatics to develop the whole child through cooperative activities that promote language and literacy learning across the curriculum.

EEC 345 Sequence Field Experience 1 cr

Supervised practice in teaching curriculum areas in the elementary or early childhood classroom setting during the semester in which sequence courses are taken.

Prerequisite: EEC 346 Minimum Grade of C and RED 330 Minimum Grade of C and RED 333 Minimum Grade of C and EEC 332 Minimum Grade of C

Corequisite: EEC 335, EEC 336, EEC 337, RED 331

EEC 346 Early Child Prog(Birth-8)-W 3 cr

This course will introduce the roles of the adult in working with children from birth through age 8. History, management and parent education techniques are presented.

EEC 348 Lang Dev in Early Childhood 3 cr

An introduction to speech and language development birth through primary grades and teaching practices that support language and literacy development. Includes discussion of cultural and developmental factors that influence language development methods appropriate for helping young children acquire language and literacy skills.

Cross-Listed: RED 348

EEC 351 Child Development & Learning 3 cr

A study of physical, cognitive, social, and emotional development from birth to age 8. Emphasis is placed on applying an understanding of child growth and development in an educational context. This course includes a field experience in an early childhood setting.

EEC 429 Opening School Lab Exp 1 cr

Professional laboratory experiences of observation and participation for a two-week period at the opening of school. (May be taken twice.)

Prerequisite: senior standing.

EEC 430 Student Teaching - EEC 9-12 cr

Observation and supervised teaching in elementary or early childhood settings with the opportunity for study and discussion of problems and issues encountered. (Co-requisite: Lab) **Prerequisite:** Permission of department.

Prerequisite: EEC 332 Minimum Grade of C and EEC 335 Minimum Grade of C and EEC 336 Minimum Grade of C and EEC 337 Minimum Grade of C and EEC 345 Minimum Grade of C and EEC 346 Minimum Grade of C and RED 330 Minimum Grade of C and RED 331 Minimum Grade of C and RED 333 Minimum Grade of C

EEC 430L Student Teaching - EEC 0 cr

Observation and supervised teaching in elementary or early childhood settings with the opportunity for study and discussion of problems and issues encountered. (Co-requisite: Lecture) Prerequisite: Permission of department.

Prerequisite: EEC 332 Minimum Grade of C and EEC 335 Minimum Grade of C and EEC 336 Minimum Grade of C and EEC 337 Minimum Grade of C and EEC 345 Minimum Grade of C and EEC 346 Minimum Grade of C and RED 330 Minimum Grade of C and RED 331 Minimum Grade of C and RED 333 Minimum Grade of C

Corequisite: EEC 430

EEC 490 Special Topics 3 cr

Guided study of selected educational tasks (e.g. curriculum revision, classroom materials development, models of learning and teaching) and teaching problems and practices for improving student achievement.

EEC 494 Directed Studies 1-3 cr

No more than 6 hours can be accepted for a Bachelor's Degree and Class B Certificate. Prerequisite: Permission of department chair.

EEC 496 Internship- 3-9 cr

The internship is a supervised learning experience in an approved setting similar to that in which the student will eventually be employed. The internship provides students with an opportunity to apply theories and concepts learned during the undergraduate program. Requires candidacy and approval of department chair.

EEC 499 Senior Honors Project - H 3-6 cr

Under the advice and guidance of a faculty mentor, honors students will identify and carry out a research project, relevant to the field of elementary/early childhood study, that will lead to a formal presentation at the annual Honors Student Colloquium. The senior project will be judged and graded by three faculty chaired by the honors mentor. This course is required for Honors recognition and may be repeated for up to 6 credit hours. Prerequisite: Participant in honors program and junior level status.

EEC 522 Elementary School Curriculum 3 cr

The study of curriculum with an emphasis on concepts, procedures and models particular to curriculum in the elementary school. Curriculum study includes the context of and a process of planning, developing, implementing, and evaluating the elementary school curriculum.

EEC 523 Instr Plan Elem School 3 cr

Presents an overview of factors and procedures involved in planning, developing and evaluating the elementary school instructional process.

EEC 532 Lit and Lang Dev in Elem Sch 3 cr

Designed to explore the multi-dimensional theory of language development and to provide techniques and practices for development of language ability. Through correlating these related areas, the student should grow in understanding dynamics and change in language structure and development. Opportunities for oral and written communication are emphasized.

EEC 535 Trends in Teaching Mathematics 3 cr

This course emphasizes new methods of presenting mathematical content to elementary school students. Various materials will be developed to promote thinking and discovery of mathematical concepts. Opportunities are provided for developing multi-level materials appropriate to the varied abilities and interest levels in elementary school.

Prerequisite: EEC 523 (may be taken concurrently) Minimum Grade of C

EEC 536 Issues-Innov Tch Soc Studies 3 cr

Current issues and innovations in early childhood and elementary school social studies teaching and learning are reviewed.

EEC 537 Teaching Science 3 cr

Current trends and issues in early childhood and elementary school science teaching and learning are reviewed.

EEC 547 Instructional Strategies for Science Teaching 3 cr

This course prepares students to provide effective science instruction using strategies that focus on phenomena, inquiry learning, sensemaking, and science practices

EEC 548 Early Childhood Practicum 1-9 cr

Experiences in a field-setting working with children birth through age 8 under the supervision of qualified personnel.

EEC 550 Trends in Parent Education 3 cr

A study of current trends in parent education designed to promote better homeschool communication and cooperation.

EEC 551 Seminar Elem Education 3 cr

A seminar of topics, programs and research in the field of elementary education. This course provides a forum for discussion of contemporary educational issues and practicum experiences in the teaching field in which the quality of performance in teaching is evaluated.

EEC 552 Comm Svcs Families-Children 3 cr

Study of agencies which provide services, types of services provided, and means of obtaining needed services.

EEC 553 Org Patterns and Curr in ECE 3 cr

A review of organizational and curricular patterns utilized in the classroom setting for the education of young children. A study of educators and their theories concerning learning styles and developmental patterns in relation to the school setting and curriculum.

EEC 554 Lang Dev in Early Child Ed 3 cr

Study of the language development of young children with an emphasis on provision of classroom environment to promote growth of language.

EEC 555 Org-Adm In Early Childhood Ed 3 cr

Managing the multiple responsibilities of administrative heads of educational programs for young children.

EEC 556 Elementary School Curriculum 3 cr

An in-depth study of the development, implementation, and assessment of Elementary school curriculum through a theoretical and research-based lens.

EEC 557 Elementary Practicum 1-9 cr

Experiences in a field setting working with children in grades K-6 under the supervision of qualified personnel.

EEC 558 Teaching Spelling and Writing 3 cr

Analysis of methods of teaching spelling and the mechanics of writing, included review of pertinent research in the skill areas as well as emphasis on the relationship of spelling to the development of skills in word recognition.

EEC 560 Workshop Elem-Early Child Ed 3 cr

A topical workshop in which participants have experiences in creating, designing, constructing and using instructional materials and activities. No more than 6 hours can be applied toward a degree program.

EEC 562 Classroom Logis - Facilitation 3 cr

To increase teacher's competencies to facilitate learning by providing a classroom atmosphere conducive to self-discipline, participation and worthwhile learning activities.

EEC 575 Diag Lrng Difficulties in Math 3 cr

Analysis of diagnostic techniques for identifying children's learning difficulties in mathematics.

Prerequisite: EEC 535 Minimum Grade of B

EEC 577 Children's Lit for Gifted 3 cr

An exploration of research related to reading behavior of gifted and high-ability children with emphasis on examining criteria for selecting and utilizing literature to promote cognitive, emotional, and social development.

EEC 590 Sp Top - 1-3 cr

Guided supervision in the identification and completion of educational tasks, such as curriculum revision, course and/or program design, self-study for accreditation visitation, student achievement evaluation, aesthetic experiences, consumer and career education. No more than 6 hours can be applied toward a graduate degree.

EEC 592 Research Seminar 3 cr

Structured to assist graduate students in designing and implementing appropriate research for professional growth and writing of a thesis.

EEC 594 Dir St and Research 1-3 cr

Students explore through directed individual study research problems and issues of special interest or significance in elementary or early childhood education. No more than 3 hours of any departmental 594 courses can be applied toward a degree program. Prerequisite: Permission of department chair

EEC 595 Internship-Elementary 3-9 cr

The internship is a supervised learning experience in a work setting similar to that in which the educator will eventually be employed. The internship provides the student an opportunity to apply the theories and concepts learned during the graduate program of study. Prerequisite: Permission of department chair.

Prerequisite: (PRAXIS-Social Studies Subtest 154 (PRAXIS-Mathematics Subtest 157 or PRAXIS-Mathematics Subtest 157) or PRAXIS-Social Studies Subtest 154) and (PRAXIS-Science Subtest 158 or PRAXIS-Science Subtest 158) and PRAXIS-Teaching Reading CB 159 or 190 233

EEC 598 Internship Early Childhood Edu 3-9 cr

The internship is a supervised learning experience in a work setting similar to that in which the educator will eventually be employed. The internship provides the student an opportunity to apply the theories and concepts learned during the graduate program of study. Prerequisite: Permission of department chair.

Prerequisite: PRAXIS-Early Child Edu 156 and PRAXIS-Teaching Reading CB 159 or 190 233

EEC 599 Thesis 1-9 cr

A student selects a project, study, or investigation related to his area of specialization in early childhood or elementary education. The project forms a basis for the thesis. A thesis committee will provide direction during the investigation for and writing of the thesis.

EEC 601 Advanced Seminar - 3 cr

In depth study of various curriculum areas through research reports, problem analysis and individual evaluation of promising practices and topical issues. Each seminar participant will concentrate on a curriculum area: e.g., arithmetic, career awareness, communication, consumer education, humanities, natural sciences, social sciences, early reading and psycholinguistics.

EEC 610 Diag and Prescriptive Teaching 3 cr

Designed to assist teachers and school leaders in understanding the skills and techniques necessary for diagnosing and prescribing instruction for learners in different types of teaching-learning settings.

EEC 622 Seminar in Curr-Inst Problems 3 cr

Critical study of curriculum and instructional problems in the elementary school. Research reviews and program design problems are emphasized.

EEC 635 Seminar in Mathematics Ed 3 cr

A study of current topics related to teaching mathematics in early childhood and elementary years.

EEC 690 Sp Top - 3 cr

Guided supervision in the identification and completion of educational tasks, such as curriculum revision, course and/or program design, self-study for accreditation visitation, student achievement evaluation. No more than 6 hours can be applied toward a graduate degree. Prerequisite: Permission of department chair.

EEC 694 Dir St and Research - 1-3 cr

Students explore through directed study problems and issues of special interest or significance in early childhood or elementary education. No more than 3 hours of any departmental 694 courses can be applied toward a degree program. Prerequisite: Permission of department chair.

EEC 695 Internship 3-9 cr

The internship is a supervised learning experience in a work setting similar to that in which an educator will eventually be employed. The internship provides the student with an opportunity to apply the theories and concepts learned during the graduate program.

EEC 699 Research Project 1-3 cr

The research project, as the culminating experience in the Instructional Specialist Program, provides an opportunity for the candidate to synthesize and apply the various program components in a selected instructional setting. Suitable agreements are reached with the appropriate school systems by the candidate. May be taken more than one semester. Prerequisite: Permission of department chair.

Prerequisite: EEC 601 Minimum Grade of B and EEC 610 Minimum Grade of B and EEC 622 Minimum Grade of B and (IDE 692 Minimum Grade of B or EDU 692 Minimum Grade of B)

English Lang Teaching (ELT)**ELT 325 Survey of ESL 3 cr**

A comprehensive survey of current research, methodology and materials in the field of English as a Second Language and historical, philosophical, political, legal, social and educational issues that have contributed to policy regarding public school services for language minority students.

ELT 330 Methods and Materials for ESL 3 cr

Techniques of teaching English as a second language will be introduced and applications explored. Acquaints students with methodology and materials, with instruction on the preparation of audio and visual teaching aids, lesson plans and the use of educational technology, behavioral objectives, state ESOL objectives and teaching strategies for English learners in the ESL or mainstream classroom. ELT 525 is a recommended pre-requisite or co-requisite course, but is not a requirement.

ELT 345 Cross-Cultural Understanding 3 cr

Investigates the roles of language and culture in education. Addresses the social processes involved in second language acquisition, including developmental influences, influences of home language and culture, culture variation, home vs. school cultural differences and working parents/family of ELL students.

ELT 358 Cross-Cultural Understanding 3 cr

This course provides knowledge of linguistics including English syntax, semantics, pragmatics, morphology, phonemics and phonology as applied to teaching English Language Learners. Students will review theories in first and second language acquisition. Students will apply linguistic theory, issues in sociolinguistics, psycholinguistics and neurolinguistics to teach English to ELLs, with emphasis on pronunciation, intonation and structural analysis of English and contrastive analysis of English and non-English linguistic systems.

ELT 525 Found Tchg Eng as Sec Lang 3 cr

A comprehensive survey of current research, methodology and materials in the field of English as a Second Language and historical, philosophical, legal, social, and educational issues that have contributed to policy regarding public school services for language minority populations.

ELT 530 Methods and Materials Tch ESL 3 cr

Techniques of teaching English as a second language will be introduced and applications explored. Acquaints students with methodology and materials, with instruction on the preparation of audio and visual teaching aids, lesson plans, and the use of educational technology, behavioral objectives, state ESOL objectives, and teaching strategies for the ELL student in the ESL or mainstream classroom. Course restricted to majors in ESOL education.

ELT 545 Cross-Cultural Understand Tch 3 cr

Investigates the roles of language and culture in education. Addresses the social processes involved in the second language acquisition, including developmental influences, influences of home language and culture, cultural variation, home vs. school cultural differences, and working with parents/family of ELL students.

ELT 553 LA Assess Eval of ELL Students 3 cr

Selection, administration, and interpretation of measurement instruments. Includes entry and placement procedures, language proficiency/achievement testing, linguistic and cultural aspects of intelligence testing, multiple intelligence assessment, ELL student assessment in the mainstream classroom, and application of testing to instruction. Course restricted to majors in ESOL education.

ELT 558 Applied Ling for Teach of ELL 3 cr

This course provides knowledge of linguistics including English syntax, semantics, pragmatics, morphology, phonemics, and phonology as applied to teaching English Language Learners. Students will review theories in first and second language acquisition. Students will apply linguistics theory, issues in sociolinguistics, psycholinguistics, and neurolinguistics, to teach English to ELLs with emphasis on pronunciation, intonation, and structural analysis of English and contrastive analysis of English and non-English linguistic systems. Course restricted to majors in ESOL education.

ELT 590 Spec Top- 1-3 cr

Current topics of special concern to ESOL Educators. A different topic will be covered each time the course is offered. Not more than six semester hours may be applied toward a degree program.

ELT 594 Directed Study and Research 1-3 cr

Students explore through directed study problems and issues of special interest or significance in ESOL Education. Not more than three semester hours may be applied toward a degree program.

ELT 595 ESOL Internship 3,6 cr

Three hundred hours of supervised on-the-job experience in teaching English to speakers of other languages (ESOL) in P-12 settings. Interns are engaged in the full scope of teaching activities including planning, delivering lessons, evaluating students, and conducting managerial tasks related to teaching English as a Second Language. Teaching experience will be accompanied by scheduled observations and discussions to analyze and evaluate each student's internship experience. Course restricted to majors in ESOL education.

Prerequisite: ELT 525 Minimum Grade of C and ELT 530 Minimum Grade of B and ELT 545 Minimum Grade of C and ELT 553 Minimum Grade of C and ELT 558 Minimum Grade of C

Higher Education (HED)**HED 501 Digital Leader 3 cr**

This course will explore the role of digital media, including social media, in higher education administration.

HED 503 Higher Ed Finance 3 cr

This course will examine national, state and local economic factors and their impact upon budgeting and financial management work of higher education administrators/leaders.

HED 603 Current Probs Higher Education 3 cr

Analysis of current issues affecting higher education.

HED 611 Human Relations in Higher Edu 3 cr**HED 621 Program and Curriculum Develop 3 cr**

Designed to assess and improve the student's level of competency in program development skills, instructional strategies, systems analysis, and change innovation.

HED 631 Sem Higher Ed Mgt Skills 3 cr

Designed to assess and improve the student's knowledge of decision making styles, problem-solving processes, leadership skills, implementation of organizational change, and physical environments which promote productivity, all in the context of higher education.

HED 701 Adv Org Theory for Higher Edu 3 cr

This course is designed to provide students with an in-depth exploration of organizational theories and models and organizational approaches in higher education. Topics covered include administrative structure and leadership, accountability and change.

HED 702 Higher Ed Finance 3 cr

This course is designed to provide students with an overview of finance in higher education. The overview will include the financial benefits of higher education, access and affordability issues, state and federal funding, price-setting, tuition discounting, merit aid, sources of revenue and expenditures, cost-cutting measures, budgeting and college athletics.

HED 703 Adv Leadership for Higher Ed 3 cr

This course is designed to provide students with an in-depth exploration of leadership theories and models. Students will create a personal knowledge base from which to create a plan to develop or revise a leadership perspective.

HED 704 Current Issues in Higher Ed 3 cr

This course offers an in-depth analysis of current issues in and challenges to higher education.

HED 707 Multiculturalism and Organizational Change in Higher Education 3 cr

Students will examine the role of University leaders, at Universities and diverse student populations, and study strategies and organizational models relative to the solution of problems associated with the implementation of organizational diversity plans.

HED 732 Ethics and Law for Higher Ed 3 cr

An examination of ethical and legal issues present in higher education.

HED 6313 Sem Higher Ed Mgt Skills 3 cr**Leadership/Teacher Educ (LTE)****LTE 547 Instructional Coaching 3 cr**

An overview of strategies for guiding teachers and other professionals toward improving student achievement by building better learning communities.

LTE 645 Curriculum Leadership 3 cr

A purpose of this course will be to prepare professional educators through teaching, research and services to become committed to life-long learning and to facilitating the process of building better communities.

LTE 646 Community Leadership 3 cr

This course will prepare future teacher leaders to work effectively within their school community as well as with the communities in which they work and with the families of the students they teach.

LTE 647 Instructional Coaching 3 cr

A purpose of this course is to prepare professional educators through teaching, research, and service to become committed to life-long learning and to facilitate the process of building better communities. Students will demonstrate best educational practices and professional dispositions and will learn how to create a positive, motivational learning environment in schools while recognizing, appreciating, and including diverse learners and perspectives. Additionally, students are expected to demonstrate satisfactory skills in curriculum leadership; to engage in action research related to schools; to engage in literacy coaching; to address current family, community, regional, and national issues related to scholastic achievement, and to use tenets of instructional leadership to guide teachers and other professionals toward improving student achievement.

LTE 699 Research Project 1-3 cr

The Research Project, as the culminating experience in the Instructional Specialist Program, provides the candidate an opportunity to synthesize and apply program components and a timely topic in the field.

Prerequisite: IDE 692 Minimum Grade of B or EDU 692 Minimum Grade of B

Natural Science Educ (NSE)**NSE 201 Intro to Physical Science 3 cr**

The scientific attitude, the application of physical laws and principles to modern life, and assembling of apparatus and materials for demonstrating these principles are studied. (Not open to science majors.)

NSE 202 Intro to Physical Science 3 cr

The scientific attitude, the application of physical science laws and principles to modern life, and assembling of apparatus and materials for demonstrating these principles are studied. (Not open to science majors.)

NSE 403 Aerospace Education 3 cr

Basic principles of flight; survey of space exploration, military, commercial, and general aviation. Preparation of materials for use in teaching.

NSE 404 Aerospace Education 3 cr

Basic scientific principles applied in aerospace. Development of model rockets and aircraft. Preparation of materials for use in teaching.

NSE 494 Dir St - 1-3 cr

Directed study. No more than 6 hours can be accepted for a Bachelor's Degree and Class B Certificate. Prerequisite: Permission of department chair.

NSE 501 Adv Aerospace Education 3 cr

Scientific principles applied in aerospace education. Development of model rockets and aircraft. Preparation of advanced materials for teaching.

NSE 594 Dir St and Research 1-3 cr

Students explore through directed study problems and issues of special interest or signification in Science Education. No more than 3 hours of any departmental 594 courses can be applied toward a degree program. Prerequisite: Permission of department chair.

Passage USA (PSG)**PSG 001 Adult Development Seminar I 0 cr**

A learner-centered approach to developing self-advocacy, academic/career, independent living, and community integration skills is used. Seminar I focuses on personal safety and prevention, campus navigation, learning with technology, and personal care.

PSG 002 Internship/Work Experiences I 0 cr

Individualized instruction focused on career exploration and soft skill development. Students will explore different job and career options during the semester as well as develop skills related to employment.

PSG 003 Adult Dev Sem II 0 cr

A holistic instructional approach addresses individual learning goals in areas of functional skills and knowledge, application, integration, caring, and learning to learn is used. Seminar II focuses on goal setting, self-care, well-being, budgeting, and learning strategies.

Prerequisite: PSG 001 Minimum Grade of S

PSG 004 Intern/Wrk Exp II 0 cr

Individualized instruction focused workplace documentation, characteristics of good employees and employment development. Students will explore different job and career options while practicing skills they have learned in class in supervised work experiences.

Prerequisite: PSG 002 Minimum Grade of S

PSG 005 Adult Dev Sem III 0 cr

Students will participate in valuable and diverse learning experiences generalized to multiple environments. Seminar III focuses on transportation to and from campus, managing personal, finances, interpersonal skills development, and citizenship responsibilities.

Prerequisite: PSG 003 Minimum Grade of S

PSG 006 Intern/Wrk Exp III 0 cr

Students will be placed in supervised internship/work placements and receive on job training. Individual job training will address Adult Education Program goals as well as a student's needs.

Prerequisite: PSG 004 Minimum Grade of S

PSG 007 Adult Dev Sem IV 0 cr

Through individualized instructions students will refine self-advocacy, academic/career, independent/daily living, and community integration skills. Seminar IV focuses on advanced transportation, budgeting and finances, interpersonal, well-being, and self-care skills.

Prerequisite: PSG 005 Minimum Grade of S

PSG 008 Intern/Wrk Exp IV 0 cr

Students will have a supervised internship/work experience. Instruction will focus on the skills needed to gain and/or maintain paid employment. Individualized instruction will be provided.

Prerequisite: PSG 006 Minimum Grade of S

PSG 009 Work Pract I 0 cr

Students will engage in supervised work-based experience in a practicum setting(s) for a minimum of 6 hours a week.

PSG 010 Work Pract II 0 cr

Students will engage in supervised work-based experience in a practicum setting(s) for a minimum of 6 hours a week.

Prerequisite: PSG 009 Minimum Grade of S

PSG 011 Work Pract III 0 cr

Students will engage in supervised work-based experience in a practicum setting(s) for a minimum of 10 hours a week.

Prerequisite: PSG 010 Minimum Grade of S

PSG 012 Work Pract IV 0 cr

Students will engage in supervised work-based experience in a practicum setting(s) for a minimum of 10 hours a week.

Prerequisite: PSG 011 Minimum Grade of S

PSG 020 Job and Career Skills 1 0 cr

An individualized approach is taken toward identifying and mastering the skills that will be needed for jobs and career. Contents include workplace advocacy, on-site generic and specific work skills, workplace hazards, and specific work skills for employment sectors.

PSG 021 Adv Ind Liv Skills 1 0 cr

An individualized approach is taken toward identifying and mastering the skills that will be needed for independent living. Focus areas will include budgeting, hygiene, home upkeep, personal safety and prevention, community engagement, social skills and other skills.

PSG 022 Job and Career Skills 2 0 cr

An individualized approach is taken toward identifying and mastering the skills that will be needed for jobs and career: workplace advocacy, on-site work skills, workplace hazards, and specific work skills for employment sectors.

Prerequisite: PSG 020 Minimum Grade of S

PSG 023 Adv Ind Liv Skills 2 0 cr

An individualized approach is used to develop needed independent living skills. Personal, financial, nutritional, safety, and community skills will be assessed and taught using a strengths-based approach.

Prerequisite: PSG 021 Minimum Grade of S

PSG 024 Job and Career Skills 3 0 cr

An individualized approach is taken toward identifying and mastering the skills that will be needed for jobs and career in fields of interest. Specific and general skills needed in related employment sectors will also be taught.

Prerequisite: PSG 022 Minimum Grade of S

PSG 025 Comm Res Exper 1 0 cr

Individualized supports and direct instruction will be provided to help students master the skills they need to live as independently as possible in their community residence.

Prerequisite: PSG 023 Minimum Grade of S

PSG 026 Job and Career Skills 4 0 cr

An individualized approach is taken toward identifying and mastering the skills needed for jobs and career in fields of interest. Specific and general skills needed in related employment sectors will also be taught.

Prerequisite: PSG 024 Minimum Grade of S

PSG 027 Comm Res Exper 2 0 cr

Individualized supports and direct instruction will be provided to help students master the skills they need to live as independently as possible in their community residence. Person-centered planning will be used to identify strengths and needs.

Prerequisite: PSG 025 Minimum Grade of S

PSG 029 Comm R 0 cr

Individualized community-based supports and direct instruction will be provided to help students master the skills they need to live as independently as possible in their community residence. Person-centered planning will be used to identify strengths and needs.

Prerequisite: PSG 027 Minimum Grade of S

PSG 031 Career Practicum 1 0 cr

Students will engage in supervised work-based experience in a competitive employment setting. The practicum setting will be related to students' job and career goals.

PSG 032 Career Practicum 2 0 cr

Students will engage in supervised work-based experience in a competitive employment setting. The practicum setting will be related to students' job and career goals.

Prerequisite: PSG 031 Minimum Grade of S

PSG 033 Career Employ Pract 1 0 cr

Students will engage in supervised work-based experience in a competitive employment setting in the community.

Prerequisite: PSG 032 Minimum Grade of S

PSG 034 Career Employ Pract 2 0 cr

Students will engage in extended-length, supervised work-based experience in a competitive employment setting in the community.

Prerequisite: PSG 033 Minimum Grade of S

PSG 035 Career Employ Pract 3 0 cr

Students will engage in extended-length, supervised work-based experience in a competitive employment setting in the community.

Prerequisite: PSG 034 Minimum Grade of S

PSG 090 Special Topics 0 cr

Guided study topics of specific interest to the student. Students will participate in inclusive classes that are part of the USA undergraduate curriculum.

Reading Instruction (RED)**RED 110 Effect Read-Lang-Study Skills 3 cr**

A laboratory experience to increase facility in reading, language and study skills.

RED 330 Found of Read Instruction - W 3 cr

A course to orient the student to fundamentals in the teaching of reading and provides practice in basic skills.

RED 331 Teaching Reading 3 cr

A course focusing on methodology, materials, and techniques for developing systematic instruction and diagnosis appropriate for early childhood and elementary children. This course has a required field experience.

Prerequisite: RED 330 Minimum Grade of C and EEC 346 Minimum Grade of C and RED 333 Minimum Grade of C and EEC 332 Minimum Grade of C

Corequisite: EEC 335, EEC 336, EEC 337, EEC 345

RED 333 Literature for Children - W 3 cr

A course for the selection and use of literature based on the interests, abilities, and needs of children from prekindergarten through the elementary school. Particular emphasis on creative ways of sharing books with children. This course has a required field experience.

Corequisite: RED 330

RED 334 Lit for the Young Child - W 3 cr

A survey course dealing with methods of writing literary materials with children in preschool through the primary grades. It is designed to assist those who wish to become widely acquainted with books and related materials for today's young children.

RED 348 Lang & Lit Dev in Early Child 3 cr

A study of oral language structures and stages of development, early literacy foundations, and developmental sequences of phonological awareness along with teaching practices that support language and literacy development. Includes discussion of cultural and developmental factors that influence acquisition of language and literacy skills.

RED 352 Literature for Adolescents 3 cr

Discussion and evaluation of literature for students in grades 7 through 12 with extensive reading, listening, and viewing of materials.

RED 451 Content Area Literacy - W 3 cr

Methods and materials in the teaching of reading. Development of effective study and skills at the secondary level is stressed.

Prerequisite: SED 340 Minimum Grade of C and SED 341 (may be taken concurrently) Minimum Grade of C

RED 458 Crit Read in Content Field - W 3 cr

An examination of non-fiction (and some fiction) which emphasizes critical reading skills. Various types of prose will be considered including that found in textbooks, newspapers and other periodicals, popular fiction, and non-fiction.

RED 520 Reading Foundations 3 cr

Introduces students to the fundamentals of the teaching of reading, including concepts of print, phonological awareness, phonics, fluency, vocabulary, and comprehension and how these areas are assessed. This course has a required field experience.

RED 530 Curr App & Res in Read Instr 3 cr

An intensive exploration of the current theories, practices, and research in the teaching of reading.

RED 531 Trends-Practices Tchg Reading 3 cr

Begins with in-depth study of the nature of reading as a process and its place in the total school program and extends through assessments, methods, materials, and personalized procedures for pupils and teachers.

Prerequisite: RED 520 Minimum Grade of C

RED 533 Diag-Corr Reading Disabilities 3 cr

First, an intensive study of steps in the diagnosis of reading disabilities; second, a survey of corrective and remedial techniques for eliminating the difficulties; the third, application of diagnostic and instructional techniques to specific type of disabilities.

Prerequisite: RED 531 Minimum Grade of B

RED 534 Remed-Clinic Proced in Reading 3 cr

A practicum in remediating reading disabilities. Each student receives close supervision in work with actual cases at varying disabilities levels.

Prerequisite: RED 533 Minimum Grade of B

RED 541 Literacy in the Content Area 3 cr

This course includes the methods and materials for literacy-based instruction in the content areas. The incorporation of literacy-based activities such as reading, writing, and thinking; and the use of strategies to promote student comprehension are emphasized. **Prerequisite:** Admission to teacher education program.

RED 544 Wrtg Process Skls Read Writing 3 cr

Intensive writing applications with an emphasis on the writing process, action research, and the reading and discussion of reading and writing pedagogy and research.

RED 545 Lit for Children - Adolescents 3 cr

Provides a comprehensive survey of books written for children and adolescents, and makes appropriate interspersions of periodicals and other media. Through varied class activities, with emphasis on techniques for encouraging literary enjoyment, the student will increase skills in making children's literature an integral part of the school curriculum.

RED 547 Lit Early Childhood Classroom 3 cr

Provides a comprehensive survey of books written for children in the pre K-3 classroom, and incorporates periodicals, media and technology appropriate for teaching young children. A variety of class activities intended to motivate and encourage children to become lifelong readers is included.

RED 548 Literacy Coaching 3 cr

Includes an in-depth study of coaching techniques, specifically the role of coaching in the school setting. This course includes strategies for encouraging teachers to engage in the coaching process, coaching teachers to meet the literacy needs of their students, as well as providing school-based professional development and maximizing moments with struggling readers.

Prerequisite: RED 531 Minimum Grade of B

RED 557 Practicum in Reading Education 1-9 cr

Experiences in working in the area of reading instruction and/or diagnosis under the supervision of a reading teacher or supervisor and a college supervisor.

RED 560 Materials Workshop - 3 cr

A topical workshop in which participants have experiences in creating, designing, constructing and using instructional materials and activities. This work will emphasize reading and language arts. No more than 6 hours can be applied toward a degree program. **Prerequisite:** Permission of instructor.

RED 590 Sp Top - 3-6 cr

Guided investigation of topics in reading education, such as curriculum revision, course or program design, newly evolved trends in reading education, and implications of research in reading education. No more than 6 hours can be applied toward a degree program.

RED 594 Dir St - Research 1-3 cr

Students explore through directed study research problems and issues of special interest or significance in reading education. No more than 3 hours of any departmental 594 courses can be applied toward a degree program. **Prerequisite:** Permission of department chair.

RED 595 Internship in Reading Educ 1-9 cr

The internship is a supervised learning experience in a work setting similar to that in which an educator will eventually be employed. The internship provides students with an opportunity to apply the theories and concepts learned during the graduate program.

Prerequisite: PRAXIS-Reading Specialist 164 and RED 533 Minimum Grade of B and RED 534 Minimum Grade of B

RED 599 Thesis 1-9 cr

A student selects a project, study, or investigation which is related to reading education. The project will form the basis for the thesis. A thesis committee will provide direction during the investigation and during the writing of the thesis.

RED 611 Theor Lang Dev Tchg Reading 3 cr

Emphasizes theories of language acquisition and development. Includes linguistics, language development of the culturally different child, and application of theory to classroom practices in reading and related areas. Requires special permission.

RED 612 Socio Influences in Rdg Instr 3 cr

Focuses upon the history of reading instruction, sociological factors influencing reading, reading in relation to other media of communication, and ways of applying these findings in classroom and clinical practice. Requires special permission.

RED 613 Admn and Supv the Rdg Program 3 cr

Analyzes and interprets administrative and supervisory roles and functions as they relate to the total school program, elementary through high school. Stress is upon facilitating and enhancing all aspects of the program. Requires special permission.

RED 615 Diag - Rem Severe Rdg Disab 3 cr

Provides laboratory experiences in studying severe cases of reading disabilities and in developing plans and procedures for their remediation. Requires special permission.

RED 630 Psy Factors in Tchg Reading 3 cr

Relates pertinent psychological concepts and principles to (1) current definitions of the reading process, (2) methods of teaching, and (3) special procedures for reluctant and disabled readers. The student may apply these concepts and principles in regular or laboratory settings.

RED 640 Research in Reading 3 cr

A critical analysis and evaluation of the significant research studies in reading from which reading concepts emerge and from which implications for teaching and further research may be drawn.

RED 648 Literacy Coaching Teacher/Ldrs 3 cr

A purpose of this course is to prepare professional educators through teaching, research, and service to become committed to life-long learning and to facilitate the process of building better communities. Students will demonstrate best educational practices and professional dispositions and will learn how to create a positive, motivational learning environment in schools while recognizing, appreciating, and including diverse learners and perspectives. Additionally, students are expected to demonstrate satisfactory skills in curriculum leadership; to engage in action research related to schools; to engage in literacy coaching; to address current family, community, regional, and national issues related to scholastic achievement, and to use tenets of instructional leadership to guide teachers and other professionals toward improving student achievement.

RED 690 Sp Top - 3 cr

Guided investigation of topics in reading education such as curriculum revision, course or program design, newly evolved trends in reading education, and implications of research in reading education.

RED 694 Dir St - Research 1-3 cr

Students explore through directed study problems and issues of special interest or significance in reading education. No more than 3 hours of any departmental 694 courses can be accepted toward a degree program.

Prerequisite: Permission of department chair.

RED 699 Research Project 1-3 cr

A supervised research project, study, or investigation in reading. Student will conduct an investigation, and apply concepts and skills learned during the sixth-year program. May be taken more than one semester.

Prerequisite: Permission of department chair.

Prerequisite: IDE 692 Minimum Grade of B or EDU 692 Minimum Grade of B

Secondary Education (SED)**SPE 200 Field Exp in SPE Settings 1 cr**

A series of in-field opportunities for students in Special Education. A variety of appropriate placements will be employed depending on each student's interest and needs. May be repeated for credit.

SPE 201 Field Exp in Sp Ed Setting 1 cr

A series of in-field opportunities in special education. A variety of appropriate placements will be employed depending on each student's interests and needs. To be taken with SPE 312.

SPE 202 Field Exp in Sp Ed Setting 1 cr

A series of in-field opportunities in special education. A variety of appropriate placements will be employed depending on each student's interests and needs. To be taken with SPE 410.

Corequisite: SPE 410

SPE 203 Field Exp in Sp Ed Setting 1 cr

A series of in-field opportunities in special education. A variety of appropriate placements will be employed depending on each student's interests and needs. To be taken with SPE 410.

Corequisite: SPE 410

SPE 205 Init Field Exp in SPE Setting 1 cr

An in-field opportunity for early field-based practicum in a variety of placements. To be taken with SPE 400 by Special Education majors.

SPE 311 Intro to Partnerships in SPE 3 cr

Emphasis is on the special problems found in the home, community, and school of the exceptional child, the teacher, the family, and community resource agencies. Ways for the teacher to form teamships to work collaboratively with all human resources involved in the child's life are explored and ethical and moral standards examined.

SPE 312 Intellect and Phys Disabs 3 cr

A study of the intellectual and physical disability which usually require substantial curriculum adaptations or ecological accommodation. Historical perspectives, etiology, definitions, classification, treatment, social aspects and interdisciplinary team work will be explored.

Corequisite: SPE 201

SPE 313 Lrng and Behavrl Disorders 3 cr

An examination of the definitions, characteristics, and prevalence of children with learning and/or behavioral disabilities. Emphasis is placed on the causes of problems in motor, perceptual, social, academic, affective, and behavioral development. Students will be introduced to current service delivery models and the programming options for individuals with learning and behavioral disabilities.

SPE 342 Dev-Tchg Ecological Curriculum 3 cr

An ecological systems view which emphasizes curricular design as a multisystem interaction involving the individual, family, school, occupational setting, and society.

SPE 362 Behav Mgt of Except Child - W 3 cr

Presentation of the principles and applications of behavioral modification, data collection procedures, and single-subject research designs as related to exceptional children and youth in special education environments.

Prerequisite: SPE 313 Minimum Grade of C and SPE 342 Minimum Grade of C and SPE 454 Minimum Grade of C

SPE 363 Tch Adpt Curr Spec Nds Lrn 3 cr

An examination of regular and special education K-12 curricula, materials, and procedures. Specific emphasis will be placed on the selection modification, and adaptation of curricula, materials, and procedures to meet the needs of individuals with learning and behavioral disabilities.

Prerequisite: SPE 313 Minimum Grade of C and SPE 342 Minimum Grade of C and SPE 454 Minimum Grade of C

SPE 373 Teaching Reading to Stu Dis 3 cr

Introduces the student to the curriculum, teaching the methodologies and instructional activities and materials associated with effective and appropriate developmental and functional reading instruction for students with disabilities.

Prerequisite: SPE 313 Minimum Grade of C and SPE 342 Minimum Grade of C and SPE 454 Minimum Grade of C

SPE 400 Edu for Except Child and Youth 3 cr

Introduction to the field of exceptional children and youth, involving the study of various areas of exceptionality.

SPE 410 Formal-Informal Assessment 3 cr

Assesses developmental levels, academic, and non-academic performance of exceptional individuals through the administration and interpretation of criterion-referenced, formal and informal measures. Evaluation of classroom teaching and special education programs is also emphasized.

Prerequisite: SPE 313 Minimum Grade of C and SPE 342 Minimum Grade of C and SPE 454 Minimum Grade of C

Corequisite: SPE 202, SPE 203

SPE 432 Impact Typ and Atyp Dev on Edu 3 cr

An examination of typical child development and developmental characteristics of infants, toddlers, and young children with disabilities from the prenatal period through age 8. Characteristics of disabling conditions and their impact upon development are also discussed.

SPE 433 Iss in Edu Young Child W-Dis 3 cr

This course prepares students to work with infants, toddlers, and young children with disabilities and their families. Topics covered include specific teaching and intervention techniques, special education laws and regulations, and service delivery models.

SPE 443 Voc Ed-Career Dev Dis Indiv 3 cr

Issues and practices involved in the vocational preparation and training of students with disabilities, including career awareness, exploration, preparation, and use of vocational resources. Vocationally related programs and services, both within and outside the special education environment are included.

Prerequisite: SPE 313 Minimum Grade of C and SPE 342 Minimum Grade of C and SPE 454 Minimum Grade of C

SPE 444 Senior Seminar - W 3 cr

Topics based upon students' experiences in internship. Students develop personal growth plans to enhance professional functioning.

SPE 454 Curric Meth Develop Young 3 cr

Curriculum and methods of instruction for individuals who function in the lower levels of cognitive, motor, self care, communicative, and/or social behaviors. Emphasis is on physical management, class/individual scheduling, adapted aids and equipment, task analysis, and functional life skills.

SPE 484 General Education Curriculum 3 cr

A Curriculum course designed to emphasize general education and special education K-12 curriculum. Students learn content of general education curricula through study of scope and sequence charts and strategies for adapting the curricula for students with exceptionalities, especially in inclusionary settings.

Prerequisite: SPE 313 Minimum Grade of C and SPE 342 Minimum Grade of C and SPE 454 Minimum Grade of C

SPE 489 Pre-Practicum 3 cr

Supervised experience in the teaching field which allows the teacher's performance to be evaluated qualitatively.

SPE 490 Sp Top - 3 cr

Varies in content and deals with issues, trends, and topics of current interest in the field of educating exceptional individuals. May be repeated for credit when course content varies.

SPE 494 Dir St - 3 cr

Directed Study. No more than two directed studies may be applied to programs at the undergraduate level or for certification.

SPE 495 Internship K-6 9 cr

Observation and supervised K-6 classroom teaching experience providing the opportunity to synthesize all previous instruction. This culminating activity provides opportunity for study and discussion of problems and issues encountered in the practicum situation.

Prerequisite: PRAXIS-Elem Ed Cont Knowledge 137 and SPE 363 Minimum Grade of C and SPE 410 Minimum Grade of C

SPE 496 Internship 6-12 9 cr

Observation and supervised 6-12 classroom teaching experiences providing the opportunity to synthesize all previous instruction. This culminating activity provides opportunity for study and discussion of problems and issues encountered in the practicum situation.

Prerequisite: SPE 363 Minimum Grade of C and SPE 410 Minimum Grade of C

SPE 497 Internship ECSE 9 cr

Observation and supervised ECSE classroom teaching experiences providing the opportunity to synthesize all previous instruction. This culminating activity provides opportunity for study and discussion of problems and issues encountered in the practicum situation.

Prerequisite: PRAXIS-Elem Ed Cont Knowledge 137 and SPE 363 Minimum Grade of C and SPE 433 Minimum Grade of C

SPE 499 Senior Honors Project-H 3-6 cr

Under the advice and guidance of a faculty mentor, honors students will identify and carry out a research project, relevant to the field of study in Special Education, that will lead to a formal presentation at the annual Honors Student Colloquium. The senior project will be judged and graded by three faculty chaired by the honors mentor. This course is required for Honors recognition and may be repeated for up to 6 credit hours. Prerequisite: Participate in honors program and junior level status.

SPE 500 Nat-Needs of Exc Chld and Yth 3 cr

Introduction to the field of special education involving the study of all exceptionality areas. Developmental and maturational sequences of exceptional children/youth are included.

SPE 504 Seminar in Spec Educ 3 cr

Designed to allow students an in-depth exploration of topics of special concern to them related to children with disabilities or high potential.

SPE 505 Admn and Supv of SPE 3 cr

Establishing, maintaining, supervising, and evaluating special education programs in school districts and systems. Legislation and litigation, budgeting and finance, trends and issues in special education are included.

SPE 510 Intro to Lrng Char Tchg in SPE 3 cr

An examination of the definitions, characteristics, and prevalence of children with learning disabilities, emotional and/or behavioral disabilities, mental retardation and multiple disabilities. Emphasis is placed on the environmental and biological causes of problems in motor, perceptual, social academic, affective, and behavioral development. Students will be introduced to current service delivery models and the programming for individuals with disabilities.

SPE 511 Curr - Reg Class and Adapt 3 cr

Examination of all curricula as represented by various state course of study documents. Students will study and develop relevant adaptations of curricula to meet needs of various exceptional children.

SPE 512 Ecological Curr and Method 3 cr

From an ecological systems view, methods of individually deriving a functional, life-centered curriculum for students with mild to severe disabilities as well as educational strategies for teaching and training within such a framework.

SPE 514 Teaming and Collaboration 3 cr

An intensive study of the nature of teaming and collaborative practices with an emphasis on developing skills to organize and participate in a variety of such situations.

SPE 515 Data and Behav Mgmt 3 cr

Behavioral assessment techniques and experimental designs for the evaluation of behavior change programs. Operant and respondent methods for deceleration of inappropriate behavior. Operant methods for accelerating appropriate behaviors, teaching new behaviors and maintaining behaviors. Data-Based decision making strategies for formative program evaluation and modifications.

SPE 516 Methods Spec Needs Learners 3 cr

An examination of the methodologies employed in teaching special needs learners. The course covers the theoretical underpinnings and practical application of techniques with media, and materials.

SPE 517 Com Lang Read Stu Disability 3 cr

Major topics include the nature of language, language development and language problems in exceptional students; and remedial procedures. Informal and formal language and reading assessment. Relationship of reading to writing, phonetic, sight and combination means of reading instruction.

SPE 518 Assessment 3 cr

Advanced assessment of developmental levels, academic and non-academic performance of exceptional individuals through the administration and interpretation of standardized tests, criterion-referenced instruments, and informal measures.

SPE 521 Children W-High Potential 3 cr

Study of the intellectual, creative, emotional, and other psychological facets of gifted and talented children. Attention will be paid both to those individuals whose potential is realized and those who are considered underachievers.

SPE 522 Creative and Prod Thinking 3 cr

Geared to understanding the creative process, personality, and product of gifted and talented children as well as how to foster creativity and productive thought in the classroom.

SPE 523 Tchg Children W-High Potential 3 cr

Various curricular emphases and program approaches employed for gifted, creative, and talented children are studied. Insights are offered into articulating educational efforts.

SPE 524 Atyp Children W-High Potential 3 cr

This course is an in-depth study of the unique needs of atypical populations of gifted students. Attention will be directed to the culturally diverse gifted, economically disadvantaged gifted, underachieving gifted, gifted in rural areas, gifted females, highly/profound gifted, gifted handicapped, gifted with ADD/ADHD/SLD, and gifted preschoolers.

SPE 532 Impact of Typical Atypical Dev 3 cr

An examination of typical child development and developmental characteristics of infants, toddlers, and young children with disabilities from the prenatal period through age eight. Characteristics of disabling conditions and their impact upon development are also discussed.

SPE 533 Issue Edu Young Child Disabil 3 cr

This course prepares students to work with infants, toddlers, and young children with disabilities and their families. Topics covered include specific teaching and intervention techniques, special education laws and regulations, and service delivery models.

SPE 534 Assessment Devel Young 3 cr

This course contains information on basic psychometric qualities of screening, evaluations, and assessments, tools for use with infants, toddlers, and young children with disabilities, conducting family assessments, adapting measures for children with disabilities and using screening assessment, and evaluation in individualized programming.

SPE 535 Collaborating with Families 3 cr

This course prepares students to work with families of children with special needs. It contains information on understanding families, working with traditional and non-traditional families, and providing family-centered services.

SPE 588 Advanced Practicum Experience 3 cr

The purpose of this course is to provide a field experience focusing on evaluation and program improvement in academic and behavioral assessment, program planning, and experiences in implementation of special education programming.

SPE 589 Pre-Practicum Experience 3,6 cr

Supervised experience in the teaching field which allows the teacher's performance to be evaluated qualitatively.

SPE 590 Sp Top - 3 cr

A course with varying content dealing with issues, trends, and topics of current interest in the field of education exceptional individuals. May be repeated for credit when course content varies. Composition of activity. Total credit cannot exceed 6 hours.

SPE 591 Multicategory Prac Seminar 3 cr

Combines field experiences and technology-based simulations and learning experiences with an ongoing seminar to address a wide-range of disabilities and educational implications. Course content will be individualized according to the students educational and professional background.

SPE 592 Collaborative Pract-Seminar 3 cr

A seminar which enables students to discuss controversial issues related to the role and function of the collaborative teacher. Students lead and respond to discussion on topics which include teaming, inclusion, and collaboration.

SPE 593 Classroom Exp Prac - 3 cr

Supervised experience in the teaching field which allow the teacher's performance to be evaluated qualitatively.

SPE 594 Dir St - Research 3 cr

Students explore through directed individual study and research, problems and issue of special interest or significance in Special Education.

SPE 595 Intern/Prac SPE Coll Tch K-6 3,6 cr

Supervised experiences in Collaborative Teaching K-6 in the teaching field which allow the teacher's performance to be evaluated qualitatively.

Prerequisite: SPE 500 Minimum Grade of B and SPE 514 Minimum Grade of B and SPE 512 Minimum Grade of B and SPE 516 Minimum Grade of B and SPE 515 Minimum Grade of B and SPE 591 Minimum Grade of B and (PRAXIS-Mathematics Subtest 157 or PRAXIS-Mathematics Subtest 157) and (PRAXIS-Social Studies Subtest 154 or PRAXIS-Social Studies Subtest 154) and (PRAXIS-Science Subtest 158 or PRAXIS-Science Subtest 158) and PRAXIS-Teaching Reading CB 159 or 190 233

SPE 596 Intern/Prac SPE Coll Tch 6-12 3,6 cr

Supervised experiences in Collaborative Teaching 6-12 in the teaching field which allow the teacher's performance to be evaluated qualitatively.

Prerequisite: SPE 500 Minimum Grade of B and SPE 514 Minimum Grade of B and SPE 512 Minimum Grade of B and SPE 516 Minimum Grade of B and SPE 515 Minimum Grade of B and SPE 591 Minimum Grade of B

SPE 597 Intern/Prac SPE ECSE 3 cr

Supervised experiences in Collaborative Teaching ECSE in the teaching field which allow the teacher's performance to be evaluated qualitatively
Prerequisite: PRAXIS-Elem Ed Cont Knowledge 137

SPE 598 Intern/Prac SPE G/T 3 cr

Supervised experiences in Collaborative Teaching Gifted/Talented in the teaching field which allows the teacher's performance to be evaluated qualitatively.

SPE 599 Thesis 3 cr

A student selects a project, study, or investigation in Special Education related to the student's area of specialization. The project forms a basis for the thesis. A thesis committee will give guidance during the investigation and during the writing of the thesis.

SPE 601 Advanced Eval in SPE 3 cr

Methods and procedures for developing criterion-referenced instruments and assessment batteries for classroom use in evaluating exceptional children and youth.

SPE 609 Adv Study of Excep Children 3 cr

Comparison of the normal development progress and that usually seen in the various exceptionality categories of special education especially cognitive, communication, motor, social and emotional development.

SPE 641 Seminar Behav Disorders 3 cr

Advanced study and review of the state of present knowledge in areas relevant to the psycho-pathological disorders of childhood including etiology, assessment, treatment and education.

SPE 642 Clinical Teaching I 3 cr

A study of the principles of behavioral theory upon which strategies for change in cognitive and social behavior rest and the evaluative designs used to monitor behavioral change and validate strategies.

Prerequisite: SPE 515 Minimum Grade of B

SPE 643 Clinical Teaching II 3 cr

A study and review of clinical research relevant to the curriculum requirements in the education and treatment of exceptional children and the identification of research needs in the various areas of exceptionality.

SPE 651 Seminar in LD 3 cr

Current trends and issues in the education of learning disabled individuals are discussed, various theoretical approaches and current empirical evidence provide the basis for discussion.

SPE 671 Seminar in ID Educ 3 cr

Current trends and issues in the education of individuals with intellectual disabilities. Class and recent professional literature are the basis for developing perspectives.

SPE 690 Sp Top - 3 cr

A course with varying content dealing with issues, trends, and topics of current interest in the field of education exceptional individuals. May be repeated for credit when course content varies.

SPE 694 Dir St - Research 3 cr

Students explore through directed study problems and issues of special interest or significance in Special Education.

SPE 699 Research Project 1-3 cr

The Research Project, as the culminating experience in the Specialist Program, provides an opportunity for the candidate to synthesize and apply the various program components in a selected instructional setting. Suitable agreements are reached with the appropriate public school system by the candidate. MR majors may not take more than 8 hours.

Prerequisite: IDE 692 Minimum Grade of B or EDU 692 Minimum Grade of B

Special Education (SPE)**SPE 200 Field Exp in SPE Settings 1 cr**

A series of in-field opportunities for students in Special Education. A variety of appropriate placements will be employed depending on each student's interest and needs. May be repeated for credit.

SPE 201 Field Exp in Sp Ed Setting 1 cr

A series of in-field opportunities in special education. A variety of appropriate placements will be employed depending on each student's interests and needs. To be taken with SPE 312.

SPE 202 Field Exp in Sp Ed Setting 1 cr

A series of in-field opportunities in special education. A variety of appropriate placements will be employed depending on each student's interests and needs. To be taken with SPE 410.

Corequisite: SPE 410

SPE 203 Field Exp in Sp Ed Setting 1 cr

A series of in-field opportunities in special education. A variety of appropriate placements will be employed depending on each student's interests and needs. To be taken with SPE 410.

Corequisite: SPE 410

SPE 205 Init Field Exp in SPE Setting 1 cr

An in-field opportunity for early field-based practicum in a variety of placements. To be taken with SPE 400 by Special Education majors.

SPE 311 Intro to Partnerships in SPE 3 cr

Emphasis is on the special problems found in the home, community, and school of the exceptional child, the teacher, the family, and community resource agencies. Ways for the teacher to form teamships to work collaboratively with all human resources involved in the child's life are explored and ethical and moral standards examined.

SPE 312 Intellect and Phys Disabs 3 cr

A study of the intellectual and physical disability which usually require substantial curriculum adaptations or ecological accommodation. Historical perspectives, etiology, definitions, classification, treatment, social aspects and interdisciplinary team work will be explored.

Corequisite: SPE 201

SPE 313 Lrng and Behavrl Disorders 3 cr

An examination of the definitions, characteristics, and prevalence of children with learning and/or behavioral disabilities. Emphasis is placed on the causes of problems in motor, perceptual, social, academic, affective, and behavioral development. Students will be introduced to current service delivery models and the programming options for individuals with learning and behavioral disabilities.

SPE 342 Dev-Tchg Ecological Curriculum 3 cr

An ecological systems view which emphasizes curricular design as a multisystem interaction involving the individual, family, school, occupational setting, and society.

SPE 362 Behav Mgt of Except Child - W 3 cr

Presentation of the principles and applications of behavioral modification, data collection procedures, and single-subject research designs as related to exceptional children and youth in special education environments.

Prerequisite: SPE 313 Minimum Grade of C and SPE 342 Minimum Grade of C and SPE 454 Minimum Grade of C

SPE 363 Tch Adpt Curr Spec Nds Lnrn 3 cr

An examination of regular and special education K-12 curricula, materials, and procedures. Specific emphasis will be placed on the selection modification, and adaptation of curricula, materials, and procedures to meet the needs of individuals with learning and behavioral disabilities.

Prerequisite: SPE 313 Minimum Grade of C and SPE 342 Minimum Grade of C and SPE 454 Minimum Grade of C

SPE 373 Teaching Reading to Stu Dis 3 cr

Introduces the student to the curriculum, teaching the methodologies and instructional activities and materials associated with effective and appropriate developmental and functional reading instruction for students with disabilities.

Prerequisite: SPE 313 Minimum Grade of C and SPE 342 Minimum Grade of C and SPE 454 Minimum Grade of C

SPE 400 Edu for Except Child and Youth 3 cr

Introduction to the field of exceptional children and youth, involving the study of various areas of exceptionality.

SPE 410 Formal-Informal Assessment 3 cr

Assesses developmental levels, academic, and non-academic performance of exceptional individuals through the administration and interpretation of criterion-referenced, formal and informal measures. Evaluation of classroom teaching and special education programs is also emphasized.

Prerequisite: SPE 313 Minimum Grade of C and SPE 342 Minimum Grade of C and SPE 454 Minimum Grade of C

Corequisite: SPE 202, SPE 203

SPE 432 Impact Typ and Atp Dev on Edu 3 cr

An examination of typical child development and developmental characteristics of infants, toddlers, and young children with disabilities from the prenatal period through age 8. Characteristics of disabling conditions and their impact upon development are also discussed.

SPE 433 Iss in Edu Young Child W-Dis 3 cr

This course prepares students to work with infants, toddlers, and young children with disabilities and their families. Topics covered include specific teaching and intervention techniques, special education laws and regulations, and service delivery models.

SPE 443 Voc Ed-Career Dev Dis Indiv 3 cr

Issues and practices involved in the vocational preparation and training of students with disabilities, including career awareness, exploration, preparation, and use of vocational resources. Vocationally related programs and services, both within and outside the special education environment are included.

Prerequisite: SPE 313 Minimum Grade of C and SPE 342 Minimum Grade of C and SPE 454 Minimum Grade of C

SPE 444 Senior Seminar - W 3 cr

Topics based upon students' experiences in internship. Students develop personal growth plans to enhance professional functioning.

SPE 454 Curric Meth Develop Young 3 cr

Curriculum and methods of instruction for individuals who function in the lower levels of cognitive, motor, self care, communicative, and/or social behaviors. Emphasis is on physical management, class/individual scheduling, adapted aids and equipment, task analysis, and functional life skills.

SPE 484 General Education Curriculum 3 cr

A Curriculum course designed to emphasize general education and special education K-12 curriculum. Students learn content of general education curricula through study of scope and sequence charts and strategies for adapting the curricula for students with exceptionalities, especially in inclusionary settings.

Prerequisite: SPE 313 Minimum Grade of C and SPE 342 Minimum Grade of C and SPE 454 Minimum Grade of C

SPE 489 Pre-Practicum 3 cr

Supervised experience in the teaching field which allows the teacher's performance to be evaluated qualitatively.

SPE 490 Sp Top - 3 cr

Varies in content and deals with issues, trends, and topics of current interest in the field of educating exceptional individuals. May be repeated for credit when course content varies.

SPE 494 Dir St - 3 cr

Directed Study. No more than two directed studies may be applied to programs at the undergraduate level or for certification.

SPE 495 Internship K-6 9 cr

Observation and supervised K-6 classroom teaching experience providing the opportunity to synthesize all previous instruction. This culminating activity provides opportunity for study and discussion of problems and issues encountered in the practicum situation.

Prerequisite: PRAXIS-Elem Ed Cont Knowledge 137 and SPE 363 Minimum Grade of C and SPE 410 Minimum Grade of C

SPE 496 Internship 6-12 9 cr

Observation and supervised 6-12 classroom teaching experiences providing the opportunity to synthesize all previous instruction. This culminating activity provides opportunity for study and discussion of problems and issues encountered in the practicum situation.

Prerequisite: SPE 363 Minimum Grade of C and SPE 410 Minimum Grade of C

SPE 497 Internship ECSE 9 cr

Observation and supervised ECSE classroom teaching experiences providing the opportunity to synthesize all previous instruction. This culminating activity provides opportunity for study and discussion of problems and issues encountered in the practicum situation.

Prerequisite: PRAXIS-Elem Ed Cont Knowledge 137 and SPE 363 Minimum Grade of C and SPE 433 Minimum Grade of C

SPE 499 Senior Honors Project-H 3-6 cr

Under the advice and guidance of a faculty mentor, honors students will identify and carry out a research project, relevant to the field of study in Special Education, that will lead to a formal presentation at the annual Honors Student Colloquium. The senior project will be judged and graded by three faculty chaired by the honors mentor. This course is required for Honors recognition and may be repeated for up to 6 credit hours. Prerequisite: Participate in honors program and junior level status.

SPE 500 Nat-Needs of Exc Chld and Yth 3 cr

Introduction to the field of special education involving the study of all exceptionality areas. Developmental and maturational sequences of exceptional children/youth are included.

SPE 504 Seminar in Spec Educ 3 cr

Designed to allow students an in-depth exploration of topics of special concern to them related to children with disabilities or high potential.

SPE 505 Admn and Supv of SPE 3 cr

Establishing, maintaining, supervising, and evaluating special education programs in school districts and systems. Legislation and litigation, budgeting and finance, trends and issues in special education are included.

SPE 510 Intro to Lrng Char Tchg in SPE 3 cr

An examination of the definitions, characteristics, and prevalence of children with learning disabilities, emotional and/or behavioral disabilities, mental retardation and multiple disabilities. Emphasis is placed on the environmental and biological causes of problems in motor, perceptual, social academic, affective, and behavioral development. Students will be introduced to current service delivery models and the programming for individuals with disabilities.

SPE 511 Curr - Reg Class and Adapt 3 cr

Examination of all curricula as represented by various state course of study documents. Students will study and develop relevant adaptations of curricula to meet needs of various exceptional children.

SPE 512 Ecological Curr and Method 3 cr

From an ecological systems view, methods of individually deriving a functional, life-centered curriculum for students with mild to severe disabilities as well as educational strategies for teaching and training within such a framework.

SPE 514 Teaming and Collaboration 3 cr

An intensive study of the nature of teaming and collaborative practices with an emphasis on developing skills to organize and participate in a variety of such situations.

SPE 515 Data and Behav Mgmt 3 cr

Behavioral assessment techniques and experimental designs for the evaluation of behavior change programs. Operant and respondent methods for deceleration of inappropriate behavior. Operant methods for accelerating appropriate behaviors, teaching new behaviors and maintaining behaviors. Data-Based decision making strategies for formative program evaluation and modifications.

SPE 516 Methods Spec Needs Learners 3 cr

An examination of the methodologies employed in teaching special needs learners. The course covers the theoretical underpinnings and practical application of techniques with media, and materials.

SPE 517 Com Lang Read Stu Disability 3 cr

Major topics include the nature of language, language development and language problems in exceptional students; and remedial procedures. Informal and formal language and reading assessment. Relationship of reading to writing, phonetic, sight and combination means of reading instruction.

SPE 518 Assessment 3 cr

Advanced assessment of developmental levels, academic and non-academic performance of exceptional individuals through the administration and interpretation of standardized tests, criterion-referenced instruments, and informal measures.

SPE 521 Children W-High Potential 3 cr

Study of the intellectual, creative, emotional, and other psychological facets of gifted and talented children. Attention will be paid both to those individuals whose potential is realized and those who are considered underachievers.

SPE 522 Creative and Prod Thinking 3 cr

Geared to understanding the creative process, personality, and product of gifted and talented children as well as how to foster creativity and productive thought in the classroom.

SPE 523 Tchg Children W-High Potential 3 cr

Various curricular emphases and program approaches employed for gifted, creative, and talented children are studied. Insights are offered into articulating educational efforts.

SPE 524 Atyp Children W-High Potential 3 cr

This course is an in-depth study of the unique needs of atypical populations of gifted students. Attention will be directed to the culturally diverse gifted, economically disadvantaged gifted, underachieving gifted, gifted in rural areas, gifted females, highly/profound gifted, gifted handicapped, gifted with ADD/ADHD/SLD, and gifted preschoolers.

SPE 532 Impact of Typical Atypical Dev 3 cr

An examination of typical child development and developmental characteristics of infants, toddlers, and young children with disabilities from the prenatal period through age eight. Characteristics of disabling conditions and their impact upon development are also discussed.

SPE 533 Issue Edu Young Child Disabil 3 cr

This course prepares students to work with infants, toddlers, and young children with disabilities and their families. Topics covered include specific teaching and intervention techniques, special education laws and regulations, and service delivery models.

SPE 534 Assessment Devel Young 3 cr

This course contains information on basic psychometric qualities of screening, evaluations, and assessments, tools for use with infants, toddlers, and young children with disabilities, conducting family assessments, adapting measures for children with disabilities and using screening assessment, and evaluation in individualized programming.

SPE 535 Collaborating with Families 3 cr

This course prepares students to work with families of children with special needs. It contains information on understanding families, working with traditional and non-traditional families, and providing family-centered services.

SPE 588 Advanced Practicum Experience 3 cr

The purpose of this course is to provide a field experience focusing on evaluation and program improvement in academic and behavioral assessment, program planning, and experiences in implementation of special education programming.

SPE 589 Pre-Practicum Experience 3,6 cr

Supervised experience in the teaching field which allows the teacher's performance to be evaluated qualitatively.

SPE 590 Sp Top - 3 cr

A course with varying content dealing with issues, trends, and topics of current interest in the field of education exceptional individuals. May be repeated for credit when course content varies. Composition of activity. Total credit cannot exceed 6 hours.

SPE 591 Multicategory Prac Seminar 3 cr

Combines field experiences and technology-based simulations and learning experiences with an ongoing seminar to address a wide-range of disabilities and educational implications. Course content will be individualized according to the students educational and professional background.

SPE 592 Collaborative Pract-Seminar 3 cr

A seminar which enables students to discuss controversial issues related to the role and function of the collaborative teacher. Students lead and respond to discussion on topics which include teaming, inclusion, and collaboration.

SPE 593 Classroom Exp Prac - 3 cr

Supervised experience in the teaching field which allow the teacher's performance to be evaluated qualitatively.

SPE 594 Dir St - Research 3 cr

Students explore through directed individual study and research, problems and issue of special interest or significance in Special Education.

SPE 595 Intern/Prac SPE Coll Tch K-6 3,6 cr

Supervised experiences in Collaborative Teaching K-6 in the teaching field which allow the teacher's performance to be evaluated qualitatively.

Prerequisite: SPE 500 Minimum Grade of B and SPE 514 Minimum Grade of B and SPE 512 Minimum Grade of B and SPE 516 Minimum Grade of B and SPE 515 Minimum Grade of B and SPE 591 Minimum Grade of B and (PRAXIS-Mathematics Subtest 157 or PRAXIS-Mathematics Subtest 157) and (PRAXIS-Social Studies Subtest 154 or PRAXIS-Social Studies Subtest 154) and (PRAXIS-Science Subtest 158 or PRAXIS-Science Subtest 158) and PRAXIS-Teaching Reading CB 159 or 190 233

SPE 596 Intern/Prac SPE Coll Tch 6-12 3,6 cr

Supervised experiences in Collaborative Teaching 6-12 in the teaching field which allow the teacher's performance to be evaluated qualitatively.

Prerequisite: SPE 500 Minimum Grade of B and SPE 514 Minimum Grade of B and SPE 512 Minimum Grade of B and SPE 516 Minimum Grade of B and SPE 515 Minimum Grade of B and SPE 591 Minimum Grade of B

SPE 597 Intern/Prac SPE ECSE 3 cr

Supervised experiences in Collaborative Teaching ECSE in the teaching field which allow the teacher's performance to be evaluated qualitatively

Prerequisite: PRAXIS-Elem Ed Cont Knowledge 137

SPE 598 Intern/Prac SPE G/T 3 cr

Supervised experiences in Collaborative Teaching Gifted/Talented in the teaching field which allows the teacher's performance to be evaluated qualitatively.

SPE 599 Thesis 3 cr

A student selects a project, study, or investigation in Special Education related to the student's area of specialization. The project forms a basis for the thesis. A thesis committee will give guidance during the investigation and during the writing of the thesis.

SPE 601 Advanced Eval in SPE 3 cr

Methods and procedures for developing criterion-referenced instruments and assessment batteries for classroom use in evaluating exceptional children and youth.

SPE 609 Adv Study of Excep Children 3 cr

Comparison of the normal development progress and that usually seen in the various exceptionality categories of special education especially cognitive, communication, motor, social and emotional development.

SPE 641 Seminar Behav Disorders 3 cr

Advanced study and review of the state of present knowledge in areas relevant to the psycho-pathological disorders of childhood including etiology, assessment, treatment and education.

SPE 642 Clinical Teaching I 3 cr

A study of the principles of behavioral theory upon which strategies for change in cognitive and social behavior rest and the evaluative designs used to monitor behavioral change and validate strategies.

Prerequisite: SPE 515 Minimum Grade of B

SPE 643 Clinical Teaching II 3 cr

A study and review of clinical research relevant to the curriculum requirements in the education and treatment of exceptional children and the identification of research needs in the various areas of exceptionality.

SPE 651 Seminar in LD 3 cr

Current trends and issues in the education of learning disabled individuals are discussed, various theoretical approaches and current empirical evidence provide the basis for discussion.

SPE 671 Seminar in ID Educ 3 cr

Current trends and issues in the education of individuals with intellectual disabilities. Class and recent professional literature are the basis for developing perspectives.

SPE 690 Sp Top - 3 cr

A course with varying content dealing with issues, trends, and topics of current interest in the field of education exceptional individuals. May be repeated for credit when course content varies.

SPE 694 Dir St - Research 3 cr

Students explore through directed study problems and issues of special interest or significance in Special Education.

SPE 699 Research Project 1-3 cr

The Research Project, as the culminating experience in the Specialist Program, provides an opportunity for the candidate to synthesize and apply the various program components in a selected instructional setting. Suitable agreements are reached with the appropriate public school system by the candidate. MR majors may not take more than 8 hours.

Prerequisite: IDE 692 Minimum Grade of B or EDU 692 Minimum Grade of B

Faculty

Early Childhood Education (Alt. M.Ed.)

Degree Requirements

In general, the program requires a minimum of 42 graduate hours and such additional undergraduate courses or experiences as the Department may require. Please visit <http://www.southalabama.edu/colleges/ceps/programs.html> for specific requirements. See College of Education and Professional Studies general section for program admission requirements.

The program for the Alternative M.Ed. in Elementary Education and Early Childhood Education is as follows: 42 minimum graduate hours requires (500 level).

Code	Title	Hours
Curriculum and Teaching		
EEC 523	Instr Plan Elem School	3
Foundations/Special Education		
SPE 500	Nat-Needs of Exc Chld and Yth	3

Clinical Field Experience		
EEC 598	Internship Early Childhood Edu (Supervised practice in a school setting in the student's teaching field. The student will work full time in the school for an entire semester)	6
Total Hours		42

Alabama State Department of Education Certification Requirements

A Student applying for initial teacher certification will be required to pass the appropriate Praxis II test(s) and have a successful score on his/her edTPA portfolio. ALSDE certification requirements are subject to change and students will be required to meet those which are in place the semester they are applying for certification. Prior to registering for any Praxis II exam, please verify current requirements by going directly to the ALABAMA portion of the Praxis II at <http://www.ets.org/praxis/al> (<http://www.ets.org/praxis/al/>)

Early Childhood Education (M.Ed.) Degree Requirements

The Master of Education (M.Ed.) program in Early Childhood Education provides advanced study for teachers working with children preschool through third grade. Upon completion of the program, students are eligible for the Class A Professional Early Childhood Education Certificate provided they already hold the Class B Professional Early Childhood Certificate.

Note: The appropriate course of study sheet and the assigned departmental advisor should be consulted in all program matters.

Thesis

A student may elect to write a thesis as part of the program. If the student decides to write a thesis, a thesis committee will be appointed to work with the student and to evaluate the thesis. (IDE 510 and IDE 620 are required.)

The program for the M.Ed. in Early Childhood Education is as follows: 30 minimum hours required (500 level)

Code	Title	Hours
Curriculum and Teaching		
EEC 553	Org Patterns and Curr in ECE	3
EEC 522	Elementary School Curriculum	3
EEC 523	Instr Plan Elem School	3

This major contains a professional component (Candidacy) comprised of upper level courses (300-400 levels), as shown on the graduation plan, and are only available to students who have gained admission to Candidacy.

Admission Requirements for Candidacy – Early Childhood Studies

- Courses: CA 110, EH 101, EH 102; CIS 150 or CIS 250 or EDM 310; EEC 351
- Hours: 60 credit hours of degree requirements completed
- Minimum Grade Point Averages: 2.20 Major GPA, 2.20 USA GPA
- Proof of clear DHR or SDE fingerprinting/background check and professional liability insurance
- Completion of satisfactory departmental interview with your assigned advisor. Recommendation of advisor and department chairperson.

- Sufficient physical ability and emotional stability to perform as a professional.
- Application/Admission Information:
 - Candidacy applications are due one semester prior to enrolling in classes that require Candidacy. The intent is for students to apply for Candidacy AND meet with their advisor prior to registration to enable appropriate planning decisions for upcoming semesters.
 - Students approaching eligibility will receive a link to the online application in their JagMail.
 - After final grades are posted and all requirements are verified as met, the Office of Student Services will notify students by JagMail when they are admitted to Candidacy. Students will then be able to register for Candidacy courses.

Educational Administration (M.Ed.) Degree Requirements

The department offers the M.Ed in Educational Administration for higher education administrators and the M.Ed in Educational Administration leading to Alabama Class "A" certification in Instructional Leadership. Instructional Leadership courses empower students for advancement in educational service. Leadership programs emphasize growth from the knowledge base through simulations to practical application and career mobility.

Special Admission Requirements for Instructional Leadership Certification

Applications for Master's programs in Instructional Leadership are reviewed for admission to the fall, spring and summer semesters. Readmission to some programs in Education (i.e. Educational Administration, Doctoral Program, and some AA/Ed.S. Programs) require review by program faculty. Deadline for receipt of all application materials is November 1, April 1 and July 1.

In addition to the requirements listed in the College section of the bulletin, program specific requirements for admission to Instructional Leadership include:

1. Documents required to submit with the application can be found at <https://www.southalabama.edu/colleges/ceps/lte/edlead-med-k12.html>.
2. Successful completion of a structured interview with a panel of Educational Leadership professors and a current K-12 practicing administrator.
3. Special admission requirements apply only to the Instructional Leadership certification and not to the Higher Administration Master's degree.

Admission decisions involve evaluation of the applicant's grade-point average, scores on the GRE and MAT (Master's only), all submitted documents, and structured interview. Program enrollment and availability will also be considered. The application, transcripts, test scores, and complete admissions portfolio must be received by November 1, April 1 and July 1:

Class A Certificate in Instructional Leadership and Master of Education Degree

Students entering this program must have a bachelor's degree and Alabama Class B Certification in a teaching field. Program requirements include:

1. Completing a minimum of 30 semester hours as outlined below with at least a 3.25 grade-point average, including a grade of "B" or above in all courses with EDL prefix,
2. Passing the electronic portfolio assessment, and completing a School-based Residency focused on authentic assessments of performance on state standards.
3. Successful completion of ALSDE approved certification assessment (Praxis 5412 score 146 and above).

The Class A Certificate is valid for 5 years and is renewable.

Footnote

¹ If a survey course in special education was previously taken at the undergraduate or graduate level, EDU 567 is required in lieu of SPE 500.

Instructional Leadership Add-on

Code	Title	Hours
EDL 501	Theories Instructnl Leadership	3
EDL 502	Data-Driven Instrucnl Leadrshp	3
EDL 503	Supervision & Prof Development	3
EDL 504	Ethical & Legal Dimens Sch Ldr	3
EDL 505	Bus Mgmt of Lrng Organizations	3
EDL 598	Residency -	3
Total Hours		18

- The option is referred to as the "Reduced Hour Option" and includes completing the 18-hour program and passing the appropriate Praxis Exam. It is available only for those already holding a master's degree and a valid Alabama "A" Certificate in another area.

- A survey of special education course is required if not previously completed. If a survey of special education course was previously completed, then an ALSDE-approved diversity course is required. If an ALSDE-approved diversity course was previously completed to meet requirements for Class A certification, then an additional diversity course is NOT required for an additional Class A certification. Requirement may be waived if a survey of special education course and an ALSDE-approved diversity course were previously completed. Contact your advisor, the certification officer, or the Office of Student Services to verify eligibility.

Educational Leadership (Ed.D.)

Degree Requirements

Doctor Of Education Program in Educational Leadership

The Educational Leadership Executive Ed.D. program is an intensive 60 credit hour, cohort-based program designed for educators who wish to earn a terminal degree in educational leadership. The Ed.D. program allows students to keep their current full-time jobs while also studying full-time.

The program is aligned with the recommendations of the Carnegie Project on the Education Doctorate (<http://cpedinitiative.org/>) to redesign the Ed.D. to make it a stronger and more relevant degree for the advanced preparation of school practitioners and clinical faculty, academic leaders, and professional staff for the nation's schools and colleges, and the learning organizations that support them. The program is intended to train an emerging generation of senior educational leaders with the knowledge and skills necessary to connect research, theory, and practice in leading high performing learning organizations to manage resources strategically, engage in evidence-based decision-making, promote continuous improvement, and encourage innovation.

The program includes courses in educational leadership, program assessment and evaluation, finance, ethics and legal issues, global education, and various research strategies. The dissertation process is structured and systematic, unfolding from the first course throughout the curriculum to make it possible to complete a dissertation study by the end of the program. The research courses in the curriculum are designed to build the expertise needed not only to complete the dissertation, but also to supervise, evaluate, and apply research to the management of complex educational organizations.

Because the program is explicitly designed to prepare educational leaders who can use research and theory to create change by solving a problem of practice, students complete a dissertation that is addressed to a specific practical management challenge appropriate to their work setting.

The Doctor of Education degree has two concentrations. One area of focus is for K-12 practitioners, the other for aspiring Higher Education administrators. For information contact Dr. Susan Santoli, Department of Leadership and Teacher Education. The program accepts applications each March 15th for yearly cohorts starting the following May.

Upon admission, practicing K-12 administrators who hold an Educational Specialist degree in Educational Leadership may request coursework from their Specialist degree be considered for transfer credit into the Educational Leadership Doctoral Program.

A 3.25 program and institutional GPA is required at graduation. Courses over 10 years old cannot be used in the program.

Educational Specialist (Ed.S.)**Degree Requirements****Advanced Graduate Study: Sixth-year (Post-master's) Programs**

(Ed.S. and Class AA Certification)

Post-Master's or Sixth-Year Graduate Programs for Educational Specialist which lead to an (Ed.S.) Degree and Class AA (State of Alabama) Professional Certification for Instructional Specialist are available for qualified individuals in the areas listed below.

In addition to college requirements students seeking certification will have a graduate program committee plan a program based upon the student's training, experience and needs. This committee will determine if any prerequisite courses are needed.

Alabama State Department of Education Certification Requirements

A Student applying for initial teacher certification will be required to pass the appropriate Praxis II test (s) and have a successful score on his/her edTPA portfolio. ALSDE certification requirements are subject to change and students will be required to meet those which are in place the semester they are applying for certification. Prior to registering for any Praxis II exam, please verify current requirements by going directly to the ALABAMA portion of the Praxis II website at <http://www.ets.org/praxis/al> (<http://www.ets.org/praxis/al/>).

Elementary Education (M.Ed.)

Degree Requirements

The Master of Education (M.Ed.) program in Elementary Education provides advanced study for teachers working with children kindergarten through sixth grade. Upon completion of the program, students are eligible for the Class A Professional Elementary Education Certificate provided they already hold a Class B Professional Elementary Education Certificate.

Note: The appropriate course of study sheet and the assigned department advisor should be consulted in all program matters.

Thesis

A student may elect to write a thesis as part of the program. If the student decides to write a thesis, a thesis committee will be appointed to work with the student and to evaluate the thesis. (IDE 510 and IDE 620 are required.)

The program for the M.Ed. in Elementary Education is 30 min credit hours (500 level).

Teacher Candidacy – Elementary Education K6

This major contains a professional component of upper level education courses (300-400 levels), grouped into three consecutive semesters (as shown on graduation plan: Tier 2, Tier 3, Tier 4), and are only available to students who have gained admission to Teacher Candidacy.

Admission Requirements for Teacher Candidacy:

Courses and GPA

- Courses: 4 x 12 (12 semester hours in each of the four areas: English/ Language Arts, Math, Science, Social Science with a grade of C or better). Plus, CA 110, EH 101, EH 102, EDM 310, EPY 351, EDU 330, and EDU 346
- Hours: 60 credit hours of degree requirements completed
- Minimum Grade Point Averages: 2.5 Program, 2.5 Professional Studies, 2.5 Teaching Field, and 2.5 USA GPA (all GPAs found in degree audit). No grade below a "C" is accepted in the 4 x 12, the Professional Studies, or Teaching Field.

ALSDE Background Check

- https://www.alabamaachieves.org/teacher-center/teacher-preparation/#Background_Clearance

Application, Liability Insurance, and Interview

- Completed and scheduled in the UCOM Advising Center during the semester prior to beginning Teacher Candidacy

Tier Prerequisites and Certification/Graduation Requirements:

Tier 2 Prerequisite

- Admission to Teacher Candidacy

Tier 3 Prerequisites

- Praxis – Elementary Education: Multi Subjects – All Passing Scores (Math, Science, Social Studies) https://www.ets.org/praxis/al/al_teacher_ed/
- GPAs at Admission Requirement Levels
- Successful Completion of Tier 2 with Grades of C or Higher

Tier 4 Prerequisites

- Praxis – Teaching Reading: Elementary – Passing Score https://www.ets.org/praxis/al/al_teacher_ed/
- GPAs at Admission Requirement Levels
- Successful Completion of Tier 3 with Grades of C or higher
- Student Teaching Application

Certification/Graduation Requirements

- Successful Completion of Tier 4 with Grades of C or higher
- GPAs at Admission Requirement Levels
- Passing Score on edTPA
- Applications for Certification and Graduation

Add-on Certification (s) available for K6 Teacher Education Majors (9-21 Hours plus required Praxis)

CT K-6 Add-on Certificate: No additional coursework required. Praxis Test Requirements: Subject Area-Special ED (required for certification).

P-3 ECE Add-On Certificate: 9 hours of coursework required EDU 348, EDU 398, EDU 498. Praxis Test Requirements: Subject Area: Early Childhood (required for certification).

P-3 ECE/SPE Add-On Certificate: 9-12 hours of coursework required: EDU 432, EDU 433, and EDU 497. Praxis Test Requirements: Subject Area: Early Childhood and Special Education (both required for certification).

Note: Praxis tests requirements are subject to change as prescribed by the ALSDE. Prior to registering for any Praxis exam, please verify current requirements by going directly to the Alabama portion of the ETS Praxis website at <http://ets.org/praxis/al> (<http://ets.org/praxis/al/>).

- (W) Courses that satisfy USA writing requirement (2 required)

Reading Specialist Certification

Degree Requirements

Reading Specialist Class A Certification

Admission

Requirements for admission to the Class A Reading Specialist program shall include:

- At least baccalaureate-level professional educator certification in any area of education and master's degree; Candidates without a master's degree may pursue the reading specialist certification along with the master's degree in Elementary or Early Childhood Education. See advising sheets for details.
- Two years of successful classroom teaching experience; **and**
- Certification in Early Childhood Education, Elementary Education, Collaborative Teacher (K-6 or 6-12), **or**
- Certification in any other area of education and completion of two reading courses including an introduction to reading course.

Note: All certification programs require an introductory course, special education SPE 500, if not completed at the undergraduate level.

¹ EEC 522 taken by those with an undergraduate secondary certificate.

SED 552 taken by those with an undergraduate elementary certificate.

² SPE 500 required if introductory special education course not previously taken or EDU 567 or an ALSDE-Approved diversity course if not completed with Class A certification.

State Board Of Education Praxis II Test Information

Applicants completing coursework for Class A Reading Specialist certification are required to pass Praxis II in their area of certification. Please see specific program requirements on advising sheets. Praxis II test requirements are subject to change as dictated by the ALSDE. Prior to registering for any Praxis II exam, please verify current requirements by going directly to the **Alabama** portion of the Praxis II website at <http://www.ets.org/praxis/al> (<http://www.ets.org/praxis/al/>)

Secondary Education (Alt. M.Ed.)

Degree Requirements

This program is designed to provide initial teacher preparation at the graduate level primarily for students interested in pursuing a career in teaching but whose undergraduate degree did not include a teacher education program. See College of Education and Professional Studies general section for program admission requirements.

Secondary Grades 6-12 (42 semester hours 500 level)

Total Hours		42

Footnote

¹ Students must have A or B in this course on order to be eligible for student teaching.

² This course has a field component. See advisor for details.

Each comprehensive teaching field of English language arts, general science, and general social science shall ensure that the candidate has completed at least one course in at least two of the comprehensive fields.

Successful completion of PRAXIS II test appropriate to the teaching field and grade level of certification sought is required **prior** to enrollment in internship.

Alabama State Department of Education Certification Requirements

A Student applying for initial teacher certification will be required to pass the appropriate Praxis II test (s) and have a successful score on his/her edTPA portfolio. ALSDE certification requirements are subject to change and students will be required to meet those which are in place the semester they are applying for certification. Prior to registering for any Praxis II exam, please verify current requirements by going directly to the ALABAMA portion of the Praxis II website at: <http://www.ets.org/praxis/al> (<http://www.ets.org/praxis/al/>).

Student must take a comprehensive end of program examination or submit an end of degree portfolio during the semester in which the internship is completed.

Please visit <http://www.southalabama.edu/colleges/ceps/programs.html> for specific requirements.

Secondary Education (M.Ed.)

Degree Requirements

Programs in Secondary Education - Master of Education Degree Programs

M.Ed. programs are designed to enhance and extend the knowledge and qualifications of secondary teachers. See College of Education and Professional Studies general section for program admission requirements.

LGS 207	Intermediate Arabic II	Total Hours 45-46	
LGS 210	Intermediate ASL I		
LGS 211	Intermediate ASL II		

Footnote

¹ Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 121 & HY 122 or HY 135 & HY 136)

Additional Information

E-portfolio and Assessment

Students enrolled in education classes are required to purchase a LiveText membership.

- <https://www.southalabama.edu/colleges/ceps/livetext.html>

Teacher Candidacy – Secondary Education

This major contains a professional component (Candidacy) comprised of upper level education courses (300-400 levels), grouped into three semesters (as shown on graduation plan), and are only available to students who have gained admission to Teacher Candidacy.

Admission Requirements for Teacher Candidacy

Courses and GPA

- Courses: CA 110, EH 101, EH 102, EDM 310, EDU 400, EPY 351, and 75% of Teaching Field (or no more than one semester of Teaching Field courses between methods and internship)
- Hours: 60 credit hours of degree requirements completed
- Minimum Grade Point Averages: 2.5 Program, 2.5 Professional Studies, 2.5 Teaching Field, and 2.5 USA GPA (all GPAs found in degree audit). No grade below a "C" is accepted in Professional Studies.

ALSDE Background Check

- https://www.alabamaachievers.org/teacher-center/teacher-preparation/#Background_Clearance

Application, Liability Insurance, and Interview

- Completed and scheduled in the UCOM Advising Center during the semester prior to beginning Teacher Candidacy

Prerequisites and Certification/Graduation Requirements

Semester 1 of Teacher Candidacy: EDU 340 (Prerequisite Below)

- Admission to Teacher Candidacy

Semester 2 of Teacher Candidacy: Methods Block (Fall Only-15 Credit Hours) (Prerequisites Below)

- Successful Completion of EDU 340 with a Grade of C or better
- GPAs at Admission Requirements Levels

Semester 3 of Teacher Candidacy: Internship (Prerequisites Below)

- Praxis - Teaching Field Content Knowledge - Passing Score https://www.ets.org/praxis/al/al_teacher_ed/
- Successful Completion of Methods Block with Grades of C or better
- GPAs at Admission Requirement Levels
- Student Teaching Application

Certification/Graduation Requirements

- Successful Completion of Student Teaching
- GPAs at Admission Requirement Level
- Passing Score on edTPA
- Application for Certification and Graduation

Secondary students will be required to participate in an opening of school experience during the fall immediately preceding either their methods block classes or their student teaching. This experience will take place at the beginning of the public school year which is prior to the beginning of U.S.A. classes.

Note: Praxis tests requirements are subject to change as prescribed by the ALSDE. Prior to registering for any Praxis exam, please verify current requirements by going directly to the Alabama portion of the ETS Praxis website at <http://ets.org/praxis/al> (<http://ets.org/praxis/al/>).

Teaching Field Core

Includes 12 hours from **General Education Area II**

A. Complete the following:

CA 100	Intro to Communication	3
CA 220	Writing Comm Media - W	3
EH 300	Intro to Literary Study	3
EH 371	Approaches to Eng Grammar - W	3
EH 401	Teaching Composition-W	3

B. Select six hours from the following: see footnote table below (p. 532)²

EH 215	Brit Lit before 1785	
or EH 216	Brit Lit after 1785	
EH 225	Am Lit before 1865	
or EH 226	Am Lit after 1865	
EH 235	World Lit before 1650	
or EH 236	World Lit after 1650	

C. Select six hours from the following:

EH 400 - EH 499		6
-----------------	--	---

D. Select one of the following:

EH 402	Rhetoric-Ancient and Modern-W	3
EH 421	Literary Criticism to 1900-W	
EH 422	Lit Criticism Since 1900-W	

Literature Prior to 1660

E. Select one of the following:

EH 314	Medieval Literature	3
EH 315	Chaucer	
EH 321	Renaissance Literature	
EH 342	Later 18th Century Lit - W	
EH 461	Tudor and Stuart Drama	
EH 465	Middle English Literature	
EH 467	Milton	
EH 470	Medieval Lit	
EH 471	Renaissance Lit	
EH 472	Shakespeare	

<i>British or American Literature from 1660-1900</i>		
F. Select one of the following:		3
EH 331	American Novel to 1900	
EH 332	American Nonfiction Prose	
EH 334	American Poetry to 1900	
EH 340	Restoration Early 18th Lit	
EH 342	Later 18th Century Lit - W	
EH 343	18th Century British Novel	
EH 351	British Romanticism	
EH 352	Victorian Poetry	
EH 353	Victorian Prose	
EH 354	19th Century British Novel	
EH 462	Restor-18th Century Drama - W	
EH 474	Restoration Lit	
EH 475	19th Century Lit	
<i>Literature after 1900</i>		
G. Select one of the following:		3
EH 360	Anglo-Am Poetry since 1900	
EH 361	American Novel since 1900	
EH 362	Am. Novel from 1900 to 1945	
EH 363	American Novel since 1945	
EH 364	Brit. Novel from 1900 to 1945	
EH 365	British Novel since 1945	
EH 366	Contemporary Fiction	
EH 367	British Novel since 1900	
EH 369	Modern Short Story	
EH 380	Science Fiction	
EH 463	Drama 1890 to Present	
EH 468	Contemporary Black Fiction	
EH 476	Studies in 20th Century Lit	
EH 478	Film	
EH 479	Mod/Postmodern Poetry

Total Hours		120-123

Footnote

¹ Required for admission to Candidacy as a prerequisite

² One course in each area with a **sequence** included in Area II, B, D

General Education Requirements

Includes 12 hours of Humanities and Fine Arts courses from Area II that will satisfy requirements in the **Teaching Field Core**.

Code	Title	Hours
Area I – Written Composition		
A. Complete the following:		
EH 101	English Composition I	3
B. Complete the following:		
EH 102	English Composition II	3
Area II – Humanities & Fine Arts		
A. Complete the following:		

CA 110	Public Speaking	3
B. Select one of the following: see footnote table below (p. 533) ¹		
EH 215	Brit Lit before 1785	
EH 225	Am Lit before 1865	
EH 235	World Lit before 1650	
C. Complete the following:		
DRA 110	Introduction to Theatre	3
D. Select one of the following: see footnote table below (p. 533) ¹		
EH 226	Am Lit after 1865	
EH 226	Am Lit after 1865	
EH 236	World Lit after 1650	
Area III – Natural Sciences & Mathematics		
A. Select 3-4 hours from the following:		
MA 110	Finite Mathematics	
MA 112	Precalculus Algebra	
MA 113	Precalculus Trigonometry	
MA 115	Precal Algebra-Trigonometry	
MA 120	Calculus and Its Applications	
MA 125	Calculus I	
B. Select 8-10 hours from the following:		
AN 121 & 121L	Biological Anthropology and Biological Anthropology Lab	
BLY 101 & 101L	Life Science I and Life Science I Laboratory	
or BLY 121 & 121L	General Biology I and General Biology I Lab	
BLY 102 & 102L	Life Science II and Life Science II Lab	
or BLY 122 & 122L	General Biology II and General Biology II Laboratory	
CH 101 & 101L	Survey of Inorg and Org Chem and Survey Inorg-Org Chem Lab	
CH 131 & 131L	General Chemistry I and General Chemistry I Lab	
CH 132 & 132L	General Chemistry II and General Chemistry II Lab	
GEO 101 & 101L	Environmental Geography and Environmental Geography Lab	
GEO 102 & 102L	Earth and the Environment and Earth and the Environment Lab	
GY 111 & 111L	Physical Geology and Physical Geology Lab	
GY 112 & 112L	Earth History and Earth History Lab	
MAS 134 & 134L	Ocean Science and Ocean Science Lab	
PH 101 & 101L	Introduction to Astronomy and Introduction to Astronomy Lab	
PH 104 & 104L	Concepts of Physics and Concepts of Physics Laboratory	
PH 114 & 114L	Physics with Algebra-Trig I and Alg-Trig Based Physics I Lab	
PH 115 & 115L	Physics with Algebra -Trig II and Alg-Trig Based Physics II Lab	

PH 201 & 201L	Calculus-Based Physics I and Calculus-Based Physics I Lab
PH 202 & 202L	Calculus-Based Physics II and Calculus-Based Physics II Lab

Area IV – History, Social & Behavioral Sciences see footnote table below (p. 533)¹

A. Select one of the following:	3
HY 101	HY of Western Civilization I
HY 102	HY of Western Civilization II
HY 121	World Civilization I
HY 122	World Civilization II
HY 135	US History to 1877
HY 136	US History since 1877
B. Select three of the following:	9
AN 100	Intro to Cultural Anthropology
AN 101	Intro Archaeology-Bio Anthro
ECO 215	Prin of Microeconomics
ECO 216	Prin of Macroeconomics
GEO 114	People, Places, Environment
GEO 115	World Regional Geography
GS 101	Intro to Gender Studies
HY 101	HY of Western Civilization I

PSC 130	Intro to US Government
PSY 250	Life Span Development
SY 109	Introductory Sociology
SY 112	Social Problems

Area V

A. Complete the following:	3
KIN 100	Concepts of Health and Fitness
B. Complete the following:	1
PE activity course	

Total Hours 45-48

Footnote

¹ Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216 EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 121 & HY 122 or HY 135 & HY 136)

Additional Information

E-portfolio and Assessment

Students enrolled in education classes are required to purchase a LiveText membership.

- <https://www.southalabama.edu/colleges/ceps/livetext.html>

Teacher Candidacy – Secondary Education

This major contains a professional component (Candidacy) of upper level education courses (300-400 levels), grouped into three semesters (as

shown on graduation plan), and are only available to students who have gained admission to Teacher Candidacy.

Admission Requirements for Teacher Candidacy

Courses and GPA

- Courses: CA 110, EH 101, EH 102, EDM 310, EDU 400, EPY 351, and 75% of Teaching Field (or no more than one semester of Teaching Field courses between methods and internship)>
- Hours: 60 credit hours of degree requirements completed
- Minimum Grade Point Averages: 2.5 Program, 2.5 Professional Studies, 2.5 Teaching Field, and 2.5 USA GPA (all GPAs found in degree audit). No grade below a “C” is accepted in Professional Studies.

ALSDE Background Check

- https://www.alabamaachievers.org/teacher-center/teacher-preparation/#Background_Clearance

Application, Liability Insurance, and Interview

- Completed and scheduled in the UCOM Advising Center during the semester prior to beginning Teacher Candidacy

Prerequisites and Certification/Graduation Requirements

Semester 1 of Teacher Candidacy: EDU 340 (Prerequisite Below)

- Admission to Teacher Candidacy

Semester 2 of Teacher Candidacy: Methods Block (Fall Only-15 Credit Hours) (Prerequisites Below)

- Successful Completion of EDU 340 with a Grade of C or better
- GPAs at Admission Requirements Levels

Semester 3 of Teacher Candidacy: Internship (Prerequisites Below)

- Praxis - Teaching Field Content Knowledge - Passing Score https://www.ets.org/praxis/al/al_teacher_ed/
- Successful Completion of Methods Block with Grades of C or better
- GPAs at Admission Requirement Levels
- Student Teaching Application

Certification/Graduation Requirements

- Successful Completion of Student Teaching
- GPAs at Admission Requirement Level
- Passing Score on edTPA
- Application for Certification and Graduation

Secondary students will be required to participate in an opening of school experience during the fall immediately preceding either their methods block classes or their student teaching. This experience will take place at the beginning of the public school year which is prior to the beginning of U.S.A. classes.

Note: Praxis tests requirements are subject to change as prescribed by the ALSDE. Prior to registering for any Praxis exam, please verify current requirements by going directly to the Alabama portion of the ETS Praxis website at <http://ets.org/praxis/al> (<http://ets.org/praxis/al/>).

Area V		
A. Complete the following:		
KIN 100	Concepts of Health and Fitness	3
B. Complete the following:		
PE activity course		1
Total Hours		46-48

Footnote

¹ Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 121 & HY 122 or HY 135 & HY 136)

Additional Information

E-portfolio and Assessment

Students enrolled in education classes are required to purchase a LiveText membership.

- <https://www.southalabama.edu/colleges/ceps/livetext.html>

Teacher Candidacy – Secondary Education

This major contains a professional component (Candidacy) comprised of upper level education courses (300-400 levels), grouped into three semesters (as shown on graduation plan), and are only available to students who have gained admission to Teacher Candidacy.

Admission Requirements for Teacher Candidacy

Courses and GPA

- Courses: CA 110, EH 101, EH 102, EDM 310, EDU 400, EPY 351, and 75% of Teaching Field (or no more than one semester of Teaching Field courses between methods and internship)>
- Hours: 60 credit hours of degree requirements completed
- Minimum Grade Point Averages: 2.5 Program, 2.5 Professional Studies, 2.5 Teaching Field, and 2.5 USA GPA (all GPAs found in degree audit). No grade below a “C” is accepted in Professional Studies.

ALSDE Background Check

- https://www.alabamaachieves.org/teacher-center/teacher-preparation/#Background_Clearance

Application, Liability Insurance, and Interview

- Completed and scheduled in the UCOM Advising Center during the semester prior to beginning Teacher Candidacy

Prerequisites and Certification/Graduation Requirements

Semester 1 of Teacher Candidacy: EDU 340 (Prerequisite Below)

- Admission to Teacher Candidacy

Semester 2 of Teacher Candidacy: Methods Block (Fall Only-15 Credit Hours) (Prerequisites Below)

- Successful Completion of EDU 340 with a Grade of C or better
- GPAs at Admission Requirements Levels

Semester 3 of Teacher Candidacy: Internship (Prerequisites Below)

- Praxis - Teaching Field Content Knowledge - Passing Score https://www.ets.org/praxis/al/al_teacher_ed/
- Successful Completion of Methods Block with Grades of C or better
- GPAs at Admission Requirement Levels
- Student Teaching Application

Certification/Graduation Requirements

- Successful Completion of Student Teaching
- GPAs at Admission Requirement Level
- Passing Score on edTPA
- Application for Certification and Graduation

Secondary students will be required to participate in an opening of school experience during the fall immediately preceding either their methods block classes or their student teaching. This experience will take place at the beginning of the public school year which is prior to the beginning of U.S.A. classes.

Note: Praxis tests requirements are subject to change as prescribed by the ALSDE. Prior to registering for any Praxis exam, please verify current requirements by going directly to the Alabama portion of the ETS Praxis website at <http://ets.org/praxis/al> (<http://ets.org/praxis/al/>).

Secondary students will be required to participate in an opening of school experience during the fall immediately preceding either their methods block classes or their student teaching. This experience will take place at the beginning of the public school year which is prior to the beginning of U.S.A. classes.

Note: Praxis tests requirements are subject to change as prescribed by the ALSDE. Prior to registering for any Praxis exam, please verify current requirements by going directly to the Alabama portion of the ETS Praxis website at <http://ets.org/praxis/al> (<http://ets.org/praxis/al/>).

³ Required for admission to Candidacy

Notes:

- (CP) Prerequisite for Candidacy
- (W) Courses that satisfy USA writing requirement (2 required)

Special Education (Alt. M.Ed.)

Degree Requirements

Alternative M.Ed. in Collaborative Teaching

This is a special alternative program for individuals with a baccalaureate degree in non-teacher education fields and individuals without Class "B" certification in an area of Education. In general the program requires a minimum of 42 graduate hours. See College of Education and Professional Studies general section for program admission requirements.

All pre-requisites must be completed prior to admission to the program.

Academic Standards and Student Responsibility

Students should be aware that the Special Education Program requires that certain courses be taken in sequence. Advisors should be consulted to obtain information about sequencing and pre-requisite coursework.

A committee consisting of graduate faculty members within the program will be selected by program advisors to assist the student in planning their courses of study following the schedule of course offerings. Such programs of study should be approved before the completion of nine semester hours of work.

The Special Education Program requires that students who receive a grade of "C" in a Special Education course, must repeat that course and attain a grade of "B" or better.

Satisfactory performance in all course work (GPA of 3.0 or greater) is required of all graduate Special Education majors; in the event of unsatisfactory performance (below "C") in a course not in their major area, a student's Graduate Program Committee selects the option of repeating the course and demonstrating satisfactory performance or demonstrating satisfactory performance in an approved alternate course. A minimum GPA of 3.25 is required for graduation.

Students must do their internship/practicum in the Mobile area or arrange to be supervised through another university out of our area. Contact Field Services for info regarding the out of area option.

Students are assigned to advisors in their respective program areas. The student has the sole responsibility for initiating applications and meeting test and other deadline requirements.

Students must have a passing score on the appropriate Praxis II prior to enrollment in the internship		
Total Hours		42

Notes

Current admission procedures require a passing score on the appropriate Praxis II prior to admission to the program.

Alabama State Department of Education Certification Requirements

A Student applying for initial teacher certification will be required to pass the appropriate Praxis II test (s) and have a successful score on his/her edTPA portfolio. ALSDE certification requirements are subject to change and students will be required to meet those which are in place the semester they are applying for certification. Prior to registering for any Praxis II exam, please verify current requirements by going directly to the ALABAMA portion of the Praxis II website at <http://www.ets.org/praxis/al> (<http://www.ets.org/praxis/al/>).

Teacher Candidacy – Special Education 6-12

This major contains a professional component comprised of upper level education courses (300-400 levels), grouped into three semesters (as shown in blocks on graduation plan), and are only available to students who have gained admission to Teacher Candidacy.

Admission Requirements for Teacher Candidacy:

Courses and GPA

- Courses: 4 x 12 (12 semester hours in each of the four areas: English/Language Arts, Math, Science, Social Science with a grade of C or better). Plus, CA 110, EH 101, EH 102, EDM 310, EDU 400, and EPY 351
- Hours: 60 credit hours of degree requirements completed
- Minimum Grade Point Averages: 2.5 Program, 2.5 Professional Studies, 2.5 Teaching Field, and 2.5 USA GPA (all GPAs found in degree audit). No grade below a “C” is accepted in the 4 x 12, the Professional Studies, or Teaching Field.

ALSDE Background Check

- https://www.alabamaachieves.org/teacher-center/teacher-preparation/#Background_Clearance (https://www.alabamaachieves.org/teacher-center/teacher-preparation/#Background_Clearance)

Application, Liability Insurance, and Interview

- Completed and scheduled in the UCOM Advising Center during the semester prior to beginning Teacher Candidacy

Internship Pre-requisites and Certification/Graduation Requirements

Internship Pre-requisites

- Student Teaching Application
- GPAs at Admission Requirement Levels
- Successful Completion of the Two Previous Teacher Candidacy Blocks with Grades of C or Higher

- Praxis – Special Education: Core Knowledge and Applications – Pass Score https://www.ets.org/praxis/al/al_teacher_ed/

Certification/Graduation Requirements

- Successful Completion of the Internship with a Grade of C or Higher
- GPAs at Admission Requirement Levels
- Passing Score on edTPA
- Applications for Certification and Graduation

Note: Praxis tests requirements are subject to change as prescribed by the ALSDE. Prior to registering for any Praxis exam, please verify current requirements by going directly to the Alabama portion of the ETS Praxis website at <http://ets.org/praxis/al> (<http://ets.org/praxis/al/>).

Special Education (M.Ed.)

Degree Requirements

Special Education Graduate

The graduate program in Special Education prepares individuals with or without special education backgrounds to work with exceptional children and youth. Students seeking Alabama Class A Professional Certification may select programs of study in the areas of Collaborative Teaching K-6 or 6-12.

Post-master's or Sixth-Year Graduate Programs which lead to an Instructional Specialist Degree are available, and for qualified individuals, an Alabama Professional Certificate at the AA level.

Academic Standards and Student Responsibility

Students should be aware that the Special Education Program requires that certain courses be taken in sequence. Advisors should be consulted to obtain information about sequencing and prerequisite course work.

A committee consisting of graduate faculty members within the program will be selected by program advisors to assist the student in planning their courses of study following the schedule of course offerings. Such programs of study should be approved before the completion of nine semester hours of work.

The Special Education Program requires that students who receive a grade of "C" in a Special Education course, must repeat that course and attain a grade of "B" or better.

Satisfactory performance in all course work (GPA of 3.0 or greater) is required of all graduate Special Education majors; in the event of unsatisfactory performance (below "C") in a course not in their major area, a student's Graduate Program Committee selects the option of repeating the course and demonstrating satisfactory performance or demonstrating satisfactory performance in an approved alternate course. A minimum GPA of 3.25 is required for graduation.

Students must do their internship/practicum during their final semesters in the Mobile area or arrange to be supervised through another university. Contact Field Services for information regarding the out of area option.

Students are assigned to advisors in their respective program areas. The student has the sole responsibility for initiating applications and meeting test and other deadline requirements.

Master of Education Degree Program in Special Education

The requirements for the Master of Education include a minimum of 30 semester hours in the program specialization. All graduate majors will have a graduate program committee plan the individual program of study based upon the student's training, experience, needs and schedule of course offerings.

Those students seeking teacher certification must complete one of the program areas detailed as follows:

Program for Collaborative Teaching, K-6 or 6-12

For students with a valid Class "B" certificate in an area of Education. The 30 semester hour minimum program for the M.Ed. in the area of Collaborative Teaching includes:

Code	Title	Hours

Total Hours **30**

Footnote

¹ Students seeking certification in both K-6 and 6-12 must complete a practicum at each level.

College of Engineering General Information

(251) 460-6140

College of Engineering website
<https://www.southalabama.edu/colleges/engineering/>

College of Engineering Administrative Staff

Title	Name
Dean	John Usher
Associate Dean, Undergraduate Affairs	Eric Steward
Associate Dean, Research and Graduate Affairs	Clive Woods
Director of Graduate Studies	Clive Woods

Mission Statement

The mission of the College of Engineering is to provide students with quality accessible undergraduate and graduate engineering education, to prepare graduates for professional careers and lifelong learning, to promote the creation and dissemination of knowledge, to serve society through professional practice and community outreach and to act as a catalyst for economic and technological development of the Gulf Coast region, the State of Alabama and the Nation.

Honors Program in Engineering

To receive a designation of "Departmental Honors" students must have at least a 3.5 GPA at the time of graduation and complete an Honors Senior Project in their major. The Honors Senior Project requirement may be satisfied in either of two ways.

1. By completing an Honors Senior Project course that requires completion of a research project under the guidance of a faculty mentor.
2. By completing a special honors design project as part of the capstone engineering design requirement under the guidance of a faculty mentor.

It is required that there be both a written report and an oral presentation of the results of the Honors Senior Project.

Students participating in "Departmental Honors" may also elect to take the University Honors Seminar and participate in other University Honors Activities upon recommendation of their major advisor.

Undergraduate Admission

All students, whether domestic or international, are strongly encouraged to submit standardized test scores, either ACT or SAT.

Computer Ownership Policy

All College of Engineering undergraduate students are required to own a personal laptop computer that conforms to the current college minimum standards at the time they enter engineering level courses. For more information, consult the Laptop Policy at www.southalabama.edu/colleges/engineering/currentstudents/academicpolicies.html (<http://www.southalabama.edu/colleges/engineering/currentstudents/academicpolicies.html>).

Requirements for Minors in Disciplines Other than Engineering

Engineering students may complete a minor in disciplines other than engineering. Students desiring to do so must complete the published requirements for that discipline.

Choice of Bulletin for Undergraduate Degree Requirements

After an absence of one calendar year or when transferring into an engineering program, students must use the Bulletin in effect at the time of readmission or transfer, or a later version. No student may use a Bulletin older than six years from the date of graduation.

Cooperative Education Program

The College of Engineering also offers an attractive five year cooperative Education Program. This program allows students to gain valuable engineering experience as they pursue their degree. The freshman year is spent as a full-time student at the university. During the sophomore and junior years the students alternate working full time with an excellent salary for one semester and taking full-time course work the next semester. Students return to study full time for the senior year. This program offers many advantages for students. Interested students should consult with either the Career Services Center or the College of Engineering Dean's Office.

Master's Program

The College of Engineering offers programs leading to degrees of Master of Science in Chemical, Civil, Electrical, Mechanical, and Systems Engineering. The programs of study are designed to provide knowledge of modern engineering concepts and practices; to prepare the graduate for the practice of engineering at a higher level of proficiency than attainable with the bachelor's degree; and to prepare the graduate for further study toward the doctoral degree should the graduate so desire. The programs comprise course work and direct theoretical and experimental inquiry in thesis or project research. For details, see the Master of Science in Chemical Engineering, Master of Science in Civil Engineering, Master of Science in Electrical Engineering, Master of Science in Mechanical Engineering, and Master of Science in Systems Engineering program.

Doctor of Philosophy (Ph.D.) in Systems Engineering

The Doctor of Philosophy (Ph.D.) in Systems Engineering offers students a holistic approach to the design and understanding of complex systems. NASA defines systems engineering as "a holistic, integrative discipline, wherein the contributions of structural engineers, electrical engineers, mechanism designers, power engineers, human factors engineers, and many more disciplines are evaluated and balanced, one against another, to produce a coherent whole that is not dominated by the

perspective of a single discipline." At USA, we emphasize a model-based systems engineering approach (MBSE) in many of our courses. The main objectives of the Ph.D. program are to:

1. provide our graduates with the ability to approach all systems (engineered, environmental, coastal, biological, social/organizational, etc.) with the ability to understand the entire system lifecycle in a manner that meets the needs of industry, and
2. prepare our graduates for leadership positions requiring applied research along with critical and creative thinking.

This program is appropriate for students who want to pursue research-based careers in industry, government, or academia. The program requires coursework across multiple engineering disciplines, and specific, validated systems research resulting in a publicly defended doctoral thesis.

Departments of Instruction

- Chemical And Biomolecular Engineering (p. 552)
 - Chemical Engineering (BS) (p. 556)
 - Chemical Engineering (MS) (p. 559)
- Civil, Coastal, And Environmental Engineering (p. 560)
 - Civil Engineering (BS) (p. 566)
 - Civil Engineering (MS) (p. 568)
 - Civil Engineering - Coastal Engineering Certificate (p. 569)
 - Civil Engineering - Structural Engineering Certificate (p. 570)
 - Civil Engineering - Water/Wastewater Engineering Certificate (p. 570)
- Electrical and Computer Engineering (p. 571)
 - Computer Engineering (BS) (p. 581)
 - Electrical Engineering (BS) - General Track (p. 584)
 - Electrical Engineering (BS) - Premed Track (p. 587)
 - Electrical Engineering (MS) (p. 590)
- Systems Engineering (p. 591)
 - Systems Engineering (MS) (p. 594)
 - Systems Engineering (Ph.D.) (p. 595)
 - Systems Engineering Certificate Program (p. 596)
- William B. Burnsed, Jr. Mechanical, Aerospace, and Biomedical Engineering (p. 596)
 - Mechanical Engineering (BS) (p. 603)
 - Mechanical Engineering (BS) - Aerospace Track (p. 605)
 - Mechanical Engineering (BS) - Biomedical Engineering Track (p. 608)
 - Mechanical Engineering (MS) (p. 610)
 - Mechanical Engineering - Accelerated Bachelor's to Master's Program (p. 611)

Admission Requirements

Undergraduate Admission

All students, whether domestic or international, are strongly encouraged to submit standardized test scores, either ACT or SAT.

Admission to Graduate Programs

The minimum requirements for admission to the graduate degree programs in this College differ slightly between programs and are listed in the Bulletin entry for each program.

Each application will be reviewed by the Admissions Committee of the appropriate department which may reserve the right to evaluate additional credentials, such as, but not limited to, course work taken, and letters of recommendation.

The minimum requirements for non-degree graduate admission (or admission prior to declaring a graduate degree program) are the same as the minimum requirements for admission to the Graduate School and are listed in the Bulletin entry for the Graduate School, but applicants wishing to register later for a graduate degree must ensure that they will at that time satisfy the requirements for that degree.

College Requirements

Undergraduate

Admission to the University of South Alabama constitutes admission to the College of Engineering for those students wishing to major in engineering. Incoming students should specify a particular discipline in the College as a major as soon as practical in order to receive proper counseling to pursue their engineering course work. Transfer students must declare a major and have all transfer credit evaluated by the Admissions Office. The department chair will approve transfer credit for engineering degree credit except where substitutions are involved; substitutions require the approval of the dean. Transfer students are encouraged to have departmental evaluations accomplished prior to their first registration for classes.

Entering freshmen students not adequately prepared to enter the degree program may be required to take additional preparatory course work. Such preparatory work will not be counted toward the major degree program.

Students must have the prerequisites for the courses in which they enroll; students who enroll without prerequisites are subject to administrative withdrawal. Prerequisites are satisfied by courses taken either at the University of South Alabama or by acceptable transfer credit. Students not exempted from EH 101 will be required to take it as a prerequisite to EH 102.

Today's society is permeated by an extensive technology that affects the lives of everyone. The engineering function in this modern society – while basically unchanged from the goal of using natural resources for the betterment of mankind – has more far-reaching and immediate consequences than ever before through the social, economic, environmental, and political reactions that follow technological developments.

The engineering profession has recognized that to fulfill the social as well as technical responsibilities incumbent upon today's engineer, engineering graduates must not only be technically competent, but must also be as broadly educated as possible within the allotted educational time period. To this end, the College of Engineering strives to prepare its students ultimately to assume their responsibilities by providing technically sound programs of instruction that incorporate a strong component in the humanities and social sciences. Graduates are prepared so they may take industrial positions, assume positions with government, or pursue graduate studies.

Engineering students may also qualify as premedical students should they desire to apply for admission to medical school. Students interested in medical careers should consult the Dean of the College of Medicine.

General Education Requirements

Engineering students must comply with the University's general education requirements. In the area of Humanities and Fine Arts, engineering students are required to take a total of at least 9 semester hours with a minimum of 3 semester hours in literature and a minimum of 3 semester hours in the arts with the remaining hours from the Humanities and Fine Arts. In the area of History, Social, and Behavioral Sciences, engineering students are required to take at least 9 semester hours with a minimum of 3 semester hours in history and a minimum of 3 semester hours from among the other disciplines in the social and behavioral sciences.

Professional Component Standing for Undergraduate Programs

It is important that students make adequate progress in departmental majors within the College of Engineering, so each department establishes a list of courses that must be satisfactorily completed with a minimum grade before the student is allowed to proceed with more advanced courses. Professional Component Standing (PCS) within a department indicates that these courses have been satisfactorily completed. Six courses are required for PCS in every department, so they are collectively required for every student. The PCS requirements for all College of Engineering students are shown in the following table:

College of Engineering PCS Requirements

Minimum Grade C

Code	Title	Hours
EH 101	English Composition I	3
EH 102	English Composition II	3
CH 131 & 131L	General Chemistry I and General Chemistry I Lab	4
MA 125	Calculus I	4
MA 126	Calculus II	4
PH 201	Calculus-Based Physics I (+Lab)	4

In addition, all departments in the College of Engineering require Departmental Professional Component Standing for enrollment in most 300- and 400-level courses. PCS is awarded by the appropriate department chair when the student completes the College of Engineering PCS requirements and the departmental PCS requirements. See the departmental policy statements for additional details.

Requirements for a Bachelor's Degree

To become a candidate for a Bachelor of Science degree in one of the five major disciplines within the College of Engineering, the student must satisfy the general requirements of the University as set forth in "Academic Policies and Procedures", and must have satisfactorily completed the program of instruction specified by the major department. In addition to these requirements, the Engineering student must have at least a GPA of 2.00 or C-level competency in all subjects taken in the student's major department at the University of South Alabama.

Mechanical and Civil Engineering students are required to take and make a "good faith" effort to pass the Fundamentals of Engineering (FE) examination prior to their anticipated date of graduation. Students should be aware of the deadline established by the National Council of Examiners for Engineering and Surveying (NCEES) for submission of examination application materials. Failure to meet the deadline could result in delayed graduation.

A transfer student must complete at least 25 percent of the credit hours required for the degree from upper-division courses with at least 16 hours

in the upper level of the student's major department at the University of South Alabama.

Engineering students with less than 15 credit hours are required to take EG 101. This requirement for EG 101 can be waived by the student's advisor once it is demonstrated that a particular student has been exposed to material covered in this course and most likely is not going to benefit from this course. An appropriate math, science or engineering course must be substituted if the student does not take EG 101.

Accelerated Bachelor's to Master's Program

The College of Engineering allows well-qualified undergraduates in the program to follow an "Accelerated Bachelor's to Master's" study plan. This plan permits up to six credit hours of graduate coursework to count towards both the Bachelor's (as Technical Electives) and the Master's degrees, so that the Master's degree is earned faster than usual. (The coursework concerned must individually satisfy the requirements of both degrees.) See a departmental advisor for specific details.

ABM students must meet all requirements for admission to the Graduate School. However, each degree program has specific requirements that may exceed Graduate School minimums. An ABM student must meet all requirements of their specific degree program. A complete Graduate School application is required.

Eligibility Requirements

- 3.0 cumulative undergraduate GPA
- Have completed at least 90 credit hours
- Have completed at least 30 credit hours at USA

A student who withdraws or is dismissed from the ABM program may not count graduate coursework towards both degrees. Graduate courses for which an undergraduate student did not earn an "A" or "B" grade may not be counted towards the graduate degree.

ABM students must be full-time students and must complete all degree requirements for the Master's degree within three semesters of the semester in which they were admitted to the Graduate School. An exception for a fourth semester may be granted where an additional semester is required for final revisions to and submission of a defended thesis. Exceptions to the ABM policy are at the discretion of the Dean of the Graduate School.

Graduate study requirements

The requirements for each graduate program of study are stated in the Bulletin entry for that program.

Chemical And Biomolecular Engineering

Department Information

(251) 460-6160

Department of Chemical and Biomolecular Engineering website
<https://www.southalabama.edu/colleges/engineering/chbe/index.html>
 (<https://www.southalabama.edu/colleges/engineering/chbe/>)

Department of Chemical and Biomolecular Engineering Staff

Title	Name
Interim Chair	Silas Leavesley
Professors	Glover, Leavesley, West
Associate Professors	Rabideau, Wheeler
Assistant Professors	Dennis, Walker

Chemical Engineering is a profession in which knowledge of mathematics, chemistry, biology and other natural sciences gained by study, experience, and practice is applied with judgment to develop economical ways of using material and energy for the benefit of mankind. The program required for the degree of Bachelor of Science in Chemical Engineering provides fundamental instruction in mathematics, chemistry, biology, physics, and engineering. This education prepares the graduate to seek employment in petrochemical, pharmaceutical, healthcare, microelectronics, polymers, energy and environmental industries. In addition, the graduate is well-prepared to pursue graduate school.

All electives must be approved by the student's advisor. Degree requirements include a minimum of 18 semester hours of approved electives in the Humanities and Social Sciences.

Satisfactory completion of the 126 hour program outlined below leads to the degree of Bachelor of Science in Chemical Engineering. Students must also comply with the College of Engineering Requirements for a Degree, which are covered in the Bulletin under the College of Engineering.

BSChE Program Educational Objectives

The educational objectives of the Department of Chemical & Biomolecular Engineering's undergraduate program are that, within a few years of program completion, graduates will have used the knowledge and skills gained through academic preparation and post-graduation experience so they have:

1. Advanced in the chemical engineering profession and applied engineering knowledge and problem-solving skills to multi-disciplinary projects.
2. Incorporated economic environmental, social, regulatory, constructability, safety, and sustainability considerations into the practice of chemical engineering.
3. Exhibited effective communication skills, teamwork, leadership, initiative, project management, and professional and ethical behavior.
4. Continued their technical and professional development, which may include graduate level education, continuing education, and participation in professional organizations.

BSChE Student Outcomes

By the time of graduation from the BSChE program, a student will have demonstrated attainment of the following outcomes:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. an ability to communicate effectively with a range of audiences

4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgements, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgement to draw conclusions.
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

The BSChE curriculum is designed to ensure the attainment of the student outcomes.

The Bachelor of Science degree program in Chemical Engineering at the University of South Alabama is accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Program Criteria for Chemical, Biochemical, Biomolecular and similarly named Engineering programs.

BSChE Accelerated Bachelor's to Master's (ABM) Degree Option

The USA Accelerated Bachelor's to Master's (ABM) in Chemical and Biomolecular Engineering provides exceptional undergraduate students the opportunity to earn a bachelor's and a master's degree at an accelerated pace. ABM students may count up to 12 credit hours of graduate coursework towards either the undergraduate or graduate degrees in Chemical and Biomolecular Engineering. ABM students typically complete the master's degree within one academic year after completing the undergraduate degree. See a departmental advisor for specific details.

BSChE Departmental Honors Designation

To receive a designation of "Departmental Honors," students must:

1. successfully complete 4 to 6 credit hours of Honors Senior Project in Chemical Engineering (CHE 499).
2. have at least a 3.50 GPA overall at the time of graduation.
3. have both submitted a written report and made an oral presentation of the Honors Senior Project in keeping with the expectations of the Honors College (<https://www.southalabama.edu/colleges/honors/seniorproject.html>).

See a departmental advisor for specific details.

Degrees, Programs, or Concentrations

- Chemical Engineering (BS) (p. 556)
- Chemical Engineering (MS) (p. 559)

Courses

CHE 190 Special Topics - 1-5 cr

Topics of current Chemical Engineering interest. Requires permission of department chair.

CHE 201 CHE Fundamentals I 3 cr

Formulation of material balances and relations involving real gases, vapors, liquids, and solids. Prerequisites: CH 132. Corequisite: MA 126.

Prerequisite: (CH 116 Minimum Grade of D or CH 132 Minimum Grade of D) and (MA 126 (may be taken concurrently) Minimum Grade of D or MA 233 Minimum Grade of D)

CHE 202 CHE Fundamentals II 3 cr

Formulation of energy balance and combined material and energy balances for steady-state processes. Prerequisites: CHE 201.

Corequisites: BLY 121. Fee

Prerequisite: CHE 201 Minimum Grade of D and (BLY 121 (may be taken concurrently) Minimum Grade of D or BLY 141 Minimum Grade of D)

CHE 203 Material and Energy Balances 4 cr

Application of multicomponent material and energy balances to chemical processes involving phase changes and chemical reactions. Minimum grade of 'C' is required and only 2 attempts are permitted. Fee

Prerequisite: CH 132 Minimum Grade of C and CH 132L Minimum Grade of C and MA 126 Minimum Grade of C and (EH 101 Minimum Grade of C or EH 105 Minimum Grade of C or ACT English 27 or SAT Critical Reading 610 or READING TEST SCORE 33 or University - EH101 Exempt P)

CHE 232 Chemical Engr Thermodynamics I 3 cr

Applications of the First and Second Law. Estimation of fluid properties and heat effects. Thermodynamic analysis of meters, throttles, nozzles, and compressors.

Prerequisite: (PH 201 Minimum Grade of D or PH 216 Minimum Grade of D) and (MA 227 Minimum Grade of D or MA 234 Minimum Grade of D) and (CHE 201 Minimum Grade of D)

CHE 290 Special Topics - 1-5 cr

Topics of current chemical engineering interest. Requires consent of department chair.

CHE 301 CHE Calculations III - C 3 cr

Material and energy balance process calculations emphasizing applied statistics utilizing computer programming concepts, spreadsheets, and modern mathematical computer tools.

Prerequisite: CHE 202 Minimum Grade of D

CHE 311 CHE Separations I 3 cr

Applications of material balances and equilibrium relations to equilibrium stage design. Design of single stages and cascades for absorption, stripping, distillation, liquid-liquid extraction, and bioseparations.

Prerequisite: CHE 203 Minimum Grade of C

Corequisite: CHE 331

CHE 321 Transport Phenomena I 3 cr

Fundamentals of momentum transfer with applications in fluid flow through pipes and process equipment.

Prerequisite: MA 238 Minimum Grade of C and CHE 203 Minimum Grade of C and PH 201 Minimum Grade of C

CHE 322 Transport Phenomena II 3 cr

Fundamentals of conductive, convective, and radiative modes of heat transfer with applications in the design of heat exchanges.

Prerequisite: CHE 321 Minimum Grade of C

CHE 331 CHE Thermodynamics I 3 cr

This course introduces the fundamentals of thermophysical property estimation and modeling of non-ideal pure and multicomponent fluid systems, including an introduction to multicomponent vapor/liquid equilibria.

Prerequisite: CH 201 Minimum Grade of C and CHE 203 Minimum Grade of C and MA 238 Minimum Grade of C and CH 201L Minimum Grade of C and PH 201 Minimum Grade of C

Corequisite: CHE 351

CHE 332 CHE Thermodynamics II 3 cr

This class is an advanced thermodynamics course that uses a molecular level viewpoint to introduce students to applications of thermodynamics principles to complex chemical engineering problems including multicomponent, non-ideal fluid phase equilibria (VLE, VLLE, SLE), and chemical reaction equilibria. The concepts of chemical potential, fugacity, partial molar and excess properties as well as complex activity coefficient models are introduced to solve these problems.

Prerequisite: CHE 331 Minimum Grade of C

Corequisite: CHE 352

CHE 342 Engineering Communication - W 3 cr

Formal and informal reports, oral presentations, and visual aids.

Prerequisite: EH 102 Minimum Grade of C or EH 105 Minimum Grade of C

Corequisite: CHE 352

CHE 351 Modeling Lab 1 cr

Computational tools and numerical methods for solving chemical engineering problems.

Corequisite: CHE 311, CHE 331

CHE 352 Measurement Lab 1 cr

Laboratory practices for measurement of reaction and phase change parameters. Statistical tools for assessing experimental data.

Prerequisite: CHE 351 Minimum Grade of C

Corequisite: CHE 332, CHE 372

CHE 363 Simulation of Chemical Process 3 cr

In this course, students utilize modern software tools, such as Aspen Plus, to model steady rate chemical processes. Simulation topics include physical property selection, flowsheet generation, separations, and reactors.

Prerequisite: CHE 311 Minimum Grade of C

Corequisite: CHE 332, CHE 372

CHE 372 Chemical Reactor Design 3 cr

Fundamentals of systems involving chemical reactions, including batch and flow systems. Design of thermal and catalytic systems with single and multiple reactions. Analysis of kinetic data and mechanisms.

Prerequisite: CHE 331 Minimum Grade of C

Corequisite: CHE 322, CHE 332

CHE 390 Special Topics - 1-5 cr

Topics of current chemical engineering interest. Requires consent of department chair.

CHE 421 CHE Separations II 3 cr

Fundamentals of mass transfer. Mass, energy, and momentum transfer analogies. Design of mass transfer equipment.

Prerequisite: CHE 311 Minimum Grade of C and CHE 322 Minimum Grade of C

CHE 441 Chem Engr Ops Lab I-W 2 cr

Laboratory Studies of the unit operations of chemical engineering with emphasis on momentum and heat transfer.

Prerequisite: CHE 322 Minimum Grade of C and CHE 351 Minimum Grade of C and CHE 352 Minimum Grade of C and (CHE 342 Minimum Grade of C or CHE 363 Minimum Grade of C)

CHE 442 Chem Engr Ops Lab II - W 2 cr

Laboratory studies of the unit operations of chemical engineering with emphasis on stage-wise and differential contactors.

Prerequisite: CHE 441 (may be taken concurrently) Minimum Grade of C and CHE 311 Minimum Grade of C and CHE 421 Minimum Grade of C

CHE 451 Process Models 3 cr

Mathematical modeling, simulation, and dynamics of chemical process systems for design and analysis.

Prerequisite: CHE 322 Minimum Grade of C

CHE 452 Process Dynamics and Control 3 cr

Mathematical modeling, simulation and dynamics of chemical process systems. Feedback and Feed-forward control of chemical processes. Specification of control loops. Selection and tuning of controller modes.

Prerequisite: CHE 372 Minimum Grade of C

CHE 461 Process Design I 3 cr

Engineering economics and elements of process design, including energy and material balances, manufacturing and product cost. Unit operation equipment sizing, and cost. This course is considered a "Senior Capstone Design" course.

Prerequisite: EG 231 Minimum Grade of C and CHE 332 Minimum Grade of C and CHE 372 Minimum Grade of C and (CHE 342 Minimum Grade of C or CHE 363 Minimum Grade of C)

CHE 462 Process Design II 3 cr

Selection, design and specification of principal chemical processes. This course is considered a "Senior Capstone Design" course.

Prerequisite: CHE 461 Minimum Grade of C

CHE 490 Special Topics 1-3 cr

Topics of current chemical engineering interest. Requires consent of department chair or departmental approval.

CHE 494 Directed Studies 1-3 cr

Directed study, under the guidance of a faculty advisor, of a topic from the field of chemical engineering, not offered in a regularly scheduled course. A written report is required. May be repeated for a maximum of 6 credit hours. Requires consent of the department chair and minimum GPA of 3.00 for admission or departmental approval.

CHE 499 Honors Senior Project 1-6 cr

Under the advice and guidance of a faculty mentor, honors students will identify and carry out a research project, relevant to the field of chemical engineering. The senior project will be judged and graded by three faculty chaired by the honors mentor. This course is required for Honors recognition. A minimum of 4 credit hours is required, but students may enroll for a maximum of 6 credit hours over two semesters. Requires completion of an approved project prospectus.

Prerequisite: CHE 322 Minimum Grade of C and CHE 332 Minimum Grade of C

CHE 501 Chemical Engineering Seminar 1 cr

A weekly research seminar for Chemical Engineering graduate students. Students will attend research presentations by faculty, invited speakers and other students rehearsing for their proposal presentations, thesis defenses or conference presentations. Topics will include research, research methods, safety and responsible conduct of research.

CHE 510 Adv Chemical Thermodynamics 3 cr

Advanced classical and molecular thermodynamics as applied to non-ideal multicomponent phase and reaction equilibria for chemical engineering applications. An introduction to statistical thermodynamics will also be given.

CHE 520 Adv Transport Phenomena I 3 cr

An advanced treatment of the principles and methods of transport phenomena. Detailed coverage of several key aspects of energy and momentum transfer including creeping flows, boundary layers and lubrication theory.

CHE 521 Adv Transport Phenomena II 3 cr

An advanced treatment of the principles and methods of mass transfer, diffusion and adsorption phenomena. Coverage of conservation equations, mass transfer at interfaces and boundary conditions. Includes coverage of adsorption and diffusion on surfaces, porous structures and membranes.

CHE 525 Chemical Reactor Analysis 3 cr

Design, modeling and analysis of non-ideal chemical reactor systems. Includes effects of mass transfer in heterogeneous catalytic reactors, non-steady-state heat transfer and residence time distributions.

CHE 530 Synthetic Fuels 3 cr

Fundamentals of gasification and liquefaction concepts applied to fossil fuels and biomass conversion.

CHE 540 Distillation 3 cr

Analysis and design of separation units for multicomponent nonideal systems.

CHE 550 Chemical Process Control 3 cr

Sampled-data algorithms, feedback, feedforward, deadtime compensation, advanced control schemes applied to chemical engineering processes.

CHE 551 Adv Chem Engineering Modeling 3 cr

Advanced mathematical modeling of chemical process systems for design and analysis.

CHE 560 Mixing and Agitation 3 cr

Analysis and design of single-phase and multiple-phase mixing units.

CHE 563 Simulation of Chem Processes 3 cr

In this course, students utilize modern software, tools, such as Aspen Plus, to model steady state chemical processes. Simulation topics include physical property selection, flowsheet generation, separations and reactors.

Cross-Listed: CHE 463

CHE 570 Separation Processes 3 cr

Analysis and design of separation processes. Topics include molecular diffusion and convective mass transfer with applications in the chemical, petroleum and pharmaceutical industries.

CHE 575 Chem Proc Synth Optimization 3 cr

Use of analysis, synthesis, and optimization in process development.

CHE 580 Chem Process Safety and Design 3 cr

Fundamental principles of chemical process safety, fires and explosions and design for the mitigation of associated hazards.

CHE 590 Special Topics - 3 cr

Topics of current chemical engineering interest. Requires consent of the department chair or departmental approval.

CHE 592 Directed Independent Study 1-6 cr

Directed study, under the guidance of a faculty advisor, of a topic from the field of chemical engineering, not offered in a regularly scheduled course. A written report is required. Requires consent of the department chair and overall minimum GPA of 2.5 for admission or departmental approval.

CHE 594 Project in Chem Engineering 3 cr

Approved investigation of original problems under direction of a faculty member. Requires approved prospectus.

CHE 599 Thesis 1-6 cr

May be taken more than once. Only 6 hours may be applied for credit toward a degree. Requires approved prospectus.

Faculty

CHE 462	Process Design II	3

Chemistry Elective

Select one of the following: 3-4

CH 265 & 265L	Introductory Analysis and Introductory Analysis Lab	
CH 440	Biochemistry I (one of CH 440 or BMD 321 is required for Pre-Med track) or BMD 321 Biochemistry I-Molecular Biol	

Technical Elective

Select one of the following: 3

BLY 122	General Biology II (required for Pre-Med track)	
Chemistry - Any course higher than CH 202		
CPE 260	Intro to C++ Programming	

MA 237	Linear Algebra I	
MA 332	Differential Equations II	
MA 354	Comp Assist Math Modeling - W	
ST 315	Applied Probability-Statistics	
ST 320	Applied Stat Analysis	

Any Engineering 200, 300, or 400 level elective (excluding EG 270)

Chemical Engineering Electives

(Accelerated Bachelor's to Master's (ABM) students will take up to six hours of approved graduate coursework)

Select two of the following (6 hours): 6

CHE 490	Special Topics (3 or 6 hours)	
CHE 494	Directed Studies (3 or 6 hours)	
CHE 499	Honors Senior Project (3 or 6 hours)	

Minor Requirements

A minor is not required for this degree program. 0

Total Hours 126-127

Notes

1. All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major or minor.
2. C-grade or higher required in all prerequisite courses.
3. Appropriate software tools will be utilized in almost all CHE courses.

General Education Requirements

Code	Title	Hours
------	-------	-------

Area I – Written Composition

Complete the following:

EH 101	English Composition I (Students who earn an English ACT score of 27, or a written SAT score of 610, can opt out of EH 101.)	3
EH 102 or EH 105	English Composition II Honors Composition - H	3

Area II – Humanities & Fine Arts

A. Select one of the following: 3

EH 215	Brit Lit before 1785	
EH 216	Brit Lit after 1785	
EH 225	Am Lit before 1865	
EH 226	Am Lit after 1865	
EH 235	World Lit before 1650	
EH 236	World Lit after 1650	

B. Select one of the following: 3

ARH 100	Survey of Art	
ARH 103	Art History I	
ARH 123	Art History II	
ARS 101	Art Appreciation	
DRA 110	Introduction to Theatre	
MUL 101	Introduction to Music	

C. Complete the following:

CA 110	Public Speaking	3
--------	-----------------	---

Area III – Natural Sciences & Mathematics

Complete the following:

MA 125	Calculus I	4
--------	------------	---

CH 131 & 131L	General Chemistry I and General Chemistry I Lab	4
CH 132 & 132L	General Chemistry II and General Chemistry II Lab	4

Area IV – History, Social & Behavioral Sciences

A. Select 3 hours from the following: 3

HY 101	HY of Western Civilization I	
HY 102	HY of Western Civilization II	
HY 135	US History to 1877	
HY 136	US History since 1877	

B. Select 3 hours from the following: 3

AN 100	Intro to Cultural Anthropology	
AN 101	Intro Archaeology-Bio Anthro	
CA 100	Intro to Communication	
CA 211	Interpersonal Comm	
ECO 215	Prin of Microeconomics	
ECO 216	Prin of Macroeconomics	
GEO 114	People, Places, Environment	
GEO 115	World Regional Geography	
GS 101	Intro to Gender Studies	
IS 100	Global Issues	
IST 201	Seasons of Life	
PSC 130	Intro to US Government	
PSY 120	Introduction to Psychology	
PSY 250	Life Span Development	
SY 109	Introductory Sociology	
SY 112	Social Problems	

C. Select a further 3 hours from either List A or B above in Area IV 3

Area V

Complete the following:

MA 126	Calculus II	4
MA 227	Calculus III	4
MA 238	Differential Equations I	3
BLY 121	General Biology I	3
PH 201 & 201L	Calculus-Based Physics I and Calculus-Based Physics I Lab	4
PH 202 & 202L	Calculus-Based Physics II and Calculus-Based Physics II Lab	4

Total Hours 58

Additional Information

It is important that students make adequate progress in the Chemical Engineering program. Satisfactory completion of a set of fundamental courses is required before a student is allowed to take advanced courses. Professional Component Standing (PCS) is awarded by the Chair of the Department when the student completes the College of Engineering PCS requirements and the ChBE Departmental PCS requirements.

College of Engineering PCS Courses

Minimum Grade C required in all these courses

Code	Title	Hours
EH 101	English Composition I	3
EH 102	English Composition II	3

CH 131 & 131L	General Chemistry I and General Chemistry I Lab	4
MA 125	Calculus I	4
MA 126	Calculus II	4
PH 201	Calculus-Based Physics I (+Lab)	4

Chemical and Biomolecular Engineering PCS Courses

Minimum Grade C required in all these courses

Code	Title	Hours
CH 132 & 132L	General Chemistry II and General Chemistry II Lab	4
CH 201 & 201L	Organic Chemistry I and Organic Chemistry I Lab	4
MA 227	Calculus III	4
MA 238	Differential Equations I	3
BLY 121	General Biology I	3
CHE 203	Material and Energy Balances	4

Graduation Plan

(126 Total Hours)

The Sample 4-year plan is designed as a guide for students preparing for their course selections. This information provides only a suggested schedule. Actual course selections should be made in consultation with an advisor. Courses listed as Milestones are required to obtain Professional Component Standing (PCS). Two designated writing (W) courses are required with at least one course chosen from offerings in the student's major or minor. Courses carrying this required credit are identified in the University Bulletin by a W after the course title.

Course	Title	Hours
First Year		
Fall		
MA 125	Calculus I ¹	4
CH 131 & 131L	General Chemistry I and General Chemistry I Lab ¹	4
EH 101	English Composition I ¹	3
BLY 121	General Biology I ¹	3
EG 101	Intro to Engineering & Design	2
Milestone Notes		
Must complete at least 12 hours with a 2.0 or higher GPA		
C-grade or higher required in all prerequisite courses		
Hours		16
Spring		
MA 126	Calculus II ¹	4
CH 132 & 132L	General Chemistry II and General Chemistry II Lab ¹	4
EH 102	English Composition II (or EH 105) ¹	3
PH 201 & 201L	Calculus-Based Physics I and Calculus-Based Physics I Lab ¹	4
Milestone Notes		
MA 125	Calculus I	
CH 131 & 131L	General Chemistry I and General Chemistry I Lab	
BLY 121	General Biology I	
EH 101	English Composition I (if not exempt)	
C-grade or higher required in all prerequisite courses		
Hours		15

Second Year		
Fall		
MA 227	Calculus III ¹	4
CH 201 & 201L	Organic Chemistry I and Organic Chemistry I Lab ¹	4
CHE 203	Material and Energy Balances ¹	4
PH 202 & 202L	Calculus-Based Physics II and Calculus-Based Physics II Lab	4
Milestone Notes		
MA 126	Calculus II	
PH 201 & 201L	Calculus-Based Physics I and Calculus-Based Physics I Lab	
CH 132 & 132L	General Chemistry II and General Chemistry II Lab	
EH 102 or EH 105	English Composition II or Honors Composition - H	
C-grade or higher required in all prerequisite courses		
CHE 203: only two attempts permitted to obtain grade C or better		
Hours		16

Spring		
MA 238	Differential Equations I ¹	3
CH 202 & 202L	Organic Chemistry II and Organic Chemistry II Lab	4
EG 231	Intro to Ethics and Economics	3
Tech Elective	Technical Electives ²	3
General Education	Area II or IV ²	3
Milestone Notes		
CHE 203 Summer not guaranteed		
MA 238	Differential Equations I	
CH 201 & 201L	Organic Chemistry I and Organic Chemistry I Lab	
MA 227	Calculus III	
C-grade or higher required in all prerequisite courses		
Hours		16

Third Year		
Fall		
CHE 311	CHE Separations I	3
CHE 321	Transport Phenomena I	3
CHE 331	CHE Thermodynamics I	3
CHE 351	Modeling Lab	1
General Education	Area II or IV ²	3
Chemistry Elective	Chemistry Electives ²	3-4
Milestone Notes		
C-grade or higher required in all prerequisite courses		
CHE courses only available in Fall semester		
Hours		16-17

Spring		
CHE 322	Transport Phenomena II	3
CHE 332	CHE Thermodynamics II	3
CHE 363	Simulation of Chemical Process (Simulation of Chemical Process)	3
CHE 352	Measurement Lab	1
CHE 372	Chemical Reactor Design	3
General Education	Area II or IV ²	3
Milestone Notes		
C-grade or higher required in all prerequisite courses		
CHE courses only available in Spring semester		
Hours		16

Fourth Year		
Fall		
CHE 421	CHE Separations II	3
CHE 441	Chem Engr Ops Lab I-W	2
CHE 452	Process Dynamics and Control	3

CHE 461	Process Design I	3
CHE Elective I	Chemical Engineering Electives ²	3
General Education	Area II or IV ²	3
Milestone Notes		
Apply for graduation		
C-grade or higher required in all prerequisite courses		
CHE courses only available in Fall semester		
Hours		17
Spring		
CHE 442	Chem Engr Ops Lab II - W	2
CHE 462	Process Design II	3
CHE Elective II	Chemical Engineering Electives ²	3
General Education	Area II or IV ²	3
General Education	Area II or IV ²	3
Milestone Notes		
C-grade or higher required in all prerequisite courses		
CHE courses only available in Spring semester		
Hours		14
Total Hours		126-127

¹ Required for Professional Component Standing (PCS).

² See Degree Requirements.

Notes

- CHE 300- and 400-level courses are offered only in the semesters indicated above.
- Students not Term 1-Calculus I ready will exceed the 126 hours required for this degree. Students with ACT Math scores 21 and below will not complete the degree in 4 years. Students beginning in MA 112 must utilize the summer before Term 3 to take MA 125 and CH 132/CH 132L and utilize the summer before Term 5 to complete the degree in 4 years. Students with ACT Math scores 23 and below should begin math courses in the summer before Fall-Year 1.

Chemical Engineering (MS)

Overview

With the ever-increasing pace of technological development in society, new opportunities are becoming available that require chemical engineering graduates with increased levels of specialization. The Department offers a Master of Science degree in Chemical Engineering that blends scholarship and research with advanced coursework to provide excellent training for students to pursue careers in the chemical industry. Graduate students have opportunities to undertake cutting-edge research with faculty for both thesis and project work. In addition, a coursework-only program is also offered by the department for those who wish to further their professional development by pursuing a graduate degree.

Admission to the MSChE Program

The following Admission Requirement criteria supplement the Graduate School admission criteria (see Categories of Admissions (<https://www.southalabama.edu/bulletin/current/colleges-schools/graduate-school/>)):

1. A Bachelor's degree in chemical engineering or a related field such as chemistry, physics, mathematics, or engineering.
2. A grade-point average of 3.0 or greater (A=4.0) on all undergraduate work.

3. Applicants whose native language is not English must provide one of the following official language test results:

- Written TOEFL minimum score of 550
- Internet-Based TOEFL minimum score of 79
- IELTS minimum band score of 6.5
- Pearson PTE Academic minimum overall score of 58
- Duolingo English test minimum score of 100

Note that we do not require nor consider GRE scores in our review of applications. Each applicant will be reviewed by the Admissions Committee, which carries out a holistic review of all applications and welcomes personal discussions with each applicant to discuss specific circumstances. This committee reserves the right to evaluate additional credentials such as, but not limited to, coursework taken and letters of recommendation. Students with a Bachelor's degree in a major other than chemical engineering can qualify for admission by taking a prescribed series of additional undergraduate preparatory courses depending on their background. These undergraduate preparatory courses will not count toward the Master's degree.

The minimum credit hour requirements for the different options of the MSChE degree are:

- Thesis Option 30 credit hours
- Project Option 30 credit hours
- Course Option 33 credit hours

Graduation Plan

(30-33 Total Hours)

The Graduation Plan for each Option is an example of a suggested course schedule; individual student plans may vary. Students should consult an academic advisor to create a personalized plan.

Thesis Option

Course	Title	Hours
First Year

Civil, Coastal, And Environmental Engineering

Department Information

(251) 460-6174

Department of Civil, Coastal, and Environmental Engineering website:
<https://www.southalabama.edu/colleges/engineering/ce/index.html>
 (<https://www.southalabama.edu/colleges/engineering/ce/>)

Department of Civil, Coastal, and Environmental Engineering Staff

Title	Name
Chair	John Cleary
Professors	Kang, Webb
Associate Professors	Cleary, Islam, Patch, Steward
Assistant Professors	Macdonald, Temple, Venkiteshwaran, Wu

Civil Engineering involves the design and construction of systems necessary for our modern society to function. It encompasses many technical specialties whose focus is the design of large, normally one-of-a-kind, facilities such as bridges, buildings, tunnels, highways, dams, waterways, airports, flood control systems, coastal protection systems, water supply networks, and waste treatment plants. As our society expands, challenging opportunities will continue to be available for Civil Engineers practicing in their own private firms, in large companies, or in governmental agencies.

BSCE Program Educational Objectives

The educational objectives of the Civil Engineering undergraduate program are that, within a few years of program completion, graduates will have used the knowledge and skills gain through academic preparation and post-graduation experience so they have:

1. Advanced in the civil engineering profession, obtained professional licensure, and applied engineering knowledge and problem-solving skills to multi-disciplinary projects.
2. Incorporated economic, environmental, social, regulatory, constructability, and sustainability considerations into the practice of civil engineering.

3. Exhibited effective communication, teamwork, leadership, initiative, project management, and professional and ethical behavior as complements to technical competence.
4. Continued their technical and professional development, which may include graduate level education, continuing education, and participation in professional organizations.

BSCE Student Outcomes

By the time of graduation from the BSCE Program, students should attain the following outcomes:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

The Bachelor of Science degree program in Civil Engineering at the University of South Alabama is accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>, under the General Criteria and the Program Criteria for Civil and similarly named Engineering programs.

The curriculum builds on a strong base in mathematics, physical sciences, engineering sciences, and humanities developed primarily during the freshman and sophomore years. During the junior year, students develop an understanding of the fundamentals of each area of Civil Engineering. The specialty areas include:

- Environmental Engineering
- Geotechnical Engineering
- Structural Engineering
- Transportation Engineering
- Water Resources/Coastal Engineering

The senior year focuses on design, construction practices, and the integration of more advanced knowledge in civil engineering. A comprehensive project with students participating in a design team prepares them to enter professional practice.

Satisfactory completion of the program outlined in this Bulletin leads to a degree of Bachelor of Science in Civil Engineering. Students must also comply with the College of Engineering Requirements for a Degree which are covered in this Bulletin under College of Engineering.

BSCE Accelerated Bachelor's to Master's (ABM) Degree Option

The USA Accelerated Bachelor's to Master's (ABM) in Civil Engineering provides exceptional undergraduate students the opportunity to earn a bachelor's and a master's degree at an accelerated pace. ABM students may count up to 12 credit hours of graduate coursework towards either the undergraduate or graduate degrees in Civil Engineering. ABM students typically complete the master's degree within one academic year after completing the undergraduate degree. See a departmental advisor for specific details.

Degrees, Programs, or Concentrations

- Civil Engineering (BS) (p. 566)
- Civil Engineering (MS) (p. 568)
- Civil Engineering - Coastal Engineering Certificate (p. 569)
- Civil Engineering - Structural Engineering Certificate (p. 570)
- Civil Engineering - Water/Wastewater Engineering Certificate (p. 570)

Courses

CE 102 Intro to Civil Engineering 2 cr

Introduction to Civil Engineering as a profession and the issues facing today's Civil Engineers. This course also includes a brief introduction of civil engineering sub-disciplines, freehand sketching techniques, Computer Aided Design (CAD) drawings, and spreadsheet application to civil engineering problems.

Prerequisite: MA 113 Minimum Grade of D or MA 125 Minimum Grade of D

CE 204 Surveying Fundamentals 2 cr

Applications of fundamental surveying techniques. Students will be introduced to the applications of Global Positioning Systems (GPS) and Geographical Information Systems (GIS) in Civil Engineering.

Prerequisite: MA 113 Minimum Grade of C or MA 115 Minimum Grade of C or MA 125 (may be taken concurrently) Minimum Grade of C and CE 102 Minimum Grade of C

Corequisite: CE 205

CE 205 Surveying Fundamentals Lab 1 cr

Students will collect field data and using state-of-the-art surveying and GPS equipment. Collected data will be used in Geographical Information Systems (GIS) software.

Prerequisite: MA 113 Minimum Grade of C or MA 115 Minimum Grade of C or MA 125 (may be taken concurrently) Minimum Grade of C and CE 102 Minimum Grade of C

Corequisite: CE 204

CE 314 CE Materials 3 cr

Study of Engineering Properties of Materials used in civil engineering including steel, concrete, asphalt, and timber.

Prerequisite: EG 315 Minimum Grade of D

Corequisite: CE 315

CE 315 CE Materials Lab-W 1 cr

Study of experimental techniques used to evaluate engineering properties of materials. These techniques will be used to test materials used in civil engineering according to ASTM standards.

Prerequisite: EH 102 Minimum Grade of C or EH 105 Minimum Grade of C and EG 315 Minimum Grade of D

Corequisite: CE 314

CE 340 Soil Mechanics 3 cr

An introduction to Soil Mechanics. Soil identification and engineering properties of soils. Analysis of elementary geo-hydraulics and geo-mechanics problems.

Prerequisite: EG 315 Minimum Grade of D and (EG 360 Minimum Grade of D or CE 365 Minimum Grade of D or ME 324 Minimum Grade of D)

Corequisite: CE 341

CE 341 Geotechnical Laboratory-W 1 cr

Soil identification and classification: experimental measurement of soil properties and technical reporting.

Prerequisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C) and CE 340 (may be taken concurrently) Minimum Grade of D

Corequisite: CE 340

CE 352 Intro to Transportation 3 cr

Principles of transportation engineering with emphasis on highways and traffic.

Prerequisite: CE 204 Minimum Grade of C and CE 205 Minimum Grade of C and ST 315 Minimum Grade of C

CE 353 Transp-Geometric Design 3 cr

Basic principles and techniques of highway design, including route layout, alignment, intersection design, and materials/earthwork estimation. Use of computer tools to generate and analyze highway designs.

Prerequisite: CE 352 Minimum Grade of D

CE 360 Water Resources Engineering I 2 cr

The application of fluid mechanics and other science and engineering disciplines in the development of structures, projects, and systems involving water resources. Introductions to open-channel flow, closed-conduit flow, hydraulic structures, hydraulic machinery, and groundwater flow.

Prerequisite: EG 360 Minimum Grade of D

Corequisite: CE 367

CE 367 Hydraulics Laboratory - W 1 cr

Laboratory and field measurement of fluid and flow properties; hydraulic laboratory practice and model stimulation techniques.

Prerequisite: EG 360 Minimum Grade of D or CE 365 Minimum Grade of D

Corequisite: CE 360

CE 370 Intro to Enviro Eng 3 cr

Introduction to the fundamentals of water quality characterization, water pollution hazardous waste management, water and wastewater treatment, solid waste management, waste minimization and control.

Prerequisite: CH 132 Minimum Grade of C and MA 238 Minimum Grade of D

Corequisite: CE 374

CE 374 Intro to Environmental Eng Lab 1 cr

Introduction to specific physical, chemical, and microbiological methods of analysis common to environmental engineering; including laboratory and field measurement of water quality characteristics and interpretation of results.

Prerequisite: CH 132 Minimum Grade of C and MA 238 Minimum Grade of D

Corequisite: CE 370

CE 384 Structural Analysis 3 cr

Analysis of statically determinate structures such as trusses, beams, and frames including the calculation of deflections. Introduction to analysis of indeterminate structures.

Prerequisite: EG 315 Minimum Grade of D

Corequisite: CE 385

CE 385 Structural Analysis Lab 1 cr

Modeling and analysis of determinate and indeterminate structures. Use of state-of-the-art structural analysis software.

Prerequisite: EG 315 Minimum Grade of D

Corequisite: CE 384

CE 410 Construction Engineering 3 cr

An introduction to the construction industry and the role of civil engineering in construction. Construction engineering methods including preparation of cost estimates, critical path scheduling and resource allocation. Instructor permission.

CE 412 Mgmt & Sustainability of C.I. 3 cr

Management and sustainability of Civil infrastructure is designed to present an overview of infrastructure engineering and management systems and to use project management, decision support tools, and life cycle costing tools in connection with infrastructure planning and assessment. Students will be presented with the understanding that achieving sustainability requires the consideration to meeting present and future human needs and respecting "triple bottom line: economic, social, and environmental goals. The course also provides a review of several important design and management tools to support sustainable development and communities.

CE 431 Civil Engineering Design I 2 cr

Introduction to the practice of civil engineering and the engineering design process. In depth consideration of ethical issues in engineering practice. Participation in engineering design teams for project planning, proposal development, and completion of a feasibility study. Written and oral presentations of results. Senior Capstone Course.

Prerequisite: CE 353 Minimum Grade of D

Corequisite: CE 440, CE 460, CE 470, CE 480

CE 432 Civil Engineering Design II 4 cr

A multidisciplinary development of a project involving analysis and design in Civil Engineering. Implementation of design concepts and methodologies from conception to final design. Completion of a comprehensive design project including cost estimates, oral and written presentation of results. A senior capstone course.

Prerequisite: CE 431 Minimum Grade of D

CE 440 Intro to Geotech Eng 3 cr

An Introduction to Geotechnical Engineering designed to provide tools to analyze geomechanical and geohydraulic problems associated with the design of foundations, retaining structures, slopes and other geotechnically related designs.

Prerequisite: CE 340 (may be taken concurrently) Minimum Grade of D and CE 341 Minimum Grade of D

CE 442 Foundation Engineering 3 cr

Principles of foundation analysis, design and construction in engineering practice.

Prerequisite: CE 440 Minimum Grade of D

CE 452 Transportation Geometric Design 3 cr

This course will provide students with an understanding of the basic principles and techniques of highway design. This will include laying out potential routes, design of the alignment and intersections, and evaluation of earthwork requirements. The student should be able to understand and apply these principles to highway design problems. The student should also be able to use existing computer tools to generate and analyze designs. Upon completion, students should be prepared to work in the field of highway design.

Prerequisite: CE 352 Minimum Grade of D

CE 460 Water Resources Engineering II 3 cr

The application of hydrologic and hydraulic principles for hydrologic analysis, frequency analysis, flood routing, hydrologic simulation, urban hydrology, floodplain hydraulics, and coastal engineering.

Prerequisite: CE 360 Minimum Grade of D and CE 367 Minimum Grade of D

CE 466 Coastal and Harbor Eng 3 cr

An introduction to the principles of coastal hydraulic and sedimentary processes and the design of coastal and harbor works such as ship channels, marinas, jetties, breakwaters, groins, seawalls and beach nourishment projects.

Prerequisite: CE 460 (may be taken concurrently) Minimum Grade of D

CE 470 Water-Wastewater Trtmt Design 3 cr

Development of the principles of design for components of water supply and wastewater treatment facilities, including drinking water distribution and wastewater collection systems.

Prerequisite: CE 360 Minimum Grade of D and CE 370 Minimum Grade of D and CE 374 Minimum Grade of D

Corequisite: CE 471

CE 471 Water-Wastewater Design Lab 1 cr

Application of design principles and criteria to analyze, design, and evaluate water and wastewater treatment facility components, including water distribution and wastewater collection systems.

Prerequisite: CE 360 Minimum Grade of D and CE 370 Minimum Grade of D and CE 374 Minimum Grade of D

Corequisite: CE 470

CE 474 Industrial Waste Treatment 3 cr

Topics in Industrial Waste Treatment unit processes and their design, including those addressing wastewater treatment, air pollution control, solid waste, and hazardous management.

Prerequisite: CE 470 Minimum Grade of D

CE 480 Design of Steel Structures 3 cr

Design of Steel Trusses, Girders, Building Frames, and other Steel Structures.

Prerequisite: CE 384 Minimum Grade of D and CE 314 Minimum Grade of D and CE 315 Minimum Grade of D

Corequisite: CE 481

CE 481 Steel Design Lab 1 cr

Application of structural steel design methods to specific cases.

Prerequisite: CE 384 Minimum Grade of D and CE 314 Minimum Grade of D and CE 315 Minimum Grade of D

Corequisite: CE 480

CE 482 Timber Design 3 cr

This course will cover the design of timber structures. Design loads, structural behavior, properties and grades of wood will be covered. Design of beams, columns, diaphragms, shear walls, structural glued laminated timber, and structural connections. Instructor Approval Required

Prerequisite: CE 384 Minimum Grade of D and CE 385 Minimum Grade of D

CE 485 Reinforced Concrete Design 3 cr

Fundamentals of reinforced concrete analysis and design. Design of beams, one-way slabs, short columns, and single footings. Calculations of cracking and deflection of beams.

Prerequisite: CE 384 Minimum Grade of D and CE 314 Minimum Grade of D and CE 315 Minimum Grade of D

Corequisite: CE 486

CE 486 Reinforced Concrete Design Lab 1 cr

Integrated reinforced concrete design problems similar to those found in practice will be presented. Students will solve similar problems in class during the lab period.

Prerequisite: CE 384 Minimum Grade of D and CE 314 Minimum Grade of D and CE 315 Minimum Grade of D

Corequisite: CE 485

CE 490 Special Topics 1-4 cr

Topics of current civil engineering interest.

CE 494 Directed Studies 1-4 cr

Directed study, under the guidance of a faculty advisor, of a topic from the field of civil engineering not offered in a regularly scheduled course. Requires department chair permission.

CE 499 Honors Senior Project 1-6 cr

Under the advice and guidance of a faculty mentor, honors students will identify and carry out a research project, relevant to the field of Civil Engineering study, that will lead to a formal presentation at the Annual Honors Student Colloquium. The senior project will be judged and graded by three faculty, chaired by the honors mentor. This course is required for Honors recognition. A minimum of 4 credit hours is required, but a student may enroll for a maximum of 6 credit hours over two semesters.

Prerequisites: Completion of the most advanced required course in the subdiscipline of the project (CE 440, CE 366, CE 470, or CE 384) and completion of an approved project prospectus.

Prerequisite: CE 352 Minimum Grade of C or CE 366 Minimum Grade of D or CE 384 Minimum Grade of C or CE 443 Minimum Grade of C or CE 470 Minimum Grade of C

CE 503 Intro to Coastal Engineering 3 cr

This graduate course provides students with an introduction to the coastal design environment. The goal of this course is to orient civil engineers, or students from related degree programs, to fundamental coastal engineering concepts. These concepts are important as they make the practice of civil engineering unique due to the complex tide, wave, and sediment characteristics found along the coast. These coastal systems are dynamic, ecologically sensitive, critical to the nation's economy, and are highly vulnerable to storms and the impacts of climate change.

CE 510 Construction Engineering 3 cr

An introduction to the construction industry and the role of civil engineering in construction. Construction engineering methods including preparation of cost estimates, critical path scheduling and resource allocation. Instructor permission required.

CE 512 Mgmt & Sustainability of Infr 3 cr

This course is designed to present an overview of infrastructure systems and how to manage and maintain these systems. Project management, decision support tools, and life cycle costing tools will be presented, in connection with infrastructure planning and assessment. Infrastructure sustainability will also be addressed, particularly considering the "triple bottom line" of economic, social, and environmental goals. The course also provides a review of several important design and management tools to support sustainable development and communities. A course project is required.

CE 540 Advanced Soil Mechanics 3 cr

Shearing strength and deformation behavior of soils with applications to retaining structures, slopes and bearing capacity. Behavior of cohesionless soils and cohesive soils under drained and undrained conditions. Permeability, steady state flow and effective stress in soils. Consolidation theory.

Prerequisite: CE 440 Minimum Grade of C

CE 542 Foundation Engineering 3 cr

This course is to provide advanced knowledge of selected geotechnical principals for analysis, design and construction of a variety of foundations systems. This course is dually listed with an equivalent 400 level course(CE 442).

Prerequisite: CE 440 Minimum Grade of C

CE 547 Groundwater 3 cr

Principals of fluid flow through porous media, well hydraulics. Ground water contamination, including principals that govern fate, transport, and remediation.

Prerequisite: CE 340 Minimum Grade of C and CE 470 Minimum Grade of C

CE 551 Traffic Engineering 3 cr

This course will focus on traffic flow parameters and their influence on roadway traffic conditions, with emphasis on traffic data collection, traffic safety analysis, roadway markings, traffic signs, traffic signal timing and signal capacity analysis, and traffic management systems.

Prerequisite: CE 352 Minimum Grade of C

CE 552 Trans. Geometric Design 3 cr

This course will provide students with an understanding of the basic principles and techniques of highway design. This will include laying out potential routes, design of the alignment and intersections, and evaluation of earthwork requirements. The student should be able to understand and apply these principles to highway design problems. The student should also be able to use existing computer tools to generate and analyze designs. Upon completion, students should be prepared to work in the field of highway design.

Prerequisite: CE 352 Minimum Grade of C

CE 553 Transportation Systems Eval 3 cr

This course will focus on concepts and principles of transportation economic analysis, transportation costs and benefits, user and nonuser consequences, methods of evaluation of plans and projects, environmental impact assessments, and transportation programming and management. Requires Instructor Permission.

CE 560 Coastal Hydrodynamics 3 cr

Theory and analysis of advanced coastal and estuarine hydrodynamics. Potential topics to be covered include: wave mechanics; tidal dynamics; coastal and estuarine circulation; and transport and mixing in coastal waters.

Prerequisite: CE 501 Minimum Grade of C

CE 563 Hydrodynamic Modeling 3 cr

Theory and application of numerical models to coastal hydrodynamics. Potential topics to be covered include: overview of numerical simulation techniques; wave transformation processes; engineering wave models; principles of circulation; and advanced circulation models.

Prerequisite: CE 501 Minimum Grade of C

CE 566 Coastal and Harbor Engineering 3 cr

Advanced principles of coastal hydraulic and sedimentary processes and the design of coastal and harbor works such as ship channels, marina, jetties, breakwaters, groins, seawalls, and beach nourishment projects. This course is dually listed with an equivalent 400 level course (CE 466).

Prerequisite: CE 460 Minimum Grade of C and CE 501 Minimum Grade of C

CE 571 Biological Wastewater Treatmnt 3 cr

Theory, analysis and design criteria of biological treatment systems for municipal and industrial wastewaters, including suspended and attached growth processes in both the aerobic and anaerobic environments.

Prerequisite: CE 470 Minimum Grade of C

CE 572 Physical Wastewater Treatment 3 cr

Advanced theory and applications in physical and chemical wastewater treatment. Topics covered include mass balance; reactor design, modeling, and analysis; filtration; mixing and flocculation; flotation; dissolved oxygen transfer optimization; chemical treatment of nutrient loads; disinfection; and residuals management.

Prerequisite: CE 470 Minimum Grade of C

CE 574 Industrial Waste Treatment 3 cr

Topics in Industrial Waste Treatment unit processes and their design, including those addressing waste water treatment, air pollution, solid waste, and hazardous waste management. This course is dually listed with an equivalent 400 level course (CE 474). Credit for both CE 474 and CE 574 is not permitted.

Prerequisite: CE 470 Minimum Grade of C

CE 579 Fundamentals Environmental Eng 3 cr

Fundamentals of water quality characterization, water pollution, hazardous waste management, water and wastewater treatment, solid waste management, and waste minimization and control. This course includes a comprehensive project in addition to the lecture class. Note: This course is a core course for MS degree students in the Environmental Toxicology Program and not intended for Engineering Majors. Instructor Permission. (This course is dual listed with CE 370.)

Prerequisite: (CH 116 Minimum Grade of C or CH 132 Minimum Grade of C)

CE 580 Steel Design 3 cr

Design of steel trusses, girders, building frames, and other steel structures. This course is dually listed with an equivalent 400 level course (CE 480).

Prerequisite: CE 384 Minimum Grade of C or CE 385 Minimum Grade of C

Corequisite: CE 581

CE 581 Steel Design Lab 1 cr

Application of structural steel design methods to specific cases. This course is dually listed with an equivalent 400 level course (CE 481).

Prerequisite: CE 384 Minimum Grade of C and CE 385 Minimum Grade of C

Corequisite: CE 580

CE 582 Timber Design 3 cr

This course will cover the design of timber structures. Design loads, structural behavior, properties and grades of wood will be covered. Design of beams, columns, diaphragms, shearwalls, structural glued laminated timber, and structural connections. This course is dually listed with an equivalent 400 level course (CE 482). Instructor Approval Required.

CE 583 Advanced Steel Design 3 cr

This course covers the design of built-up members, composite beams, columns and floors. Design of advanced bolted and welded connections will also be covered. Students will use state-of-the-art software to model and design complex steel structures.

Prerequisite: CE 480 Minimum Grade of C or CE 481 Minimum Grade of C

CE 584 Advanced Structural Analysis 3 cr

Students will be introduced to the analysis of indeterminate structures using classical and matrix methods. Students will also be introduced to advanced structural modeling techniques using state-of-the-art software.

Prerequisite: CE 384 Minimum Grade of C and CE 385 Minimum Grade of C

CE 585 Concrete Design 3 cr

Fundamentals of reinforced concrete analysis and design. Design of beams, one-way slabs, short columns, and single footings. Calculations of cracking and deflection of beams. This course is dually listed with an equivalent 400 level course (CE 485).

Prerequisite: CE 384 Minimum Grade of C or CE 385 Minimum Grade of C

Corequisite: CE 586

CE 586 Concrete Design Lab 1 cr

Integrated reinforced concrete design problems similar to those found in practice will be presented. Students will solve similar problems in class during the lab period. This course is dually listed with an equivalent 400 level course (CE 486).

Prerequisite: CE 384 Minimum Grade of C and CE 385 Minimum Grade of C

Corequisite: CE 585

CE 587 Advanced Concrete Design 3 cr

Students will be introduced to the analysis and design of reinforced concrete footings, retaining walls, two-way floor systems, long columns, beams subjected to torsion and deep beams.

Prerequisite: CE 485 Minimum Grade of C and CE 486 Minimum Grade of C

CE 588 Prestressed Concrete Design 3 cr

Students will be introduced to the concepts of prestressing, loss of prestress, design of prestressed beams, columns and slabs.

Prerequisite: CE 485 Minimum Grade of C and CE 486 Minimum Grade of C

CE 590 Special Topics - 1-4 cr

Topics of current civil engineering interest.

CE 592 Directed Independent Study - 1-3 cr

Directed study, under the guidance of a faculty advisor, of a topic from the field of Civil Engineering not offered in a regularly scheduled course. Requires Instructor Permission.

CE 594 Projects in Civil Engineering 1-3 cr

May be repeated for credit. Requires approved proposal and consent of director of engineering graduate studies.

CE 599 Thesis 1-6 cr

Thesis research. May be taken more than once. Requires approved prospectus.

Faculty

Faculty Name	Faculty Department	Faculty Position	Degrees Held
CLEARY, JOHN C. (cleary@southalabama.edu)	Civil Engineering	Associate Professor	BCE, Cleveland State University MS, Cleveland State University PHD, Case Western Reserve U
ISLAM, SAMANTHA (sislam@southalabama.edu)	Civil Engineering	Associate Professor	BS, Bangladesh Univ of Engineer MS, Purdue University-Main Campus PHD, Purdue University-Main Campus

Civil Engineering (BS)

Degree Requirements

Code	Title	Hours
General Education Requirements		51
Major Requirements		
<i>Civil Engineering Requirements</i>		
Complete the following:		
EG 101	Intro to Engineering & Design (or EG 201 for LINK students)	2
ST 315	Applied Probability-Statistics	3
EG 231	Intro to Ethics and Economics	3
EG 283	Statics	3
EG 284	Dynamics	3
EG 315	Mechanics of Materials	3
EG 360	Fluid Mechanics	3
CE 102	Intro to Civil Engineering	2
CE 204	Surveying Fundamentals	2
CE 205	Surveying Fundamentals Lab	1
CE 314	CE Materials	3
CE 315	CE Materials Lab-W	1
CE 340	Soil Mechanics	3
CE 341	Geotechnical Laboratory-W	1
CE 352	Intro to Transportation	3
CE 353	Transp-Geometric Design ¹	3
CE 360	Water Resources Engineering I	2
CE 367	Hydraulics Laboratory - W	1
CE 370	Intro to Enviro Eng	3
CE 374	Intro to Environmental Eng Lab	1
CE 384	Structural Analysis	3
CE 385	Structural Analysis Lab	1
CE 431	Civil Engineering Design I	2
CE 432	Civil Engineering Design II	4
CE 440	Intro to Geotech Eng ¹	3
CE 460	Water Resources Engineering II ¹	3
CE 470	Water-Wastewater Trtmt Design ¹	3
CE 471	Water-Wastewater Design Lab	1
<i>Science Elective</i>		
Select one of the following: 4		
BLY 101 & 101L	Life Science I and Life Science I Laboratory	
BLY 121 & 121L	General Biology I and General Biology I Lab	
GEO 101 & 101L	Environmental Geography and Environmental Geography Lab	
GEO 102 & 102L	Earth and the Environment and Earth and the Environment Lab	
GY 111 & 111L	Physical Geology and Physical Geology Lab	

MAS 134 & 134L	Ocean Science and Ocean Science Lab	
<i>Civil Engineering Structural Design</i>		
Select one of the following:		4
CE 480 & CE 481	Design of Steel Structures and Steel Design Lab ¹	
CE 485 & CE 486	Reinforced Concrete Design and Reinforced Concrete Design Lab ¹	
<i>Civil Engineering Technical Electives ²</i>		
A. Select one of the following:		3
CE 442	Foundation Engineering	
CE 466	Coastal and Harbor Eng	
CE 474	Industrial Waste Treatment	
CE 480 & CE 481	Design of Steel Structures and Steel Design Lab	
CE 482	Timber Design	
CE 485 & CE 486	Reinforced Concrete Design and Reinforced Concrete Design Lab	
CE 490	Special Topics	
B. Select one of the following:		3-4
CE 410	Construction Engineering	
CE 412	Mgmt & Sustainability of C.I.	
EG 450	Intro to Systems Engineering	
GIT 460	Intro to GIT	
Minor Requirements		
A minor is not required for this degree program		0
Total Hours		131-132

Footnote

- ¹ Students must complete all five terminal subdiscipline courses (CE 353, CE 440, CE 460, CE 470 and structural design course) with a "C" grade or better.
- ² Two technical electives are required, at least one of which must be a "design-oriented" course. Students can take two courses from List A (design oriented) or one course from List A and one course from List B (non-design oriented).

General Education Requirements

Code	Title	Hours
Area I – Written Composition		
A. Complete the following:		
EH 101	English Composition I (Students who earn an English ACT score of 27, or a written SAT score of 610, can opt out of EH 101.)	3
EH 102 or EH 105	English Composition II or Honors Composition - H	3
Area II – Humanities & Fine Arts		
A. Select one of the following: 3		
EH 215	Brit Lit before 1785	

EH 216	Brit Lit after 1785	
EH 225	Am Lit before 1865	
EH 226	Am Lit after 1865	
EH 235	World Lit before 1650	
EH 236	World Lit after 1650	

B. Select one of the following: 3

ARH 100	Survey of Art	
ARH 103	Art History I	
ARH 123	Art History II	
ARS 101	Art Appreciation	
DRA 110	Introduction to Theatre	
MUL 101	Introduction to Music	

C. Complete the following:

CA 110	Public Speaking	3
--------	-----------------	---

Area III – Natural Sciences & Mathematics

Complete the following:

MA 125	Calculus I	4
CH 131 & 131L	General Chemistry I and General Chemistry I Lab	4
CH 132 & 132L	General Chemistry II and General Chemistry II Lab	4
PH 201 & 201L	Calculus-Based Physics I and Calculus-Based Physics I Lab	4

Area IV – History, Social & Behavioral Sciences

A. Select 3 hours from the following: 3

HY 101	HY of Western Civilization I	
HY 102	HY of Western Civilization II	
HY 135	US History to 1877	
HY 136	US History since 1877	

B. Select 3 hours from the following: 3

AN 100	Intro to Cultural Anthropology	
AN 101	Intro Archaeology-Bio Anthro	
CA 100	Intro to Communication	
CA 211	Interpersonal Comm	
ECO 215	Prin of Microeconomics	
ECO 216	Prin of Macroeconomics	
GEO 114	People, Places, Environment	
GEO 115	World Regional Geography	
GS 101	Intro to Gender Studies	
IS 100	Global Issues	
IST 201	Seasons of Life	
PSC 130	Intro to US Government	
PSY 120	Introduction to Psychology	
PSY 250	Life Span Development	
SY 109	Introductory Sociology	
SY 112	Social Problems	

C. Select a further 3 hours from either List A or B above in Area IV 3

Area V

Complete the following:

MA 126	Calculus II	4
MA 227	Calculus III	4

MA 238	Differential Equations I	3
--------	--------------------------	---

Total Hours 51

Additional Information

It is important that students make adequate progress in the Civil Engineering program. Satisfactory completion of a set of fundamental courses is required before a student is allowed to take advanced courses. Professional Component Standing (PCS) is awarded by the Chair of the Department when the student completes the College of Engineering PCS requirements and the CCEE Departmental PCS requirements.

College of Engineering PCS Courses

Minimum Grade C

Code	Title	Hours
EH 101	English Composition I	3
EH 102	English Composition II	3
CH 131	General Chemistry I (+Lab CH 131L)	4
MA 125	Calculus I	4
MA 126	Calculus II	4
PH 201	Calculus-Based Physics I (+Lab PH 201L)	4

Civil, Coastal, and Environmental Engineering PCS Courses

Minimum Grade C

Code	Title	Hours
CH 132	General Chemistry II (+Lab CH 132L)	4
MA 227	Calculus III	4
CE 102	Intro to Civil Engineering	2

Students who fail to maintain at least a 2.00 GPA overall at the University of South Alabama may be required to take or repeat appropriate courses as specified by the department chair to correct their deficiencies and may not be permitted to continue in 300- and 400-level engineering courses.

Graduation Plan

(131 Total Hours)

The Sample 4-year plan is designed as a guide for students preparing for their course selections. This information provides only a suggested schedule. Actual course selections should be made in consultation with an advisor. Courses listed as Milestones are required to obtain the Professional Component Standing (PCS). Two designated writing (W) courses are required with at least one course chosen from offerings in the student's major or minor. Courses carrying this required credit are identified in the University Bulletin by a W after the course title.

¹ Courses required for Professional Component Standing (PCS) with a "C" grade or better.

² See Degree Requirements

Notes

- Students must make a 2.0 GPA in CE major courses to graduate.
- Students must complete all five terminal subdiscipline courses (CE 353, CE 440, CE 460, CE 470, and Structural Design) with a "C" grade or better.
- Students who earn an English ACT score of 27, or a written SAT score of 610, can opt out of EH 101
- **Students not Term 1 - Calculus I ready will exceed the 131 hours required for this degree. If math is not started prior to Fall-Year 1, the four-year graduation timetable is likely to be extended. Students with ACT Math scores 21 and below should begin math courses in the summer before Fall-Year 1.**

Civil Engineering (MS)

Degree Requirements

The program leading to the Master of Science in Civil Engineering focuses on civil engineering in the coastal environment and allows for specialization in several possible civil engineering sub-disciplines: Environmental Engineering, Geotechnical Engineering, Structural Engineering, Transportation Engineering, or Water Resources/Coastal Engineering. Program admission and MS Degree requirements, as well as plan of study options (thesis or coursework options), are described under the College of Engineering section of this Bulletin. Many graduate courses in Civil Engineering are offered in late afternoon, early evening,

or online to accommodate practicing engineers – see the detailed degree requirements.

Admission to The MSCE Program

- Regular Admission requirements:
 - A Bachelor's degree in Engineering in a relevant field.
 - A grade-point average of 3.0 or greater (A=4.0) on all undergraduate work.
 - Verification of registration by examination as a Professional Engineer (P.E.) can be substituted for the GPA requirement.
 - International students whose native language is not English must submit official scores showing a score of 71 or higher on the internet based TOEFL, or an IELTS band score of 6.5 or higher, or a Duolingo minimum score of 100, or an ITEP minimum score of 3.7, or a Pearson Academic minimum score of 48.
- Provisional Admission requirements
 - A Bachelor's degree in Engineering or in a field acceptable to the department is required. Depending on the student's background, additional undergraduate preparatory courses may be required. These courses will not count toward the Master's degree.
 - A minimum grade-point average of 2.5 (A=4.0) on all undergraduate work.
 - International students whose native language is not English must submit official scores showing a score of 71 or higher on the internet based TOEFL, or an IELTS band score of 6.5 or higher, or a Duolingo minimum score of 100, or an ITEP minimum score of 3.7, or a Pearson Academic minimum score of 48.

Although official scores on the Graduate Record Exam (GRE) are not required, students are often required to present GRE scores to be eligible for assistantships or fellowships.

Admission may be granted in special cases where a holistic evaluation of the applicant's credentials is appropriate.

The minimum credit hour requirements for the different options for the MSCE degree are:

- Thesis Option: 30 credit hours
- Course Option: 30 credit hours

Civil Engineering - Coastal Engineering Certificate

Certificate Details

The Department offers Graduate Certificates in three focus areas: Coastal Engineering, Structural Engineering, and Water/ Wastewater Engineering. Each Certificate requires the completion of 12 credit hours (four classes) in one of the three focus areas. Upon completion, a Graduate Certificate is awarded; however, all earned credits are full graduate credits and can either be applied toward a MSCE degree at USA or transferred to other institutions. For acceptance, graduate certificate applicants should have a civil engineering Bachelor's degree (or closely related equivalent) and appropriate course prerequisites. The program requires satisfactory completion of 12 credit hours with a minimum GPA of 3.0 to be awarded the Certificate.

Admission to the Certificate Program

Regular Admission requirements:

1. A Bachelor's degree in Civil Engineering or a closely related field.
2. A grade-point average of 3.0 or greater (A=4.0) on all undergraduate work.

- Verification of registration by examination as a Professional Engineer (P.E.) can be substituted for the GPA requirement.
- International students whose native language is not English must submit official scores showing a score of 71 or higher on the internet-based TOEFL, or an IELTS band score of 6.5 or higher, or a Duolingo minimum score of 100, or an iTEP minimum score of 3.7, or a Pearson Academic minimum score of 48.

Admission may be granted in special cases where a holistic evaluation of the applicant's credentials is appropriate.

Certificate Program Requirements

Code	Title	Hours
CE 503	Intro to Coastal Engineering	3
CE 566	Coastal and Harbor Engineering	3
Select at least 6 credits from the following:		6
CE 560	Coastal Hydrodynamics	3
CE 563	Hydrodynamic Modeling	3
CE 590	Special Topics - (Coastal Hazards or Nature-Based Solutions)	1-4

Civil Engineering - Structural Engineering Certificate

Certificate Details

The Department offers Graduate Certificates in three focus areas: Coastal Engineering, Structural Engineering, and Water/ Wastewater Engineering. Each Certificate requires the completion of 12 credit hours (four classes) in one of the three focus areas. Upon completion, a Graduate Certificate is awarded; however, all earned credits are full graduate credits and can either be applied toward a MSCE degree at USA, or transferred to other institutions. For acceptance, graduate certificate applicants should have a civil engineering Bachelor's degree (or closely related equivalent) and appropriate course prerequisites. The program requires satisfactory completion of 12 credit hours with a minimum GPA of 3.0 to be awarded the Certificate.

Admission to the Certificate Program

Regular Admission requirements:

- A Bachelor's degree in Civil Engineering or a closely related field.
- A grade-point average of 3.0 or greater (A=4.0) on all undergraduate work.
- Verification of registration by examination as a Professional Engineer (P.E.) can be substituted for the GPA requirement.
- International students whose native language is not English must submit official scores showing a score of 71 or higher on the internet-based TOEFL, or an IELTS band score of 6.5 or higher, or a Duolingo minimum score of 100, or an iTEP minimum score of 3.7, or a Pearson Academic minimum score of 48.

Admission may be granted in special cases where a holistic evaluation of the applicant's credentials is appropriate.

Structural Engineering Certificate Program Requirements

Code	Title	Hours
Select four of the following:		12
CE 582	Timber Design	
CE 583	Advanced Steel Design	
CE 584	Advanced Structural Analysis	
CE 587	Advanced Concrete Design	
CE 588	Prestressed Concrete Design	
CE 590	Special Topics -	
Total Hours		12

Civil Engineering - Water/Wastewater Engineering Certificate

Certificate Details

The Department offers Graduate Certificates in three focus areas: Coastal Engineering, Structural Engineering, and Water/ Wastewater Engineering. Each Certificate requires the completion of 12 credit hours (four classes) in one of the three focus areas. Upon completion, a Graduate Certificate is awarded; however, all earned credits are full graduate credits and can either be applied toward a MSCE degree at USA, or transferred to other institutions. For acceptance, graduate certificate applicants should have a civil engineering Bachelor's degree (or closely related equivalent) and appropriate course prerequisites. The program requires satisfactory completion of 12 credit hours with a minimum GPA of 3.0 to be awarded the Certificate.

Admission to the Certificate Program

Regular Admission requirements:

- A Bachelor's degree in Civil Engineering or a closely related field.
- A grade-point average of 3.0 or greater (A=4.0) on all undergraduate work.
- Verification of registration by examination as a Professional Engineer (P.E.) can be substituted for the GPA requirement.
- International students whose native language is not English must submit official scores showing a score of 71 or higher on the internet-based TOEFL, or an IELTS band score of 6.5 or higher, or a Duolingo minimum score of 100, or an iTEP minimum score of 3.7, or a Pearson Academic minimum score of 48.

Admission may be granted in special cases where a holistic evaluation of the applicant's credentials is appropriate.

Water/Wastewater Engineering Certificate Program Requirements

Code	Title	Hours
CE 571	Biological Wastewater Treatment (required)	3
CE 572	Physical Wastewater Treatment (required)	3
Select at least 6 credits from the following:		
CE 574	Industrial Waste Treatment	3
CE 590	Special Topics - (Decentralized Wastewater Systems or Natural Treatment Systems)	1-4
CH 514	Environmental Chemistry	3

Electrical and Computer Engineering

Department of Electrical and Computer Engineering Administrative Staff

Title	Name
Chair	Hulya Kirkici
Professors	Gong, Kirkici, Woods
Associate Professors	El-Sharkh, Khan, Latif, Russ, Spencer, Wang
Assistant Professors	Shaban, Touma
Emeritus Professors	Bosarge, Gungor, Sakla
Part-time Instructors	Gholson, Sakla, Steadman, Thomas

The Department of Electrical and Computer Engineering offers the degrees of Bachelor of Science in Electrical Engineering (BSEE) and Bachelor of Science in Computer Engineering (BSCpE), both granted by the College of Engineering. The BSCpE program is administered by the ECE Department in collaboration with the School of Computing. The ECE Department also offers the degree of Master of Science in Electrical Engineering.

BSEE Program Educational Objectives

The program educational objectives (PEOs) of the Electrical Engineering B.S. degree program are to produce graduates who, during their first few years after graduation, will:

1. Achieve professional advancement with increasing responsibility, leadership, and mentorship.
2. Function effectively on multidisciplinary teams, and individually, to develop and apply electrical engineering solutions within a global, societal, and environmental context.
3. Communicate effectively and manage resources skillfully as members and leaders of their profession.
4. Advance professional competence through continuous learning such as studying for advanced degrees, professional registration, and leadership through ethical standards and professionalism.

BSEE Student Outcomes

By the time of graduation from the Electrical Engineering B.S. program, students should attain the following outcomes:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must

consider the impact of engineering solutions in global, economic, environmental, and societal contexts

5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

The BSEE curriculum is designed to ensure the attainment of the student outcomes.

The Bachelor of Science degree program in Electrical Engineering at the University of South Alabama is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>, (<http://www.abet.org>) under the General Criteria and the Program Criteria for Electrical, Computer, Communications, Telecommunication(s) and similarly named Engineering programs.

Electrical Engineering is among the fastest evolving disciplines in our technological society. Engineering developments in electrical technology have provided, in a substantial way, improvement in the standard of living of humanity. The domain of the electrical engineer reaches from massive electrical energy systems to microscopic integrated circuits; from life studies in bioengineering to satellite communications systems; and from the control of electromagnetic radiation to the control of information flow in this field.

The highly diverse and rapidly evolving characteristics of these fields require a thorough understanding of fundamentals as well as flexibility in the design of individualized programs of study.

Therefore, emphasis is placed on mathematics, physics, humanities, social sciences, basic sciences and engineering sciences during the first two years. Sufficient flexibility is provided at the senior level to allow a student, in consultation with an advisor, to prepare a specialized course of study in six main concentration areas from the broad field of electrical engineering: 1 – Control Systems, 2 – Communications and Networks, 3 – Digital Systems, 4 – Electromagnetics and Optics, 5 – Electronics, and 6 – Power Systems. In addition, means are provided, through the Electrical and Computer Engineering Design Laboratory, for a student to pursue a design topic outside of, but related to, the formal course work.

Students are required to take general education (GenEd) elective courses in four broad areas: (i) Literature, (ii) Humanities and Fine Arts, (iii) Natural Science and Mathematics and (iv) History, Social, and Behavioral Sciences. These courses provide breadth to the educational experience of Electrical Engineering and Computer Engineering students. They must be planned, in consultation with an academic advisor, to reflect a rationale appropriate to the educational objectives of the Departmental Programs, while conforming strictly to the requirements of the Articulation and General Studies Committee of the State of Alabama.

All students are required to successfully complete EH 101 and EH 102, English Composition I and II from area (i) (or acceptable alternatives), plus a minimum of 18 semester hours of general education courses from areas (ii) and (iv). In area (ii), Public Speaking (CA110) is required by all Electrical and Computer Engineering students. Of the two remaining courses, one course must be in literature and one course must be in the fine arts. In area (iv), at least one course must be in history and at

least one course must be from disciplines in the social and behavioral sciences.

Students in Electrical Engineering are required to become Student Members of the Institute of Electrical and Electronics Engineers (IEEE) by the time they enroll in EE 401 and EE 404. Through participation in the activities of such technical organizations students become aware of the activities of electrical and computer engineers in society. An excellent opportunity is provided to students for contact with practicing professionals as well as fellow students.

Any Electrical Engineering student interested in pursuing a career in medicine or bioengineering should consult with an advisor for an appropriate sequence of courses which will meet the minimum requirements for entry into a medical school or the necessary life sciences background to enter a graduate program in bioengineering.

The award of the BSEE degree will allow the graduate to enter the professions of electrical engineering directly, or to continue his/her education at graduate level.

BScpE Program Educational Objectives

The program educational objectives (PEOs) of the Computer Engineering B.S. degree program are to produce graduates who, during their first few years after graduation, will:

1. Achieve professional advancement with increasing responsibility, leadership and mentorship.
2. Function effectively on multidisciplinary teams, and individually, to develop and apply computer engineering solutions within a global, societal, and environmental context.
3. Communicate effectively and manage resources skillfully as members and leaders of their profession.
4. Advance professional competence through continuous learning such studying for advanced degrees, professional registration, and leadership through ethical standards and professionalism.

BScpE Student Outcomes

By the time of graduation from the Computer Engineering B.S. program, students will have demonstrated attainment of the following outcomes:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

The BScpE curriculum is designed to ensure the attainment of the student outcomes.

The Bachelor of Science degree program in Computer Engineering at the University of South Alabama is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>, (<http://www.abet.org>) under the General Criteria and the Program Criteria for Electrical, Computer, Communications, Telecommunication(s) and similarly named Engineering programs.

The Computer Engineering program is geared to students who are interested in the design of digital computing systems, integrating both hardware and software design components.

In the Computer Engineering degree program, sequences of courses are chosen from Electrical and Computer Engineering and from Computer Science that produce an in-depth treatment of digital logic and systems theory. In addition, means are provided, through the Electrical and Computer Engineering Design Laboratory, for a student to pursue a design topic outside of, but related to, the formal course work.

Students are required to take general education (GenEd) elective courses in four broad areas:

1. Literature,
2. Humanities and Fine Arts,
3. Natural Sciences and Mathematics and
4. History, Social, and Behavioral Sciences.

These courses provide breadth to the educational experience of Electrical Engineering and Computer Engineering students. They must be planned, in consultation with an academic advisor, to reflect a rationale appropriate to the educational objectives of the Departmental Programs, while conforming strictly to the requirements of the Articulation and General Studies Committee of the State of Alabama.

All students are required to successfully complete EH 101 and EH 102, English Composition I and II from area (1) (or acceptable alternatives), plus a minimum of 18 semester hours of general education courses from areas (2) and (4). In area (2), Public Speaking (CA 110) is required by all Electrical and Computer Engineering students. Of the two remaining courses, one course must be in literature and one course must be in the fine arts. In area (4), at least one course must be in history and at least one course must be from disciplines in the social and behavioral sciences.

Students in Computer Engineering are required to become members of either the Institute of Electrical and Electronics Engineers (IEEE) or the Association for Computing Machinery (ACM) by the time they enroll in EE 401 and EE 404. Through participation in the activities of such technical organizations students become aware of the activities of electrical and computer engineers in society. An excellent opportunity is provided to students for contact with practicing professionals as well as fellow students.

Any Computer Engineering student interested in pursuing a career in medicine or bioengineering should consult with an advisor for an appropriate sequence of courses which will meet the minimum requirements for entry into a medical school or the necessary life sciences background to enter a graduate program in bioengineering.

The award of the BScPE degree will allow the graduate to enter the professions of electrical engineering or computer engineering directly, or to continue his/her education at the graduate level.

BSEE and BScPE Accelerated Bachelor's to Master's (ABM) Degree Option

The USA Accelerated Bachelor's to Master's (ABM) programs in Electrical and Computer Engineering provide exceptional undergraduate students the opportunity to earn a bachelor's and a master's degree at an accelerated pace. ABM students may count up to 12 credit hours of graduate coursework towards either the undergraduate degrees in Electrical or Computer Engineering or the graduate degree in Electrical Engineering. ABM students typically complete the master's degree within one academic year after completing the undergraduate degree. See a departmental advisor for specific details.

Degrees, Programs, or Concentrations

- Computer Engineering (BS) (p. 581)
- Electrical Engineering (BS) - General Track (p. 584)
- Electrical Engineering (BS) - Premed Track (p. 587)
- Electrical Engineering (MS) (p. 590)

Courses

EE 220 Circuit Analysis I 3 cr

Resistive networks with independent and dependent sources: Ohm's law; Kirchhoff's law; nodal and loop analysis; network theorems; energy storage elements (capacitors and inductors); operational amplifiers; steady state AC analysis; and introduction to PSpice.

Prerequisite: MA 125 Minimum Grade of C and PH 201 Minimum Grade of C

EE 223 Network Analysis 3 cr

Transient analysis of RLC circuits; Three-phase systems; power-factor correction in three-phase power systems; magnetically coupled networks; Operational amplifiers; network frequency response functions and resonance; Fourier series.

Prerequisite: EE 220 Minimum Grade of C and PH 202 Minimum Grade of C and MA 227 (may be taken concurrently) Minimum Grade of C and MA 238 (may be taken concurrently) Minimum Grade of C

EE 227 Circuits and Devices Lab 1 cr

Introduction to electrical laboratory equipment and instrumentation; analog and digital meters, oscilloscopes, bridges, power supplies, function generators. Measurement of voltage, current and power in DC networks and in single-phase and three-phase AC networks. Verification of Kirchhoff's laws. Measurement of resistance, capacitance, and inductance. Corequisite: EE 223 and credit for or concurrent registration in EH102.

Prerequisite: EE 223 (may be taken concurrently) Minimum Grade of D and (EH 102 (may be taken concurrently) Minimum Grade of D or EH 105 Minimum Grade of D)

EE 263 Digital Logic Design 3 cr

Number systems, introduction to basic logic circuits, analysis and design of combinational and sequential logic circuits, k-map methods, finite state machines, multiplexers, decoders, encoders, adders, latches, flip-flops, registers, and counters.

Prerequisite: CPE 260 Minimum Grade of C

EE 264 Microprocessor Sys-Interfacing 3 cr

Small computer organization, assembly and machine level programming, microprocessor architectures and instruction sets, microprocessor and microcontroller system design, and microprocessor based peripheral interfacing.

Prerequisite: EE 263 Minimum Grade of C or CSC 228 Minimum Grade of C

EE 268 Digital Logic Design Lab 1 cr

A series of digital logic circuit experiments and simulations using TTL/CMOS integrated circuits designed to reinforce the material presented in EE 263. Design projects include standard SSI and MSI digital circuit based simulation and experiments.

Prerequisite: EE 263 Minimum Grade of C or CSC 228 Minimum Grade of C

EE 302 Computer Methods in EE - CpE 1 cr

Introduction to the use of computer softwares such as MATHCAD/MATLAB and PSPICE/ELECTRONIC WORKBENCH for the analysis of engineering related problems and the solution of electric/ electronic circuits.

Prerequisite: EE 223 Minimum Grade of C and EE 263 Minimum Grade of C

EE 321 Signals, Systems & Transforms 3 cr

Modeling of analog and discrete-time signals and systems, time domain analysis, Fourier series, continuous and discrete time Fourier transforms and applications, sampling, z-transform, state variables, analysis of signals and systems and basic filter design, filter implementation using MatLab.

Prerequisite: EE 223 Minimum Grade of D and MA 238 Minimum Grade of C

EE 322 Prob, Rand Sigs & Stat Anly 3 cr

Discrete and continuous probability distributions; random variables; Bernoulli trials; hypothesis testing; confidence intervals; Anova multiple comparisons; Bayes' theorem; estimation; sampling; random processes and random signals in linear systems. Probability applications in computer and electrical engineering.

Prerequisite: MA 238 Minimum Grade of C and EE 321 (may be taken concurrently) Minimum Grade of D

EE 328 Feedback Control Systems 3 cr

Review of the Laplace Transform. Transfer functions; block diagrams; signal-flow graphs and Mason's Gain Formula. Stability of feedback control systems; Routh-Hurwitz criterion; root-locus technique and the Nyquist criterion. Bode plots; gain and phase margins. PI, PD and PID controller design. Introduction to the use of Matlab for analysis and design.

Prerequisite: EE 321 Minimum Grade of D

EE 331 Physical Electronics 3 cr

Introduction to quantum concepts; particles in one dimensional potential well; tunneling. Silicon band structure, electrons and holes. Drift and diffusion current density; band bending; Einstein diffusion coefficient; recombination/generation. The pn junction; step and linear junctions; depletion layer. I-V characteristics of a pn junction and steady-state carrier concentrations at junctions. Bipolar junction transistor fundamentals; npn and npn types; common emitter configuration, biasing and gain.

Prerequisite: MA 238 Minimum Grade of C and PH 202 Minimum Grade of C and CH 131 Minimum Grade of C

EE 334 Digital Electronics 3 cr

Review of semiconductor diodes and diode circuits; Introduction to digital electronics; Review of BJTs, operating characteristics and DC analysis, TTL logic gates; Field effect devices, operating characteristics and DC analysis; NMOS, PMOS, CMOS devices and logic circuits, transmission gates; Design considerations.

Prerequisite: EE 331 Minimum Grade of D

EE 354 Electromagnetics I 3 cr

Basic concepts of electrostatics, electric potential theory, electric fields and currents, fields of moving charge, Poisson's and Laplace's equations, magnetostatics, metallic conductors and dielectric materials, electric-scalar and magnetic-vector potentials and boundary conditions, general time varying fields and Maxwell's equations.

Prerequisite: (MA 237 Minimum Grade of C and MA 238 Minimum Grade of C and PH 202 Minimum Grade of C)

EE 355 Electromagnetics II 3 cr

Lumped versus distributed circuit components, capacitance, inductance and mutual inductance, uniform plane waves, power flow and skin effect, reflection, transmission and propagation of uniform plane waves through different media, wave polarization, transmission lines, waveguides, optical fiber, electromagnetic radiation and antennas, the Radar equation.

Prerequisite: EE 354 Minimum Grade of D

EE 356 Electromagnetics Laboratory 1 cr

Computer-aided and experimental field mapping; shielding techniques; field measurement of elementary radiating structures and waveguide circuits; terminal characteristics of klystrons and space wave propagation losses.

Prerequisite: EE 355 (may be taken concurrently) Minimum Grade of C

EE 368 Microprocessor Sys Interf Lab 1 cr

This Laboratory is designed to reinforce the material covered in EE 264 and to provide practical hands-on experience with microprocessor software, hardware and interfacing. Topics include integration of microprocessor software, hardware and peripheral devices; assembly level programming and hardware interfaces for control and instrumentation.

Prerequisite: EE 268 Minimum Grade of D and EE 264 (may be taken concurrently) Minimum Grade of D

EE 372 Introduction to Communications 3 cr

Introduction to communication systems; analog, digital, deterministic and stochastic messages; modulation; redundancy coding. Signal energy and power; correlation; orthogonal signal set and Fourier series. Fourier transforms; signal transmission through linear systems; ideal and practical filters; signal distortion; Parseval's theorem; essential bandwidth and energy and power spectral density. Amplitude modulation: DSB, SSB, AM, QAM and VSB; phase and frequency modulation and the basic design of a FM transmitter. Sampling theorem; pulse code modulation and differential pulse code modulation.

Prerequisite: EE 322 (may be taken concurrently) Minimum Grade of D and EE 321 Minimum Grade of D

EE 381 Electromech Energy Conversion 3 cr

Introduction to the principles of electromechanical energy conversion. Energy balance, force, and torque of electromagnetic systems; magnetic circuits and ferromagnetic losses; transformers and their connections; three-phase induction motors; synchronous generators and motors; non-salient machines. Parallel operation of synchronous generators. Dynamics of electric machines.

Prerequisite: EE 223 Minimum Grade of D

EE 385 Energy Conversion Lab 1 cr

Laboratory experiments based on: Faraday's Law and magnetic coupling; magnetic circuits; transformers (single and three phase) and their connections and tests. Three phase induction motors - tests and performance characteristics; synchronous generators and motors. Machine data acquisition methods and processing using a computer.

Prerequisite: (EE 381 Minimum Grade of D and EE 227 Minimum Grade of D)

EE 401 Intro Elec and CpE Design - W 1 cr

Specification of design criteria. Written and oral presentations of design proposals. Coverage of professional and contemporary issues and students are required to become members of the IEEE or ACM and attend two technical meetings of IEEE/ACM.

Prerequisite: CA 110 Minimum Grade of D and EE 321 Minimum Grade of D and EE 334 (may be taken concurrently) Minimum Grade of D and EE 368 (may be taken concurrently) Minimum Grade of D

EE 404 Electrical and Computer Engineering Design 3 cr

Implementation of design project from the field of Electrical or Computer Engineering in the broadest sense and under the guidance of a project director from the electrical and computer engineering faculty. Written and oral presentations of project proposals, interim and final reports. Students are required to be current members of the IEEE/ACM and attend two technical meetings.

Prerequisite: EE 328 Minimum Grade of D and EE 334 Minimum Grade of D and EE 368 Minimum Grade of D and EE 401 Minimum Grade of D

EE 422 Adv Feedback Control Systems 3 cr

Sensors, encoders and DC motors in control systems. The performance and design of feedback control systems. System bandwidth; Nichol's Chart and the stability of control systems with time delays. State variable analysis and design. This course is dually listed with an equivalent graduate level course (EE522) and requires a minimum GPA of 2.75 or the instructor's permission for admission.

Prerequisite: EE 328 Minimum Grade of D

EE 423 Modern Control Theory 3 cr

Simulation and modeling; introduction to linear systems theory; concepts of controllability and observability; specifications; structures and limitations; review of classical design methods; state feedback design methods; multivariable control; robust stability and sampled data implementation. Introduction to the use of MATLAB for design. This course is dually listed with an equivalent graduate-level course (EE 523) and requires a minimum G.P.A. of 2.75 or the instructor's permission for admission.

Prerequisite: EE 328 Minimum Grade of D

EE 424 Nonlinear Control Systems 3 cr

State space description; methods of linearization; isoclines; stability of nonlinear systems; Lyapunov's direct method; harmonic linearization; describing functions; dual input describing functions; Popov's method; circle criterion and computer aided analysis. This graduate-level course is dually listed with an equivalent course (EE524) and requires a minimum GPA of 2.75 or the instructor's permission for admission.

Prerequisite: EE 328 Minimum Grade of D

EE 427 Digital Control Systems 3 cr

State space and transfer function description of discrete-time systems; solution of discrete state equation; discrete-time model of analog plants; frequency domain analysis; design of discrete state-feedback regulators; observers and tracking systems. This course is dually listed with an equivalent graduate-level course (EE 527) and requires a minimum G.P.A. of 2.75 or the instructors permission for admission.

Prerequisite: EE 328 Minimum Grade of D

EE 430 Power Semiconductor Dev 3 cr

Characteristics of power devices; physics of transport phenomena; breakdown voltage; power rectifiers; bipolar transistors; power MOSFET; insulated-gate bipolar transistor and MOS-gated thyristors.

Prerequisite: EE 331 Minimum Grade of D

EE 431 Analog Electronics 3 cr

Small signal model of diodes, applications, advanced op-amp applications, principle of operation of FETs, small signal model of FET and basic FET amplifiers, small signal model of BJT and basic BJT amplifiers, differential and multistage amplifiers, Miller's Theorem, Nyquist stability criterion and frequency response, internal circuit of typical op-amp.

Prerequisite: EE 334 Minimum Grade of D

EE 432 Microelectronic Devices 3 cr

Introduction to semiconductor material properties; semiconductor diodes; structure and operation; diode circuit applications; bipolar transistor; structure and operation; junction field effect transistors (JFETs); metal oxide field effect transistors (MOSFETs) fabrication technology and construction of semiconductor devices; biasing and stability of amplifiers. This course is dually listed with an equivalent graduate-level course (EE 532) and requires a minimum GPA of 2.75 or the instructor's permission for admission.

Prerequisite: EE 334 Minimum Grade of D

EE 437 Electronics Lab 1 cr

Computer analysis and measurement of the characteristics and parameters of power supplies; operational amplifiers; voltage and power amplifiers; oscillators and active filters.

Prerequisite: (EE 334 Minimum Grade of D and EE 431 (may be taken concurrently) Minimum Grade of D)

EE 438 Virtual Instrumentation 3 cr

Transducers; measurement techniques; measurement errors; digital signal processing; noise sources and reduction; introduction to LabVIEW software, data acquisition and processing using computer-controlled data acquisition hardware.

Prerequisite: EE 334 Minimum Grade of D

EE 439 VSLI Technology-Fabrication 3 cr

Introduction to semiconductor devices; crystal growth and wafer preparation; chemical and physical vapor deposition; oxidation; diffusion; ion implantation; lithography; etching metallization, process integration of CMOS and bipolar technologies; diagnostic techniques and measurements; packaging; yield and reliability. This course is dually listed with an equivalent graduate-level course (EE 539) and requires a minimum G.P.A. of 2.75 or the instructor's permission for admission.

Prerequisite: EE 331 Minimum Grade of D

EE 440 HDL Logic Synthesis 3 cr

Introduction to the syntax and elements of the basic VHDL language such as entities and architectures; creating combinational, synchronous logic and state machines using both structural and behavioral VHDL; using hierarchy in large designs; synthesizing and implementing designs. This course is dually listed with an equivalent graduate-level course (EE 540) and requires a minimum GPA of 2.75 or the instructor's permission for admission. Credit for both EE 440 and EE 443 not allowed toward a degree.

Prerequisite: EE 264 Minimum Grade of D and EE 268 Minimum Grade of D

EE 441 Computer Networks 3 cr

Introduction to design and analysis of computer networks. Polling networks and ring networks. This course is dually listed with an equivalent graduate-level course (EE 541) and requires a minimum GPA of 2.75 or the instructor's permission for admission.

Prerequisite: EE 264 Minimum Grade of D and EE 268 Minimum Grade of D

EE 443 HDL Logic Simulation 3 cr

Introduction to the syntax and elements of the basic Verilog language such as modules and ports; hierarchical modeling; gate-level modeling; dataflow modeling; switch-level modeling; tasks and functions; timing and delays; user-defined primitives; synthesizing and implementing designs. Emphasis is on the simulation and test-bench aspects. This course is dually listed with an equivalent graduate-level course (EE 543) and requires a minimum GPA of 2.75 or the instructor's permission for admission. Credit for both EE 440 and EE 443 not allowed toward a degree.

Prerequisite: EE 264 Minimum Grade of D and EE 268 Minimum Grade of D

EE 444 Wireless Networks 3 cr

Introduction to modern wireless networks/systems, the cellular concept, frequency reuse, interference and system capacity improvement, trunking and grade of service, multiple access techniques, wireless/wireline interworking, and advanced networks (i.e. ad hoc networks). This course is dually listed with an equivalent graduate-level course (EE 544) and requires a minimum GPA of 2.75 or the instructor's permission for admission.

Prerequisite: EE 441 Minimum Grade of D

EE 445 Smart Grid 3 cr

Introduction to smart grid concepts, phasor measurement units, applications of PMUs in protection and fault recovery, communication over power lines, smart metering, smart grid standards, and cyber security.

Prerequisite: EE 264 Minimum Grade of D and EE 381 Minimum Grade of D

Corequisite: EE 483

EE 446 Embedded System Design Lab 1 cr

Design projects utilizing 16-bit and 32-bit microprocessor hardware and software; interfaces to memory and peripheral devices.

Prerequisite: EE 457 (may be taken concurrently) Minimum Grade of D

EE 447 Programmable Logic Devices Lab 1 cr

Digital design projects utilizing simulation and synthesis CAD tools and targeting programmable logic devices.

Prerequisite: EE 264 Minimum Grade of D and EE 268 Minimum Grade of D

EE 449 Control and Communications Lab 1 cr

Computer-aided modeling, design and performance analysis in time and frequency domain of analog and digital communication end-to-end systems, and automatic control systems.

Prerequisite: EE 328 Minimum Grade of D and EE 372 (may be taken concurrently) Minimum Grade of D

EE 450 Fundamentals of Fourier Optics 3 cr

Two-dimensional Fourier analysis; linear systems; sampling theory; scalar diffraction theory. Fourier transform imaging properties of lenses; frequency analyses of diffraction-limited coherent and incoherent imaging systems; aberrations and resolution analysis; Vander Lugt filters and frequency domain analysis and synthesis; SAR and pattern recognition applications.

Prerequisite: EE 331 Minimum Grade of D and EE 355 Minimum Grade of D

EE 452 Microwave Engineering 3 cr

Generation and transmission of high frequency electromagnetic energy; magnetrons, klystrons, masers, parametric amplifiers, traveling wave tubes and solid-state devices; waveguides and resonators. This course is dually listed with an equivalent graduate level course (EE 552) and requires a minimum GPA of 2.75 or the instructor's permission for admission.

Prerequisite: EE 355 Minimum Grade of D

EE 453 Antenna Theory and Design 3 cr

Radiation fundamentals; linear antennas; loop antennas; aperture antennas; reflector antennas; antenna impedance and measurements; computer-aided design of antenna systems. This course is dually listed with an equivalent graduate-level course (EE 553).

Prerequisite: EE 355 Minimum Grade of D

EE 454 Digital Computer Architecture 3 cr

Computer organization; instruction set design; ALU design; control unit design; I/O and interrupt designs; memory organization; DMA; microprogramming; introduction to multi-processors; performance analysis. This course is dually listed with an equivalent graduate level course (EE 554) and requires a minimum GPA of 2.75 or the instructor's permission for admission.

Prerequisite: EE 264 Minimum Grade of D and EE 268 Minimum Grade of D

EE 455 Optoelectronics 3 cr

Wave propagation in free-space and in wave guides; optical resonators; interaction of radiation and atomic systems; laser oscillation; solid-state lasers. He-Ne and Argon lasers, integrated optics including integration of emitters and detectors; optical interconnects; spatial light modulators; optoelectronic materials and devices; and applications of optoelectronics. This course is dually listed with an equivalent graduate-level course (EE 555) and requires a minimum GPA of 2.75 or the instructor's permission of admission.

Prerequisite: EE 355 Minimum Grade of D

EE 456 Fiber Optic Communication Sys 3 cr

Review of optical principles, dielectric waveguides, signal propagation, degradations and attenuation of fibers. Fiber interconnection devices, active and passive components, optical transmitters and receivers, power budget, fiber optic communication systems. This course is dually listed with an equivalent graduate-level course (EE 556).

Prerequisite: EE 355 Minimum Grade of D

EE 457 Embedded System Design 3 cr

Architecture and software of 16-bit and 32-bit microprocessor hardware and software; interface design to memory and peripheral devices; multiprocessing. This course is dually listed with an equivalent graduate level course (EE 557) and requires a minimum GPA of 2.75 or the instructor's permission for admission.

Prerequisite: EE 264 Minimum Grade of D and EE 368 Minimum Grade of D

EE 458 Radar Systems 3 cr

Introduction to radar signal processing. Continuous wave and pulsed radars. Clutter and radio wave propagation. Moving target indicator, target surveillance and tracking radar systems. Side-looking, synthetic aperture, interferometric and other airborne radars. This course is dually listed with an equivalent graduate level course (EE 558) and requires a minimum GPA of 2.75 or the instructor's permission for admission.

Prerequisite: EE 355 Minimum Grade of D

EE 465 Digital Signal Processing 3 cr

Review of discrete Fourier and Z-transforms; review of analog filter design; design of IIR and FIR digital filters. Fast Fourier transform (FFT) and applications; Hardware implementation and quantization effects. Advanced digital filter structures and design. DSP algorithm design and implementation. Analysis of finite word length effects of DSP applications. Extensive use of MatLab for analysis and design.

Prerequisite: (EE 321 Minimum Grade of C and EE 322 (may be taken concurrently) Minimum Grade of D)

EE 468 Programmable Logic Controllers 3 cr

Hardware and software principles of PLC devices, ladder logic, hardware components of PLC systems and controller configuration, basic PLC operation, program construction and manipulation, advanced operation and networking.

Prerequisite: EE 264 Minimum Grade of D and EE 268 Minimum Grade of D

EE 469 Signal Integrity 3 cr

Design techniques for high-speed digital interfaces and circuit boards; signal integrity including crosstalk and ground bounce; electromagnetic aspects of high-speed digital design; frequency-domain analysis of power-system integrity; state-of-the-art buses and standards. This course is dually listed with an equivalent graduate-level course (EE 569) and requires a minimum GPA of 2.75 or the instructor's permission for admission.

Prerequisite: EE 264 Minimum Grade of D and EE 268 Minimum Grade of D and EE 334 Minimum Grade of D

EE 470 Synth Active-Passive Networks 3 cr

Reliability of network functions (high-pass, band-pass, low-pass, band reject and equalizing filters); approximation techniques; sensitivity analysis; passive and active synthesis; positive and negative feedback and biquads. Computer techniques for the realization of standard filter forms (Butterworth, Chebyshev, Bessel, Sallen and Key, and other forms).

Prerequisite: EE 321 Minimum Grade of D

EE 471 Wireless Communication 3 cr

Introduction to wireless communications propagation in mobile radio channels, large, small scale fading and multipath; diversity and diversity combining techniques and modulation techniques. This course is dually listed with an equivalent graduate level course (EE 571) and requires a minimum GPA of 2.75 or the instructor's permission for admission.

Prerequisite: EE 372 Minimum Grade of D

EE 473 Advanced Communication Systems 3 cr

Digital line coding; pulse shaping; partial response signaling; scrambling; M-ary communication; digital carrier systems and digital multiplexing. Probability; random variables; quantization error in PCM; random processes; white noise and the behavior of analog systems in the presence of noise. Information theory; compact codes and error correcting codes. This course is dually listed with an equivalent graduate level course (EE 573) and requires a minimum GPA of 2.75 or the instructor's permission for admission.

Prerequisite: EE 372 Minimum Grade of D

EE 481 Electrical Machines 3 cr

DC machines-motors and generators. Single-phase motors; unbalanced two-phase motors; servo-motors; commutator motors; stepper motors; synchros; shaded pole motors; reluctance and hysteresis motors and brushless DC motors. Dynamic circuit analysis of rotating machines.

Prerequisite: EE 381 Minimum Grade of D

EE 482 Switch Mode Power Conversion 3 cr

Design and analysis of switch mode power converters; design of magnetic components; stability considerations; input filter interactions; performance measurements and evaluations. This course is dually listed with an equivalent graduate-level course (EE 582) and requires a minimum GPA of 2.75 or the instructor's permission for admission.

Prerequisite: EE 334 Minimum Grade of D and EE 381 Minimum Grade of D

EE 483 Power Systems I 3 cr

Principles of power system analysis. Synchronous machines, transformers and loads; transmission line parameters and analysis. Impedance/admittance matrix representation of power systems. Power flow analysis. Symmetrical fault studies and protective devices.

Prerequisite: EE 381 Minimum Grade of D and EE 385 (may be taken concurrently) Minimum Grade of D

EE 484 Power Systems II 3 cr

Symmetrical components and sequence networks; computer studies of transmission lines; fault studies using a computer; state estimation of power system and power system stability, Economic analysis.

Prerequisite: EE 483 Minimum Grade of D

EE 485 Power Distrib and Utilization 3 cr

Principles and characteristics of generating stations; transformers; conversion equipment; primary and secondary distribution systems; short-circuit calculations; selection of protective devices; system grounding and over current protection; voltage control; power factor control and correction; load and cost estimating.

Prerequisite: EE 483 Minimum Grade of D

EE 486 Power Electronics 3 cr

Power semiconductor diodes and thyristors; commutation techniques; rectification circuits - uncontrolled and controlled; AC voltage controllers; DC chopper; pulse-width modulated inverters and resonant pulse inverters. This course is dually listed with an equivalent graduate level course (EE 586) and requires a minimum GPA of 2.75 or the instructor's permission for admission.

Prerequisite: EE 334 Minimum Grade of D and EE 381 Minimum Grade of D

EE 487 Switch Mode Power Conversion 3 cr

Design and analysis of switch mode power converters; design of magnetic components; stability considerations; input filter interactions; performance measurements and evaluation. This course is dually listed with an equivalent graduate level course and requires a minimum GPA of 2.75 for admission.

Prerequisite: EE 334 Minimum Grade of D and EE 381 Minimum Grade of D

EE 488 Illumination Engineering 3 cr

Photometric units and definitions; light sources and luminaires; interior lighting and artificial illumination design techniques; daylight lighting design; exterior lighting design and the theory of color. Optics and control of lighting. Prerequisite: Instructor's permission.

EE 489 Renewable Energy 3 cr

Introduction to renewable energy sources. Fuel cells: classification, configuration and operation. Hydrogen: production, purification and storage. Photovoltaic cells: solar cells and operational characteristics. Wind turbines: operational characteristics. Energy from water sources: hydroelectric, wave and tidal energy. This course is dually listed with an equivalent graduate course and requires a minimum GPA 2.75 or the instructor's permission for admission.

Prerequisite: EE 381 Minimum Grade of D

EE 490 Special Topics 1-3 cr

Topics of current electrical and computer engineering interest. This course requires permission of the department chair and a minimum GPA of 2.75 for admission. (Prerequisites: PCS and Instructor's permission.)

EE 494 Directed Studies 1-3 cr

Directed study under the guidance of a faculty advisor, of a topic from the field of electrical and/or computer engineering, not offered in a regularly scheduled course. This course requires permission of the Department Chair and a minimum GPA of 2.75 for admission. Pre-requisite: PCS.

EE 499 Honors Senior Project - H 1-6 cr

Under the advice and guidance of a faculty mentor, honors student will identify and carry out a research project, relevant to the field of Electrical and Computer Engineering which will lead to a formal presentation at the annual Honors Student Colloquium. The senior project will be judged and graded by three faculty chaired by the honors mentor. Students are required to become members of IEEE/ACM and attend two technical meetings. This course is required for Honors recognition. A minimum of 4 credit hours is required, but students may enroll for a maximum of 6 credit hours over two semesters. Prerequisites: an approved project prospectus.

Prerequisite: (EE 401 Minimum Grade of C or HON 301 Minimum Grade of C)

EE 522 Adv Feedback Control Systems 3 cr

Sensors; encoders and D.C. motors in control systems. The performance and design of feedback control systems. System bandwidth; Nichol's Chart and the stability of control systems with time delays. State variable analysis and design. Use of MatLab for analysis and design. This course is dually listed with an equivalent 400-level Electrical/Computer Engineering course.

EE 523 Modern Control Theory 3 cr

Simulation and modeling; introduction to linear system theory; concepts of controllability and observability; specifications, structures and limitations; review of classical design methods; state feedback design methods; multivariable control; robust stability and sampled data implementation. Introduction to the use of MATLAB for design. This course is dually listed with an equivalent 400-level course (EE 423).

EE 524 Nonlinear Control Systems 3 cr

State space description; methods of linearization; isoclines; stability of nonlinear systems; Lyapunov's direct method; harmonic linearization; describing functions; dual input describing functions; Popov's method; circle criterion, computer aided analysis. This course is dually listed with an equivalent 400-level course (EE 424).

Prerequisite: EE 523

EE 525 Optimal Control Systems 3 cr

Static optimization; method of Lagrange multipliers; adaptive controllers; dynamic optimization; calculus of variations; the principle of optimality and dynamic programming; Pontryagin's maximum principle; quadratic optimal control.

Prerequisite: EE 523

EE 526 Introduction to Robotics 3 cr

Basic mathematics of robotic systems; coordinate transformations: forward and inverse kinematics; velocity kinematics; path planning and trajectory generation; numerical methods; mobile robots. Fee

EE 527 Digital Control Systems 3 cr

State space and transfer function description of discrete time systems; solution of the discrete state equation; discrete-time model of analog plants; frequency domain analysis; designing of discrete state-feedback regulators; observers and tracking systems. This course is dually listed with an equivalent 400-level course (EE 427).

EE 528 Advanced System Theory 3 cr

Review of linear spaces and operators; state variable description of time varying and time invariant linear systems. Controllability and observability of linear dynamical systems; state feedback and state estimators; stability of linear systems; arbitrary pole assignment for multivariable case. Prerequisite: Instructor's permission.

EE 530 Nanotechnology 3 cr

Nanotechnology fundamentals and principles; quantum wires and dots; single electron effects and coulomb blockade; nanomagnets and spintronics; spin based electronics (magnetic memories, magnetic field sensors); nanofabrication; nanoelectronics (QCQ); organic electronics (carbon fullerenes and nanotubes, polymers); advanced characterization techniques; applications especially those related to nanotechnology; MEMS and microsystems (sensors); QWIP technology and its associative nanoscience; photonic crystal; advances in nanostructured materials. Requires instructor's permission.

EE 531 Advanced Electronic Devices 3 cr

Semiconductor electronics; semiconductor diode circuit analysis; bipolar and field effect transistors; analog-to-digital and digital-to-analog circuits and active filters. This course is dually listed with an equivalent 400-level course (EE 431). Prerequisite: Instructor's permission

EE 532 Microelectronic Devices 3 cr

Introduction to semiconductor material properties; semiconductor diodes: structure and operation; diode circuit applications; semiconductor heterojunctions; metal-semiconductor junctions; bipolar transistor: structure and operation; junction field effect transistors (JFETs); metal oxide field effect transistors (MOSFETs); metal semiconductor field effect transistors (MESFETs); fabrication technology and construction of semiconductor devices; photodetectors; light-emitting diodes; laser diodes; solar cells; image sensors; spice based microelectronic circuit design. This course is dually listed with equivalent 400-level course (EE 432).

EE 534 VLSI Design Systems 3 cr

Review of fabrication of microelectronic devices; introduction to MOS technology; basic physical and electrical properties of field effect transistors; CMOS fabrication; layout of CMOS integrated circuits; MOSFETs; concepts of VLSI chip design; physical design of CMOS integrated circuit.

EE 535 Electronic Materials Prop-App 3 cr

Schrodinger's equation, potential wells and barriers; crystallographic geometry; Kronig-Penney model; energy bands in crystalline solids; density of states - Fermi statistics; intrinsic and extrinsic semiconductors; conductivity and Hall effects; interfaces; magnetic materials; superconducting materials; optical materials. Prerequisite: Instructor's permission.

EE 536 Intro to Superconductivity 3 cr

Microscopic theory of superconductivity; BCS theory; superconduction tunneling phenomena; superconducting device; superconducting materials; High-Tc superconductors. Prerequisite: Instructor's permission.

EE 537 Adv Plasma Process Elect Mat 3 cr

Analysis, design and application of DC, RF and microwave plasma in microelectronic material processing; sputtering; etching; deposition; surface modification; diagnostic and characterization techniques. Prerequisite: Instructor's permission.

EE 538 Magnetic Recording Media 3 cr

Magnetostatic fields; magnetization processes; demagnetizing factors; magnetic circuits; hard disk / tape media; inductive and MR heads; magnetic data storage systems. Prerequisite: Instructor's permission.

EE 539 VLSI Technology - Fabrication 3 cr

Introduction to semiconductor devices; crystal growth and wafer preparation; chemical and physical vapor deposition; oxidation; diffusion; ion implantation; lithography; etching; metallization; process integration of CMOS and bipolar technologies; diagnostic techniques and measurements; packaging; yield and reliability. This course is dually listed with an equivalent 400-level course (EE 439).

EE 540 HDL Logic Synthesis 3 cr

Introduction to the syntax and elements of the basic VHDL language such as entities and architectures; creating combinational, synchronous logic and state machines using both structural and behavioral VHDL; using hierarchy in large designs; synthesizing and implementing designs. This course is dually listed with an equivalent undergraduate-level course (EE 440) and requires a minimum GPA of 2.75 or the instructor's permission for admission. Credit for both EE 540 and EE 543 not allowed toward a degree.

EE 541 Computer Networks 3 cr

Introduction to design and analysis of computer networks. Polling networks and ring networks. Networking applications. This course is dually listed with an equivalent 400-level EE course.

EE 542 Adv Top Digital Design - HDLs 3 cr

Current topics of interest in digital design. State-of-the-art software tools used in digital design. Advanced topics in HDLs.

EE 543 HDL Logic Simulation 3 cr

Introduction to the syntax and elements of the basic Verilog language such as modules and ports; hierarchical modeling; gate-level modeling; dataflow modeling; behavioral modeling; switch-level modeling; tasks and functions; timing and delays; user-defined primitives; synthesizing and implementing designs. Emphasis is on the simulation and test-bench aspects. This course is dually listed with an equivalent undergraduate-level course (EE 443) and requires a minimum GPA of 2.75 or the instructor's permission. Credit for both EE 540 and EE 543 not allowed toward a degree.

EE 544 Wireless Networks 3 cr

Introduction to modern wireless networks/systems, the cellular concept, frequency reuse, interference and system capacity improvement, trunking and grade of service, multiple access techniques, wireless/wireline interworking, and ad hoc networks). This course is dually listed with an equivalent 400-level course (EE 444) and requires a minimum GPA of 2.75.

Prerequisite: EE 541

EE 545 Optical Network 3 cr

Digital transmission using fiber optics as point-to-point link. Wavelength-division-multiplexing concepts and components, LAN, WAN, and MAN, SONET/SDH, FDDI Networks, Broadcast-and-select WDM Networks, Wavelength-routed Networks, and Performance of WDM and EDFA systems. Prerequisite: Instructor's permission.

Prerequisite: EE 456 Minimum Grade of D

EE 546 Neural Networks 3 cr

Introduction to neural networks and their application to electrical engineering. Concept learning and the general-to-specific ordering, decision tree learning, linear perceptrons, back propagation networks, recursive networks, radial basis networks, neural network-based control systems, unsupervised learned networks.

EE 548 Computer-Network Security 3 cr

Cryptography; Symmetric and asymmetric encryption; authentication and identification schemes; MACs and Digital Signatures; applications of security.

EE 552 Microwave Engineering 3 cr

Generation and transmission of high frequency electromagnetic energy-magnetrons, klystrons, maser, parametric amplifiers, traveling wave tubes and solid-state devices. This course is dually listed with an equivalent 400-level course (EE 452). Prerequisite: Instructor's permission.

EE 553 Antenna Theory and Design 3 cr

Radiation fundamentals; linear antennas; loop antennas; aperture antennas; reflector antennas; antenna impedance and measurements; computer-aided design of antenna systems. This course is dually listed with an undergraduate level course (EE 453).

EE 554 Digital Computer Architecture 3 cr

Computer organization; instruction set design; ALU design; control unit design; I/O and interrupt designs; memory organization; DMA; microprogramming; introduction to multi-processors; performance analysis. This course is dually listed with an undergraduate level course (EE 454).

EE 555 Optoelectronics 3 cr

Wave propagation in free-space and in wave guides; optical resonators, interaction of radiation and atomic systems; laser oscillation; solid-state lasers. He-Ne and Argon ion lasers, integrated optics including integration of emitters and detectors; optical interconnects; spatial light modulators; optoelectronic materials and devices; and applications of optoelectronics. This course is dually listed with a 400-level course (EE 455).

EE 556 Fiber Optic Communication Sys 3 cr

Review of optical principles, dielectric waveguides, signal propagation, degradations and attenuation of fibers. Fiber interconnection devices, active and passive components, optical transmitters and receivers, power budget, fiber optic communication systems. This course is dually listed with an equivalent undergraduate-level course (EE 456).

EE 557 Adv. Embedded System Design 3 cr

Architecture and software of 16-bit and 32-bit microprocessor hardware and software; interface design to memory and peripheral devices; multiprocessing. This course is dually listed with an undergraduate level course (EE 457).

EE 558 Radar Analysis 3 cr

Introduction to radar signal processing. Continuous wave and pulsed radars. Clutter and radio wave propagation. Moving target indicator, target surveillance and tracking radar systems. Side-looking, synthetic aperture, interferometric and other airborne radars. This course is dually listed with an equivalent 400-level (EE458).

EE 559 Optical Info Process-Holograph 3 cr

Parallel optical information processing in Fourier transform systems; nonlinear optical image processing in a linear optical processing; optical image equidensity and pseudo-color using techniques; wave-front reconstruction; on-axis and off-axis holography, effects of film MTF and nonlinearities; holographic memory, display and non-destructive testing; and optical computing. Prerequisite: Instructor's permission.

EE 560 Adv Computer Architecture 3 cr

Overview of software/hardware architectures of selected RISC/CISC microprocessors, advanced pipelining and instruction level parallelism, superscalar techniques, memory hierarchy design, cache coherency, introduction to multiprocessor systems and interconnection networks.

Prerequisite: EE 554 Minimum Grade of C

EE 565 Adv Digital Signal Processing 3 cr

Review of discrete Fourier and z-transforms; review of analog filter design; canonical digital filter forms; design of IIR and FIR digital filters. Fast Fourier Transforms (FET) and their applications; hardware implementation and quantization effects. Advanced digital filter structures and design. DSP algorithm design and implementation. Analysis of finite word length effects of DSP applications. Extensive use of MatLab for analysis and design. This course is dually listed with an equivalent 400-level EE course (EE465).

EE 566 Digital Image Processing 3 cr

Review of digital image fundamentals; different image transforms; image enhancement techniques; image restoration methods; detection of discontinuities and thresholding.

EE 567 Biomedical Imaging 3 cr

Introduction to biomedical imaging, projection radiography, computer aided tomography, single photon emission computed tomography (SPECT), positron emission tomography (PET), magnetic resonance imaging (MRI and fMRI), ultrasound imaging, optical imaging techniques including confocal microscopy and optical coherence tomography (OCT).

Prerequisite: EE 566 Minimum Grade of D

EE 568 Pattern Recognition 3 cr

Introduction to pattern recognition, statistical, syntactic and neural pattern recognition; Decision procedures; Parameter estimation and supervised learning; Non-parametric techniques; Feature extraction and nonlinear mapping; Fuzzy systems in pattern recognition; Methods of testing

EE 569 Signal Integrity 3 cr

Design techniques for high-speed digital interfaces and circuit boards; signal integrity including crosstalk and ground bounce; electromagnetic aspects of high-speed digital design; frequency-domain analysis of power-system integrity; state-of-the-art buses and standards. This course is dually listed with an equivalent undergraduate-level course (EE 469).

EE 571 Wireless Communications 3 cr

The cellular concept and system design fundamentals, propagation in mobile radio channels, large scale fading; small-scale fading and multi-path statistical distributions, distributions, diversity and diversity combining techniques. This course is dually listed with an equivalent undergraduate level course (EE 471) and requires instructor's permission for admission.

Prerequisite: EE 322 Minimum Grade of D and EE 372 Minimum Grade of D

EE 573 Advanced Communication Systems 3 cr

Digital line coding; pulse shaping; partial response signaling; scrambling; M-ary communication; digital carrier systems and digital multiplexing. Probability; random processes; white noise and the behavior of analog systems in the presence of noise. Information theory; compact codes and error correcting codes. This course is dually listed with an equivalent 400-level course (EE 473).

EE 574 Digital Communications 3 cr

Analysis and design of digital communication systems based on probability theory; signal space representation and optimum detection principles; Digital modulation techniques and their performance in additive white Gaussian noise.

Prerequisite: EE 573

EE 575 Stochastic Processes 3 cr

Introduction to estimation theory. Markov chains - finite, countable, continuous time, optimal stopping; Martingales; renewal processes, reversible Markov chains, Brownian motion and stochastic integration.

EE 576 Optical Communications 3 cr

Light sources, detectors, fiber components and optical systems for fiber communication; free-space inter-satellite optical networks for high-speed global communication; coding problems in optical fiber data transmission; three-dimensional optical data storage for database processing; propagation losses and fiber amplifiers; and optical free-space interconnections in future computers. Prerequisite: Instructor's permission.

EE 577 Information Theory 3 cr

Self-information; entropy; mutual information and channel capacity; encoding; error detecting and correcting codes. Sampling theorem. Discrete and continuous channels. Band-limited channels.

EE 578 Error Correction Codes 3 cr

This course is designed to introduce the students to error correcting codes, their construction and properties, encoding and decoding.

EE 579 Wireless Sensor Networks 3 cr

Introduction to Wireless Sensor Networks; Network deployment; Network Topologies; Localization; Tracking; Time synchronization techniques; Wireless characteristics; Energy considerations; MAC layer protocol and sleep scheduling; Routing; Sleep-based topology control; Latest development in the field.

Prerequisite: EE 544 Minimum Grade of D

EE 582 Switch-Mode Power Conversion 3 cr

Design and analysis of switch mode power converters-design of magnetic components; stability considerations; input filter interactions; performance, measurements and evaluation. This course is dually listed with an equivalent 400-level course (EE 482). Prerequisite: Instructor's permission.

EE 585 Advanced Power Systems 3 cr

Special topics that are not covered in traditional power systems courses, such as: Optimization techniques, computer methods, unified fault (short circuit) analysis, protection and control of power systems. Prerequisite: Instructor's permission.

EE 586 Power Electronics 3 cr

Power semiconductor diodes and thyristors; commutation techniques; rectification circuits - uncontrolled and controlled; AC voltage controllers; DC chopper; pulse-width modulated inverters and resonant pulse inverters. This course is dually listed with an equivalent undergraduate level course (EE 486).

Cross-Listed: EE 486

EE 588 Power Semiconductor Drives 3 cr

Rectifier control of DC motors; chopper control of DC drives; closed-loop control of DC drives; induction motor speed control and multiquadrant control; control of induction motors by AC controllers and frequency-controlled drives; slip power control of induction motors; synchronous motor drives - brushless DC and AC motor drives. Prerequisites: Instructor's permission.

EE 589 Renewable Energy 3 cr

Introduction to renewable energy sources. Fuel cells: classification, configuration and operation. Hydrogen: production, purification and storage. Photovoltaic cells: solar cells and operational characteristics. Wind turbines: operational characteristics. Energy from water sources: hydroelectric, wave and tidal energy.

EE 590 Special Topics - 1-3 cr

Topics of current electrical engineering interest. Prerequisite: Instructor's permission.

EE 592 Directed Independent Study 1-3 cr

Directed study, under the guidance of a faculty advisor, of a topic from the field of Electrical and Computer Engineering not offered in a regularly scheduled course. Prerequisite: Instructor's permission.

EE 594 Project in Electrical Engr 1-3 cr

An investigation of an original problem in electrical engineering under the guidance of the student's major professor. Prerequisites: Approval of the project prospectus by the student's advisory committee, and consent of the Director of Engineering Graduate Studies.

EE 599 Thesis 1-6 cr

An investigation of an original problem in electrical and/or computer engineering under the guidance of the student's major professor. Prerequisite: Approval of the thesis prospectus by the student's Advisory Committee and the Graduate School and consent of the Director of Engineering Graduate Studies.

Faculty

Faculty Name	Faculty Department	Faculty Position	Degrees Held
EL-SHARKH, MOHAMED YOUSEF MOHAMED (yel-shark@southalabama.edu)	Electrical-Computer Eng	Associate Professor	BS, Ain Shams Univ MS, Ain Shams Univ PHD, University of Alabama
GONG, NA (nagong@southalabama.edu)	Electrical-Computer Eng	Professor	PHD, SUNY at Buffalo
KHAN, AURANGZEB (akhan@southalabama.edu)	Electrical-Computer Eng	Associate Professor	BS, University of Karachi MS, University of Karachi MPHIL, Quaid-i-Azam University PHD, Tottori University

KIRKICI, HULYA (hkirkici@southalabama.edu)	Electrical-Computer Eng	Professor	PHD, Polytechnic University
LATIF, SAEED IFTAKHAR (slatif@southalabama.edu)	Electrical-Computer Eng	Associate Professor	BS, Bangladesh Univ of Engineer MS, Univ of Manitoba PHD, Univ of Manitoba
RUSS, SAMUEL H. (sruss@southalabama.edu)	Electrical-Computer Eng	Associate Professor	BSEE, Georgia Inst of Tech - Main PHD, Georgia Inst of Tech - Main
SHABAN, MOHAMED E (mshaban@southalabama.edu)	Electrical-Computer Eng	Assistant Professor	BS, Mansoura University MS, Mansoura University MS, University of LA at Lafayette PHD, University of LA at Lafayette
SPENCER, EDMUND A. (espencer@southalabama.edu)	Electrical-Computer Eng	Associate Professor	BE, University of Leicester MS, University of Texas- Austin PHD, University of Texas- Austin
THOMAS, THOMAS GEIGER (tthomas@southalabama.edu)	Electrical-Computer Eng	Part-Time Instructor	BS, University of South Alabama BSEE, University of South Alabama MSEE, Univ of Alabama-Birmingham
WANG, JINHUI (jwang@southalabama.edu)	Electrical-Computer Eng	Associate Professor	PHD, University of Alabama-Huntsv BS, Hebei University MS, Beijing University of Tech PHD, Beijing University of Tech
WOLTER FERREIRA TOUMA, DANIELA (dtouma@southalabama.edu)	Electrical-Computer Eng	Assistant Professor	BS, Uni de Sao Paulo MS, Uni de Sao Paulo DSC, Uni de Sao Paulo
WOODS, ROGER CLIVE (clivewoods@southalabama.edu)	Electrical-Computer Eng	Professor	DPHIL, University of Oxford England MA, University of Oxford England

Computer Engineering (BS)

Degree Requirements

Code	Title	Hours
General Education Requirements		54
Major Requirements		
<i>Computer Engineering Major Core</i>		
EG 101	Intro to Engineering & Design (or EG 201 for LINK students)	2
EG 231	Intro to Ethics and Economics	3
CPE 260	Intro to C++ Programming	3
CSC 231	Intro Data Structures Algs	4
CSC 311	Networking and Communications	3
CSC 322	Operating Systems	3
EE 220	Circuit Analysis I	3
EE 223	Network Analysis	3
EE 227	Circuits and Devices Lab	1
EE 263	Digital Logic Design	3
EE 264	Microprocessor Sys-Interfacing	3
EE 268	Digital Logic Design Lab	1
EE 321	Signals, Systems & Transforms	3
EE 322	Prob, Rand Sigs & Stat Anlys	3
EE 328	Feedback Control Systems	3
EE 331	Physical Electronics	3
EE 334	Digital Electronics	3
EE 368	Microprocessor Sys Interf Lab	1
EE 401	Intro Elec and CpE Design - W	1

EE 404	Electrical and Computer Engineering Design	3
EE 431	Analog Electronics	3
EE 446	Embedded System Design Lab	1
EE 454	Digital Computer Architecture	3
EE 457	Embedded System Design	3
<i>Tracks</i>		
Select one of the following Tracks:		12
<i>Hardware Track: Technical Electives</i>		
A. Select two of the following:		
EE 438	Virtual Instrumentation	
EE 439	VSLI Technology-Fabrication	
EE 440	HDL Logic Synthesis ¹	
EE 441	Computer Networks	
EE 443	HDL Logic Simulation ¹	
EE 444	Wireless Networks	
EE 465	Digital Signal Processing	
EE 468	Programmable Logic Controllers	
EE 469	Signal Integrity	
EE 470	Synth Active-Passive Networks

Computer Senior Lab

Select one of the following: ¹	
EE 437	Electronics Lab
EE 447	Programmable Logic Devices Lab
EE 449	Control and Communications Lab

Minor Requirements

A minor is not required for this degree program	0
---	---

Total Hours	129
--------------------	------------

Note: All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major or minor. Courses carrying this required credit are identified in the University Bulletin by W after the course title. Appropriate software tools will be utilized in almost all CpE/EE courses.

¹ Credit for both EE 440 & EE 443 is not allowed.

General Education requirements

Code	Title	Hours
Area I – Written Composition		
Complete the following:		
EH 101	English Composition I (Students who earn an English ACT score of 27, or a written SAT score of 610, can opt out of EH 101.)	3
EH 102	English Composition II	3
or EH 105	Honors Composition - H	
Area II – Humanities & Fine Arts		
A. Select one of the following: ³		
EH 215	Brit Lit before 1785	
EH 216	Brit Lit after 1785	
EH 225	Am Lit before 1865	
EH 226	Am Lit after 1865	
EH 235	World Lit before 1650	
EH 236	World Lit after 1650	
B. Select one of the following: ³		
ARH 100	Survey of Art	
ARH 103	Art History I	
ARH 123	Art History II	
ARS 101	Art Appreciation	
DRA 110	Introduction to Theatre	
MUL 101	Introduction to Music	
C. Complete the following:		
CA 110	Public Speaking	3
Area III – Natural Sciences & Mathematics		
Complete the following:		
MA 125	Calculus I	4
CH 131	General Chemistry I	4
& 131L	and General Chemistry I Lab	
PH 201	Calculus-Based Physics I	4
& 201L	and Calculus-Based Physics I Lab	
PH 202	Calculus-Based Physics II	4
& 202L	and Calculus-Based Physics II Lab	
Area IV – History, Social & Behavioral Sciences		
A. Select one of the following: ³		
HY 101	HY of Western Civilization I	
HY 102	HY of Western Civilization II	
HY 135	US History to 1877	
HY 136	US History since 1877	

B. Select one of the following:		3
AN 100	Intro to Cultural Anthropology	
AN 101	Intro Archaeology-Bio Anthro	
CA 100	Intro to Communication	
CA 211	Interpersonal Comm	
ECO 215	Prin of Microeconomics	
ECO 216	Prin of Macroeconomics	
GEO 114	People, Places, Environment	
GEO 115	World Regional Geography	
GS 101	Intro to Gender Studies	
IS 100	Global Issues	
IST 201	Seasons of Life	
PSC 130	Intro to US Government	
PSY 120	Introduction to Psychology	
PSY 250	Life Span Development	
SY 109	Introductory Sociology	
SY 112	Social Problems	

C. Select one additional course from either List A or List B above in Area IV 3

Area V Pre-Professional, Major, Elective Courses		
Complete the following:		
MA 126	Calculus II	4
MA 227	Calculus III	4
MA 238	Differential Equations I	3
MA 267	Discrete Math Structures	3

Total Hours 54

Professional Component Standing (PCS)

PCS is required to be eligible to take EE 300-level and EE 400-level courses. PCS is awarded when the student meets the following requirements:

- Courses: MA 125, MA 126, CH 131, CH 131L, PH 201, CPE 260, EE 220, EE 263, EH 101, EH 102 or EH 105
- Grade C or higher is required in all PCS courses
- Minimum Grade Point Average: 2.00 USA GPA

Students who fail to maintain at least a 2.00 GPA overall at the University of South Alabama will lose PCS status and may be required to take or repeat appropriate courses as specified by the Department Chair to correct their deficiencies and may not be permitted to continue in 300- and 400-level engineering courses.

Graduation Plan

(129 Total Hours)

The Sample 4-year plan is designed as a guide for students preparing for their course selections. This information provides only a suggested schedule. Actual course selections should be made in consultation with an advisor. Courses listed as Milestones are required to obtain Professional Component Standing (PCS).

Course	Title	Hours
First Year		
Fall		
MA 125	Calculus I ⁴	4

CH 131 & 131L	General Chemistry I and General Chemistry I Lab ⁴	4
EH 101	English Composition I ⁴	3
EG 101	Intro to Engineering & Design	2
CA 110	Public Speaking	3

Milestone Notes
Must complete at least 12 hours with a 2.0 or higher GPA

Hours		16
Spring		
MA 126	Calculus II ⁴	4
PH 201 & 201L	Calculus-Based Physics I and Calculus-Based Physics I Lab ⁴	4

EE/CSC 4xx	Technical Elective ³	3
General Education: Area I, II or IV		3
Hours		13
Total Hours		129

¹ EE course only taught in the Spring semester.

² EE course only taught in the Fall semester.

³ CpE technical electives must be selected from CSC and/or EE courses at 400-level according to the selected track with permission of the student's advisor.

⁴ These courses are required for Professional Component Standing (PCS). Grade C or better in each course is required to obtain PCS in the Computer Engineering Program. No 300-level courses can be taken without PCS.

Note: Students not Term 1-Calculus I ready will exceed the 129 hours required for this degree. If math is not started prior to Fall of Year 1, it is likely that the four-year graduation timetable will be extended. Students with ACT Math scores of 21 and below should begin math courses in the summer before Fall of Year 1.

Electrical Engineering (BS) - General Track

Degree Requirements

EE 404	Electrical and Computer Engineering Design	3
EE 431	Analog Electronics	3
EE 437	Electronics Lab	1
EE 465	Digital Signal Processing	3

Technical Electives

I. Select one of the following concentrations (A-F) with permission of student's advisor: 6

A. Control Systems: choose any two of the following courses:

EE 422 Adv Feedback Control Systems

EE 423 Modern Control Theory

EE 424 Nonlinear Control Systems

EE 427 Digital Control Systems

EE 438 Virtual Instrumentation

EE 468 Programmable Logic Controllers

B. Communications and Networks: choose any two of the following courses:

EE 441 Computer Networks

EE 444 Wireless Networks

EE 453 Antenna Theory and Design

EE 456 Fiber Optic Communication Sys

EE 471 Wireless Communication

EE 473 Advanced Communication Systems

C. Digital Systems: choose any two of the following courses:

EE 438 Virtual Instrumentation

EE 440 HDL Logic Synthesis ¹

EE 441 Computer Networks

EE 443 HDL Logic Simulation ¹

EE 454 Digital Computer Architecture

EE 457 Embedded System Design

EE 468 Programmable Logic Controllers

EE 469 Signal Integrity

D. Electromagnetics and Optics: choose any two of the following courses:

EE 450 Fundamentals of Fourier Optics

EE 452 Microwave Engineering

EE 453 Antenna Theory and Design

EE 455 Optoelectronics

EE 456 Fiber Optic Communication Sys

EE 458 Radar Systems

EE 488	Illumination Engineering	
E. Electronics: choose any two of the following courses:		
EE 430	Power Semiconductor Dev	
EE 432	Microelectronic Devices	
EE 438	Virtual Instrumentation	
EE 439	VSLI Technology-Fabrication	
EE 455	Optoelectronics	
EE 470	Synth Active-Passive Networks	
EE 482	Switch Mode Power Conversion	
EE 486	Power Electronics	
F. Power Systems: choose any two of the following courses:		
EE 430	Power Semiconductor Dev	
EE 481	Electrical Machines	
EE 482	Switch Mode Power Conversion	
EE 483	Power Systems I	
EE 484	Power Systems II	
EE 485	Power Distrib and Utilization	
EE 486	Power Electronics	
EE 488	Illumination Engineering	
EE 489	Renewable Energy	
II. Select one additional course from any concentration (A-F) listed above		3
<i>Senior Lab Elective</i>		
Select one of the following:		1
EE 446	Embedded System Design Lab	
EE 447	Programmable Logic Devices Lab	
EE 449	Control and Communications Lab	
Minor Requirements		
A minor is not required for this degree program		0
Total Hours		129

Note: All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major or minor. Courses carrying this required credit are identified in the University Bulletin by W after the course title. Appropriate software tools will be utilized in almost all EE courses.

¹ Credit for both EE 440 & EE 443 is not allowed.

General Education Requirements

Code	Title	Hours
Area I – Written Composition		
Complete the following:		
EH 101	English Composition I (Students who earn an English ACT score of 27, or a written SAT score of 610, can opt out of EH 101.)	3
EH 102 or EH 105	English Composition II Honors Composition - H	3
Area II – Humanities & Fine Arts		
A. Select one of the following:		3
EH 215	Brit Lit before 1785	
EH 216	Brit Lit after 1785	
EH 225	Am Lit before 1865	

EH 226	Am Lit after 1865	
EH 235	World Lit before 1650	
EH 236	World Lit after 1650	
B. Select one of the following:		3
ARH 100	Survey of Art	
ARH 103	Art History I	
ARH 123	Art History II	
ARS 101	Art Appreciation	
DRA 110	Introduction to Theatre	
MUL 101	Introduction to Music	
C. Complete the following:		
CA 110	Public Speaking	3
Area III – Natural Sciences & Mathematics		
Complete the following:		
MA 125	Calculus I	4
CH 131 & 131L	General Chemistry I and General Chemistry I Lab	4
PH 201 & 201L	Calculus-Based Physics I and Calculus-Based Physics I Lab	4
PH 202 & 202L	Calculus-Based Physics II and Calculus-Based Physics II Lab	4
Area IV – History, Social & Behavioral Sciences (3 Courses, 9 Hours)		
A. Select one of the following:		3
HY 101	HY of Western Civilization I	
HY 102	HY of Western Civilization II	
HY 135	US History to 1877	
HY 136	US History since 1877	
B. Select one of the following:		3
AN 100	Intro to Cultural Anthropology	
AN 101	Intro Archaeology-Bio Anthro	
CA 100	Intro to Communication	
CA 211	Interpersonal Comm	
ECO 215	Prin of Microeconomics	
ECO 216	Prin of Macroeconomics	
GEO 114	People, Places, Environment	
GEO 115	World Regional Geography	
GS 101	Intro to Gender Studies	
IS 100	Global Issues	
IST 201	Seasons of Life	
PSC 130	Intro to US Government	
PSY 120	Introduction to Psychology	
PSY 250	Life Span Development	
SY 109	Introductory Sociology	
SY 112	Social Problems	
C. Select one additional course from either List A or List B above in area IV		3
Area V Pre-Professional, Major, Elective Courses		
Complete the following:		
MA 126	Calculus II	4
MA 227	Calculus III	4
MA 237	Linear Algebra I	3

MA 238	Differential Equations I	3
Total Hours		54

Professional Component Standing (PCS)

PCS is required to be eligible to take EE 300-level and EE 400-level courses. PCS is awarded when the student meets the following requirements:

- Courses: MA 125, MA 126, CH 131, CH 131L, PH 201, CPE 260, EE 220, EE 263, EH 101, EH 102 or EH 105
- Grade C or higher is required in all PCS courses
- Minimum Grade Point Average: 2.00 USA GPA

Students who fail to maintain at least a 2.00 GPA overall at the University of South Alabama will lose PCS status and may be required to take or repeat appropriate courses as specified by the Department Chair to correct their deficiencies and may not be permitted to continue in 300- and 400-level engineering courses.

Graduation Plan

(129 Total Hours)

The Sample 4-year plan is designed as a guide for students preparing for their course selections. This information provides only a suggested schedule. Actual course selections should be made in consultation with an advisor. Courses listed as Milestones are required to obtain Professional Component Standing (PCS).

Minor Requirements		

A minor is not required for this degree program	0
Total Hours	139-142

¹ Credit for both EE 440 & EE 443 is not allowed.

Notes:

- Grade C or higher is required in all prerequisite courses for admission to Medical School.
- All Electrical and Computer Engineering undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major. Courses carrying this credit are identified in the University Bulletin by W after the course title.
- Appropriate software tools will be utilized in almost all EE courses.

General Education Requirements

Code	Title	Hours
Area I – Written Composition		
Complete the following:		
EH 101	English Composition I (Students who earn an English ACT score of 27, or a written SAT score of 610, can opt out of EH 101.)	3
EH 102 or EH 105	English Composition II Honors Composition - H	3
Area II – Humanities & Fine Arts		
CA 110	Public Speaking	3
A. Select one of the following: 3		
EH 215	Brit Lit before 1785	
EH 216	Brit Lit after 1785	
EH 225	Am Lit before 1865	
EH 226	Am Lit after 1865	
EH 235	World Lit before 1650	
EH 236	World Lit after 1650	
B. Select one of the following: 3		
ARH 100	Survey of Art	
ARH 103	Art History I	
ARH 123	Art History II	
ARS 101	Art Appreciation	
DRA 110	Introduction to Theatre	
MUL 101	Introduction to Music	
Area III – Natural Sciences & Mathematics		
Complete the following:		
MA 125	Calculus I	4
BLY 121 & 121L	General Biology I and General Biology I Lab	4
BLY 122 & 122L	General Biology II and General Biology II Laboratory	4
CH 131 & 131L	General Chemistry I and General Chemistry I Lab	4
CH 132 & 132L	General Chemistry II and General Chemistry II Lab	4
PH 201 & 201L	Calculus-Based Physics I and Calculus-Based Physics I Lab	4

PH 202 & 202L	Calculus-Based Physics II and Calculus-Based Physics II Lab	4
------------------	--	---

Area IV – History, Social & Behavioral Sciences (3 Courses, 9 Hours)

A. Select one of the following: 3	
HY 101	HY of Western Civilization I
HY 102	HY of Western Civilization II
HY 135	US History to 1877
HY 136	US History since 1877
B. Select one of the following: 3	
AN 100	Intro to Cultural Anthropology
AN 101	Intro Archaeology-Bio Anthro
CA 100	Intro to Communication
CA 211	Interpersonal Comm
ECO 215	Prin of Microeconomics
ECO 216	Prin of Macroeconomics
GEO 114	People, Places, Environment
GEO 115	World Regional Geography
GS 101	Intro to Gender Studies
IS 100	Global Issues
IST 201	Seasons of Life
PSC 130	Intro to US Government
PSY 120	Introduction to Psychology (recommended for MCAT) ¹
PSY 250	Life Span Development
SY 109	Introductory Sociology (recommended for MCAT) ¹
SY 112	Social Problems

C. Select one additional course from either List A or List B above in Area IV 3

Area V - Pre-Professional, Major, Elective Courses

Complete the following:	
MA 126	Calculus II 4
MA 227	Calculus III 4
MA 237	Linear Algebra I 3
MA 238	Differential Equations I 3
CH 201 & 201L	Organic Chemistry I and Organic Chemistry I Lab 4
CH 202 & 202L	Organic Chemistry II and Organic Chemistry II Lab 4

Total Hours 74

¹ Courses PSY 120 and SY 109 (electives in Area IV.B of General Education Requirements) are not required for graduation, but are recommended to prepare for the Medical College Admission Test (MCAT) that is required for admission to most Medical Schools.

Professional Component Standing (PCS)

PCS is required to be eligible to take EE 300-level and EE 400-level courses. PCS is awarded when the student meets the following requirements:

- Courses: MA 125, MA 126, CH 131, CH 131L, PH 201, CPE 260, EE 220, EE 263, EH 101, EH 102 or EH 105
- Grade C or higher is required in all PCS courses
- Minimum Grade Point Average: 2.00 USA GPA

Students who fail to maintain at least a 2.00 GPA overall at the University of South Alabama will lose PCS and may be required to take or repeat appropriate courses as specified by the Department Chair to correct their deficiencies and may not be permitted to continue in 300- and 400-level engineering courses.

Graduation Plan

(139 Total Hours)

The Sample 4-year plan is designed as a guide for students preparing for their course selections. This information provides only a suggested schedule. Actual course selections should be made in consultation with an advisor. Courses listed as Milestones are required to obtain Professional Component Standing (PCS).

Course	Title	Hours
First Year		
Fall		
MA 125	Calculus I ¹	4
CH 131 & 131L	General Chemistry I and General Chemistry I Lab ¹	4
EH 101	English Composition I ¹	3
EG 101	Intro to Engineering & Design	2
Social & Behavioral Elective	PSY 120 recommended	3
CA 110	Public Speaking	3
Milestones		
Must complete at least 12 hours with a 2.0 or higher GPA		
Hours		19
Spring		
MA 126	Calculus II ¹	4
CH 132 & 132L	General Chemistry II and General Chemistry II Lab	4
PH 201 & 201L	Calculus-Based Physics I and Calculus-Based Physics I Lab ¹	4
CPE 260	Intro to C++ Programming ¹	3
EH 102	English Composition II (or EH 105) ¹	3
Milestones		
MA 125	Calculus I	
CH 131 & 131L	General Chemistry I and General Chemistry I Lab	
EH 101	English Composition I	
Hours		18
Second Year		
Fall		
MA 227	Calculus III	4
PH 202 & 202L	Calculus-Based Physics II and Calculus-Based Physics II Lab	4
EE 263	Digital Logic Design ¹	3
EE 220	Circuit Analysis I ¹	3
CH 201 & 201L	Organic Chemistry I and Organic Chemistry I Lab	4
Milestones		
PH 201 & 201L	Calculus-Based Physics I and Calculus-Based Physics I Lab	
MA 126	Calculus II	
CPE 260	Intro to C++ Programming	
Hours		18
Spring		
EE 223	Network Analysis	3
EE 268	Digital Logic Design Lab	1
CH 202 & 202L	Organic Chemistry II and Organic Chemistry II Lab	4

BLY 121 & 121L	General Biology I and General Biology I Lab	4
MA 237	Linear Algebra I	3
MA 238	Differential Equations I	3
Milestones		
EE 220	Circuit Analysis I	
EE 263	Digital Logic Design	
EH 102 or EH 105	English Composition II or Honors Composition - H	
Obtain PCS		
Hours		18
Third Year		
Fall		
EE 227	Circuits and Devices Lab	1
EE 264	Microprocessor Sys-Interfacing	3
EE 321	Signals, Systems & Transforms	3
EE 331	Physical Electronics	3
BMD 321	Biochemistry I-Molecular Biol	3
BLY 122 & 122L	General Biology II and General Biology II Laboratory	4
Hours		17
Spring		
EE 322	Prob, Rand Sigs & Stat Anlysis	3
EE 334	Digital Electronics	3
BMD 322	Biochemistry II-Metabolism	3
EE 328	Feedback Control Systems	3
EE 368	Microprocessor Sys Interf Lab	1
History/Humanities & Fine Arts Elective		3
Social & Behavioral Elective	SY 109 recommended	3
Hours		19
Fourth Year		
Fall		
EE 372	Introduction to Communications	3
EE 401	Intro Elec and CpE Design - W (only taught in Fall semester)	1
EG 231	Intro to Ethics and Economics	3
EE 465	Digital Signal Processing	3
EE 431	Analog Electronics	3
EE 446 or EE 447	Senior Lab Elective	1
BLY 350	Human Physiology (recommended but not required for the PreMed Track)	
Milestones		
Apply for graduation		
Hours		14
Spring		
EE 404	Electrical and Computer Engineering Design (only taught in Spring semester)	3
EE 437	Electronics Lab	1
EE 4XX	Electrical Engineering Technical Elective ²	3
EE 4XX	Electrical Engineering Technical Elective ²	3
History/Humanities & Fine Arts Elective		3
History/Humanities & Fine Arts Elective		3
Hours		16
Total Hours		139

¹ These courses are required for Professional Component Standing (PCS). Grade C or better in each course is required to obtain PCS in the Electrical Engineering Program. No 300-level courses can be taken without PCS.

² EE Technical electives must be selected from EE courses at 400-level and must include a two-course concentration from the approved list with permission of the student's advisor.

Note: Students not Term 1-Calculus ready will exceed the number of hours required for this degree. If math is not started prior to Fall of Year 1, it is likely that the four-year graduation timetable will be extended. Students with ACT Math scores 21 and below should begin math courses in the summer before Fall of Year 1.

Electrical Engineering (MS)

MSEE Degree Overview

With the ever-increasing pace of technological development in society, new and challenging opportunities are becoming available that require engineering graduates with increased levels of specialization. To provide for this, the Electrical and Computer Engineering Department offers electrical engineering and computer engineering graduates a cutting-edge program in graduate studies leading to the Master of Science in Electrical Engineering (MSEE) degree.

The program offers advanced level courses and areas of specialization in computer engineering, digital controls, laser-assisted fabrication, microelectronics, networks, image processing, pattern recognition, wireless communications, optical information processing and power systems. Graduate students have wide opportunities to undertake front-line engineering research alongside faculty for both thesis and project work. In addition, a coursework-only program is also offered by the department for those in industry who intend to further their professional development while pursuing a graduate degree.

Admission to the MSEE Program

- **Regular Admission**
 - a. A B.S. degree in electrical or computer engineering or closely related field is required.
 - b. A grade-point average of 3.0 or greater (A=4.0) on all undergraduate work is required. This can be relaxed depending on the academic background and experience of the applicant.
 - c. A minimum score of 151 in the quantitative section and a minimum score of 141 in the verbal section of the Graduate Record Examination (GRE) is required. These requirements may be relaxed slightly depending upon special individual circumstances evaluated holistically. GRE scores are not required for ECE students who have graduated from the University of South Alabama.
 - d. For International students whose native language is not English, a minimum score of 550 on the written Test of English as a Foreign Language (TOEFL), or a minimum score of 79 on the Internet-based TOEFL exam, or a minimum score of Band 6.5 on the International English Language Testing System (IELTS) test, is required (or other English language test results may be considered).
- **Provisional Admission**
 - a. A B.S. degree in electrical or computer engineering, or in a field acceptable to the departmental Graduate Admissions Committee, is required. Depending on the student's background, additional undergraduate preparatory courses may be required. These courses will not count toward the MS degree.
 - b. A minimum grade-point average of 2.5 (A=4.0) on all undergraduate work, including a minimum grade-point average

of 2.5 over the last 64 course hours of undergraduate work is required. Alternatively, a minimum grade-point average of 2.75 over the last 64 course hours of undergraduate work is required.

- c. A minimum GRE combined score greater than or equal to 283 (Verbal + Quantitative) is required. GRE scores are not required for ECE students who have graduated from the University of South Alabama.
- d. For International students whose native language is not English, a minimum score of 525 on the written Test of English as a Foreign Language (TOEFL), or a minimum score of 71 on the Internet-based TOEFL exam, or a minimum score of Band 6.0 on the International English Language Testing System (IELTS) test, is required (or other English language test results may be considered).

Admission may be granted in special cases where a holistic evaluation of the applicant's credentials is appropriate.

MSEE Degree Requirements

The MSEE Program has three Tracks: Electrical Engineering, Computer Engineering, and Systems Engineering. Each Track has either a Thesis option or a Course option. Award of the MSEE degree in any Track, either option, requires completion of 30 credit hours at graduate level. This includes 9 credit hours from the three required courses specified for the Track selected. The Thesis option requires successful completion of 6 credit hours (two semesters) of EE599 Thesis study; the Course option requires 6 credit hours (two courses) that can be selected from both dual-listed and non-dual-listed (i.e., pure graduate, not listed with a 400-level number) graduate courses. The remaining 15 credit hours are made up from elective courses, of which at least 9 credit hours must be taken from non-dual-listed courses. Graduate level instruction in research integrity and professional ethics (<https://www.southalabama.edu/colleges/engineering/resources/rcrtraininginstructions.pdf>) is also required by MSEE students. The detailed requirements of each MSEE Track and option are indicated on the Electrical and Computer Engineering Department Graduate program website at <https://www.southalabama.edu/colleges/engineering/ece/ecegrad.html#MSEE>.

BSEE and BSCpE Accelerated Bachelor's to Master's (ABM) Degree Option

The Department of Electrical & Computer Engineering allows well-qualified EE and CpE undergraduates in this Department to follow an "Accelerated Bachelor's to Master's" (ABM) study plan. This plan permits up to **six credit hours of graduate coursework** to count towards **both** the Bachelor's (as Technical Electives) and the Master's degrees, so that the Master's degree is earned faster than usual. (The coursework concerned must individually satisfy the requirements of **both** degrees.)

Example: the MSEE degree requires 30 total credit hours (for thesis option, 24 credit hours of coursework plus six credit hours of thesis work). ABM students may take up to six of the MSEE coursework credit hours as Technical Electives for their BSEE or BSCpE degrees, leaving only 24 credit hours of coursework (for non-thesis option) or 18 credit hours of coursework plus six credit hours of thesis work (for thesis option) needed to earn the MSEE degree.

Eligibility Requirements:

- Must have at least 3.0 **cumulative undergraduate GPA** (at USA), and
- Must have completed at least **90 credit hours** (i.e., senior status; within two semesters of BSEE or BSCpE graduation), and
- Must have completed at least **30 credit hours at USA**.

A student who later withdraws or is dismissed from the ABM program may not count graduate coursework towards both degrees. Graduate courses will only be counted towards the MSEE degree if the undergraduate student earns Grade A or B.

An ABM student **must be a full-time student** and must complete all degree requirements for the Master's degree within three semesters of the semester in which he or she was admitted to the Graduate School. An exception for a fourth semester may be granted where an additional semester is required for final revisions to and submission of a defended thesis. Thesis option students must form the thesis committee during the second semester of the program at the latest. Exceptions to the Electrical and Computer Engineering ABM program policy are at the discretion of the Department Chair and the Dean of the Graduate School.

Procedure:

If you satisfy these eligibility requirements, and wish to be considered for the ABM program:

1. Discuss ABM with the Department Chair and/or your advisor, for course planning;
2. Complete an undergraduate Advising Form at <https://www.southalabama.edu/colleges/engineering/currentstudents/resources/engineeringadvisingform.pdf> incorporating the ABM courses you have chosen;
3. Complete and print **both** the ABM Declaration form at <https://www.southalabama.edu/departments/eforms/graduateschool/abmdeclarationform.pdf> **and** the form requesting authorization to use graduate courses at https://www.southalabama.edu/departments/eforms/registrar/graduate_level_course_for_undergraduate_degree.pdf incorporating the ABM courses you have chosen;
4. Submit these printed forms to the Department Chair for formal approval and routing; and
5. Enroll in the **graduate section (500-level)** of your chosen ABM Technical Elective(s) (note that this will require course overrides).

These 500-level Technical Electives will count towards the MSEE degree after you apply for graduate school admission (after completing the BS degree) and successfully complete nine additional credit hours of graduate courses.

MSEE Graduation Plan

(30 Total Hours)

The sample Graduation Plan is designed as a guide for students preparing for their course selections. This information provides only a suggested schedule. Actual course selections should be made in consultation with an academic advisor to create a personalized plan as individual student plans may vary.

Course	Title	Hours

Assistant Professor	Kari Lippert
Assistant Professor	Bhushan Lohar
Assistant Professor	Sean Walker
Part-Time Instructor	Mary Bone
Part-Time Instructor	Tom Wade

Master of Science in Systems Engineering (MS)

The program for the Master of Science in Systems Engineering (MSSE) focuses on holistic views of systems. As the complexity of everything increases, it is important for engineers to recognize that everything can be viewed as a system. The MSSE takes a total system lifecycle view – from cradle to grave. The program provides an ideal mix of theory and a practical experience-based approach to systems engineering. It is suitable for both working engineers looking for a broader view of engineering as well as for full-time students wishing to find out more about systems. Courses include the system lifecycle, project engineering, systems thinking and software systems engineering. At USA,

we emphasize a model-based systems engineering approach (MBSE) in many of our courses. Graduates will have acquired the background needed to move into any industry that understands and values early concept development, the importance of solid systems requirements, systems integration, and verification and validation. Most graduate courses in Systems Engineering are offered in late afternoon or early evening, in a blended classroom/webcast format, to accommodate remote and practicing engineers.

Requirements for Admission to MSSE Program

The following requirements are additional to the requirements of the Graduate School. Final admission decisions are made based upon an evaluation of the applicant's complete file which consists of all official academic transcripts, undergraduate grade-point average, Graduate Record Exam (GRE) scores (when required), English language test score (for international applicants), work history, program enrollment, and funding availability if required by the applicant. Admission may be granted by the Systems Engineering Program Director in special cases where holistic evaluation shows that the applicant's credentials and work experience are appropriate. GRE scores are not required for regular admission, but students may be required to present GRE scores to be eligible for some assistantships or fellowships.

Regular Admission to MSSE Program

1. A minimum grade-point average of 3.0 or greater (on a scale of 4.0) on all undergraduate coursework leading to the award of a Bachelor's degree in a discipline related to engineering (e.g. civil, computer, chemical, electrical, industrial, mechanical engineering; other related STEM majors may be considered on a case-by-case basis).
2. Grade B or higher for all graduate courses to be considered as transfer credits from previous institutions attended. Only graduate credits that have not been applied to another degree can be considered for transfer.
3. Official transcripts from all colleges and universities attended by the applicant.
4. For international students whose native language is not English, a minimum score of 79 on the Internet-based TOEFL, or a minimum score of 213 on the computer-based TOEFL, or a minimum score of band 6.5 on the IELTS test, or a minimum overall score of 58 on the Pearson PTE Academic Test, or a minimum Duolingo score of 100.

Provisional Admission to MSSE Program

1. A grade-point average of 2.5 or greater (on a scale of 4.0) on all undergraduate coursework leading to the award of a Bachelor's degree in a discipline related to engineering (e.g. civil, computer, chemical, electrical, industrial, mechanical engineering; other related STEM majors may be considered on a case-by-case basis).
2. Officially certified minimum score of 146 in the Verbal portion and a minimum score of 151 in the Quantitative portion of the Graduate Record Examination (GRE). This requirement is waived for students who received an engineering BS degree from the University of South Alabama (but those students may be required, however, to present GRE scores to be eligible for some assistantships or fellowships.) Applicants holding a current P.E. license, or holding a Bachelor's degree in an engineering discipline (e.g., civil, computer, chemical, electrical, industrial, or mechanical engineering), or having a minimum of five years of engineering work experience, may request that this GRE requirement be waived. Strong GRE scores may improve chances of acceptance for candidates who do not have a strong GPA or English language scores.

3. All other requirements for Regular Admission to the MSSE program (see above), except that the grade-point average required is reduced as above.

Doctor of Philosophy in Systems Engineering (Ph.D.)

The Doctor of Philosophy (Ph.D.) in Systems Engineering offers students a holistic approach to the design and understanding of complex systems. NASA defines systems engineering as "a holistic, integrative discipline, wherein the contributions of structural engineers, electrical engineers, mechanism designers, power engineers, human factors engineers, and many more disciplines are evaluated and balanced, one against another, to produce a coherent whole that is not dominated by the perspective of a single discipline." At USA, we emphasize a model-based systems engineering approach (MBSE) in many of our courses. The main objectives of the Ph.D. program are to

1. provide our graduates with the ability to approach all systems (engineered, environmental, coastal, biological, social/organizational, etc.) with the ability to understand the entire system lifecycle in a manner that meets the needs of industry, and
2. prepare our graduates for leadership positions requiring applied research along with critical and creative thinking.

This program is appropriate for students who want to pursue research-based careers in industry, government, or academia. The program requires coursework across multiple engineering disciplines, and specific, validated systems research resulting in a publicly defended doctoral thesis.

Requirements for Admission to Systems Engineering Ph.D. Program

GRE scores are not required for regular admission. However, a strong GRE score may improve chances of acceptance for candidates who do not have a strong GPA or English language scores. Students may be required to present GRE scores to be eligible for some assistantships or fellowships.

Final admission decisions are made based upon an evaluation of the applicant's complete file which consists of all official academic transcripts, undergraduate grade-point average, GRE scores (when required), letters of recommendation, the applicant's statement of purpose, English language test score (for international applicants), work history, program enrollment, and funding availability if required by the applicant. Admission may be granted by the Systems Engineering Program Director in special cases where holistic evaluation shows that the applicant's credentials and work experience are appropriate. The Ph.D. Admission Committee reserves the right to review coursework at the Bachelor's degree level before making any admission decision.

Requirements for Regular Admission (already holding Master's degree) to Ph.D. Program

In addition to meeting Graduate School requirements, the requirements for **Regular Admission** into the Systems Engineering Ph.D. program when already holding a Master's degree are as follows:

1. A written Statement of Purpose outlining the applicant's professional goals and commitment to completing the degree requirements.
2. Three letters of recommendation, from individuals familiar with the student's academic and technical abilities, describing the applicant's ability to succeed in the Ph.D. degree in Systems Engineering.

3. A Master's degree in a discipline related to engineering (e.g. civil, computer, chemical, electrical, industrial, mechanical engineering; other related STEM majors may be considered on a case-by-case basis).
4. All other requirements for Regular Admission to the Systems Engineering MS program (see above), except that the grade point average requirement of 3.0 or greater (on a scale of 4.0) applies instead to all graduate (not undergraduate) coursework, and other STEM Bachelor's degrees may be considered depending on relevant factors such as time spent working and gaining experience in an Engineering field or environment. GRE scores are not required.

Requirements for Regular Admission (not already holding Master's Degree) to Ph.D. Program

As above for Regular Admission (already holding Master's degree), except that the requirement to hold a Master's degree does not apply, and the grade point average of 3.0 or greater (on a scale of 4.0) is required on all undergraduate (not graduate) coursework.

Requirements for Provisional Admission to Ph.D. Program

1. A written Statement of Purpose and the letters of recommendation as specified above for Regular Admission (already holding a Master's degree).
2. All other requirements for Provisional Admission to the Systems Engineering MS program (see above).

Degrees, Programs, or Concentrations

- Systems Engineering (MS) (p. 594)
- Systems Engineering (Ph.D.) (p. 595)
- Systems Engineering Certificate Program (p. 596)

Courses

Engineering (EG)

Systems Engineering (SE)

SE 500 Engr Probability & Statistics 3 cr

Probability and statistical concepts; discrete, continuous, and joint distributions; point and interval estimation; hypothesis testing; regression and correlation analysis; analysis of variance.

SE 501 Engineering Optimization 3 cr

Model construction, linear programming, network models, dynamic models, stochastic models, queuing theory, and decision theory.

Prerequisite: SE 500 (may be taken concurrently) Minimum Grade of B

SE 590 Special Topics in SE 3 cr

Topics of current interest in Systems Engineering. Fee

SE 592 Directed Study in SE 3 cr

Directed study, under the guidance of a faculty advisor, of a topic from the field of Systems Engineering not offered in a regularly scheduled course. Requires Instructor's permission.

SE 594 Projects in SE 3 cr

An investigation of an original problem in Systems Engineering, under the guidance of a faculty advisor. Approval of the project prospectus by the student's advisory committee and consent of the Director of Engineering Graduate Studies.

SE 599 Thesis 1-6 cr

An investigation of an original problem in Systems Engineering under the guidance of the student's major professor. Approval of the dissertation prospectus by the student's Advisory Committee, the Graduate School, and consent of the Director of Engineering Graduate Studies.

SE 601 Systems Eng Fundamentals 3 cr

Fundamentals of systems engineering, structure of complex systems, system development process, systems engineering management and documentation, needs analysis, requirements development, engineering design and development, integration and test, change management, process improvement.

SE 602 Risk and Failure Analysis 3 cr

Risk Analysis needs, risk analysis methods, performance requirement analysis, trade studies, failure analysis needs, failure analysis tracking, and failure analysis methods. Pre-requisites: Requires a background in calculus-based statistics and permission of instructor.

SE 603 Integration, Test & Evaluation 3 cr

Interface control documents, design reviews, requirements management, allocation of test methods to requirements, test plans, test procedures, test execution, and failure tracking and resolution.

Prerequisite: SE 601 Minimum Grade of C

SE 604 Software Systems Engineering 3 cr

Software development methodologies, software development tools, change management, software concept development, software requirements development and allocation, coding and unit test, program technical interfaces, software engineering management.

Prerequisite: SE 601 Minimum Grade of C

SE 605 Project Engineering 3 cr

Management of system design, development and risk, work breakdown, structure, systems engineering management plan, design reviews, budget and schedule analyses, negotiation and conflict resolution, contracts, customer interactions, team selection, failure resolution.

SE 606 Systems Architecture 3 cr

The systems architecture is that foundational structure of a system, capturing the core capability and structure of the system. This course will cover principles of systems architecting, system architecture drivers, relationship of systems architecture to system requirements, common tools and techniques to include design structure matrices, IDEF0, SysML, and simulation.

Prerequisite: SE 601 Minimum Grade of C

SE 607 Systems Simulation 3 cr

This course rigorously examines system modeling and simulation methodologies, emphasizing statistical analysis and discrete-event simulation via simulation software.

SE 608 Reliability Engineering 3 cr

This course rigorously examines reliability and maintainability methodologies, emphasizing mathematical constructs, design concepts, and data analysis employed to quantify reliability, availability, and maintainability measures for operational readiness, support system design, and system effectiveness.

SE 609 Engineering Research Methods 3 cr

This course is a fast tracked course examining quantitative and qualitative methods for conducting meaningful inquiry and research. Topics include research ethics, intent, design, methodologies, techniques, formatting, data management, analysis, publication, and presentation utilizing common statistical approaches.

SE 610 Systems Thinking 3 cr

The act of systems thinking is taking a step back from the details considered during engineering design, and looking at the whole picture. This class exposes the student to a conceptual framework to allow them to properly define complex systems and enterprises drawing from synthesizing techniques from systems science, soft systems methodologies, and systems engineering. The class demonstrates the ability to leverage the simultaneity of perspectives, the role of paradox, and the centrality of soft issues in resolving complexity.

SE 611 Socio-Technical Systems 3 cr

Socio-Technical systems are those systems which contain and/or are strongly influenced by human, social and institutional elements. Because of those influences, they quickly become dependent on community partnerships, infrastructure constraints, and government-aspects that are not traditionally part of the engineering equation. This course considers the systems engineering approach as it relates to the challenges of socio-technical systems.

SE 612 Production System Engineering 3 cr

This course rigorously examines principles, design, models and techniques for operational planning and analysis of production and distribution systems emphasizing quantitative methods.

SE 613 Decision Analysis 3 cr

This course will give the engineering student the analysis techniques used to assess single participant multiple criteria and multiple participant multiple criteria decisions. As decisions occur throughout the lifecycle of a system, the variety of engineering decision techniques introduced can be applied to a myriad of decisions.

SE 614 Sys Lifecycle Cost Analysis 3 cr

Systems engineering considers the entire lifecycle of a system. Therefore, it makes sense to consider the entire cost of the product or system form cradle to grave. This course presents methods, processes, and tools needed to conduct cost analysis, estimation, and management of complex systems.

Faculty Name

CLOUTIER, ROBERT J
(rcloutier@southalabama.edu)

Faculty Department

General Engineering

LIPPERT, KARI JOANN

(klippert@southalabama.edu)

General Engineering

SE 615 Engineering Management 3 cr

Engineering management is an integral part of any engineered system. Topics to be covered include team project vision, mission, goals, organization, tools, management and leadership, managing technical issues, coordination and control. This course is relevant to any engineering or technical discipline.

SE 616 Requirements Engineering 3 cr

Systems requirements are the foundation of all engineered systems. They form the basis for what the customer wants, what the engineer produces, and what the system accomplishes. There must be synergy between those three perspectives. This course addresses the process of identifying systems requirements before the system exists, writing effective and concise requirements, writing testable requirements, and the management of those requirements as the system is engineered.

SE 690 Special Topics in SE 3 cr

Topics of current interest in Systems Engineering.

SE 692 Directed Studies 3 cr

Directed study, under the guidance of a faculty advisor, of a topic from the field of Systems Engineering not offered in a regularly scheduled course. Prerequisite: Instructor's permission.

SE 699 Dissertation 1-21 cr

An investigation of an original problem in Systems Engineering under the guidance of the student's major professor. Prerequisite: Approval of the dissertation prospectus by the student's Advisory Committee, the Graduate School, and consent of the Director of Engineering Graduate Studies.

Systems Engineering (MS)

Degree Requirements

(30 Credit Hours)

An MSSE student is required to complete a total of 30 graduate credits. These credits include core courses and electives. Below are the three options an MSSE student may pursue.

Code	Title	Hours
Core Courses For All MSSE Options		
SE 500	Engr Probability & Statistics	3
SE 601	Systems Eng Fundamentals	3
SE 602	Risk and Failure Analysis	3
SE 603	Integration, Test & Evaluation	3

SE 606	Systems Architecture	3
Options		
Select one of the following Options:		15
Option 1: Thesis Option (p. 594)		
Option 2: Project Option (p.)		
Option 3: Course Only Option (p. 595)		
Total Hours		30

Option 1: Thesis Option

This option includes a traditional 6-credit Master's Thesis.

Code	Title	Hours
SE Core Courses Required		15
SE 609	Engineering Research Methods	3

Institutional General Education or Core Curriculum hours required	N/A
Support Courses credit hours required	N/A
Required or Free Electives credit hours required	6
Thesis or Dissertation credit hours required	6
Total Hours	30

Students following the thesis option will give an oral presentation of their work (i.e. thesis defense).

Option 2: Project Option

This option is suitable for students working on a project related to their employer's discipline and interests.

Code	Title	Hours
SE Core Courses Required		15
SE 594	Projects in SE	3
Institutional General Education or Core Curriculum hours required	N/A	
Support Courses credit hours required	N/A	
Required or Free Electives credit hours required		12
Total Hours		30

Students following the project option will give a written and oral presentation of their project work.

Option 3: Course Only Option

Under this option, the Master's degree is awarded after successful study of ten courses.

Code	Title	Hours
SE Core Courses Required		15
Minor credit hours required	N/A	
Institutional General Education or Core Curriculum hours required	N/A	
Support Courses credit hours required	N/A	
Required or Free Electives credit hours required		15
Total Hours		30

Systems Engineering (Ph.D.) Degree Requirements

(67 Credit Hours)

Case 1: With Engineering Bachelor's Degree Only

Code	Title	Hours
SE 601	Systems Eng Fundamentals	3
SE 606	Systems Architecture	3
SE 603	Integration, Test & Evaluation	3
SE 602	Risk and Failure Analysis	3
SE 609	Engineering Research Methods	3
Systems Engineering Elective		3

Other Systems Engineering or Engineering Electives	at least	30
Research Hours	at least	19
Total credit hours required for completion:	at least	67

Case 2: With STEM Bachelor's Degree (Other Than Engineering)

Code	Title	Hours
Pre-requisite undergraduate courses to be determined at the time of admission. It is highly recommended that the applicant has taken at least three semesters of calculus and a college-level physics course.		
SE 601	Systems Eng Fundamentals	3
SE 606	Systems Architecture	3
SE 603	Integration, Test & Evaluation	3
SE 602	Risk and Failure Analysis	3
SE 609	Engineering Research Methods	3
Systems Engineering Elective		3
Other Systems Engineering or Engineering electives	at least	30
Research Hours	at least	19

Case 3: With Engineering Master's Degree

Code	Title	Hours
Engineering Master's degree transfer credits to be determined at the time of admission		
SE 601	Systems Eng Fundamentals	3
SE 606	Systems Architecture	3
SE 603	Integration, Test & Evaluation	3
SE 602	Risk and Failure Analysis	3
SE 609	Engineering Research Methods	3
Systems Engineering Electives		3-9
Research Hours	at least	19
Total credit hours required for completion:	at least	67

Case 4: With STEM Master's Degree (Other Than Engineering)

Code	Title	Hours
Engineering Master's degree transfer credits to be determined at the time of admission		
SE 601	Systems Eng Fundamentals	3
SE 606	Systems Architecture	3

SE 603	Integration, Test & Evaluation	3
SE 602	Risk and Failure Analysis	3
SE 609	Engineering Research Methods	3
Systems Engineering Electives (total transfer credits to be determined at the time of admission)		TBD
Research Hours		at least 19
Total credit hours required for completion:		at least 67

Required Examinations

The required examinations in the Systems Engineering Ph.D. program have two parts; each has a written component and an oral component. The examinations are:

- Qualifying Examination: Written and Oral
- Proposal Defense: Written and Oral
- Dissertation Defense: Written and Public Oral Defense

Systems Engineering Certificate Program

Certificate Details

The University of South Alabama Systems Engineering Certificate is a 12-hour academic program. The program is intended to give students a solid grounding in systems engineering. This program is meant for those who do not want to pursue a full Master's degree, but need to know more about systems engineering than is typically covered in a Bachelor's degree.

Program Requirements: For acceptance in the program, applicants should have an engineering Bachelor's degree or equivalent math/science degree. Award of the Systems Engineering Certificate requires satisfactory completion of 12 credit hours with a minimum GPA of 3.0.

Code	Title	Hours
SE 601	Systems Eng Fundamentals	3
SE 603	Integration, Test & Evaluation	3
SE 605	Project Engineering	3
SE 606	Systems Architecture	3
Total Hours		12

Title	Name
Chair	Haris Doumanidis
Professors	Doumanidis, Hsiao, Nelson, Phan
Associate Professors	Cauley, Kar, Montalvo, Tambe
Assistant Professors	Richardson, Dizbay-Onat
Professors Emeritus	Donovan, Engin
Part-Time Instructors	Boyd, Simmons, Thigpen, Webb

Mechanical Engineering is one of the broadest engineering disciplines. Mechanical engineers invent, analyze and design systems that produce power or convert energy. This encompasses such diverse applications as designing next-generation aircraft and automobiles, inventing novel methods of generating energy from renewable sources, and developing sophisticated new medical devices and systems. Mechanical engineers are in the forefront of exciting new technological fields, including nano-engineering, biomedical engineering, and energy research.

The basic fields of study for mechanical engineers include:

- Materials science, the study of the relationship between structure, properties, and processing of materials.
- Thermodynamics and heat transfer dealing with basic concepts and applications of work, energy, and power. Applications include power generation from fossil fuels, from renewable sources (solar, wind energy) and fuel cells.
- Engineering mechanics, the study of static and dynamic effects of forces applied to rigid and flexible solid bodies.
- Fluid mechanics, the study of the forces and motions of liquids and gases. Included in this area of study are hydraulics, gas dynamics, aerodynamics, and design and application of pumps, compressors, and turbines.
- Control systems including studies of transient and steady-state response of systems to external inputs.
- Design synthesis which integrates all fields of engineering in the production of safe, practical, efficient, and economically feasible solutions to real problems.

The curriculum leading to the degree of Bachelor of Science in Mechanical Engineering (BSME) is designed so that graduates can work in any Mechanical Engineering field, or continue their education at the graduate level.

All BSME students complete a senior-year "capstone" design project, in which a team of students defines and solves a unique, real-world engineering problem.

Aerospace Engineering Track

Students who plan to enter careers or graduate studies in aerospace, aeronautics, astronautics, or a related field may pursue the specialized track in Aerospace Engineering within the BSME program. Students in this track must complete AE 361 Introduction to Aerodynamics, in addition to two other approved aerospace engineering electives.

Students interested in the Aerospace Engineering track within the BSME program should consult their academic advisor.

Biomedical Engineering Track

Students who plan to enter careers or graduate studies in biomedical engineering may pursue the specialized track in Biomedical Engineering within the BSME program. This track may also be appropriate for

students planning to pursue a career in the health sciences (medical school, dental school, or other health profession programs).

Students in the Biomedical Engineering track must complete General Biology I & II with labs (BLY 121, BLY 121L, BLY 122, BLY 122L), General Chemistry II with lab (CH 132, CH 132L) and Introduction to Biomedical Engineering BME 467.

Students interested in the Biomedical Engineering track within the BSME program should consult their academic advisor.

Students planning to apply for admission to a health profession program should also consult a Pre-Health Profession Advisor to identify any additional courses that may be required.

BSME Program Educational Objectives

Alumni of the Bachelor of Science in Mechanical Engineering (BSME) program should demonstrate the following traits and accomplishments within five years following graduation:

1. Graduates will achieve professional advancements or promotions with progressively higher levels of responsibility, competency, professional and ethical judgment and analysis. They will apply creative and innovative techniques to solve significant problems. They will apply team assimilation skills to successfully manage cross-disciplinary, collaborative projects that require global and multicultural perspectives.
2. Graduates will demonstrate effective written and oral communication skills in presenting, documenting and conveying their work via traditional and new media formats. They will use these skills in creating and supporting new or improved designs, inventions, and intellectual property, thereby contributing to the social, economic, and environmental well-being of local and global communities.
3. Graduates will demonstrate commitment to lifelong learning and continuous professional development through activities such as mentoring, participating in professional societies, completing advanced degrees and achieving professional registration or other certifications.

Mechanical Engineering graduates will accomplish these objectives in the course of professional employment, entrepreneurship, military or public service and postgraduate education.

BSME Student Outcomes

By the time of graduation from the BSME program, a student will have demonstrated attainment of the following outcomes:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, and environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts

5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

The Bachelor of Science degree program in Mechanical Engineering at the University of South Alabama is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>, under the General Criteria and the Program Criteria for Mechanical and similarly named Engineering programs.

Mechanical Engineering Accelerated Bachelor's to Master's Program

The USA Accelerated Bachelor's to Master's (ABM) in Mechanical Engineering provides exceptional undergraduate students the opportunity to earn a bachelor's and a master's degree at an accelerated pace. ABM students may count up to 12 credit hours of graduate coursework towards either the undergraduate or graduate degrees in Mechanical Engineering. ABM students typically complete the master's degree within one academic year after completing the undergraduate degree. See a departmental advisor for specific details.

Exam-Compliant Calculator Policy

Every Mechanical Engineering (ME) student must have an exam-compliant calculator. Only those calculators which are acceptable for use in the Fundamentals of Engineering (FE) exam are considered to be exam-compliant and may be used in Mechanical Engineering classes which allow calculator usage. Use of a calculator which is **not** exam-compliant in an ME test, quiz, or exam will be considered academic misconduct. For a list of exam-compliant calculator models, see <https://ncees.org/exams/calculator/>.

Degrees, Programs, or Concentrations

- Mechanical Engineering (BS) (p. 603)
- Mechanical Engineering (BS) - Aerospace Track (p. 605)
- Mechanical Engineering (BS) - Biomedical Engineering Track (p. 608)
- Mechanical Engineering (MS) (p. 610)
- Mechanical Engineering - Accelerated Bachelor's to Master's Program (p. 611)

Courses

Aerospace Engineering (AE)

AE 361 Fundamentals of Aerodynamics 3 cr

Conservation laws, potential flow, airfoil and wing analysis. Boundary layer theory and pressure gradients on plates and airfoils. Introduction to turbulent and vortex-dominated flows.

Prerequisite: (EG 360 Minimum Grade of C and MA 227 Minimum Grade of C and PH 202 Minimum Grade of C)

AE 464 Principles of Spacecraft Design 3 cr

Introduction to space launch vehicle and spacecraft design, including an understanding of the various subsystems and how the overall vehicle's optimization leads to good conceptual designs. Introduction to parameters in aerospace analysis and how they effect the design.

Prerequisite: (ME 328 Minimum Grade of C and EG 360 Minimum Grade of C)

AE 468 Principles of Aircraft Design 3 cr

Introduction to aircraft design, including an understanding of the various components leading to a good conceptual design. Introduction to parameters in aerospace analysis and how they may impact a design. Application of design concepts to an RFP (request for proposal) for design competition.

Prerequisite: (ME 328 (may be taken concurrently) Minimum Grade of C and EG 360 Minimum Grade of C)

Cross-Listed: ME 468

AE 470 Aircraft Structural Analysis 3 cr

Introduction to elasticity. Torsion, bending and shearing of thin-walled skin-stringer structures. Failure mechanisms. Buckling of beams and plates. Introduction to finite element analysis and composite structural analysis.

Prerequisite: EG 284 Minimum Grade of C and EG 315 Minimum Grade of C and ME 328 (may be taken concurrently) Minimum Grade of C

Cross-Listed: ME 470

Biomedical Engineering (BME)**BME 467 Intro to Biomedical Eng 3 cr**

Survey of topics and current issues in the field of biomedical engineering. Topics include biomechanics, biomedical instrumentation, biomaterials engineering, biomedical imaging, cellular mechanics, tissue engineering, biomedical design and ethics. A portion of the course is devoted to basic biology concepts and principles. Students will review literature and discuss technical and technological developments relevant to biomedical engineering.

Prerequisite: ME 328 (may be taken concurrently) Minimum Grade of C

Cross-Listed: ME 467

BME 567 Principles of Biomedical Eng 3 cr

Survey of topics and current issues in the field of biomedical engineering. Topics may include biomechanics, biomedical instrumentation, biomaterials engineering, biomedical imaging, cellular mechanics, tissue engineering, biomedical design and ethics. A portion of the course is devoted to basic biology concepts and principles. Students will review literature and discuss technical and technological developments relevant to biomedical engineering.

Prerequisite: MA 507 (may be taken concurrently) Minimum Grade of C

Cross-Listed: ME 567

Mechanical Engineering (ME)**ME 135 Engr Graphics and Comm 3 cr**

Graphical representation of objects, orthographic, oblique, and isometric views. Freehand lettering and sketching, computer aided graphics, presentation of graphics based on numerical data using spreadsheet, word processor and presentation software.

Prerequisite: MA 125 (may be taken concurrently) Minimum Grade of C

ME 228 Computational Engineering 3 cr

Introduction to programming concepts in mechanical engineering including topics in linear algebra, loop structures for summations used in applications, and regression analyses.

Prerequisite: (MA 237 Minimum Grade of C)

ME 312 Mech Engr Thermodynamics 3 cr

Thermodynamics power and refrigeration cycles, gas mixtures, psychometrics, and combustion. One-half hour of design.

Prerequisite: EG 270 Minimum Grade of C

ME 314 Machine Component Design 3 cr

Analysis and design of machine elements to accomplish given tasks within limits of stress and size. One hour of design.

Prerequisite: EG 284 Minimum Grade of C and EG 315 Minimum Grade of C

ME 316 Instrumentatn & Exp Method 3 cr

Measuring system analysis and design, signal conditioning, analysis of data, statistical error analysis, communication of results.

Prerequisite: (EG 220 Minimum Grade of C and MA 238 Minimum Grade of C and PH 202 Minimum Grade of C) and (ME 228 Minimum Grade of C or ME 328 Minimum Grade of C)

ME 317 Heat Transfer 3 cr

Steady and transient, multi-dimensional conduction, forced and natural convection, radiation, and heat exchangers. One-half hour of design.

Prerequisite: (EG 360 Minimum Grade of C or ME 360 Minimum Grade of C) and (ME 228 Minimum Grade of C or ME 328 Minimum Grade of C) and EG 270 Minimum Grade of C

ME 319 Instrumentatn & Exp Method Lab 1 cr

Laboratory component of ME 316 Instrumentation. The same grade will be given in both courses.

Prerequisite: EG 220 Minimum Grade of D and (MA 238 Minimum Grade of D or MA 338 Minimum Grade of D) and (PH 202 Minimum Grade of D or PH 217 Minimum Grade of D)

Corequisite: ME 316

ME 326 Materials Science 3 cr

Mechanical, chemical, and physical properties of materials. Relationship between structure, processing, and properties engineering materials. One-half hour of design.

Prerequisite: (PH 202 Minimum Grade of C or PH 217 Minimum Grade of C) and (CH 115 Minimum Grade of C or CH 131 Minimum Grade of C) and EG 315 Minimum Grade of C

ME 328 Numerical Methods 3-4 cr

Numerical solutions of differential equations with applications to ME simulation and design. Introduction to Finite Element Analysis. One-half hour of design.

Prerequisite: (ME 228 Minimum Grade of C and MA 238 Minimum Grade of C)

ME 336 Material Science Lab-W 1 cr

Experimental study on the effect of thermal and mechanical processing on properties.

Prerequisite: ME 326 Minimum Grade of D and PH 202 Minimum Grade of C and CH 131 Minimum Grade of C and EG 315 Minimum Grade of C

ME 360 Mechanics of Fluids 3 cr

This course is a study of the properties of fluids including fluid statics and dynamics with applications to Mechanical Engineering and Aerospace Engineering. Topics include application of conservation of mass, momentum and energy; dimensional analysis; flow in pipes and duct; boundary layer flows; and compressible flow. Experiments are used to illustrate some principles.

Prerequisite: (EG 284 Minimum Grade of C and EG 270 Minimum Grade of C)

Cross-Listed: EG 360

ME 365 Design of Fluid Power Systems 3 cr

Fluid power components are studied in detail. Design of complete hydraulic systems is stressed. One hour of design.

Prerequisite: EG 284 Minimum Grade of D and EG 315 Minimum Grade of D and (EG 360 Minimum Grade of D or CE 365 Minimum Grade of D or ME 324 Minimum Grade of D) and ME 328 Minimum Grade of D

ME 410 Principles of Eng Design-W 3 cr

In this course, students learn to apply engineering theory and methods to the design process. Topics include problem definition, concept development and evaluation, project management, materials selection, risk analysis, quality improvement and ethics in design (0-3-0).

Prerequisite: ME 314 Minimum Grade of C and EG 231 Minimum Grade of C and ME 336 (may be taken concurrently) Minimum Grade of C and ME 317 (may be taken concurrently) Minimum Grade of C and ME 316 Minimum Grade of C

ME 411 Thermal System Design 3 cr

Thermal system design using principles of thermodynamics, fluid mechanics, heat transfer, and numerical simulation. Communication of results. Three hours of design.

Prerequisite: ME 312 Minimum Grade of D and ME 317 Minimum Grade of D and ME 328 Minimum Grade of D and (EG 360 Minimum Grade of D or CE 365 Minimum Grade of D or ME 324 Minimum Grade of D)

ME 412 Thermal Science Laboratory 1 cr

Experimental study of thermal science principles and systems. Communication of results.

Prerequisite: ME 312 Minimum Grade of D and ME 316 Minimum Grade of D and ME 317 Minimum Grade of D and (EG 360 Minimum Grade of D or CE 365 Minimum Grade of D or ME 324 Minimum Grade of D)

ME 414 Capstone Design 1 cr

This course is considered a "Senior Capstone Course."

Prerequisite: ME 410 Minimum Grade of D

Corequisite: ME 416

ME 416 Capstone Design Project 2 cr

This is a team-based capstone project course. Each team is assigned a unique design problem in mechanical engineering or a closely-related field. Students must be enrolled concurrently in ME 414 - Capstone Design.

Prerequisite: ME 410 Minimum Grade of D

Corequisite: ME 414

ME 417 Dynamics of Machines 3 cr

A study of the effects of external forces and moments on the motion of machines. Topics include the study of the position, velocity and acceleration of machine components during operation and the determination of forces on the connections and members. One hour of design.

Prerequisite: EG 284 Minimum Grade of D and EG 315 Minimum Grade of D and ME 328 Minimum Grade of D

ME 419 Computer Aided Design & Manu 3 cr

Introduction to computer aided design (CAD) and computer aided manufacturing (CAM) principles and their practical applications as fundamental elements of contemporary product design and manufacturing. This course is dual listed with an equivalent 500-level mechanical engineering course. One hour of design.

Prerequisite: ME 135 Minimum Grade of D and ME 314 Minimum Grade of D

ME 421 Mechanical System Design 3 cr

A study of design techniques as applied to mechanical components and systems. Computer simulation and numerical techniques.

Communication of results. Three hours of design.

Prerequisite: ME 314 Minimum Grade of D and ME 328 Minimum Grade of D

ME 422 Gas Turbines 3 cr

Introduction to gas turbines covering thermodynamics, fluid mechanics, combustion, cycle analysis, compressors, turbines and component design. One hour of credit.

Prerequisite: (EG 360 Minimum Grade of D or CE 365 Minimum Grade of D or ME 324 Minimum Grade of D) and ME 312 Minimum Grade of D

ME 426 Dynamic Systems and Control 3 cr

Modeling dynamic systems. Introduction to the principles of feedback control systems. Analysis of linear systems.

Prerequisite: (MA 238 Minimum Grade of D or MA 338 Minimum Grade of D) and ME 316 Minimum Grade of D and ME 328 Minimum Grade of D

ME 429 Controls & Instr. Lab 1 cr

Design and implementation of analog and digital feedback control of systems. Design and implementation of measurement systems, including signal conditioning, analog-to-digital and digital-to-analog conversion, statistical estimation of error, data analysis. Communication of laboratory results is emphasized.

Prerequisite: ME 426 (may be taken concurrently) Minimum Grade of D

ME 430 Mechanism Synthesis 3 cr

Kinematic synthesis of planar linkages for function, path, and motion generation. Topics include: degrees of freedom; graphical, linear analytical, and nonlinear analytical methods; and curvature theory. This course is dual-listed with an equivalent 500-level mechanical engineering course. One hour of design.

Prerequisite: EG 284 Minimum Grade of D and ME 328 Minimum Grade of D

ME 431 Gas Dynamics 3 cr

Introduction to compressible fluid flow. Conservation laws, isentropic flow, adiabatic flow, flow with heat transfer, normal shock. One hour of design.

Prerequisite: (EG 360 Minimum Grade of D or CE 365 Minimum Grade of D or ME 324 Minimum Grade of D) and ME 312 Minimum Grade of D

ME 432 Advanced Thermodynamics 3 cr

Continuation of Mechanical Engineering Thermodynamics to develop a broader and deeper understanding of thermal energy transformations. One hour of design.

Prerequisite: ME 312 Minimum Grade of D

ME 438 Finite Element Analysis 3 cr

Introduction to the finite element method. Engineering application to stress-strain analysis is emphasized. Other field problems are also considered. This course is dual-listed with an equivalent 500-level mechanical engineering course.

Prerequisite: ME 328 Minimum Grade of D

ME 439 Boundary Elements I 3 cr

Fundamental concepts of the boundary element method of numerically solving partial differential equations. Application to potential flow problems in heat transfer. This course is dual listed with an equivalent 500-level mechanical engineering course.

Prerequisite: ME 328 Minimum Grade of D

ME 441 Microprocessors for Mech Engr 3 cr

Basic concepts of programming and applying microprocessors to the control of mechanical systems. Assembly language programming. Memory decoding and use. Input and output circuits. Interfacing with the PIA.

Prerequisite: EG 220 Minimum Grade of D and ME 316 Minimum Grade of D

ME 450 Heat Vent and Air Conditioning 3 cr

Addresses the heating and cooling of buildings. Covers related engineering sciences, cooling and heating loads, systems, and equipment. One hour of design.

Prerequisite: (EG 360 Minimum Grade of D or CE 365 Minimum Grade of D or ME 324 Minimum Grade of D) and ME 312 Minimum Grade of D and ME 317 Minimum Grade of D

ME 451 Refrigeration Systems 3 cr

Study of refrigeration systems including solutions of typical engineering design problems. Concepts from fluid mechanics, thermodynamics, and heat transfer are used. One hour of design.

Prerequisite: (EG 360 Minimum Grade of D or CE 365 Minimum Grade of D or ME 324 Minimum Grade of D) and ME 312 Minimum Grade of D and ME 317 Minimum Grade of D

ME 452 Combustion 3 cr

Introduction to the theory of combustion processes, chemical equilibrium, adiabatic flame temperatures, reaction kinetics. This course is dual listed with an equivalent 500-level mechanical engineering courses.

Prerequisite: ME 312 Minimum Grade of D

ME 453 IC Engines 3 cr

Principles for analysis and design of internal combustion (I.C.) engines. Topics: include fuel-air cycles, fuel, air and exhaust flows, heat and mass transfer, engine performance.

Prerequisite: (EG 360 Minimum Grade of D or CE 365 Minimum Grade of D or ME 324 Minimum Grade of D) and ME 312 Minimum Grade of D and ME 317 Minimum Grade of D

ME 460 Intro to Marine Engineering 3 cr

Categorization of Ships, Ship Geometry and Hydrostatics, Ship Stability, Ship Hazards, Resistance and Power, Propellers and Propulsion Systems, Ship Dynamics and Control.

Prerequisite: EG 360 Minimum Grade of D and EG 315 Minimum Grade of D

ME 461 Turbomachinery 3 cr

Energy transfer between fluid and rotor; fluid flow in turbomachines, centrifugal and axial flow pumps and compressors; radial and axial flow turbines. One hour of design.

Prerequisite: (EG 360 Minimum Grade of D or CE 365 Minimum Grade of D or ME 324 Minimum Grade of D) and ME 312 Minimum Grade of D

ME 463 Intro. Biomedical Engineering 3 cr

Survey of topics and current issues in the field of biomedical engineering. Topics include biomechanics, biomedical instrumentation, biomaterials engineering, biomedical imaging, cellular mechanics, tissue engineering, biomedical design and ethics. A portion of the course is devoted to basic biology concepts and principles. Students will review literature and discuss technical and technological developments relevant to biomedical engineering.

ME 466 Aerospace Propulsion 3 cr

Airbreathing engines course. Apply fluids, thermodynamics, and heat transfer to analysis of air breathing engines. Topics to include: ideal cycle analysis, component performance, non-ideal cycle analysis, and blade aerodynamics.

Prerequisite: ME 312 Minimum Grade of D and ME 317 Minimum Grade of D and (EG 360 Minimum Grade of D or CE 365 Minimum Grade of D or ME 324 Minimum Grade of D)

ME 469 Aircraft Stability and Control 3 cr

Introduction to flight dynamics of aerospace vehicles. Basic overview of stability analysis and linear feedback control.

Prerequisite: ME 328 Minimum Grade of C and EG 360 Minimum Grade of C

ME 472 Vibration Analysis-Synthesis 3 cr

Steady-state and transient vibration analysis of discrete and continuous systems. Vibration problems as related to design are also included.

Prerequisite: EG 284 Minimum Grade of C and EG 315 Minimum Grade of C and ME 328 Minimum Grade of D

ME 474 Noise and Vibration Control 3 cr

Principles of acoustics; human response to noise; control of noise and vibration by means of vibration isolation, sound barriers, and absorption. One hour of design.

Prerequisite: ME 472 Minimum Grade of D

ME 490 Special Topics 1-3 cr

Topics of current mechanical engineering interest. Prerequisite: Consent of instructor

ME 494 Directed Studies 1-3 cr

Selected mechanical engineering topics of special or current interest not available to regularly scheduled courses. Prerequisite: Consent of instructor.

ME 499 Honors Senior Project - H 1-6 cr

Under the advice and guidance of a faculty mentor, honors students will identify and carry out a research project, relevant to the field of Mechanical Engineering study, that will lead to a formal presentation at the Annual Honors Student Colloquium. The senior project will be judged and graded by three faculty, chaired by the honors mentor. This course is required for Honors recognition. A minimum of 4 credit hours is required, but students may enroll for a maximum of 6 credit hours over two semesters. Prerequisites: Completion of an approved project prospectus.

ME 518 Adv Mechanical Engr Analysis 3 cr

Application of numerical methods including finite differences; finite element and boundary element techniques to the solution of problems in Mechanical Engineering. Prerequisite: Consent of instructor.

ME 519 Computer Aided Design/Manufac 3 cr

Introduction to computer aided design (CAD) and computer aided manufacturing (CAM) principles and their practical applications as fundamental elements of contemporary product design and manufacturing. This course is dual listed with an equivalent 400-level mechanical engineering course.

ME 520 Advanced Fluid Mechanics 3 cr

Analysis of steady and unsteady motion of a viscous fluid. Topics include: conservation equations, Newtonian fluids and the Navier-Stokes equations, vorticity, analytical solutions, boundary layers, instability of viscous flows. Prerequisite: Consent of instructor.

ME 522 Gas Turbines 3 cr

Introduction to gas turbines covering thermodynamics, fluid mechanics, combustion, cycle analysis, compressors, turbines, and component matching.

Prerequisite: ME 520 Minimum Grade of C

ME 525 Boundary Layer Theory 3 cr

Development of Navier-Stokes and boundary layer equations, perturbation theory application and boundary layer transition.

Prerequisite: Consent of instructor.

ME 530 Mechanism Synthesis 3 cr

Kinematic synthesis of planar linkages for function, path, and motion generation. Topics include: degrees of freedom; graphical, linear analytical, and nonlinear analytical methods; and curvature theory. This course is dual-listed with an equivalent 400-level mechanical engineering course. **Prerequisite:** Consent of instructor.

ME 538 Finite Element Analysis 3 cr

Introduction to the finite element method. Engineering application to stress-strain analysis is emphasized. Other field problems are also considered. This course is dual-listed with an equivalent 400-level mechanical engineering course. **Prerequisite:** Consent of instructor.

Prerequisite: MA 507 (may be taken concurrently) Minimum Grade of C or MA 508 (may be taken concurrently) Minimum Grade of C

ME 539 Boundary Elements I 3 cr

Fundamental concepts of the boundary element method of numerically solving partial differential equations. Application to potential flow problems in heat transfer. This course is dual listed with an equivalent 400 level mechanical engineering course. Requires special permission of instructor.

ME 540 Advanced Heat Transfer 3 cr

Steady and transient conduction, external and internal forced convection, natural convection, radiation with participating media, boiling heat transfer, Stefan condition. **Prerequisite:** Consent of instructor.

ME 541 Conduction Heat Transfer 3 cr

Closed form analytical and approximate numerical solutions of one, two- and three-dimensional steady state and transient problems in conduction heat transfer. **Prerequisite:** Consent of instructor.

Prerequisite: MA 507 Minimum Grade of C

ME 542 Convection Heat Transfer 3 cr

Fundamental laws of motion and energy balance for a viscous fluid, classical solution of the Navier-Stokes and energy equations, laminar/turbulent hydrodynamic and thermal boundary layers, convection heat transfer in laminar/turbulent internal flows. **Prerequisite:** Consent of instructor.

ME 543 Radiation Heat Transfer 3 cr

Blackbody radiation, diffuse-gray surfaces, radiative exchange in a multi-surface enclosure, gas radiation in enclosures with participating media, introduction to available numerical methods. **Prerequisite:** Consent of instructor.

ME 544 Heat Trans - Change of Phase 3 cr

Boiling heat transfer and critical heat flux, condensation heat transfer, Stefan problem, freezing and melting, ablation, introduction to available numerical techniques. **Prerequisite:** Consent of instructor.

Prerequisite: ME 540 Minimum Grade of C or ME 542 Minimum Grade of C

ME 545 Exp Fluid Mech and Heat Trans 3 cr

Uncertainty analysis, system response, sampling theory and FFT, differential pressure measurement and multi-hole probes, thermo-couple and RTD, thermal anemometry, LDV and other non-intrusive optical methods, flow visualization. **Prerequisites:** Consent of instructor

ME 550 Combustion 3 cr

Introduction to the theory of combustion processes, chemical equilibrium, adiabatic flame temperature, reaction kinetics, flame structure. This course is dual-listed with an equivalent 400-level mechanical engineering course. **Prerequisite:** Consent of instructor.

ME 551 Classical Thermodynamics 3 cr

Postulational treatment of the physical laws of equilibrium, equations of state, processes, equilibrium, stability, reactive systems, phase transition. **Prerequisite:** Consent of instructor.

ME 552 Statistical Thermodynamics 3 cr

Principles of kinetic theory, quantum mechanics, and statistical mechanics with particular reference to thermodynamic systems. Conclusions of classical thermodynamics are established from the microscopic viewpoint. **Prerequisite:** Consent of instructor.

ME 553 IC Engines 3 cr

Principles for analysis and design of internal combustion (I.C.) engines. Topics include: fuel-air cycles, fuel, air and exhaust flows, heat and mass transfer, engine performance.

ME 560 Compressible Fluid Flow 3 cr

Foundations of fluid dynamics and thermodynamics of one dimensional flow and heat transfer, isentropic flow, shock waves and method of characteristics. **Prerequisite:** Consent of Instructor.

ME 561 Turbomachinery 3 cr

Energy transfer between fluid and rotor; fluid flow in turbomachines, centrifugal and axial-flow pumps and compressors; radial and axial flow turbines. **Prerequisite:** Consent of instructor.

ME 562 Comp Fluid Dyn - Heat Trans I 3 cr

Derivation of conservation equations, numerical solution of inviscid and viscous incompressible flow problems, emphasis on finite volume method, introduction to finite element and spectral method. **Prerequisite:** Consent of instructor.

ME 563 Comp Fluid Dyn - Heat Trans II 3 cr

Governing equations in general coordinates, differential geometry for curvilinear coordinates, grid generations, numerical uncertainties. **Prerequisite:** Consent of instructor.

Prerequisite: ME 562 Minimum Grade of C

ME 564 Turbulent Flow 3 cr

Reynolds equations, statistics of turbulence, analysis of free and wall turbulence, turbulence models. **Prerequisite:** Consent of instructor.

Prerequisite: ME 520 Minimum Grade of C

ME 565 Lubrication 3 cr

Friction of solids and fluids. Lubricants. Theory of sliding bearings. Multi-dimensional bearings with constant forces and velocities. Solid, hydrodynamic and gas lubrication. Design of bearings. **Prerequisite:** Consent of instructor.

ME 566 Aerospace Propulsion 3 cr

Airbreathing engines course. Apply fluids, thermodynamics, and heat transfer to analysis of air breathing engines. Topics to include: ideal cycle analysis, component performance, non-ideal cycle analysis, and blade aerodynamics.

ME 569 Aircraft Stability and Control 3 cr

Introduction to flight dynamics of aerospace vehicles. Basic overview of stability analysis and linear feedback control.

Corequisite: MA 507

ME 571 Advanced Engineering Dynamics 3 cr

Three-dimensional kinematics and kinetics of particles and rigid bodies, energy, momentum, and stability; application of Lagrange's equations to machinery and gyrokinetics. Prerequisite: Consent of instructor.

ME 572 Advanced Vibrations 3 cr

Free and forced vibrations of mechanical systems having lumped mass and elasticity; introduction to vibrations of continuous systems; engineering applications. Prerequisite: Consent of instructor.

Prerequisite: MA 507 (may be taken concurrently) Minimum Grade of C or MA 508 (may be taken concurrently) Minimum Grade of C

ME 573 Vibrations of Continuous Sys 3 cr

Equations of motion for strings, membranes, bars, and plates with various boundary conditions, steady state and transient solutions, exact and approximate methods; wave propagation in elastic media. Prerequisite: Consent of instructor.

Prerequisite: MA 507 Minimum Grade of C

ME 574 Nonlinear Vibrations 3 cr

Vibrations of damped and undamped systems with nonlinear restoring forces; free and forced oscillations in self-sustained systems; Hills equation and its application to the study of the stability of nonlinear oscillations. Prerequisites: Consent of instructor.

Prerequisite: ME 572 Minimum Grade of C and MA 508 Minimum Grade of C

ME 575 Continuum Mechanics 3 cr

Cartesian tensor analysis. Analysis of stress and strain, fundamental laws of continuum mechanics. Constitutive equations, application to solid and fluid mechanics. Prerequisite: Consent of instructor.

ME 582 Advanced Materials Science 3 cr

Classical and quantum mechanical model of atoms, bonding, magnetism, superconductivity, high strength low density materials, corrosion, biomedical materials. Prerequisite: Consent of the instructor.

ME 583 Applied Elasticity 3 cr

Classical problems in elasticity, torsion and bending theory, plane problems in rectangular and polar coordinates; axisymmetric problems, thermoelasticity. Prerequisite: Consent of instructor.

Prerequisite: MA 507 (may be taken concurrently) Minimum Grade of C or MA 508 (may be taken concurrently) Minimum Grade of C

ME 584 Introductory Metal Theory 3 cr

Theories of metal to explain electrical conductivity and scattering process, electronic and lattice heat capacity, magnetic behavior, cohesion and lattice constant. Prerequisite: Consent of instructor.

Prerequisite: MA 507 Minimum Grade of C

ME 585 Theory of Plates 3 cr

Basic equations of rectangular and circular plates with various boundary conditions; classical solutions and approximate methods in the theory of thin plates. Prerequisite: Consent of instructor.

Prerequisite: MA 507 Minimum Grade of C

ME 586 Theory of Shells 3 cr

Introduction to differential geometry; general equations for arbitrary shells; shallow shell theory with applications; solutions to membrane and bending theory for shells of revolution. Prerequisite: Consent of instructor.

Prerequisite: ME 585 Minimum Grade of C

ME 589 Biomechanics 3 cr

Discrete mass and continuum mechanics description of biological materials, biodynamics of limb and gross body motions, various models for injury to head, neck, torso, and extremities. Prerequisite: Consent of instructor.

ME 590 Sp Top - 1-3 cr

Topics of current mechanical engineering interest. Prerequisite: Consent of instructor.

ME 592 Directed Independent Study 1-3 cr

Directed study, under the guidance of a faculty advisor, of a topic from the field of Mechanical Engineering not offered in a regularly scheduled course. Requires permission of the instructor.

ME 594 Projects in Mechanical Engr 1-3 cr

May be repeated for credit. Prerequisite: Approved proposal and consent of director of engineering graduate studies.

ME 599 Thesis 1-6 cr

Thesis research may be taken more than once. Prerequisite: Approved prospectus.

Faculty

Faculty Name	Faculty Department	Faculty Position	Degrees Held
CAULEY, LANIER S. (lcauley@southalabama.edu)	Mechanical Engineering	Associate Professor	BS, Virginia Polytechnic Inst and MS, Virginia Polytechnic Inst and PHD, Clemson University
DIZBAY-ONAT, MELIKE (monat@southalabama.edu)	Mechanical Engineering	Assistant Professor	MS, Auburn University MSEE, Auburn University PHD, Univ of Alabama-Birmingham
DOUMANIDIS, CHARALABOS CONSTANTINOS (doumanidis@southalabama.edu)	Mechanical Engineering	Professor	MS, Northwestern University PHD, Massachusetts Inst of Tech
HSIAO, KUANG-TING (kthsiao@southalabama.edu)	Mechanical Engineering	Professor	BS, Natl Taiwan University PHD, University of Delaware
KAR, JULIA (jkar@southalabama.edu)	Mechanical Engineering	Assistant Professor	ME, The University of Auckland MS, University of Louisville PHD, University of Louisville

MONTALVO, CARLOS J (cmontalvo@southalabama.edu)	Mechanical Engineering	Associate Professor	BS, Georgia Inst of Tech - Main MS, Georgia Inst of Tech - Main PHD, Georgia Inst of Tech - Main
NELSON, DAVID ARTHUR (danelson@southalabama.edu)	Mechanical Engineering	Professor	BS, Duke University MS, Ohio State U-Main Campus PHD, Duke University
PHAN, ANH-VU (vphan@southalabama.edu)	Mechanical Engineering	Professor	BS, Ho Chi Minh City Univ of Tech MS, Grenoble Inst of Technology PHD, University of Montreal
RICHARDSON, JOSEPH DAVID (jdrichardson@southalabama.edu)	Mechanical Engineering	Assistant Professor	BSME, University of Mississippi MS, University of Mississippi PHD, Vanderbilt University
TAMBE, DHANANJAY T (dtambe@southalabama.edu)	Mechanical Engineering	Associate Professor	MS, Brown University PHD, Brown University

Mechanical Engineering (BS) Degree Requirements

Code	Title	Hours
General Education Requirements		54
Major Requirements		
<i>Engineering Course Requirements</i>		
Complete the following:		
EG 101	Intro to Engineering & Design (or EG 201 for LINK students)	2
EG 220	Electrical Circuits	3
EG 231	Intro to Ethics and Economics	3
EG 270	Engineering Thermodynamics	3
EG 283	Statics	3
EG 284	Dynamics	3
EG 315	Mechanics of Materials	3
EG 360	Fluid Mechanics	3
<i>Mechanical Engineering Course Requirements</i>		
ME 135	Engr Graphics and Comm (Only two attempts are permitted to earn grade C or better. Failure to meet this requirement will result in dismissal from the program.)	3
ME 228	Computational Engineering	3
ME 312	Mech Engr Thermodynamics	3
ME 314	Machine Component Design	3
ME 316	Instrumentatn & Exp Method	3
ME 317	Heat Transfer	3
ME 326	Materials Science	3
ME 328	Numerical Methods	3-4
ME 336	Material Science Lab-W	1
ME 410	Principles of Eng Design-W	3
ME 426	Dynamic Systems and Control	3
ME 429	Controls & Instr. Lab	1
ME 472	Vibration Analysis-Synthesis	3
ME 414	Capstone Design	1
ME 416	Capstone Design Project	2
<i>Science Elective</i>		
Select one of the following (no Lab required):		3
BLY 121	General Biology I	

CH 132	General Chemistry II	
GY 111	Physical Geology	
MA 316	Linear Algebra II	
MA 354	Comp Assist Math Modeling - W	
MA 437	Complex Variables	
ST 315	Applied Probability-Statistics	
PH 303	Modern Physics (Lab required)	
<i>Mechanical Elective</i>		
One course from ME or AE/BME 400 level Elective courses (excluding required courses but ME 490 or ME 494 may be taken only if approved by Chair)		3
<i>ME Technical Elective</i>		
Select six hours from the following:		6
BLY 122	General Biology II	
CH 201	Organic Chemistry I	
CH 202	Organic Chemistry II	
GY 305	Geophysics (lab required)	
GY 310	Environmental Earth Science	
MA 316	Linear Algebra II	
MA 332	Differential Equations II	
MA 334	Advanced Calculus I	
MA 335	Advanced Calculus II	
MA 354	Comp Assist Math Modeling - W	
MA 436	Numerical Analysis	
MA 437	Complex Variables	
ST 315	Applied Probability-Statistics	
ST 320	Applied Stat Analysis	
PH 303	Modern Physics (Lab required)	
ME 490 or ME 494 only if approved by Chair		
FE Exam		
All students must attempt the NCEES FE (Fundamentals of Engineering) examination.		
Minor Requirements		
A minor is not required for this degree program		0
Total Hours		127-128

General Education Requirements

Code	Title	Hours
Area I – Written Composition		
Complete the following:		
EH 101	English Composition I (Students who earn an English ACT score of 27, or a written SAT score of 610, can opt out of EH 101.)	3
EH 102 or EH 105	English Composition II Honors Composition - H	3
Area II – Humanities & Fine Arts		
CA 110	Public Speaking	3
A. Select one of the following: 3		
EH 215	Brit Lit before 1785	
EH 216	Brit Lit after 1785	
EH 225	Am Lit before 1865	
EH 226	Am Lit after 1865	
EH 235	World Lit before 1650	
EH 236	World Lit after 1650	
B. Select one of the following: 3		
ARH 100	Survey of Art	
ARH 103	Art History I	
ARH 123	Art History II	
ARS 101	Art Appreciation	
DRA 110	Introduction to Theatre	
MUL 101	Introduction to Music	
Area III – Natural Sciences & Mathematics		
Complete the following:		
MA 125	Calculus I	4
CH 131 & 131L	General Chemistry I and General Chemistry I Lab	4
PH 201 & 201L	Calculus-Based Physics I and Calculus-Based Physics I Lab	4
Area IV – History, Social & Behavioral Sciences		
A. Select 3 hours from the following: 3		
HY 101	HY of Western Civilization I	
HY 102	HY of Western Civilization II	
HY 135	US History to 1877	
HY 136	US History since 1877	
B. Select 3 hours from the following: 3		
AN 100	Intro to Cultural Anthropology	
AN 101	Intro Archaeology-Bio Anthro	
CA 100	Intro to Communication	
CA 211	Interpersonal Comm	
ECO 215	Prin of Microeconomics	
ECO 216	Prin of Macroeconomics	
GEO 114	People, Places, Environment	
GEO 115	World Regional Geography	
GS 101	Intro to Gender Studies	
IS 100	Global Issues	
IST 201	Seasons of Life	
NAS 101	Intro Native American Studies	
PSC 130	Intro to US Government	
PSY 120	Introduction to Psychology	

PSY 250	Life Span Development	
SY 109	Introductory Sociology	
SY 112	Social Problems	
C. Select an additional 3 hours from either List A or List B above in Area IV		3
Area V - Pre-Professional, Major, Elective Courses		
Complete the following:		
MA 126	Calculus II	4
MA 227	Calculus III	4
MA 237	Linear Algebra I	3
MA 238	Differential Equations I	3
PH 202 & 202L	Calculus-Based Physics II and Calculus-Based Physics II Lab	4
Total Hours		54

Additional Information

It is important that students make adequate progress in the Mechanical Engineering program. Satisfactory completion of a set of fundamental courses is required before a student is allowed to take advanced courses. Professional Component Standing (PCS) is awarded by the Chair of the Department when the student completes the College of Engineering PCS requirements and the WBBJ MABE Departmental PCS requirements.

College of Engineering PCS Courses

Minimum Grade C is required in all the following courses:

Code	Title	Hours
EH 101	English Composition I (if not exempt)	3
EH 102 or EH 105	English Composition II Honors Composition - H	3
CH 131 & 131L	General Chemistry I and General Chemistry I Lab	4
MA 125	Calculus I	4
MA 126	Calculus II	4
PH 201	Calculus-Based Physics I (+Lab)	4

Mechanical Engineering PCS Courses

Minimum Grade C is required in all the following courses:

Code	Title	Hours
EG 283	Statics	3
MA 227	Calculus III	4
MA 237	Linear Algebra I	3
ME 135	Engr Graphics and Comm	3
PH 202	Calculus-Based Physics II	4

Graduation Plan

(127 Total Hours)

The Sample 4-year plan is designed as a guide for students preparing for their course selections. This information provides only a suggested schedule. Actual course selections should be made in consultation with an advisor. Courses listed as Milestones are required to obtain Professional Component Standing (PCS). Two designated writing (W) courses are required with at least one course chosen from offerings in

the student's major or minor. Courses carrying this required credit are identified in the University Bulletin by a W after the course title.

¹ Courses meet general education requirements.

² Students who earn an English ACT score of 27, or a written SAT score of 610, can opt out of EH 101.

Note: Students not Term 1-Calculus I ready will exceed the 127 hours required for this degree. If math is not started prior to Fall-Year 1, the four-year graduation timetable is likely to be extended. Students with ACT Math scores 21 and below should begin math courses in the summer before Fall-Year 1.

EH 226	Am Lit after 1865	
EH 235	World Lit before 1650	
EH 236	World Lit after 1650	
B. Select one of the following: 3		
ARH 100	Survey of Art	
ARH 103	Art History I	
ARH 123	Art History II	

ARS 101	Art Appreciation	
DRA 110	Introduction to Theatre	
MUL 101	Introduction to Music	

Area III – Natural Sciences & Mathematics

MA 125	Calculus I	4
CH 131 & 131L	General Chemistry I and General Chemistry I Lab	4
PH 201 & 201L	Calculus-Based Physics I and Calculus-Based Physics I Lab	4

Area IV – History, Social & Behavioral Sciences

A. Select 3 hours from the following: 3

HY 101	HY of Western Civilization I	
HY 102	HY of Western Civilization II	
HY 135	US History to 1877	
HY 136	US History since 1877	

B. Select 3 hours from the following: 3

AN 100	Intro to Cultural Anthropology	
AN 101	Intro Archaeology-Bio Anthro	
CA 100	Intro to Communication	
CA 211	Interpersonal Comm	
CJ 105	Introduction to Criminal Justice	
ECO 215	Prin of Microeconomics	
ECO 216	Prin of Macroeconomics	
GEO 114	People, Places, Environment	
GEO 115	World Regional Geography	
GS 101	Intro to Gender Studies	
IS 100	Global Issues	
IST 201	Seasons of Life	
NAS 101	Intro Native American Studies	
PSC 130	Intro to US Government	
PSY 120	Introduction to Psychology	
PSY 250	Life Span Development	
SY 109	Introductory Sociology	
SY 112	Social Problems	

C. Select an additional 3 hours from either List A or List B above in Area IV 3

Area V - Pre-Professional, Major, Elective Courses

Complete the following:

MA 126	Calculus II	4
MA 227	Calculus III	4
MA 237	Linear Algebra I	3
MA 238	Differential Equations I	3
PH 202 & 202L	Calculus-Based Physics II and Calculus-Based Physics II Lab	4

Total Hours 54**Additional Information**

It is important that students make adequate progress in the Mechanical Engineering program. Satisfactory completion of a set of fundamental courses is required before a student is allowed to take advanced courses. Professional Component Standing (PCS) is awarded by the Chair of the Department when the student completes the College of Engineering PCS requirements and the WBBJ MABE Departmental PCS requirements.

Mechanical Engineering PCS Courses

Minimum Grade C is required in all the following courses:

Code	Title	Hours
MA 227	Calculus III	4
MA 237	Linear Algebra I	3
PH 202	Calculus-Based Physics II	4
EG 283	Statics	3
ME 135	Engr Graphics and Comm (maximum 2 attempts)	3

College of Engineering PCS Courses

Minimum Grade C is required in all the following courses:

Code	Title	Hours
EH 101	English Composition I (if not exempt)	3
EH 102	English Composition II	3
or EH 105	Honors Composition - H	
CH 131	General Chemistry I (+Lab)	4
MA 125	Calculus I	4
MA 126	Calculus II	4
PH 201	Calculus-Based Physics I (+Lab)	4

Graduation Plan

(130-131 Total Hours)

The Sample 4-year plan is designed as a guide for students preparing for their course selections. This information provides only a suggested schedule. Actual course selections should be made in consultation with an advisor. Courses listed as Milestones are required to obtain Professional Component Standing (PCS). Two designated writing (W) courses are required with at least one course chosen from offerings in the student's major or minor. Courses carrying this required credit are identified in the University Bulletin by a W after the course title.

Course	Title	Hours
First Year		
Fall		
EG 101	Intro to Engineering & Design	2
EH 101	English Composition I ^{1,2}	3
MA 125	Calculus I	4
CH 131 & 131L	General Chemistry I and General Chemistry I Lab	4
General Education	Area II or IV ^{1,2}	3

Milestone Notes

Must complete at least 12 hours with a 2.0 or higher GPA

		Hours
		16
Spring		
EH 102	English Composition II (or EH 105) ^{1,2}	3
MA 126	Calculus II	4

General Education	Area II or IV ^{1,2}	3
Milestone Notes		
FE Exam		
Hours		16

Spring

BLY 122 & 122L	General Biology II and General Biology II Laboratory	4
BME 467	Intro to Biomedical Eng	3
ME 414	Capstone Design	1
ME 416	Capstone Design Project	2
ME 429	Controls & Instr. Lab	1
General Education	Area II or IV ^{1,2}	3
Hours		14
Total Hours		130-131

¹ Courses meet general education requirements.

² Students who earn an English ACT score of 27, or a written SAT score of 610, can opt out of EH 101.

Note: Students not Term 1-Calculus I ready will exceed the number of hours required for this degree. If math is not started prior to Fall-Year 1, the four-year graduation timetable is likely to be extended. Students with ACT Math scores 21 and below should begin math courses in the summer before Fall-Year 1.

Mechanical Engineering (MS)

Degree Requirements

The program leading to the degree of Master of Science in Mechanical Engineering offers three plans of study (thesis option, project option, course work only option). Some graduate courses in Mechanical Engineering are offered at night for the benefit of full-time employed engineers within commuting distance of the campus. The MS program in Mechanical Engineering has several possible specializations including biomechanics, materials engineering, heat transfer, fluid mechanics, computational mechanics, vibrations, dynamics, simulation and controls.

Admission to the MSME Program

The following criteria supplement the Graduate School admission criteria (see Admission to Graduate Programs (<https://www.southalabama.edu/graduatemajors/graduateschool/>)):

- **Regular Admission requirements**

- Grade-point average of 3.0 or greater (A=4.0) on all undergraduate work.
- Minimum score of 151 on the quantitative Graduate Record Exam (GRE) and a minimum score of 138 on the verbal GRE. Applicants must submit official GRE scores. This requirement is waived for students who received the BSME degree from the University of South Alabama. However, those students may need to present GRE scores to be eligible for some assistantships or fellowships.
- For International students whose native language is not English, at least the following score on one of these English language tests:
 - paper-based TOEFL score 550, or
 - internet-based TOEFL score 79, or
 - IELTS band score 6.5, or
 - Pearson (PTE Academic) score 59, or
 - Duolingo score 100.

- **Provisional Admission requirements**

- Minimum grade-point average of 2.5 (A=4.0) on all undergraduate work.
- Requirements B and C as for regular admission.

Degree Requirements for MSME

The requirements for the possible options of the MSME degree are:

- **Thesis Option:** 30 credit hours
 - **6 credit hours** required math courses MA 507 and MA 508, and
 - **9 credit hours** selected from **Mechanical Engineering Core graduate courses** (*one* course in Solid Mechanics, *one* course in Fluid Mechanics, and *one* course in Thermal Sciences), and
 - **9 credit hours** selected from **MSME Engineering elective graduate courses** and **MSME graduate courses in supporting areas** (but including *no more than 3 credit hours* from **MSME graduate courses in supporting areas**), and
 - Responsible Conduct of Research (RCR) training from CITI Program (<https://about.citiprogram.org/en/series/responsible-conduct-of-research-rcr/>), and
 - **6 credit hours** required Thesis courses ME 599 & ME 599, and
 - Satisfactory oral defense of Thesis.^{1,2}
- **Project Option:** 33 credit hours
 - **6 credit hours** required math courses MA 507 and MA 508, and
 - **12 credit hours** selected from **Mechanical Engineering Core graduate courses** (including *one* course in Solid Mechanics, *one* course in Fluid Mechanics, and *one* course in Thermal Sciences), and
 - **12 credit hours** selected from **MSME Engineering elective graduate courses** and **MSME graduate courses in supporting areas** (but including *no more than 6 credit hours* from **MSME graduate courses in supporting areas**), and
 - Responsible Conduct of Research (RCR) training from CITI Program (<https://about.citiprogram.org/en/series/responsible-conduct-of-research-rcr/>), and
 - **3 credit hours** required Project course ME 594, and
 - Satisfactory oral defense of Project Report,¹ and
 - Pass written comprehensive examination (<https://www.southalabama.edu/colleges/engineering/me/resources/memscprehensiveexamrequirements.pdf>).
- **Course Option:** 33 credit hours
 - **6 credit hours** required math courses, MA 507 and MA 508, and
 - **12 credit hours** selected from **Mechanical Engineering Core graduate courses** (including *one* course in Solid mechanics, *one* course in Fluid mechanics, and *one* course in Thermal Sciences), and
 - **15 credit hours** selected from **MSME Engineering elective graduate courses** and **MSME graduate courses in supporting areas** (but including *no more than 6 credit hours* from **MSME graduate courses in supporting areas**), and
 - Pass written comprehensive examination (<https://www.southalabama.edu/colleges/engineering/me/resources/memscprehensiveexamrequirements.pdf>).

Mechanical Engineering Core graduate courses:

Solid Mechanics:

- ME 538 Finite Element Analysis
- ME 571 Advanced Engineering Dynamics
- ME 573 Vibrations of Continuous Sys
- ME 575 Continuum Mechanics (cannot count in Fluid Mechanics simultaneously)
- ME 583 Applied Elasticity

Fluid Mechanics:

- ME 520 Advanced Fluid Mechanics
- ME 560 Compressible Fluid Flow
- ME 575 Continuum Mechanics (cannot count in Solid Mechanics simultaneously)

Thermal Sciences:

- ME 540 Advanced Heat Transfer
- ME 551 Classical Thermodynamics

MSME Engineering elective graduate courses:

Any ME or other Engineering 500- or 600-level courses excluding Thesis or Project courses, and excluding DIS courses more than 6 credit hours maximum.

MSME graduate courses in supporting areas:

Any non-Engineering 500- or 600-level courses subject to approval by the Graduate Coordinator in the MABE Department. The following courses will always be approved:

- CIS 506 IS in Organizations
- ISC 545 Management Information Systems
- MA 567 Operations Research
- ST 540 Stat in Research I.

¹ Should the student present an unsatisfactory defense, a second attempt will be allowed no sooner than 12 weeks after the first attempt. A second unsatisfactory defense will result in dismissal from the program.

² No written comprehensive examination is required of Thesis option MSME students. Successful defense of the Thesis will be deemed to satisfy the comprehensive examination requirement for Thesis option candidates.

Mechanical Engineering - Accelerated Bachelor's to Master's Program Overview

The William B. Burnsed Jr. Department of Mechanical, Aerospace, and Biomedical Engineering allows well-qualified undergraduates to follow an "Accelerated Bachelor's to Master's" (ABM) study plan. Under ABM, up to six credit hours of graduate coursework can count towards both the BSME (as Technical Electives) and the MSME degrees, so that the MSME degree is earned faster than usual. This applies to both thesis and non-thesis degrees. (The coursework concerned must individually satisfy the requirements of both degrees.)

Example: the MSME degree (thesis option) requires 30 total credit hours (24 credit hours of coursework plus six credit hours of thesis work). ABM students may take up to six of the MSME coursework credit hours as Technical Electives for their BSME degree, leaving only 18 further credit hours of coursework plus six credit hours of thesis work needed to earn the MSME degree.

Eligibility requirements:

- Must have at least **3.40 GPA** (Engineering and at USA), and
- Must be in junior or senior status and must have completed PCS requirements.

A student who later withdraws or is dismissed from the ABM program may not count graduate coursework towards both degrees. Graduate courses will only be counted towards the MSME degree if the undergraduate student earns an "A" or "B" grade.

ABM students must be registered for full-time study and must complete all Master's degree requirements within three semesters of the semester in which they were admitted to the Graduate School. An exception for a fourth semester may be granted where an additional semester is required for final revisions to and submission of a defended thesis. Exceptions to the ABM policy are at the discretion of the Dean of the Graduate School.

Procedure:

If you satisfy these eligibility requirements, and wish to be considered for the ABM program:

1. Discuss ABM with the Department Chair and/or your advisor, for course planning;
2. Complete an undergraduate Advising Form at <https://www.southalabama.edu/colleges/engineering/currentstudents/resources/engineeringadvisingform.pdf> (<https://www.southalabama.edu/colleges/engineering/currentstudents/resources/engineeringadvisingform.pdf>) incorporating the ABM courses you have chosen;
3. Complete and print both the ABM Declaration form at <https://www.southalabama.edu/departments/eforms/graduateschool/abmdeclarationform.pdf> (<https://www.southalabama.edu/departments/eforms/graduateschool/abmdeclarationform.pdf>) and the form requesting authorization to use graduate courses at https://www.southalabama.edu/departments/eforms/registrar/graduate_level_course_for_undergraduate_degree.pdf incorporating the ABM courses you have chosen;
4. Submit these printed forms to the Department Chair for formal approval and routing; and
5. Enroll in the **graduate section (500-level)** of your chosen ABM Technical Elective(s) (note that this will require course overrides).

These 500-level Technical Electives will count towards the MSME degree after you apply for graduate school (later) and successfully complete at least nine credit hours of graduate courses.

Requirements for Admission

The requirements for admission to the Interdisciplinary Graduate Program for the Doctor of Philosophy degree in Basic Medical Sciences are:

1. The applicant shall possess, by the time of matriculation, a baccalaureate degree or the equivalent from an accredited college or university.
2. Two semesters or three quarters of undergraduate work are recommended in each of the following: physics, general chemistry, organic chemistry, biology, English composition, and mathematics (including calculus and statistics).
3. A grade-point average of at least 3.0 for all undergraduate and graduate work, on a 4.0 scale.
4. Satisfactory standing at the last educational institution attended.
5. Additionally, international applicants must present evidence of competence and fluency in spoken and written English with a TOEFL score of at least 95-100, an IELTS score of at least 7, an iTEP score of at least 4.5, or a PTE score of at least 68.

Matriculation is contingent upon review and recommendation by the Admissions Committee of the Graduate Program in Basic Medical Sciences.

Procedures for Admission

Applications for the Basic Medical Sciences Interdisciplinary Graduate Program are accepted for matriculation in the Fall Semesters only. The Basic Medical Sciences Graduate Program does not accept students on a "non-degree" or "provisional" basis. Applications and materials should be accessed and submitted through the university's website: <https://www.southalabama.edu/departments/admissions/graduate.html>.

Information for the graduate program can be obtained on-line <https://www.southalabama.edu/colleges/com/doctoral-program/how-to-apply.html> or by contacting:

Associate Director of the Office of Research Education and Training
5795 USA Drive North, CSAB 212
College of Medicine, University of South Alabama
Mobile, Alabama 36688-0002
Telephone: (251) 460-6153
E-mail: oret@southalabama.edu

To be considered for review by the Admissions Committee, an applicant must submit the following:

1. A completed application form through UNICAS.
2. An official transcript from each college or university attended.
3. For international applicants: An official score report from an English proficiency examination (TOEFL/IELTS/ITEP/PTE).
4. Supplemental materials required for the program in Basic Medical Sciences must be submitted through UNICAS. Supplemental materials include:
 - a. Three letters of recommendation from instructors, advisors, or other persons qualified to evaluate the student's academic performance and potential in graduate school.
 - b. A personal statement

All documents submitted for admissions review become the property of the University of South Alabama.

Degrees, Programs, or Concentrations

- Basic Medical Sciences (PhD) (p. 621)

Courses

Biochemistry - MD

BCH 121 Medical Biochemistry 9 cr

This course provides the basic biochemical knowledge essential to the student's subsequent medical education experience. In addition, this course is intended to provide insight, where possible, into the mechanisms of disease at the molecular level. Finally, the course gives an adequate foundation to interpret and evaluate the current medical biochemical literature and stimulate continued education beyond the formal experience.

BCH 400 Biochemistry Externship 1-4 cr

To be determined.

BCH 410 Research in Biochem & Mol Biol 1-4 cr

: To carry out research under the supervision of a sponsoring faculty member. The student will help design experiments, learn and apply established techniques, record and evaluate data and make a final report both written and oral that describes the overall experimental results. The faculty member will assist the student in the project. This rotation is highly recommended for the student considering a career in academic medicine. Research areas include the biochemistry and molecular biology of cancer, lung diseases, and RNA viruses.

BCH 471 Res-Biochem and Molec Biology 1-4 cr

To carry out research under the supervision of a sponsoring faculty member. The student will help design experiments, learn and apply established techniques, record and evaluate data and make a final report both written and oral that describes the overall experimental results. The faculty member will assist the student in the project. This rotation is highly recommended for the student considering a career in academic medicine. Research areas include the biochemistry and molecular biology of cancer, malaria, lung diseases, lysosomal storage diseases, aging, RNA viruses, and drug design/synthesis.

BCH 520 Medical Biochemistry 7 cr

A basic course in biochemistry with emphasis on the physiochemical properties and intermediary metabolism of proteins, carbohydrates, lipids, and nucleic acids. The regulation and integration of metabolic pathways for energy transfer and biosynthesis of major cellular constituents are presented in detail. Enzymes, vitamins, hormones, biochemical genetics, and nutrition are included in the course material.

BCH 526 Biochemistry Lit Reports 1 cr

Students and faculty participate in a supervised reading of current literature and meet once a week to interact in a discussion of the selected article. The goal of this course is to maintain the student's level of information at a "state of the art" in both methods and theory in the discipline and to develop critical skills in reviewing the literature. Student presentation is required to receive credit.

BCH 527 Dir Studies Biochemistry 1-6 cr

Students participate in research under the direction of a graduate faculty member. The student may pursue independent research or participate in a literature project. This course should be taken by students who have completed their laboratory rotations, but have not yet submitted a research proposal.

BCH 590 Sp Top - 1-3 cr

This course provides in-depth tutorial exposure to specific areas in the discipline. Student and/or faculty presentations followed by group discussions (usually in the Socratic mode), examine the subject matter in an area of current interest either to one student or to a group of students. Credit and title are arranged with an individual faculty member.

BCH 620 Enzymes and Proteins 3 cr

The techniques used for the physical and chemical characterization of protein are presented and protein structure-function relationships, enzyme kinetics, and enzyme mechanisms are presented to provide a student with the basic knowledge to understand the role of functional proteins in life processes.

BCH 622 Molecular Biology 3 cr

The focus of this course is on cellular processes involving DNA repair, replication and translation. Current concepts regarding the organization and structure of chromosomes, genes and the regulation of gene expression will be discussed. Eukaryotic molecular biology is emphasized, however some eukaryotic and prokaryotic processes are compared and contrasted. This course stresses the methods and experimental design used to delineate and understand cellular information transfer and molecular phenomena.

BCH 626 Biochemistry Research Seminar 1 cr

Students and faculty present a research topic for discussion before members of the department. The presentations are usually scheduled on a rotational basis. The student may present research data for critique by the faculty.

BCH 799 Research-Dissertation 1-6 cr

Independent research by the student under the sponsorship of the graduate faculty. Students are required to submit a research project description form before enrolling in this course. Progress reports of the work accomplished are required every six months.

Cell Biology/Neuroscience - MD**CBN 111 Medical Gross Anatomy 9 cr**

Lectures by the faculty stress clinically important aspects of anatomy, utilizing both systemic and regional approaches. Student groups of four dissect the entire human body. Prosections and computer programs are available to augment information learned in the laboratory. The lecture and laboratory material is reinforced through physician-presented correlation conferences. Additionally, the students are required to complete a computer program in radiological anatomy.

CBN 112 Medical Histology 8 cr

The main objective is to teach the microscopic structure and functional anatomy of cells, tissues, and organs of the human body through lectures, laboratories, slides, demonstrations, and examinations. The course provides the student the opportunity to gain information and experience in the science of microscopic structure and to learn essential basic terminology for use and expansion in future courses.

CBN 112R Medical Histology 8 cr

Summer make-up course in Medical Histology at an LCME approved medical school.

CBN 113 Developmental Anatomy 3 cr

The course presents a synopsis of human development and related information. Clinically related topics are emphasized while normal development is closely correlated with the systemic lectures given in the gross anatomy course

CBN 114 Neuroanatomy 4 cr

The course consists of both laboratory and lecture material. Emphasis is given to the functional neurobiology of the human central nervous system. In addition to basic anatomical systems, considerable time is given to the delineation of the anatomical bases of human CNS dysfunction.

CBN 215 Medical Neuroscience 9 cr

This course is an organ-based multi-disciplinary course combining neuroanatomy, neuropathology, and neurophysiology to provide an integrated approach to neuroscience. The final exam is a mini-board from the National Board of Medical Examiners; students are charged a fee to purchase this exam.

CBN 400 Cell Biol & Neuro Externship 4 cr

To be determined.

CBN 401 Adv Gross Anatomy I - Longitu 1-4 cr

Each student is responsible for completing the dissection and study of the anatomy of the upper and lower extremities and selection and review of recent literature related to the region under study. Time will be divided between laboratory dissection, library reference study, and conference sessions with faculty, both clinical and basic science. Conferences directed by faculty will deal with the basic anatomy, both normal and anomalous, and with the practical utilization of that knowledge. Conferences directed by the student will deal with techniques from current literature.

CBN 402 Adv Gross Anatomy II - Longitu 1-4 cr

Each student is responsible for completing the dissection and study of the anatomy of the thorax, abdomen, and pelvis, and selection and review of recent literature related to the region under study. Time will be divided between laboratory dissection, library reference study, and conference sessions with faculty, both clinical and basic science. Conferences directed by faculty will deal with the basic anatomy, both normal and abnormal, and with the practical utilization of that knowledge. Conferences directed by the student will deal with techniques from current literature.

CBN 403 Adv Gross Anatomy III-Longitu 1-4 cr

Each student is responsible for completing the dissection and study of the anatomy of the head and neck, and selection and review of recent literature related to the region under study. Time will be divided between laboratory dissection, library reference study, and conference sessions with faculty, both clinical and basic science. Conferences directed by faculty will deal with the basic anatomy, both normal and abnormal, and with the practical utilization of that knowledge. Conferences directed by the student will deal with techniques from current literature.

CBN 404 Adv Neuroanatomy-Longitu 1-4 cr

The course will consist of three phases: (1) a review of the topographic and internal anatomy of the nervous system; (2) discussions by the faculty concerning current research of interest in neuroanatomy; (3) discussions of functional and clinical neuroanatomy and areas of special interest.

CBN 405 Research Assistantship 1-4 cr

Teaching assistantships are available in the following areas: head and neck; thorax and abdomen; pelvis and perineum; or extremities.

CBN 406 Teach Asst-Histology 1-4 cr

Participants will assist the faculty in teaching histology laboratories either pertaining to tissues (4 weeks) or organ systems (4 weeks, or 8 weeks for both). The student will be mentored by one of the listed faculty who will assume responsibility for the final evaluation of the student.

CBN 407 Teach Assistantship - Anatomy 1-4 cr

Teaching assistantships are available in the following areas: head and neck; thorax and abdomen; pelvis and perineum or extremities.

CBN 501 Medical Gross Anatomy 8 cr

A course consisting of lectures and laboratory experience stressing the more important aspects of human morphology using both systemic and regional approaches supplemented by introductory radiological features.

CBN 510 Medical Histology 7 cr

A study of the structure and function of cells, tissues and organs which includes lectures, demonstrations, and individual laboratory study of slides.

CBN 511 Medical Neuroanatomy 6 cr

This course consists of lectures and laboratories stressing the important aspects of the structures of the central nervous system and emphasizing the functional aspects which relate to human disease.

CBN 513 Developmental Anatomy 2 cr

A course which presents a synopsis of human development and related information. Clinically related topics are emphasized while normal development is closely correlated with the systemic lectures given in the gross anatomy course

CBN 516 Cell Biol-Neurosci Lit Reports 1 cr

Students and faculty participate in a supervised reading of the current literature and meet periodically (usually once a week) to interact in a discussion of the selected article or topic. The goal of this course is to maintain the faculty's and students' level of information at the "state of the art" in both methods and theory in the discipline to develop critical review skills in reviewing the literature. Student presentation is required to receive credit.

CBN 517 Dir St - Cell Bio Neuroscience 1-6 cr

Students participate in research under the direction of a graduate faculty member. The student may pursue independent research or participate in a literature project. This course should be taken by students who have completed their laboratory rotations, but have not yet submitted a research proposal.

CBN 590 Sp Top - 1-3 cr

This course provides in-depth tutorial exposure to specific areas in the discipline. Student and/or faculty presentations followed by group discussion (usually in the Socratic mode), examine the subject matter in an area of current interest either to one student or to a group of students. Credit and title are arranged with an individual faculty member.

CBN 610 Molecular-Cellular Neuroscienc 2 cr

A course which requires students to read and evaluate critically the contemporary literature dealing with the cellular and molecular mechanisms of neural function.

CBN 612 Cytoskeleton-Membranes 2 cr

This course requires students to read, present, and evaluate critically the modern literature on cytoskeleton and membrane structure, interactions, and function.

CBN 614 Gene Expr- Reg- Repair- Ther 2 cr

This course requires students to read, present, and evaluate critically the modern literature on gene expression and regulation, repair and therapy.

CBN 615 Molecular-Cellular Development 2 cr

This course examines embryonic development in animal systems. The focus is on the protein and molecular interactions that regulate the development of animal embryos. The course consists of lectures and written exams. Students are required to read from an assigned text and from the primary literature.

CBN 616 Cell Biol-Neurosci Resrch Sem 1 cr

Students and faculty present a research topic for discussion before members of the department. The presentations are usually scheduled on a rotational basis. The student may present research data for critique by the faculty.

CBN 799 Research Dissertation 1-6 cr

Independent research by the student under the sponsorship of the graduate faculty. Students are required to submit a research project description form before enrolling in this course. Progress reports of the work accomplished are required every six months.

Interdepartmental Stds (IDL)**IDL 560 Cancer Biology 3 cr**

This course provides a comprehensive coverage of molecular and cellular aspects of carcinogenesis as well as clinical issues related to human cancer. This course will specifically cover areas of histology, pathology, epidemiology, genetics, viruses, oncogenes and tumor suppressor genes. Additionally, topics to be covered include cellular and molecular basis of chemotherapy, pharmacology of anticancer drugs, molecular and cellular basis of radiotherapy, and biological therapy of cancer and clinical trial design.

IDL 566 Topics in Cancer Biology 1 cr

Students and faculty participate in a supervised reading of current literature and meet once a week to interact in a discussion of the selected article. The goal of this course is to maintain the student's level of information at a "state of the art" in both methods and theory in the discipline and to develop critical skills in reviewing the literature.

IDL 567 Dir Studies in Cancer Biology 1-6 cr

Students participate in research under the direction of a graduate faculty member. The student may pursue independent research or participate in a literature project.

IDL 570 Medical Pathology 7 cr

The course is taught as an introduction to the study of the diseases of man by developing working definitions and classifications of disease on the basis of known causes and effects. After surveying the structural changes characterizing disease, the mechanisms involved in clinical and lab manifestations are analyzed for human diseases.

IDL 571 Mouse Models Biomed Research 3 cr

This course utilizes the primary scientific literature to provide students with in-depth knowledge regarding the development and utilization of mouse models in biomedical research. Students are required to actively participate in class discussions, present scientific papers, and develop a research project that utilizes mouse models.

IDL 576 Interdisciplinary Lit Reports 1 cr

Students and faculty participate in a supervised reading of the current literature and meet periodically (usually once a week) to interact in a discussion of the selected article or topic. The goal of this course is to maintain the faculty's and students' level of information at a "state of the art" in both methods and theory in the discipline and to develop critical skills in reviewing the literature.

IDL 577 Intro to Research Methods 3 cr

Theoretical and practical training in basic skills utilized in basic medical science research laboratories, for students entering the first year interdisciplinary curriculum. Discussion of regulatory issues in biomedical research will be interwoven with hands-on laboratory exercises. Offered concurrently with IDL 580.

IDL 580 Fund Basic Medical Sciences I 8 cr

First of a two-semester sequence designed for students in the first year interdisciplinary curriculum. In-depth exploration of the fundamentals of biochemistry, cell biology, and molecular biology prerequisite to advanced study of basic medical sciences. Didactic lectures will be complemented with discussions of the literature.

IDL 581 Fund Basic Medical Sciences II 8 cr

Second of a two-semester sequence designed for students in the first year interdisciplinary curriculum. Detailed exploration of the fundamentals of microbiology and immunology, developmental biology, integrative systems physiology, and mechanisms of drug action prerequisite to advanced study of basic medical sciences. Didactic lectures will be complemented with discussions of the literature.

Prerequisite: IDL 580 Minimum Grade of C

IDL 590 Sp Top - 1-3 cr

In-depth tutorial exposure to interdisciplinary topics in Basic Medical Sciences.

IDL 593 IDL Dir Study Co-Op/Internship 6 cr

Directed research study under the direction of a member of the graduate faculty.

IDL 594 Interdisciplinary Dir Studies 1-6 cr

Directed research study under the direction of a member of the graduate faculty. This course should be taken by students who have not yet identified a major professor in Basic Medical Sciences.

IDL 595 Distinguished Scientist Sem 0 cr

A seminar course in which outside speakers are brought in to discuss their research. Students will attend the seminar and have an opportunity to meet informally with the speaker. Attendance will be required, and the material will be testable during each student's qualifying exam.

IDL 620 Biomedical Engineering I 4 cr

Fundamental concepts of medical instrumentation, biomedical imaging and biological systems modeling as used in biomedical engineering. Course is cross-listed with EG 620.

Cross-Listed: EG 620

IDL 621 Biomedical Engineering II 4 cr

Fundamental concepts of transport phenomena, cellular and tissue mechanics, and materials as used in biomedical engineering. Course is cross-listed with EG 621.

Cross-Listed: EG 621

IDL 630 Lung Biology 4 cr

This course introduces an advanced level of lung physiology. An understanding of fundamental lung development, anatomy, and cell and organ physiology is emphasized. The course consists of lectures and written assignments and essay exams. Reading assignments are from the primary literature.

Prerequisite: IDL 580 Minimum Grade of C and IDL 581 Minimum Grade of C

IDL 631 Lung Pathobiology 4 cr

This course builds on an in-depth understanding of normal lung biochemistry, cell biology, pharmacology, and physiology to examine lung disease. Emphasis is given on understanding mechanism(s) underlying the genetic, cell biology, anatomy and physiology of disease development and progression. Current therapeutic interventions are discussed. Clinical correlations are utilized to track signs and symptoms of specified diseases, and provide a framework for treatment options. The course consists of lectures and written assignments and essay exams. Reading assignments are exclusively from the primary literature.

Prerequisite: IDL 630 Minimum Grade of C

IDL 635 Advanced Signal Transduction 4 cr

This course builds on signal transduction topics discussed in the Fundamentals course (IDL 580, 581). The mechanisms of more generalized signaling pathways (e.g., G-protein couples pathways) to specific signaling pathways (e.g., TGF/BMP family) will be discussed. Signal transduction pathways will be examined using classic literature references, from the molecular details of pathway components to the effects on the organ-system. The course consists of lectures, student presentations, and essay/problem solving examinations.

Prerequisite: IDL 580 Minimum Grade of C and IDL 581 Minimum Grade of C

IDL 640 Stat Exp Design in Biomed Res 2 cr

This course covers statistical analysis, logic and hypothesis-driven experimental design in biomedical research, utilizing a combination of lectures, weekly practical data sets or written assignments, and student presentation.

IDL 641 Effective Scientific Writing 1 cr

This course provides strategies to improve communication skills via construction of logical scientific arguments and effective writing. Course format will include lecture/discussion, in class practical exercises, and writing assignments. In addition, participants will be introduced to the Turnitin software, reference databases, and other electronic resources useful in preparation of proposals and manuscripts.

Prerequisite: IDL 580 Minimum Grade of C and IDL 581 Minimum Grade of C

IDL 645 Res Prog Smth Musc/Vasc Blgy 1 cr

Students meet on alternate weeks for 2 hr with faculty and other research professionals to discuss on-going research projects in the field of smooth muscle and vascular biology. Signal transduction pathways, pathophysiological mechanisms in vascular disorders associated with smooth muscle, and other topics of interest will be discussed. Emphasis will be on up-to-date research results from laboratories as well as newly published literature findings. Students will be expected to present the results of their own laboratory research at least once a year to the group.

IDL 650 Topics in Lung Biology 1 cr

In-depth exposure to selected topics in lung biology or pathobiology. Course may be repeated for credit when course content varies.

Prerequisite: IDL 630 Minimum Grade of B and IDL 631 Minimum Grade of B

IDL 656 Research Sem Lung Biology 1 cr

Students and faculty present a research topic for discussion before members of the Center for Lung Biology. The presentations are usually scheduled on a rotational basis. The student may present research data for critique by the faculty.

IDL 667 Cancer Biology Research Sem 1 cr

Students and faculty present a research topic for discussion before members of the department. The presentations are usually scheduled on a rotational basis. The student may present research data for critique by the faculty.

IDL 676 Literature Report Lung Biology 1 cr

Students and faculty participate in a supervised reading of the current literature and meet once a week to discuss the selected article or topic and its relation to ongoing research. The goal of this course is to maintain the faculty's and students' level of information at a "state of the art" in both methods and theory in the discipline and to develop critical skills in reviewing the literature of lung biology.

IDL 780 Applications Biomed Statistics 3 cr

The course treats the conception, construction, criticism, and deployment of statistical models of biomedical data. Models of dose-response, identification, and survival are developed and applied to lab, clinical and epidemiological data. Course covers linear, generalized linear, and non-linear models of continuous, discrete, and censored data, and includes topics in experimental design, regression diagnostics, salvage of weak parameter estimates, and meta-analysis. Course is organized, for the greater part, on a case-study format.

IDL 799 Research-Dissertation 1-6 cr

Independent research by the student under the sponsorship of the graduate faculty in individual departments in the Basic Medical Sciences. Prerequisite: Approved formal research proposal

Microbiology/Immunology - MD**MIC 211 Microbiology and Immunology 8 cr**

This course presents the fundamental aspects of pathogenic microbiology including morphology, metabolism and replication of micro-organisms, the basic principles of the use of chemotherapeutic agents, microbial genetics, and medical microbial ecology. The major bacterial, viral, mycotic, and parasitic diseases of humans are covered in detail. The basic principles of immunology and infection in relation to clinical disease of the various body systems are discussed.

MIC 400 Microbiology Externship 1-4 cr

To be determined.

MIC 447 Molecular Basis Pathogenesis 1-4 cr

Bench research on the biology or the rickettsiales family of intracellular pathogens and on the pathogenesis of the diseases caused by these organisms. Participation in ongoing research or initiation of new projects are possible.

MIC 480 Molec Basis of Pathogenesis 1-4 cr

Bench research on the biology or the Rickettsiales family of intracellular pathogens and on the pathogenesis of the diseases caused by these organisms. Participation in ongoing research or initiation of new projects are possible.

MIC 530 Microbes & Host Defense 3 cr

Presents the fundamental aspects of microbiology including morphology, metabolism of micro-organisms, the basic principles of the use of antibiotics and chemotherapeutic agents, microbial genetics, virology, and medical microbial ecology. The principles of immunology and infection in relation to clinical disease are discussed with special emphasis on laboratory diagnosis.

MIC 536 Literature Reports 1 cr

Students and faculty participate in a supervised reading of the current literature and meet periodically to interact in a discussion of the selected article or topic. The goal of this course is to maintain the faculty's and students' level of information at a "state of the art" in both methods and theory in the discipline and to develop critical skills in reviewing the literature.

MIC 537 Dir St - Microbiology 1-6 cr

Students participate in research under the direction of a graduate faculty member. This course should be taken by students who have completed their lab rotations, but have not yet submitted a formal research proposal.

MIC 590 Sp Top - 1-3 cr

Each course provides in-depth tutorial exposure to specific areas in the discipline. Student and/or faculty presentations followed by group discussions, examine the subject matter in an area of current interest either to one student or a group of students. Credit and title are arranged with an individual faculty member.

MIC 630 Adv Microbial Pathogenesis 3 cr

This course discusses the fundamentals of this area with particular emphasis on Escherichia coli and Salmonella typhimurium as model systems. The development of problem solving skills will be stressed. Topics including aerobic vs. anaerobic metabolism, membrane physiology, biosynthesis of macromolecules and regulation of gene expression provide view of microbial cell.

Prerequisite: IDL 580 Minimum Grade of B and IDL 581 Minimum Grade of B

MIC 632 Advanced Immunology 3 cr

Selected topics in immunology are considered using formal lectures followed by student presentations. Design and interpretation of immunological experiments are emphasized throughout the course.

Prerequisite: IDL 580 Minimum Grade of B and IDL 581 Minimum Grade of B

MIC 633 Advanced Virology 3 cr

This course reviews the reproductive cycles of important human viruses and subviral agents and the diseases they cause. The focus is on the molecular biology of animal viruses and their mechanisms of regulation, assembly, and pathogenesis. Human immunodeficiency virus will be considered in detail. The course is constructed as an interactive lecture series with student reports and literature surveys.

Prerequisite: IDL 580 Minimum Grade of B and IDL 581 Minimum Grade of B

MIC 636 Microbiology-Immun Res Sem 1 cr

Students present a research topic for discussion before members of the department. Usually scheduled on a rotational basis. Student participation required after end of second year. Attendance required.

MIC 799 Research-Dissertation 1-6 cr

Independent research by the student under the sponsorship of the graduate faculty in individual departments in the Basic Medical Sciences. Students are required to submit a research project description form before enrolling in this course. Progress reports of the work accomplished are required every six months.

Pharmacology (PHA)**PHA 540 Medical Pharmacology 7 cr**

This course is designed to provide the student with a basic understanding of the actions of drugs and their clinical uses. Basic principles, including dose-response relationships and receptor theory, are emphasized. Current concepts of drug effects, mechanisms, and sites of action are explored in detail with respect to major classes of drugs. Important considerations are also given to drug interactions and the toxicology of therapeutic agents, chemicals in the environment, and other biologically active substances.

PHA 546 Pharmacology Lit Reports 1 cr

Students and faculty participate in a supervised reading of the current literature and meet periodically (usually once a week) to interact in a discussion of the selected article or topic. The goal of this course is to maintain the faculty's and students' level of information at a "state of the art" in both methods and theory in the discipline and to develop critical skills in reviewing the literature. Student presentation is required to receive credit.

PHA 547 Dir St in Pharmacology 1-6 cr

Students participate in research under the direction of a graduate faculty member. The student may pursue independent research or participate in a literature project. This course should be taken by students who have completed their laboratory rotations, but have not yet submitted a formal research proposal.

PHA 548 Physiological Pharmacology 6 cr

This course covers both cellular and organ system physiology. It is designed to prepare graduate students for Medical Pharmacology (PHA 540), and for research in pharmacology.

PHA 590 Sp Top - 1-3 cr

Each course provides in-depth tutorial exposure to specific areas in the discipline. Student and/or faculty presentations followed by group discussions (usually in the Socratic mode), examine the subject matter in an area of current interest either to one student or to a group of students. Credit and title are arranged with an individual faculty member.

PHA 640 Molecular-Cellular Pharmacology 3 cr

This course consists of presentations and literature discussions. The central themes of signal transduction from cellular receptor to amplified response, structure-activity relationships, and drug design are studied comprehensively. Specific topics include receptor-ligand interactions, receptor structure and coupling mechanisms, the biochemical and molecular aspects of G-proteins, protein phosphorylation mechanisms, molecular modeling and protein crystallography. A comprehensive course in biochemistry is prerequisite for this course.

PHA 643 Molecular-Cellular Toxicology 3 cr

This course is concerned with the mechanisms by which toxic substances exert their effects at the molecular and cellular level. Detailed analysis of the processes by which toxic materials are metabolized to toxic intermediates is addressed. The mode of action of how toxic compounds interact with structural proteins and other macromolecules, enzymes and receptors, and the genome is included. Examples of toxicity of the heart, liver, lung, pancreas, brain, including teratogenic, mutagenic and carcinogenic effects are discussed at the mechanistic level.

PHA 646 Cell Signaling Seminar 1 cr

Students present a research topic for discussion before members of the department. The presentations are usually on a rotational basis. The student may present research data for critique by the faculty.

PHA 799 Research Dissertation 1-6 cr

Independent research by the student under the sponsorship of the graduate faculty in individual departments in the Basic Medical Sciences. Students are required to submit a research project description form before enrolling in this course. Progress reports of the work accomplished are required every six months.

Physiology (PHS)**PHS 550 Medical Physiology 8 cr**

This course includes lectures and labs which introduce the student to the basic functions of the heart, circulation, lung, and kidney, as well as the endocrine, nervous, and gastrointestinal systems. Fundamental mechanisms are stressed with the intent of providing the student with the basic knowledge of organ function necessary for the understanding and treatment of disease. Overall integrated response of body to various stresses is discussed in detail.

PHS 556 Literature Reports 1 cr

Students and faculty participate in a supervised reading of the current literature and meet periodically to interact in a discussion of selected article or topic. The goal of this course is to maintain the faculty's and students' level of information at a "state of the art" in both methods and theory in the discipline and to develop critical skills in reviewing the literature. Student presentation is required to receive credit.

PHS 557 Dir St Physiology 1-6 cr

Students participate in research under the direction of a graduate faculty member. Student may pursue independent research or participate in a literature project. This course should be taken by students who have completed their lab rotations, but have not yet submitted a formal research project.

PHS 590 Special Topics - 1-3 cr

Each course provides in-depth tutorial exposure to specific areas in the discipline. Student and/or faculty presentations followed by group discussions (usually in the Socratic mode), examine the subject matter in an area of current interest either to one student or to a group of students. Credit and title are arranged with an individual faculty member.

PHS 651 Adv Cardiovascular Physiology 5 cr

This is an advanced course covering cardiac function and metabolism, peripheral circulation, and microcirculation. The objective is to provide the student with a thorough understanding of cardiovascular physiology at both the organ and cellular level.

PHS 654 Transport Physiology Barriers 2 cr

This course is designed to present a detailed analysis of physiological membranes and the physical principles governing the movement of solute and water across these barriers.

PHS 656 Cell Signaling Seminar 1 cr

Students present a research topic for discussion before members of the department. The presentations are usually scheduled on a rotational basis. The student may present research data for critique by the faculty.

PHS 799 Research-Dissertation 1-6 cr

Independent research by the student under the sponsorship of the graduate faculty in individual departments in the Basic Medical Sciences. Students are required to submit a research project description form before enrolling in this course. Progress reports of the work accomplished are required every six months.

Basic Medical Sciences (PhD)

Degree Requirements

Required Course Work

Students will matriculate into the first year interdisciplinary core curriculum for the Ph.D. Program in Basic Medical Sciences without needing to choose an advanced program prior to entry. In year one, students complete IDL 576, IDL 577, IDL 580, IDL 581, GIS 501, and three research rotations. The purpose of rotations is to acquaint the students with various research problems under investigation and aid in the selection of a major professor in their area of specialization.

By the end of the first year, each student selects a major professor and research track. Advanced curricula are determined by the student's chosen track, in conjunction with advising from their major professor and dissertation committee. Advanced curricula must include a minimum of 8 credit hours from 500 level and above courses with the following course prefixes: IDL, BCH, CBN, MIC, PHA, and PHS.

Degree Requirements

In addition to the requirements set by the Graduate School, the following requirements must be completed for the Ph.D. degree in the Basic Medical Sciences: completion of the core and advanced curricula, a minimum overall 3.0 grade-point average on all work attempted for credit, qualifying examination, a completed dissertation approved by the student's major professor and a majority of the Dissertation Committee, and closed and open defenses of the research presented in the dissertation.

All requirements for the Ph.D. degree should normally be completed within four to five years from the date of matriculation, and must be completed within seven years. A student who has not satisfactorily completed a dissertation in a seven-year period must apply for a defined extension to complete the degree.

Detailed information on program requirements and expectations can be found in the Basic Medical Sciences Student Handbook (<https://www.southalabama.edu/colleges/com/doctoral-program/resources/bms-handbook.pdf>). Additional information can also be obtained by contacting the Associate Director of the Office of Research Education and Training, the Office of Research Education and Training Co-directors, or the individual Track Coordinators. (Contact information can be found on Department Information).

Clinical Affiliation Coordinators Meredith Clough, Elizabeth Collier, Shari Lord, Yolanda Mack

The College of Nursing is dedicated to the education of professional nurses who provide the highest quality health care to the communities they serve. The practice of nursing is both an art and a science; the focus of nursing is the diagnosis and treatment of human responses to actual or potential health problems.

The College of Nursing has two locations, one is on the USA main campus, and the other is on the USA Baldwin County campus in downtown Fairhope. The resources of the University, the USA Hospitals and clinics, and the numerous clinical agencies provide excellent opportunities for students to acquire the knowledge and skills essential for professional nursing.

Mission

The mission of the College of Nursing is to provide quality innovative educational programs to a diverse student body, to participate in research and scholarly activities, and to provide service to the University, the profession, and the public. The College accomplishes this by providing a caring, engaging environment for the empowerment of student learning potential, the professional development of faculty, and the promotion of the nursing profession.

Goals

1. Cultivate a caring, innovative, and engaging environment to facilitate teaching, learning, scholarship, and service.
2. Deliver innovative quality nursing programs that meet the needs of a diverse student body and other communities of interest.
3. Promote the discovery, communication, and preservation of knowledge through scholarly activities and leadership.
4. Provide service to the University, the profession, and the public.
5. Develop community partnerships to promote nursing and the enhancement of the health care delivery system using interprofessional approaches.

Accreditation

The baccalaureate program is approved by the Alabama Board of Nursing and the baccalaureate, master's degree program in nursing, Doctor of Nursing Practice degree program and post-graduate APRN certificate programs are accredited by the Commission on Collegiate Nursing Education.

F. (202) 887-8476

Student Responsibility

While the University of South Alabama will endeavor to provide timely and accurate advisement, it is the responsibility of the student to know and satisfy the degree requirements of the academic program found in the student's PAWS account, to be aware of the University calendar,

<https://www.southalabama.edu/academiccalendar/index.html> (<https://www.southalabama.edu/academiccalendar/>) and to understand and comply with University academic policies and procedures.

Degrees Offered

The College of Nursing offers the Bachelor of Science in Nursing (BSN) degree, the Master of Science in Nursing (MSN) degree, and the Doctor of Nursing Practice (DNP) degree.

Certificates Offered

Post-Graduate Certificates are awarded to students completing planned programs of study in a nursing specialty area and subspecialty areas.

Departments of Instruction

- Nursing (p. 622)
 - Nursing (BS) - Accelerated (p. 661)
 - Nursing (BSN) - RN-BSN (p. 664)
 - Nursing (BSN) - Traditional (p. 668)
 - Nursing (MSN) - BSN-Prepared RNs (p. 674)
 - Nursing (MSN) - RN-MSN with Non-Nursing Baccalaureate (p. 679)
 - Nursing Post-Graduate Certificate (p. 683)
 - Nursing Practice (DNP) - BSN to DNP (p. 687)
 - Nursing Practice (DNP) - MSN Clinical Nurse Leader Bridge to DNP Executive Nursing Administration Pathway (p. 692)
 - Nursing Practice (DNP) - MSN to DNP Adding a New Concentration Area (p. 695)
 - Nursing Practice (DNP) - MSN to DNP for Advanced Practice Nursing Roles (p. 701)
 - Nursing Subspecialty Options (p. 705)

College of Nursing Administrative Staff

Title	Name
Dean	Heather Hall
Associate Dean for Research Faculty Development, and Evaluation	Sharon Fruh
Associate Dean for Academic Affairs	Leigh Minchew
Assistant Dean for Academic Affairs	Shanda Scott
Director of Clinical Affairs	Emily Bentley
Director of Diversity, Equity and Inclusion	Shanda Scott
Director of the DNP Program	Leigh Minchew
Director of Special Projects & Evaluation	Rebecca Graves

Professors	S. Fruh, J. Gunn, H. Hall, J. Harris, M. Jacobs, R. Lawson, S. Ridner, E. VandeWaa
Associate Professors	K. Bydalek, C. Elkins, R. Graves, L. Hammonds, T. Harlan, T. Huey, P. Johnson, S. Lawrence, A. Marass, K. McCoy, T. McMullan, L. Minchew, C. Myers, M. Nadler, J. Pittman, B. Riley, D. Streeter, W. Stuart, D. Swanzy, K. Williams, S. Williams, T. Wright
Assistant Professors	A. Adams, J. Anderson, M. Baker, C. Baughn, A. Beasley, E. Bentley, M. Bolton, A. Bowman, S. Brand, H. Breazeale, T. Brown, L. Byrd, A. Calvert Campbell, K. Cheshire, L. Dailey, A. Davis, S. Davis, W. Davis, N. Dixon, J. Ferry, M. Guy, C. Haboush, S. Harlan, S. Harris, A. Holley, H. Horton, P. Huffman, D. Hutto, C. Jackson, D. James, B. Johnson, P. Johnson, R. Johnson, L. Jones, K. Jordan, M. Korn, B. Lang, P. Levi, A. Lewis, S. Lewis, J. Lollar, C. Lynch, C. McCarter, K. McMurtrey, J. Miller, K. Miller, S. Montgomery, E. Moore, L. Moore, K. Norris, J. A. Otts, K. Pancione, T. Platt, W. Powell, D. Reed, S. Rudolf, C. Russ, S. Scott, C. Selwyn, T. Sikes-Doggett, M. Theard, A. Townsend, N. Turnham, S. Waweru, C. Williamitis, B. Woodmansee
Research Assistant Professors	Candice Selwyn
Senior Instructors	J. Cockrell
Instructors	K. Carlquist, J. Cockrell, K. Cooper, L. Emley, S. James, T. Jones, J. Ladnier, B. Mosley, C. Taylor, B. Urquhart, E. Woods
Department Chair, Adult Health Nursing	Theresa Wright
Department Chair, Community/Mental Health Nursing	Todd Harlan
Department Chair, Maternal/Child Health Nursing	Tricia Huey
Director, Academic Advising	Mary Phillips
Academic Advisors	Jennifer Bouvier, Katelyn Foster, Leigh Holland, Brenda Mosley, Kristyn Seawell, Bailey Smith, Suzan Williams
Academic Records Specialists	Lisa Brock
Clinical Placement Advising and Assessment Coordinator	Kimberly McLean-Mundy
Clinical Affiliation Coordinators	Meredith Clough, Elizabeth Collier, Shari Lord, Yolanda Mack

The College of Nursing is dedicated to the education of professional nurses who provide the highest quality health care to the communities they serve. The practice of nursing is both an art and a science; the focus

of nursing is the diagnosis and treatment of human responses to actual or potential health problems.

The College of Nursing has two locations, one is on the USA main campus, and the other is on the USA Baldwin County campus in downtown Fairhope. The resources of the University, the USA Hospitals and clinics, and the numerous clinical agencies provide excellent opportunities for students to acquire the knowledge and skills essential for professional nursing.

Mission

The mission of the College of Nursing is to provide quality innovative educational programs to a diverse student body, to participate in research and scholarly activities, and to provide service to the University, the profession, and the public. The College accomplishes this by providing a caring, engaging environment for the empowerment of student learning potential, the professional development of faculty, and the promotion of the nursing profession.

Goals

1. Cultivate a caring, innovative, and engaging environment to facilitate teaching, learning, scholarship, and service.
2. Deliver innovative quality nursing programs that meet the needs of a diverse student body and other communities of interest.
3. Promote the discovery, communication, and preservation of knowledge through scholarly activities and leadership.
4. Provide service to the University, the profession, and the public.
5. Develop community partnerships to promote nursing and the enhancement of the health care delivery system using interprofessional approaches.

Accreditation

The baccalaureate program is approved by the Alabama Board of Nursing and the baccalaureate, master's degree program in nursing, Doctor of Nursing Practice degree program and post-graduate APRN certificate programs are accredited by the Commission on Collegiate Nursing Education.

While the University of South Alabama will endeavor to provide timely and accurate advisement, it is the responsibility of the student to know and satisfy the degree requirements of the academic program found in the student's PAWS account, to be aware of the University calendar, <https://www.southalabama.edu/academiccalendar/index.html> (<https://www.southalabama.edu/academiccalendar/>) and to understand and comply with University academic policies and procedures.

Degrees Offered

The College of Nursing offers the Bachelor of Science in Nursing (BSN) degree, the Master of Science in Nursing (MSN) degree, and the Doctor of Nursing Practice (DNP) degree.

Certificates Offered

Post-Graduate Certificates are awarded to students completing planned programs of study in a nursing specialty area and subspecialty areas.

Degrees, Programs, or Concentrations

- Nursing (BS) - Accelerated (p. 661)
- Nursing (BSN) - RN-BSN (p. 664)
- Nursing (BSN) - Traditional (p. 668)
- Nursing (MSN) - BSN-Prepared RNs (p. 674)
- Nursing (MSN) - RN-MSN with Non-Nursing Baccalaureate (p. 679)
- Nursing Post-Graduate Certificate (p. 683)
- Nursing Practice (DNP) - BSN to DNP (p. 687)
- Nursing Practice (DNP) - MSN Clinical Nurse Leader Bridge to DNP Executive Nursing Administration Pathway (p. 692)
- Nursing Practice (DNP) - MSN to DNP Adding a New Concentration Area (p. 695)
- Nursing Practice (DNP) - MSN to DNP for Advanced Practice Nursing Roles (p. 701)
- Nursing Subspecialty Options (p. 705)

Courses

Adult Health Nursing (AHN)

AHN 447 Adult Gerontological Nursing 4 cr

Synthesize theories, concepts, research, issues and trends in caring for adult gerontological population with complex multisystem health care needs. Emphasis is on the role of the professional nurse in health promotion and maintenance, illness care, and rehabilitation of adult gerontological population in a variety of acute and community settings.

Prerequisite: CMN 350 Minimum Grade of C and CMN 351 Minimum Grade of C and MCN 352 Minimum Grade of C and MCN 353 Minimum Grade of C and MCN 354 Minimum Grade of C and MCN 355 Minimum Grade of C

Corequisite: AHN 448

AHN 448 Adult Gerontological Nsg Clin 4 cr

The focus of this course is the application of theories, concepts, evidence, issues and trends in caring for adult gerontological population experiencing complex multisystem health care needs. Emphasis is on the role of the professional nurse and on the use of the nursing process with adult gerontological population experiencing complex multisystem health care needs and their families.

Prerequisite: CMN 350 Minimum Grade of C and CMN 351 Minimum Grade of C and MCN 352 Minimum Grade of C and MCN 353 Minimum Grade of C and MCN 354 Minimum Grade of C and MCN 355 Minimum Grade of C

Corequisite: AHN 447

AHN 513 AG/CNS Clinical Progression 1-9 cr

The purpose of this progression practicum course is to facilitate student independence in the Adult-Gerontological Clinical Nurse Specialist role. The focus is on the application and synthesis of knowledge and skills acquired in all previous courses and to develop the necessary skills to progress to the next level of competency in the Adult-Gerontological Clinical Nurse Specialist role. The emphasis is on the three spheres of influence and the continuum of healthcare services from wellness through acute care.

AHN 515 A/G CNS Shadowing Intensive 1 cr

This is a clinical practice course in adult health nursing. The focus is on the application of theories, concepts, research, and issues and trends in adult health nursing. The emphasis is on the role of the professional nurse in adult health nursing and on the use of the nursing process with adult/gerontological patients experiencing health concerns in the acute care setting.

AHN 516 CNS Adult Geron Pract I 3 cr

The purpose of this precepted practicum course is to provide students an immersion experience in the CNS role in the Acute Care setting through health promotion, wellness, and disease management across the lifespan from adolescent to adult to older adult. The focus of the course is to develop the CNS's ability to assimilate and apply evidence-based information in nursing care activities, to appraise nursing practice standards and norms, and to influence organizations to support the delivery of nursing care and achieve optimal health outcomes. The emphasis is on the CNS core competencies of Direct Care, Systems Leadership, and Consultation.

Prerequisite: NU 578 Minimum Grade of C

Corequisite: NU 515

AHN 517 CNS Adult Geron Pract II 3 cr

The purpose of this precepted practicum course is to provide students an immersion experience in the CNS role, in both the Acute Care setting and the Emergency or Urgent Care setting, through health promotion, wellness, disease management, and acute health problems across the lifespan from adolescent to adult to older adult. The focus of the course is to enhance knowledge of differential diagnoses and pharmacological management with clinical time spent in the emergent/urgent care and acute/primary care settings. The emphasis is on all three spheres of impact and the CNS competencies of Direct Care, Research, Collaboration, and Ethical Decision-Making/Moral Agency/Advocacy. The student should participate in direct interactions with patients and families, consultations, coaching, development of evidenced based policies/guidelines/protocols, educational guidance of other nursing personnel, and implementation of practices that improve quality and promote cost-effective outcomes.

Corequisite: NU 516

AHN 518 CNS Adult Geron Pract III 3 cr

The purpose of this precepted practicum course is to provide an immersion experience in the CNS role, in both the Acute Care setting and the Outpatient Primary or Specialty Care setting, through health promotion, disease management, acute and chronic illness care, and exacerbations of chronic illness management across the lifespan from adolescent to adult to older adult. The focus of the course is to develop the CNS's ability to assimilate and apply evidence-based information in nursing care activities, to appraise nursing practice standards and norms, and to influence organizations to support the delivery of nursing care and achieve optimal health outcomes. The emphasis of this course is on the patient, nurse, and organization/system spheres of impact and the CNS competencies of Direct Care and Coaching.

Prerequisite: NU 516 Minimum Grade of C and AHN 517 Minimum Grade of C and NU 607 Minimum Grade of C and NU 613 Minimum Grade of C and NU 610 Minimum Grade of C

Corequisite: NU 517

AHN 519 Diagnostic Reasoning and Advanced Patient Management for the Clinical Nurse Specialist 4 cr

The purpose of this elective course is for the CNS to integrate advanced pharmacology, pathophysiology, and assessment for the diagnosis and management of acute and chronic problems of the adolescent/adult/old adult patients across the continuum of health services. The course focuses on the formulation of differential diagnoses and the development of pharmacologic and non-pharmacologic plans of care for the individual patients rather than aggregates. The emphasis is placed on synthesis and application of evidence-based practice to the development of differential diagnoses as a basis for health promotion and management.

Corequisite: NU 516

AHN 520 AHN MSN Incomplete Extension 1-5 cr**AHN 530 Found Palliative Care/Adv Role 2 cr**

This didactic course prepares the advance practice palliative care student a forum for the evaluation of issues and trends encountered in palliative and end of life care. Students learn to coordinate and develop primary and palliative health care programs for patients and families across the lifespan. Emphasis is on critical analysis and management of issues in an interdisciplinary health care delivery system.

AHN 531 Adv Palliative Cr/End of Life 2 cr

This course provides students an in-depth study of the health care management for patients seeking palliative and end of life care. Emphasis is on the interaction among health care providers and psychological/spiritual care of the patient and family.

Prerequisite: AHN 530 Minimum Grade of C

AHN 532 Adv Chronic Illness Care 2 cr

This course provides a study of the illness trajectories of chronic diseases that are among the leading causes of death in our society. Assessment and management of the illnesses as well as associated pain and symptoms will be examined. The focus is on assisting patients, families, and other health professionals to anticipate/prevent/reduce adverse symptoms from life threatening illnesses to maximize quality of life across the lifespan.

Prerequisite: AHN 531 Minimum Grade of C

AHN 533 Adv Palliative Care Practicum 1-9 cr

This course provides a preceptor and faculty facilitated experience in which students have the opportunity to become proficient at providing comprehensive care to patients with serious illness by engaging in holistic assessment of pain and quality of life in a variety of settings. Advanced knowledge of palliative/end of life care will be integrated into assessing and managing the complex psychological, ethical, social, spiritual issues, and grief reactions while working as a member of a palliative care team.

Prerequisite: AHN 530 Minimum Grade of C

AHN 536 Adv Nsg Assessmnt Lifespan ENP 3 cr

The purpose of this course is to expand the GNP/APNP student's knowledge and skills for obtaining, recording, and analyzing a systemic health assessment of the older adult. Emphasis is placed on synthesis and application of nursing and related theories and scientific knowledge to the development of differential/nursing diagnoses as a basis for health promotion and management.

Prerequisite: NU 545 (may be taken concurrently) Minimum Grade of C and NU 578 (may be taken concurrently) Minimum Grade of C

Corequisite: AHN 537, AHN 538

AHN 537 Adv Nsg Assessmnt for ENP Prac 1 cr

This clinical course provides an environment for the opportunity to become proficient at obtaining and recording a systematic health history and advanced physical examination across the lifespan for clients from culturally diverse backgrounds in the emergency/urgent care setting. The focus is refinement of cognitive and clinical skills needed to provide comprehensive health assessments of individuals across the lifespan with a special emphasis on emergency, urgent, and ambulatory care.

Prerequisite: NU 545 (may be taken concurrently) Minimum Grade of C and NU 578 (may be taken concurrently) Minimum Grade of C

Corequisite: AHN 536, AHN 538

AHN 538 HPDP Dual Role (FNP/AGACNP) 2 cr

This didactic course prepares the Dual Role (Family NP/Adult-Gerontological Acute Care NP) student to identify and implement appropriate and culturally sensitive health promotion, health protection, and disease prevention strategies across the lifespan for clients in emergency, urgent, and ambulatory care settings. Emphasis is on health promotion, health protection, and disease prevention with strategic planning at the primary, secondary, and tertiary levels. Effective strategies for life-style behavioral changes will also be evaluated.

AHN 548 Family Prim Care NP I 4 cr

The purpose of this didactic course is to prepare (Family NP/Adult-Gerontological Acute Care NP) students to assess, diagnose, and manage selected health care needs of women and childbirth, infants, children, and families in a caring, competent manner. Emphasis is placed on (1) synthesis and application of nursing and related theories and scientific knowledge to the development of differential/nursing diagnoses as a basis for health promotion and management; (2) wellness and the pathophysiology and epidemiology underlying acute and chronic health problems; and (3) collaboration and communication among health care providers in a culturally diverse environment. The focus is on the advanced practice nursing of individuals and families in primary healthcare settings. Co-requisite: AHN 549 Pre-requisite NU 518 Minimum Grade C and NU 545 Minimum Grade of C

Prerequisite: (NU 518 (may be taken concurrently) Minimum Grade of C and NU 545 (may be taken concurrently) Minimum Grade of C and AHN 538 Minimum Grade of C)

Corequisite: AHN 549

AHN 549 Family Prim Care NP Prac I 4 cr

The purpose of this practicum course is to provide opportunities for Dual Role (Family NP/Adult-Gerontological Acute Care NP) students to apply concepts from AHN 548 in selected clinical settings. The emphasis is on culturally competent delivery of health care, diagnostic reasoning, and decision making/critical thinking through communication and collaboration. The focus is continued refinement of cognitive and clinical skills needed to provide comprehensive health assessments, diagnoses, and management of selected health care needs of women and childbirth, infants, children, and families in primary healthcare settings. Co-requisite: AHN 548

Prerequisite: (NU 578 Minimum Grade of C and AHN 538 Minimum Grade of C)

Corequisite: AHN 548

AHN 550 Family Prim Care NP II 4 cr

This didactic course prepares the Dual Role (Family NP/Adult-Gerontological Dual Role) students to identify and implement appropriate and culturally sensitive health promotion and disease prevention strategies across the lifespan for clients in emergency, urgent, and ambulatory care settings. Emphasis is placed on health promotion and disease prevention with strategic planning at the primary, secondary, and tertiary levels. Prevention, early diagnosis, prompt treatment, and in-depth patient education will be emphasized. Effective strategies for life-style behavioral changes will also be evaluated. Co-requisite: AHN 551 Pre-requisite: NU 578 Minimum Grade of C and AHN 548 Minimum Grade of C

Prerequisite: NU 578 (may be taken concurrently) Minimum Grade of C and AHN 548 Minimum Grade of C

Corequisite: AHN 551

AHN 551 Family Prim Care NP Pract II 5 cr

The purpose of this course is to provide a preceptor and faculty facilitated experience for Dual Role (Family NP/Adult-Gerontological Acute Care NP) students to practice within an advanced nursing framework. The focus is on the role of the Family Nurse Practitioner in the health care management of children, adults, and families in primary health care settings with the application and synthesis of knowledge and skills acquired from AHN 550 and previous courses. Emphasis is on leadership, professionalism, and collaboration with other health care providers in a culturally diverse environment. Co-requisite: AHN 550

Corequisite: AHN 550

AHN 552 Adult-Geron Acute Care NP I 4 cr

The purpose of this course is to prepare Dual Role (Family NP/Adult-Gerontological Acute Care NP) students to assess, diagnose, and manage selected health care needs of young and older adults across the wellness-illness continuum in a caring, competent manner. Emphasis is placed on (1) synthesis of theoretical, scientific, and contemporary clinical knowledge used to develop differential diagnoses as a basis for health promotion, disease prevention, and management; (2) wellness and the pathophysiology and epidemiology underlying complex acute, critical, and chronic illness, disability, and/or injury; and (3) collaboration using appropriate processes for patient-centered, quality care in a culturally diverse system. The focus is on advanced practice nursing with the entire adult-older adult age spectrum and families in emergency, urgent, and ambulatory settings. Co-requisite: AHN 553 Pre-requisite: AHN 538 Minimum Grade of C and AHN 549 Minimum Grade of C and AHN 551 Minimum Grade of C and NU 607 Minimum Grade of C and NU 608 Minimum Grade of C

Prerequisite: AHN 538 Minimum Grade of C and AHN 549 Minimum Grade of C and AHN 551 Minimum Grade of C and NU 607 (may be taken concurrently) Minimum Grade of C and NU 608 (may be taken concurrently) Minimum Grade of C

Corequisite: AHN 553

AHN 553 Adult-Ger Acute Care NP Pract I 4 cr

The purpose of this practicum course is to provide opportunities for Dual Role (Family NP/Adult-Gerontological Acute Care NP) students to apply concepts from AHN 552 in selected clinical settings. Emphasis is on critical thinking, diagnostic reasoning, differential diagnosis, communication, and collaboration in a culturally diverse system. The focus is refinement of cognitive and clinical skills needed to provide competent patient-centered care to young adults, adults, and older adults across the wellness-illness continuum with acute, critical and chronic illness, disability, and/or injury in emergency, urgent, and ambulatory care settings. Co-requisite: AHN 552

Corequisite: AHN 552

AHN 554 Adult-Geron Acute Care NP II 4 cr

The purpose of this didactic course is to (1) provide the Dual Role (Family NP/Adult-Gerontological Acute Care NP) students with an in-depth study of the health care management of young adults, adults, and older adults across the wellness-illness continuum and to (2) provide a forum for the critical analysis and evaluation of issues and trends encountered by the Adult-Gerontology Acute Care Nurse Practitioner in an interdisciplinary health care delivery system. Emphasis is on leadership and professionalism in a culturally diverse system. The focus is on ensuring quality, patient-centered care of the adult-older adult population with selected complex acute, critical and chronic illness, disability, and/or injury to improve health outcomes in emergency, urgent, and ambulatory settings. Co-requisite: AHN 555 Pre-requisite: AHN 552 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C

Prerequisite: AHN 552 Minimum Grade of C and NU 610 (may be taken concurrently) Minimum Grade of C and NU 613 (may be taken concurrently) Minimum Grade of C

Corequisite: AHN 555

AHN 555 Adlt-Ger Acute Care NP Prac II 5 cr

The purpose of this practicum course is to provide a preceptor and faculty facilitated experience for Dual Role (Family NP/Adult-Gerontological Acute Care NP) students to practice within an advanced nursing framework by synthesizing and applying the knowledge and skills required in AHN 554 and previous courses. Emphasis is on leadership, professionalism, and collaboration in a culturally diverse system. The focus is on implementing the role of the Adult-Gerontology Acute Care Nurse Practitioner in the health care management of young adults, adults, and older adults across the wellness-illness continuum with acute, critical and chronic illness, disability, and/or injury in emergency, urgent, and ambulatory health care settings. Co-requisite: AHN 554

Corequisite: AHN 554

AHN 558 Dual Role FNP Clin Progression 1-9 cr

The purpose of this progression practicum course is to facilitate student independence in the Dual Role Family Nurse Practitioner role. The focus is on the application and synthesis of knowledge and skills acquired in all previous courses and to develop the necessary skills to progress to the next level of competency in the Family Nurse Practitioner role of the Dual Role (FNP/AGACNP) program.

AHN 559 Dual Role-AGAC Cli Progression 1-4 cr

The purpose of this progression practicum is to facilitate student independence in the Nurse Practitioner role. The focus is on the application and synthesis of knowledge and skills acquired in all previous courses and to develop the necessary skills to progress to the next level of competency in the Dual Track AGACNP Nurse Practitioner role.

AHN 566 AG/ACNP Clinical Progression 1-4 cr

The purpose of this progression practicum is to facilitate student independence in the Adult-Geron Acute Care Nurse Practitioner role. The focus is on the application and synthesis of knowledge and skills acquired in all previous courses and develop the necessary skills to progress to the next level of competency in the Adult-Geron Acute Care Nurse Practitioner role.

AHN 568 Intro to Adult-Geron Acute NP 3 cr

The purpose of this first didactic course is to prepare the Adult-Gerontological Acute Care Nurse Practitioner students to assess, diagnose, and manage selected health care needs of adults and geriatrics. Emphasis is placed on synthesis and application of nursing and related theories and scientific knowledge to the development of differential/nursing diagnoses as a basis for health promotion and management.

Prerequisite: NU 545 (may be taken concurrently) Minimum Grade of C and NU 518 (may be taken concurrently) Minimum Grade of C

Corequisite: AHN 571

AHN 571 HPDP Adult-Geron Acute Care NP 2 cr

The purpose of this didactic course is to prepare the Adult-Gerontological Acute Care Nurse Practitioner student to identify and implement appropriate health promotion and disease prevention strategies in the adult and geriatric populations. The focus is on the advanced practice nursing of individuals and families in the acute care setting. Emphasis is placed on health promotion/disease prevention with strategic planning at the primary, secondary and tertiary levels of prevention. Various issues are explored pertinent to the advanced practice role.

Prerequisite: NU 578 Minimum Grade of C

Corequisite: AHN 568

AHN 572 Adult-Geron Acute NP I 3 cr

The purpose of this didactic course is to prepare Adult-Gerontological Acute Care Nurse Practitioner students to assess, diagnose, and manage selected health care needs of adults and geriatrics. The focus is on advanced practice nursing with adults and families in the acute care setting. Emphasis is placed on the wellness and the pathophysiology and epidemiology underlying acute and chronic health problems.

Prerequisite: AHN 568 Minimum Grade of C and NU 578 Minimum Grade of C

Corequisite: AHN 573

AHN 573 Adult-Geron Acute NP Prac I 3 cr

The purpose of this practicum course is to provide opportunities for students to apply concepts in select clinical settings. Focus is on adults and families in the acute care setting. The emphasis is on diagnostic reasoning and decision making/critical thinking.

Prerequisite: NU 578 Minimum Grade of C

Corequisite: AHN 572

AHN 574 Adult-Geron Acute NP II 3 cr

The purpose of this course is provide an in-depth study of the health care management of the Adult Geron Acute Care patient. Emphasis is on the interaction among health care providers in a culturally diverse environment.

Prerequisite: AHN 572 Minimum Grade of C

Corequisite: AHN 575

AHN 575 Adult-Geron Acute NP Prac II 3 cr

The purpose of this course is to provide an opportunity for the Adult Acute Care Nurse Practitioner student to practice within an advanced nursing framework. The focus is on the role of the advanced practice nurse in the health care management of adults. Emphasis is on collaboration with other health care providers in a culturally diverse environment.

Corequisite: AHN 574

AHN 576 Adult Geron Acute NP Prac III 4 cr

The purpose of this culminating course is to provide a preceptor and faculty facilitated experience in the Adult Geron Acute Care Nurse Practitioner role. The focus is on the application and synthesis of knowledge and skills acquired in all previous courses.

Prerequisite: (NU 607 Minimum Grade of C and AHN 574 Minimum Grade of C and AHN 575 Minimum Grade of C)

Corequisite: AHN 577

AHN 577 Adult Geron Acute NP III 3 cr

The purpose of this course is to provide a forum for the evaluation of issues and trends encountered in advanced adult gerontological acute care nursing. Emphasis is on a critical analysis and management of issues by the Adult Geron Acute Care Nurse Practitioner in an interdisciplinary health care delivery system.

Prerequisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and AHN 574 Minimum Grade of C)

Corequisite: AHN 576

AHN 581 HP/DP Adlt-Geron Prim Care NP 2 cr

The purpose of this didactic course is to prepare the Adult-Gerontological Primary Care Nurse Practitioner (AGPCNP) student with a knowledge base for identifying and implementing appropriate health promotion and disease prevention strategies with older adults. The focus is on the AGPCNP care of adults and older adults in multiple health care settings. Emphasis is placed on health promotion/disease prevention and related health issues with strategic planning at the primary, secondary, and tertiary levels of prevention. Various issues are explored which are pertinent to the AGPCNP's role in healthcare.

Corequisite: AHN 588, HSC 601

AHN 588 Intro to Adult-Geron Prim NP 2 cr

The purpose of this course is to expand the Adult-Gerontological Primary Care Nurse Practitioner (AGPCNP) student's knowledge and skills for obtaining, recording, and analyzing a systemic health assessment of the adult and older adult. Emphasis is placed on synthesis and application of nursing and related theories and scientific knowledge to the development of differential/nursing diagnoses as a basis for health promotion and management.

Prerequisite: NU 545 (may be taken concurrently) Minimum Grade of C and NU 518 (may be taken concurrently) Minimum Grade of C

Corequisite: AHN 581, HSC 601

AHN 591 Adult-Geron Prim NP I 2 cr

This didactic course prepares the Adult-Gerontological Primary Care Nurse Practitioner student to assess, diagnose, and manage selected health care needs of culturally diverse adult and well and frail geriatric populations. The focus is on the adult gerontological practice of nursing, for adults and their families in a variety of health care settings. Emphasis is placed on wellness, the pathophysiology and epidemiology underlying acute and chronic health problems with a focus on the unique health care needs of the older adult population.

Prerequisite: AHN 588 Minimum Grade of C and NU 578 (may be taken concurrently) Minimum Grade of C

Corequisite: AHN 592, HSC 602

AHN 592 Adlt-Geron Primary NP Pract I 3 cr

The purpose of this practicum course is to provide opportunities for the Adult-Gerontological Primary Care Nurse Practitioner (AGPCNP) student to apply concepts from AHN 591 in primary and acute care settings with adults and families experiencing health concerns. This clinical course will offer clinical hours for targeting adult health and gerontological health issues. Students will divide clinical hours between young adults, middle aged adults, and elders.

Prerequisite: NU 578 Minimum Grade of C

Corequisite: AHN 591, HSC 602

AHN 593 Adult-Gero Prim NP II 3 cr

The purpose of this course is to provide the Adult-Gerontological Primary Care Nurse Practitioner student an in-depth study of health care management of adults, well and frail elders, and their families within the framework of advanced nursing. The focus is on selected acute and chronic complex health care problems. Emphasis is on the interaction among health care providers in a culturally diverse environment.

Prerequisite: AHN 591 Minimum Grade of C

Corequisite: AHN 594

AHN 594 Adult-Geron Prim NP Prac II 3 cr

The purpose of this course is to provide opportunity for the adult-gerontological primary care nurse practitioner (AGPCNP) to practice within an advanced nursing framework. The focus is on the role of the AGPCNP in the health care management of adult and geriatric patients with physical and psychiatric-mental health concerns. Emphasis is on collaboration with other health care providers in a culturally diverse environment. This clinical course will offer experience with diverse populations including young and middle aged adults and elders in a variety of settings.

Corequisite: AHN 593

AHN 595 Adult-Gero Primary Care NP III 2 cr

The purpose of this course is to provide a forum for the evaluation of issues and trends encountered in adult and gerontological nursing care. Emphasis is on critical analysis and management of issues by the Adult-Gerontological Primary Care Nurse Practitioner (AGPCNP) in an interdisciplinary health care delivery system.

Prerequisite: AHN 593 Minimum Grade of C and NU 607 (may be taken concurrently) Minimum Grade of C and NU 608 (may be taken concurrently) Minimum Grade of C and NU 610 (may be taken concurrently) Minimum Grade of C and NU 613 (may be taken concurrently) Minimum Grade of C

Corequisite: AHN 596, HSC 603

AHN 596 Adult-Geron Prim NP Prac III 4 cr

The purpose of this culminating course is to provide a preceptor- and faculty facilitated experience in the Adult-Gerontological Primary Care Nurse Practitioner (AGPCNP) role. The focus is the application and synthesis of knowledge and skills acquired in all previous courses. Students will have clinical experiences with all ages of adults and elders in a variety of settings.

Prerequisite: NU 607 (may be taken concurrently) Minimum Grade of C

Corequisite: AHN 595, HSC 603

AHN 598 AG/PCNP Clinical Progression 1-4 cr

The purpose of this progression practicum is to facilitate student independence in the Adult-Geron Primary Care Nurse Practitioner role. The focus is on the application and synthesis of knowledge and skills acquired in all previous courses and to develop the necessary skills to progress to the next level of competency in the Adult-Geron Primary Care Nurse Practitioner role.

AHN 604 Adult-Geron Acute Care NP PP&D 3 cr

This course assists the Adult-Gerontological Acute Care Nurse Practitioner DNP student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the Adult-Gerontological Acute Care Nurse Practitioner students' selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination.

Prerequisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 (may be taken concurrently) Minimum Grade of C)

AHN 617 AG ACNP Residency I 3 cr

Theories of leadership, motivation, power, and change are used to influence change in health care organizations. This course will implement evidence-based clinical models and evaluate their effectiveness in health outcomes. The Adult-Geron Acute Care Nurse Practitioner student will synthesize, critique, and apply evidence to support quality clinical or organizational practices. In this mentored and supervised experience, the Adult-Geron Acute Care Nurse Practitioner student will work with the primary faculty advisor to complete projects and advance their selected practice area. The Adult-Geron Acute Care Nurse Practitioner student will have access to and authority for expanded scope of practice to master the DNP competencies. Residency sites will depend upon the Adult-Geron Acute Care Nurse Practitioner student's career trajectory and approval by collaborating faculty. During the residency semester, students must participate in scheduled scholarly seminars online. Direct practice/management is required.

Prerequisite: AHN 604 Minimum Grade of S and NU 615 (may be taken concurrently) Minimum Grade of C

AHN 618 AG ACNP Residency II 3 cr

Provides Adult-Gerontological Acute Care Nurse Practitioner students the opportunity to fully express all DNP competencies. The Adult-Gerontological Acute Care Nurse Practitioner student, guided by the faculty facilitator, will implement the scholarly doctoral system's change project.

Prerequisite: AHN 617 Minimum Grade of C and NU 616 (may be taken concurrently) Minimum Grade of C

AHN 619 AG ACNP Residency III 3 cr

Final course in residency series as Adult-Gerontological Acute Care Nurse Practitioner student continues to implement and evaluate project plan. Provides Adult-Geron Acute Care Nurse Practitioner student the opportunity to fully express all DNP competencies. The Adult-Gerontological Acute Care Nurse Practitioner student, guided by the core faculty and advisor, completes quality improvement evidence-based system's change project.

Prerequisite: AHN 618 Minimum Grade of C and NU 612 (may be taken concurrently) Minimum Grade of C

AHN 630 Dysrhythmias and the Heart 2 cr

The first of four cardiovascular specialization courses focuses on the development of a methodical approach to dysrhythmia interpretation. Emphasis is on diagnosis and management of the patient with cardiac dysrhythmias via an evidence-based approach.

AHN 631 Foundations of Cardiac Care 2 cr

This second of four cardiovascular specialization courses focuses on health promotion, prevention, health disparities and cultural competence for patients with common cardiovascular disorders. Emphasis is on cardiovascular nurse practitioner's role in managing patients as an integral part of the interdisciplinary health care team.

Prerequisite: AHN 630 (may be taken concurrently) Minimum Grade of C

AHN 632 Diag & Mgmt of Acute CVD 2 cr

The third of four cardiovascular specialization courses focuses on advanced healthcare management of patients with acute cardiovascular disorders. Emphasis is on diagnosis and management, to include assessment, diagnostic procedures, treatment and pharmacological management. Particular attention will be given to cardiovascular health disparities in a culturally diverse environment.

Prerequisite: AHN 631 Minimum Grade of C

AHN 633 Dig/Mgmt Complex CV Disorders 2 cr

The third of four cardiovascular specialization courses focuses on advanced healthcare management of patients with complex cardiovascular disorders. Emphasis is on diagnosis and management, to include assessment, diagnostic procedures, treatment and pharmacological management. Particular attention will be given to cardiovascular health disparities in a culturally diverse environment.

Prerequisite: AHN 632 Minimum Grade of C

AHN 634 Adult-Geron CNS PP&D 3 cr

This course assists the Adult-Gerontological Clinical Nurse Specialist DNP student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning development as a preliminary step to the Adult-Gerontological Clinical Nurse Specialist students' selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination.

Prerequisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 (may be taken concurrently) Minimum Grade of C)

AHN 635 Adult-Geron CNS Residency I 3 cr

Theories of leadership, motivation, power, and change are used to influence change in health care organizations. This course will implement evidence-based clinical models and evaluate their effectiveness in health outcomes. The Adult-Gerontological Clinical Nurse Specialist student will synthesize, critique, and apply evidence to support quality clinical or organizational practices. In this mentored and supervised experience, the Adult-Gerontological Clinical Nurse Specialist student will work with the primary faculty advisor to complete projects and advance their selected practice area. The Adult-Gerontological Clinical Nurse Specialist student will have access to and authority for expanded scope of practice to master the DNP competences. Residency sites will depend upon the Adult-Gerontological Clinical Nurse Specialist student's career trajectory and approval by collaborating faculty. During the residency semester, student must participate in scheduled scholarly seminars online. A total of 180 clinical hours of direct practice/management is required.

Prerequisite: AHN 634 Minimum Grade of S and NU 615 (may be taken concurrently) Minimum Grade of C

AHN 636 Adult-Geron CNS Residency II 3 cr

Provides Adult-Gerontological Clinical Nurse Specialist students the opportunity to fully express all DNP competencies. The Adult-Gerontological Clinical Nurse Specialist student, guided by the faculty facilitator, will implement the scholarly doctoral system's change project.

Prerequisite: AHN 635 Minimum Grade of C and NU 616 (may be taken concurrently) Minimum Grade of C

AHN 637 Adult-Geron CNS Residency III 3 cr

Final course in residency series as Adult-Gerontological Clinical Nurse Specialist student continues to implement and evaluate project plan. Provides Adult-Gerontological Clinical Nurse Specialist student the opportunity to fully express all DNP competencies. The Adult-Gerontological Clinical Nurse Specialist student, guided by the core faculty and advisor completes quality improvement evidence-based system's change project.

Prerequisite: AHN 636 Minimum Grade of C and NU 612 (may be taken concurrently) Minimum Grade of C

AHN 661 Exec Admin Proj Plan/Dev 3 cr

This course assists the Executive Nursing Administration DNP student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the Executive Nursing Administration students' selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination.

AHN 662 Ex Admin Residency I 3 cr

Theories of leadership, motivation, power, and change are used to influence change in health care organizations. This course will implement evidence-based clinical models and evaluate their effectiveness in health outcomes. The Executive Nursing Administration student will synthesize, critique, and apply evidence to support quality clinical or organizational practices. In this mentored and supervised experience, the Executive Nursing Administration student will work with the primary faculty advisor to complete projects and advance their selected practice area. The Executive Nursing Administration student will have access to and authority for expanded scope of practice to master the DNP competences. Residency sites will depend upon the Executive Nursing Administration student's career trajectory and approval by collaborating faculty. During the residency semester, Executive Nursing Administration student must participate in scheduled scholarly seminars online. A total of 180 clinical hours of direct practice/management is required.

Prerequisite: AHN 661 Minimum Grade of C and NU 608 Minimum Grade of C

AHN 663 Ex Admin Residency II 3 cr

Provides Executive Nursing Administration students the opportunity to fully express all DNP competencies. The student, guided by the faculty facilitator, will implement the scholarly doctoral system's change project.

Prerequisite: AHN 662 Minimum Grade of C

AHN 664 Ex Admin Residency III 3 cr

Final course in residency series as Executive Nursing Administration student continues to implement and evaluate project plan. Provides Executive Nursing Administration student the opportunity to fully express all DNP competencies. The Executive Nursing Administration student, guided by the core faculty and advisor completes quality improvement evidence-based system's change project.

Prerequisite: AHN 663 Minimum Grade of C

AHN 670 AG-ACNP(DR) PP&D 3 cr

This course assists the DNP student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the students' selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination.

Prerequisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 (may be taken concurrently) Minimum Grade of C)

AHN 671 AG/ACNP (DR) Residency I 3 cr

Theories of leadership, motivation, power, and change are used to influence change in health care organizations. In this course, students will implement evidence-based clinical models and evaluate their effectiveness in health outcomes. The student will synthesize, critique, and apply evidence to support quality clinical or organizational practices. In this mentored and supervised experience, the student will work with the primary faculty advisor to develop a project to advance system's change in their selected practice area. The student will have access to and authority for expanded scope of practice to master all DNP competencies. Residency sites will depend upon the student's career trajectory and approval by collaborating faculty. During the residency semester, student must participate in scheduled scholarly seminars online. A total of 180 clinical hours of direct practice/management is required.

Prerequisite: (NU 608 Minimum Grade of C and AHN 670 Minimum Grade of S and NU 615 (may be taken concurrently) Minimum Grade of C)

AHN 672 AG-ACNP (DR) Residency II 3 cr

In this mentored and supervised experience, students will work with the primary faculty advisor to implement a scholarly project to advance system's change in their selected practice area. The student will have access to and authority for expanded scope of practice to master all DNP competencies. Residency sites will depend upon the student's career trajectory and approval by collaborating faculty. During the residency semester, students must participate in scheduled scholarly seminars online. A total of 180 clinical hours of direct/practice management is required.

Prerequisite: (NU 616 (may be taken concurrently) Minimum Grade of C and AHN 671 Minimum Grade of C)

AHN 673 AG-ACNP(DR) Residency III 3 cr

Final course in residency series as student continues to implement and evaluate project plan. Provides the student the opportunity to fully express all DNP competencies. The student, guided by the core faculty advisor, completes a quality improvement, evidence-based system's change project.

Prerequisite: (NU 612 (may be taken concurrently) Minimum Grade of C and AHN 671 Minimum Grade of C and AHN 672 Minimum Grade of C)

AHN 680 Family NP (DR) PP&D 3 cr

This course assists the DNP student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the students' selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, and a plan for evaluation and dissemination.

Prerequisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 (may be taken concurrently) Minimum Grade of C)

AHN 681 Family NP (DR) Residency I 3 cr

Theories of leadership, motivation, power, and change are used to influence change in health care organizations. In this course, students will implement evidence-based clinical models and evaluate their effectiveness in health outcomes. The student will synthesize, critique, and apply evidence to support quality clinical or organizational practices. In this mentored and supervised experience, the student will work with the primary faculty advisor to develop a project to advance system's change in their selected practice area. The student will have access to and authority for expanded scope of practice to master all DNP competencies. Residency sites will depend upon the student's career trajectory and approval by collaborating faculty. During the residency semester, student must participate in scheduled scholarly seminars online. A total of 180 clinical hours of direct practice/management is required.

Prerequisite: (AHN 680 Minimum Grade of S and NU 608 Minimum Grade of C and NU 615 (may be taken concurrently) Minimum Grade of C)

AHN 682 FNP (DR) Residency II 3 cr

In this mentored and supervised experience, students will work with the primary faculty advisor to implement a scholarly project to advance system's change in their selected practice area. The student will have access to and authority for expanded scope of practice to master all DNP competencies. Residency sites will depend upon the student's career trajectory and approval by collaborating faculty. During the residency semester, students must participate in scheduled scholarly seminars online. A total of 180 clinical hours of direct practice/management is required.

Prerequisite: (AHN 681 Minimum Grade of C and NU 616 (may be taken concurrently) Minimum Grade of C)

AHN 683 FNP (DR) Residency III 3 cr

Final course in residency series as student continues to implement and evaluate project plan. Provides the student the opportunity to fully express all DNP competencies. The student, guided by the core faculty and advisor, completes a quality improvement, evidence-based system's change project.

Prerequisite: (AHN 682 Minimum Grade of C and NU 612 (may be taken concurrently) Minimum Grade of C)

AHN 692 AHN DNP Incomplete Extension 3 cr

Students will register for this course to complete residency course work under supervision of faculty. Students must remain continuously enrolled until all residency requirements are completed.

AHN 693 Adult-Geron Primary NP PP&D 3 cr

This course assists the Adult-Geron Primary Care Nurse Practitioner student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the Adult-Geron Primary Care Nurse Practitioner students' selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination.

Prerequisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 (may be taken concurrently) Minimum Grade of C)

AHN 694 Adult-Gero Primary Cr NP Res I 3 cr

Theories of leadership, motivation, power, and change are used to influence change in health care organizations. This course will implement evidence-based clinical models and evaluate their effectiveness in health outcomes. The Adult-Geron Primary Care Nurse Practitioner student will synthesize, critique, and apply evidence to support quality clinical or organizational practices. In this mentored and supervised experience, the Adult-Geron Primary Care Nurse Practitioner student will work with the primary faculty advisor to complete projects and advance their selected practice area. The Adult-Geron Primary Care Nurse Practitioner student will have access to and authority for expanded scope of practice to master the DNP competencies. Residency sites will depend upon the Adult-Geron Primary Care Nurse Practitioner student's career trajectory and approval by collaborating faculty. During the residency semester, student must participate in scheduled scholarly seminars online. Clinical hours of direct practice/management is required.

Prerequisite: AHN 693 Minimum Grade of S and NU 615 (may be taken concurrently) Minimum Grade of C

AHN 695 Adlt-Gero Primary Cr NP Res II 3 cr

Provides Adult-Geron Primary Care Nurse Practitioner students the opportunity to fully express all DNP competencies. The Adult-Geron Primary Care Nurse Practitioner student, guided by the faculty facilitator, will implement the scholarly doctoral system's change project.

Prerequisite: AHN 694 Minimum Grade of C and NU 616 (may be taken concurrently) Minimum Grade of C

AHN 696 Adlt-Gero Prim Care NP Res III 3 cr

Final course in residency series as Adult-Geron Primary Care Nurse Practitioner student continues to implement and evaluate project plan. Provides Adult-Geron Primary Care Nurse Practitioner student the opportunity to fully express all DNP competencies. The Adult-Geron Primary Care Nurse Practitioner student, guided by the core faculty and advisor completes quality improvement evidence-based system's change project.

Prerequisite: AHN 695 Minimum Grade of C and NU 612 (may be taken concurrently) Minimum Grade of C

Comm Mental Health Nurs (CMN)**CMN 350 Psy-Mental Health Nsg 2 cr**

Analysis of theories, concepts, evidence, issues and trends from contemporary nursing science and related disciplines in promoting the health of individuals and families experiencing psychiatric-mental health concerns. The emphasis is on the use of the nursing process and other systematic approaches to plan, implement, and evaluate health promotion and maintenance activities, illness care, and rehabilitation with individuals and families experiencing psychiatric-mental health concerns in a variety of acute and community settings.

Prerequisite: (NU 311 Minimum Grade of C and NU 312 Minimum Grade of C and NU 325 Minimum Grade of C)

Corequisite: CMN 351

CMN 351 Psy-Mental Health Nsg Clin 2 cr

The purpose of this course is to provide students the opportunity to analyze theories, concepts, research, and issues and trends in psychiatric-mental health nursing. The focus of the course is on internal and external factors affecting the mental health of children, adolescents, adults, elderly, and families. The emphasis is on the role of the professional nurse in health promotion and maintenance, illness care, and rehabilitation of children, adolescents, adults, elderly, and families experiencing psychiatric-mental health concerns.

Prerequisite: (NU 311 Minimum Grade of C and NU 312 Minimum Grade of C and NU 325 Minimum Grade of C)

Corequisite: CMN 350

CMN 420 Community Health Nursing 3 cr

The purpose of this course is to provide students an opportunity to explore community health nursing concepts and principles from a population health care perspective. The changing needs of an increasingly culturally diverse population within the social context of the community systems are examined along with the environmental, economical, political, and legal constraints to the health of systems.

Prerequisite: AHN 447 (may be taken concurrently) Minimum Grade of C and AHN 448 (may be taken concurrently) Minimum Grade of C and CMN 350 Minimum Grade of C and CMN 351 Minimum Grade of C and (MCN 352 Minimum Grade of C and MCN 353 Minimum Grade of C and MCN 354 Minimum Grade of C and MCN 355 Minimum Grade of C)

Corequisite: CMN 421

CMN 421 Community Health Nurs Clinical 1 cr

The purpose of this course is to provide students the opportunity to complete a clinical project integrating community health nursing concepts and principles from an aggregate health care perspective. The changing needs of an increasingly culturally diverse population within the social context of the community are examined. Course content includes environmental, economical, political, and legal constraints to the health of aggregates.

Prerequisite: AHN 447 (may be taken concurrently) Minimum Grade of C and AHN 448 (may be taken concurrently) Minimum Grade of C and CMN 350 Minimum Grade of C and CMN 351 Minimum Grade of C and MCN 352 Minimum Grade of C and MCN 353 Minimum Grade of C and MCN 354 Minimum Grade of C and MCN 355 Minimum Grade of C

Corequisite: CMN 420

CMN 520 CMN MSN Incomplete Extension 1-5 cr**CMN 548 Introduction to PMHNP 3 cr**

The purpose of this first didactic course is to prepare the Psychiatric-Mental Health Nurse Practitioner students to assess, diagnose, and manage selected health care needs of individuals across the lifespan. Emphasis is placed on synthesis and application of nursing and related theories and scientific knowledge to the development of differential/nursing diagnoses as a basis for health promotion and management.

Prerequisite: NU 545 (may be taken concurrently) Minimum Grade of C and NU 518 (may be taken concurrently) Minimum Grade of C

Corequisite: CMN 551

CMN 550 PMHNP Clinical Progression 1-4 cr

The purpose of this progression course is to provide opportunities for Psychiatric-Mental Health Nurse Practitioner students to apply concepts from PMHNP I in primary and acute care mental health settings with individuals and their families experiencing psychiatric-mental health concerns across the lifespan.

CMN 551 HPDP & Issues for the PMHNP 2 cr

This didactic course prepares the Psychiatric-Mental Health Nurse Practitioner student to identify and implement appropriate and culturally sensitive health promotion and disease prevention strategies of individuals and families across the lifespan in primary care settings. Emphasis is placed on health promotion/disease prevention with strategic planning at the primary, secondary, and tertiary levels.

Corequisite: CMN 548

CMN 552 PMHNP I 3 cr

This didactic course prepares the Psychiatric-Mental Health Nurse Practitioner student to assess, diagnose, and manage selected health care needs of culturally diverse populations across the life span. The focus is on advanced practice nursing with individuals and families in a variety of health care settings. Emphasis is placed on wellness and the pathophysiology and epidemiology underlying acute and chronic psychiatric-mental health problems.

Prerequisite: CMN 548 Minimum Grade of C and NU 578 (may be taken concurrently) Minimum Grade of C

Corequisite: CMN 553

CMN 553 PMHNP Practicum I 3 cr

The purpose of this practicum course is to provide opportunities for Psychiatric-Mental Health Nurse Practitioner students to apply concepts in primary and acute care settings with individuals and their families experiencing psychiatric-mental health concerns across the lifespan.

Prerequisite: NU 578 Minimum Grade of C

Corequisite: CMN 552

CMN 554 PMHNP II 3 cr

The purpose of this course is to provide the Psychiatric-Mental Health Nurse Practitioner student an in-depth study of psychiatric-mental health care management of individuals and their families across the lifespan within the framework of advanced nursing. The focus is on selected acute and chronic complex psychiatric-mental health care problems. Emphasis is on the interaction among health care providers in a culturally diverse environment.

Prerequisite: CMN 552 Minimum Grade of C

Corequisite: CMN 555

CMN 555 PMHNP Practicum II 3 cr

The purpose of this course is to provide opportunity for the Psychiatric-Mental Health Nurse Practitioner student to practice within advanced nursing framework. The focus is on the role of the advanced practice nurse in the health care management of individuals with psychiatric-mental health concerns across the lifespan. Emphasis is on collaboration with other health care providers in a culturally diverse environment.

Corequisite: CMN 554

CMN 556 PMHNP Practicum III 4 cr

The purpose of this culminating course is to provide a preceptor and faculty facilitated experience in the Psychiatric-Mental Health Nurse Practitioner role. The focus is on the application and synthesis of knowledge and skills acquired in all previous courses.

Prerequisite: CMN 554 Minimum Grade of C and NU 610 (may be taken concurrently) Minimum Grade of C or NU 607 (may be taken concurrently) Minimum Grade of C or NU 608 (may be taken concurrently) Minimum Grade of C or NU 613 (may be taken concurrently) Minimum Grade of C

Corequisite: CMN 557

CMN 557 PMHNP III 3 cr

The purpose of this course is to provide a forum for the evaluation of issues and trends encountered in the Psychiatric-Mental Health Nurse Practitioner role. Emphasis is on critical analysis and management of issues by the Psychiatric-Mental Health Nurse Practitioner in an interdisciplinary health care delivery system.

Prerequisite: NU 607 (may be taken concurrently) Minimum Grade of C and NU 608 (may be taken concurrently) Minimum Grade of C and NU 610 (may be taken concurrently) Minimum Grade of C and NU 613 (may be taken concurrently) Minimum Grade of C

Corequisite: CMN 556

CMN 566 Family NP Clin Progression 1-9 cr

The purpose of this practicum course is to provide opportunities for the Family Nurse Practitioner to apply concepts from previous courses and CMN 572, 574, or 577 in select clinical settings. Focus is on individuals and families in primary care settings. The emphasis is on diagnostic reasoning and decision-making/critical-thinking.

CMN 568 Intro to Family NP 3 cr

The purpose of this first didactic course is to prepare Advanced Family Nurse Practitioner students to assess, diagnose, and manage selected health care needs of adults and children. Emphasis is placed on synthesis and application of nursing and related theories and scientific knowledge to the development of differential/nursing diagnoses as a basis for health promotion and management.

Prerequisite: NU 545 (may be taken concurrently) Minimum Grade of C and NU 518 (may be taken concurrently) Minimum Grade of C

Corequisite: CMN 571

CMN 571 HPDP in Family NP 2 cr

The purpose of this didactic course is to prepare the Advanced Family Nurse Practitioner student to identify and implement appropriate and culturally competent health promotion and disease prevention strategies across the lifespan. The focus is on the advanced practice nursing of individuals and families in primary care settings. Emphasis is placed on health promotion/disease prevention with strategic planning at the primary, secondary, and tertiary levels of prevention. Prevention, early diagnosis, prompt treatment, and in-depth patient education with dysmetabolic syndrome and diabetes will be emphasized. Effective strategies for life-style behavior change will also be evaluated.

Corequisite: CMN 568

CMN 572 Family NP I 3 cr

This didactic course prepares the Advanced Family Nurse Practitioner student to assess, diagnose, and manage selected health care needs of culturally diverse populations across the lifespan. The focus is on the advanced practice nursing of individuals and families in primary care settings. Emphasis is placed on wellness and the pathophysiology and epidemiology underlying acute and chronic health problems.

Prerequisite: CMN 568 Minimum Grade of C and NU 578 (may be taken concurrently) Minimum Grade of C

Corequisite: CMN 573

CMN 573 Family NP Pract I 3 cr

This practicum course provides opportunities for the Advanced Family Nurse Practitioner to apply concepts in select clinical settings. Focus is on individuals and families in primary care settings. The emphasis is on culturally competent delivery of health care, diagnostic reasoning and decision making/critical thinking.

Prerequisite: NU 578 Minimum Grade of C

Corequisite: CMN 572

CMN 574 Family NP II 3 cr

This course provides an in-depth study of the health care management of children, adults, and families within the framework of advanced nursing. Emphasis is on the interaction among health care providers in a culturally diverse environment. The focus is on selected acute and chronic complex health problems of children, adults, and families in primary health care settings.

Prerequisite: CMN 572 Minimum Grade of C

Corequisite: CMN 575

CMN 575 Family NP Prac II 3 cr

This practicum course provides an opportunity for the Advanced Family Nurse Practitioner student to practice within an advanced nursing framework. The focus is on the role of the advanced practice nurse in the health care management of children, adults, and families. Emphasis is on collaboration with other health care providers in a culturally diverse environment.

Corequisite: CMN 574

CMN 576 Family NP Pract III 4 cr

The purpose of this practicum course is to provide opportunities for the Family Nurse Practitioner student to apply concepts from CMN 577 and previously required courses in select clinical settings. Focus is on individuals and families in primary care settings. The emphasis is on diagnostic reasoning and decision making/critical thinking.

Prerequisite: NU 607 (may be taken concurrently) Minimum Grade of C and NU 608 (may be taken concurrently) Minimum Grade of C

Corequisite: CMN 577

CMN 577 Family NP III 3 cr

The purpose of this course is to provide a forum for the evaluation of issues and trends encountered in health care. Emphasis is on critical analysis and management of these issues by the Advanced Family Nurse Practitioner student in an interdisciplinary health care system.

Prerequisite: NU 607 (may be taken concurrently) Minimum Grade of C and NU 608 (may be taken concurrently) Minimum Grade of C and NU 610 (may be taken concurrently) Minimum Grade of C and NU 613 (may be taken concurrently) Minimum Grade of C

Corequisite: CMN 576

CMN 604 PMHNP PP&D 3 cr

This course assists the Family Psych Mental Health Nurse Practitioner student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the Family Psych Mental Health Nurse Practitioner student's selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination.

Prerequisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 (may be taken concurrently) Minimum Grade of C)

CMN 617 PMHNP Residency I 3 cr

Theories of leadership, motivation, power, and change are used to influence change in health care organizations. This course will implement evidence-based clinical models and evaluate their effectiveness in health outcomes. The Family Psych Nurse Practitioner student will synthesize, critique, and apply evidence to support quality clinical or organizational practices. In this mentored and supervised experience, the Nurse Practitioner DNP student will work with the primary faculty advisor to complete projects and advance their selected practice area. The Nurse Practitioner student will have access to and authority for expanded scope of practice to master the DNP competences. Residency sites will depend upon the student's career trajectory and approval by collaborating faculty. During the residency semester, students must participate in scheduled scholarly seminars online. Clinical hours of direct practice/management is required.

Prerequisite: CMN 604 Minimum Grade of S and NU 615 (may be taken concurrently) Minimum Grade of C

CMN 618 PMHNP Residency II 3 cr

Provides students the opportunity to fully express all DNP competencies. The student, guided by the faculty facilitator, will implement the scholarly doctoral system's change project.

Prerequisite: CMN 617 Minimum Grade of C and NU 616 (may be taken concurrently) Minimum Grade of C

CMN 619 PMHNP Residency III 3 cr

Final course in residency series as student continues to implement and evaluate project plan. Provides student the opportunity to fully express all DNP competencies. The student, guided by the core faculty and advisor, completes quality improvement evidence-based system's change project.

Prerequisite: CMN 618 Minimum Grade of C and NU 612 (may be taken concurrently) Minimum Grade of C

CMN 643 Public Health Admin PP&D 3 cr

This course assists the public health nursing administration DNP student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the public health students' selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination.

Prerequisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 (may be taken concurrently) Minimum Grade of C)

CMN 644 Public Health Residency I 3-6 cr

Theories of leadership, motivation, power, and change are used to influence change in health care organizations. This course will implement evidence-based clinical models and evaluate their effectiveness in health outcomes. The public health nursing administration student will synthesize, critique, and apply evidence to support quality clinical or organizational practices. In this mentored and supervised experience, the public health nursing administration DNP student will work with the primary faculty advisor to complete projects and advance their selected practice area. The public health nursing administration student will have access to and authority for expanded scope of practice to master the DNP competences. Residency sites will depend upon the public health nursing administration student's career trajectory and approval by collaborating faculty. During the residency semester, student must participate in scheduled scholarly seminars online. Clinical hours of direct practice/management is required.

Prerequisite: CMN 643 Minimum Grade of S and NU 615 (may be taken concurrently) Minimum Grade of C

CMN 645 Public Health Residency II 3-6 cr

Provides public health nursing administration students the opportunity to fully express all DNP competencies. The public health nursing administration student, guided by the faculty facilitator, will implement the scholarly doctoral system's change project.

Prerequisite: CMN 644 Minimum Grade of C and NU 616 (may be taken concurrently) Minimum Grade of C

CMN 646 Public Health Residency III 3-6 cr

Final course in residency series, the public health nursing administration student continues to implement and evaluate project plan. Provides public health nursing administration student the opportunity to fully express all DNP competencies. The public health nursing administration student, guided by the core faculty and advisor completes quality improvement evidence-based system's change project.

Prerequisite: CMN 645 Minimum Grade of C and NU 612 (may be taken concurrently) Minimum Grade of C

CMN 680 Family NP PP&D 3 cr

This course assists the family nurse practitioner student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the family nurse practitioner students' selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination.

Prerequisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 (may be taken concurrently) Minimum Grade of C)

CMN 681 Family NP Residency I 3 cr

Theories of leadership, motivation, power, and change are used to influence change in health care organizations. This course will implement evidence-based clinical models and evaluate their effectiveness in health outcomes. The family nurse practitioner student will synthesize, critique, and apply evidence to support quality clinical or organizational practices. In this mentored and supervised experience, the family nurse practitioner student will work with the primary faculty advisor to complete projects and advance their selected practice area. The student will have access to and authority for expanded scope of practice to master the DNP competencies. Residency sites will depend upon the family nurse practitioner student's career trajectory and approval by collaborating faculty. During the residency semester, student must participate in scheduled scholarly seminars online. A total of 180 clinical hours of direct practice/management is required.

Prerequisite: CMN 680 Minimum Grade of S and NU 615 (may be taken concurrently) Minimum Grade of C

CMN 682 Family NP Residency II 3 cr

Provides family nurse practitioner students the opportunity to fully express all DNP competencies. The family nurse practitioner student, guided by the faculty facilitator, will implement the scholarly doctoral system's change project.

Prerequisite: CMN 681 Minimum Grade of C and NU 616 (may be taken concurrently) Minimum Grade of C

CMN 683 Family NP Residency III 3 cr

Final course in residency series, the family nurse practitioner student continues to implement and evaluate project plan. This course provides the family nurse practitioner student the opportunity to fully express all DNP competencies. The family nurse practitioner student, guided by the core faculty and advisor completes quality improvement evidence-based system's change project.

Prerequisite: CMN 682 Minimum Grade of C and NU 612 (may be taken concurrently) Minimum Grade of C

CMN 692 CMN DNP Incomplete Extension 3 cr

Students will register for this course to complete residency course work under supervision of faculty. Students must remain continuously enrolled until all residency requirements are completed.

Health Sciences (HSC)**HSC 101 Interprofessional Freshman Sem 2 cr**

The purpose of this course is to introduce the unique requirements and opportunities of the Health Sciences Division to beginning students who have declared or are considering a Health Science major (Nursing, Medicine, Pharmacy, Allied Health Professions, etc.). The course focuses on the value of higher education as a base for a career in Health Sciences and develops an awareness of activities and support services available within the University to enhance student success. Academic rules, regulations and policies related to admission, progression, and graduation in the University and Colleges of Nursing, Medicine, and Allied Health Professions are discussed.

Cross-Listed: AHP 101

HSC 324 Death and Dying 2 cr

Provides the student an opportunity to analyze theories, concepts, socioethical issues, and research related to dying and death. Focus is on assisting students to explore their feelings regarding death as well as developing self-awareness of the feelings of patients and families. Emphasis is on the acceptance of the process of mourning and death and applicable nursing interventions. Elective.

HSC 332 Diet Therapy 2 cr

The purpose of this course is to provide students the opportunity to explore the therapeutic use of nutrients and diets in the hospital and community settings. Emphasis is on the development of skills associated with dietary management for individuals across a wellness-illness continuum and all age and cultural groups. Prerequisite: Admission to Professional Component or special permission of instructor.

Prerequisite: NU 325 Minimum Grade of C and NU 327 Minimum Grade of C and (HSC 343 Minimum Grade of C or HSC 243 Minimum Grade of C) and NU 311 Minimum Grade of C and HSC 342 Minimum Grade of C

Corequisite: NU 300, NU 301

HSC 342 Administration of Medication 1 cr

The purpose of this course is to prepare the student to accurately calculate medication dosages. Mathematical and metric apothecary concepts are stressed.

HSC 343 Clinical Pharmacology 3 cr

The purpose of the course is to provide the student with the opportunity to acquire information related to the clinical application of drug therapy and the concepts relating to the mechanisms of drug actions, interactions and adverse reactions, including the immunologic-idiosyncratic-allergic responses. Emphasis is on the current evidence related to pharmacokinetics, dosage, methods of administration, and adverse effects of major classifications of drugs to inform nursing care. Prerequisites: Admission to Professional Component or special permission of instructor.

Prerequisite: (NU 311 (may be taken concurrently) and NU 325 (may be taken concurrently))

HSC 343B Clinical Pharmacology 3 cr

The purpose of the course is to provide students with the opportunity to acquire information related to clinical application of drug therapy and concepts relating to the mechanisms of drug actions, interactions and adverse reactions, including the immunologic-idiosyncratic-allergic responses. Emphasis is placed on current evidence related to pharmacokinetics, dosage, methods of administration, and adverse effects of major classifications of drugs to inform nursing care. Restricted to students enrolled in RN to BSN programs.

Cross-Listed: HSC 343

HSC 385 Study Abroad Public Healthcare 3 cr**HSC 390 Special Topics - 1-9 cr**

Selected topics in Health Sciences. Requires special permission. Variable title and 1 to 9 variable credit hours.

HSC 400 Gender Discrim and Healthcare 3 cr

The purpose of this course is to provide students with an overview of gender discrimination and disparities in healthcare, with special attention to the intersection of gender and other vulnerable social identities (i.e., historically marginalized identities). Students will learn to identify instances of gender discrimination and disparities across the full gender spectrum, and to advocate for equitable healthcare.

HSC 401 Diversity, Equity, and Inclusion in Healthcare 1 cr

Healthcare professionals must be equipped to provide care to a diverse, multicultural population. This course will introduce diversity, equity, and inclusion terminology and examine its relationship in providing equitable and quality healthcare. Content includes topics related to but is not limited to implicit bias, cultural diversity, social determinants of health and healthcare discrimination.

HSC 450 Ethical Consider Care of Aging 3 cr

Interdisciplinary course on a critical investigation of ethical issues across the lifespan and on application of ethical principles.

HSC 500 Address Gender Discrimination 3 cr

The purpose of this course is to provide students with an overview of historical and current manifestations of gender discrimination and disparities in healthcare, with special attention to the intersection of gender and other vulnerable social identities (i.e., historically marginalized identities). Students will learn to trace historical discriminatory healthcare practices to modern indications of gender discrimination and disparities across the full gender spectrum, and to advocate for and implement equitable healthcare.

HSC 501 Found of Diversity Healthcare 2 cr

In a multicultural society, healthcare professionals must be able to work with patients and colleagues from a variety of backgrounds. This course will provide students with theoretical knowledge and introduce practical skills necessary to understand and promote diversity, equity and inclusion in healthcare. The course will introduce diversity, equity, and inclusion terminology and examine implicit biases, historical and institutionalized bias, and discrimination influencing health and healthcare in the community.

HSC 502 Diversity Equity & Inclusion 2 cr

The purpose of this course is for program participants to examine population-focused health disparities and the role of policy, socioeconomics, the environment, and the medical community in their origin and continuation. This course encourages students to reflect on the responsibility to provide culturally competent care as an expression of their professional values. The emphasis is on forming an evidence-based foundation for knowledge, attitude, and skill transformation that can reduce the incidence of suboptimal outcomes among certain groups through improved policy, clinical decision-making, and cross-cultural interactions with clients.

Prerequisite: (HSC 501 (may be taken concurrently) Minimum Grade of C)

HSC 503 Curr Issues & Trends Diversity 2 cr

This course will focus on issues and trends involving diversity, equity, and inclusion from a variety of healthcare perspectives. Students will reflect on current and critical topics and engage in online discussions about how these topics impact healthcare. The course provides a broader perspective of emerging issues and trends through interactive activities and community-based projects.

Prerequisite: (HSC 501 (may be taken concurrently) Minimum Grade of C)

HSC 504 Lead&Change Mang Adv Diversity 2 cr

This course will focus on leading and influencing change and fostering inclusive climates at the organizational and community level.

Prerequisite: (HSC 501 (may be taken concurrently) Minimum Grade of C)

HSC 510 IPT for TI-IBH Primary Care 1 cr

The purpose of this course is to prepare the healthcare professional for interprofessional practice within integrated behavioral health settings. This course will bring together students from multiple professional disciplines to learn about, from and with each other in service to promote effective clinical collaboration within behavioral health settings. Emphasis is on the team-based collaboration within administrative, screening, and intervention roles as trauma-informed behavioral health providers in integrated settings serving youth.

HSC 511 IPT Telehealth Deliv TI-IBH 1 cr

The purpose of this didactic course is preparation of delivery of team-based, trauma-informed integrated behavioral healthcare in telehealth settings across the lifespan. This course is available to students from multidisciplinary professions, to fully embody the spirit of integrated, interprofessional care.

HSC 512 TI-MI in IBH Seminar 1 cr

The purpose of this course is to offer interprofessional practice preparation within an integrated behavioral health setting. This course will bring together students from multiple disciplines to learn about, from, and with each other in the service of enabling effective motivational interviewing within integrated behavioral health settings. Emphasis is on motivational interviewing during screening, intake, intervention and trauma-informed care as behavioral health providers in integrated settings serving across the life-span.

HSC 571 Managing Healthcare Personnel 3 cr

The purpose of this course is to analyze frameworks for managing health care personnel. The course focuses on exploration and application of human resource management. Emphasis within the course is placed on leadership, communication, relationship management, diversity, legal and ethical principles, and workforce planning and maintenance.

HSC 573 Resp Prescrib Common Used Drug 1 cr

This course allows the student to become familiar with most-prescribed drugs in several areas including cardiac, respiratory, psychiatric, endocrine and gastrointestinal medicine. The student will examine use of commonly-prescribed agents in diverse patient populations, focusing on drug selection, dosing, laboratory values and follow-up. Additionally, the process of drug development will be studied, so that the student may become familiar with rationales for drugs coming to market, pricing, and ethical use.

Prerequisite: NU 578 Minimum Grade of C

HSC 580 OUD/SUD Prevention/Screening 2 cr

This course serves as a one of three courses in the Addictions Subspecialty nursing program. The purpose of this didactic course is preparation of OUD/SUD Screening in integrated health care and telehealth settings across the lifespan. While preparation is across the life span, emphasis will be focused on child, adolescent, and transitional age-populations. This course is available to students from any health-related discipline, to fully embody the spirit of integrated, interprofessional care.

HSC 581 OUD/SUD Assessment/Treatment 2 cr

This course serves as a one of three courses in the Addictions Subspecialty nursing program. The purpose of this didactic course is preparation of OUD/SUD Assessment and Treatment in integrated health care and telehealth settings across the lifespan. While preparation is across the life span, emphasis will be focused on child, adolescent, and transitional age-populations. This course is available to students from any health-related discipline, to fully embody the spirit of integrated, interprofessional care.

Prerequisite: (HSC 580 Minimum Grade of C)

HSC 582 OUD/SUD Recovery/Sys Practice 2 cr

This course serves as a one of three courses in the Addictions Subspecialty nursing program. The purpose of this didactic course is preparation of OUD/SUD recovery in integrated health care and telehealth settings across the lifespan. While preparation is across the life span, emphasis will be focused on child, adolescent, and transitional age-populations. This course is available to students from any health-related discipline, to fully embody the spirit of integrated, interprofessional care.

Prerequisite: (HSC 580 Minimum Grade of C and HSC 581 Minimum Grade of C)

HSC 585 Study Abroad Public Healthcare 3 cr

The purpose of this course for the undergraduate/graduate student is to develop an improved understanding of culture, to recognize any cultural practices that affect health care and other professions, and to incorporate this understanding into the provision of care.

HSC 590 Special Topics 1-6 cr

Study of topics significant to the health professions. Content varies and may be repeated.

HSC 595 Evidence Basd Lipid Practice 2 cr

This course serves as a foundational course in the Clinical Lipidology Subspecialty program. The purpose of this didactic course is to prepare the Clinical Lipid Specialist student to evaluate CVD epidemiology, cardiometabolic risk, and evidence based lipid practice in those with selected health care needs across the lifespan.

HSC 596 Adv Vascular Biology 2 cr

This course serves as a foundational course in the Clinical Lipidology Subspecialty program. The purpose of this didactic course is to prepare the Clinical Lipid Specialist student to evaluate lipoprotein metabolism and vascular biology in those with selected health care needs across the lifespan.

HSC 597 Adv Pharm Complex Dyslipidemia 2 cr

This course serves as a foundational course in the Clinical Lipidology Subspecialty program. The purpose of this didactic course is to prepare the Clinical Lipid Specialist student to evaluate advanced pharmacologic options in treating those with selected health care needs across the lifespan.

Prerequisite: (HSC 595 Minimum Grade of C and HSC 596 (may be taken concurrently) Minimum Grade of C)

HSC 598 Diag/Mgt C-plex Dyslipidemia 2 cr

This course serves as a final course in the Clinical Lipidology Subspecialty program. The purpose of this didactic course is to prepare the Clinical Lipid Specialist student to evaluate and manage complex dyslipidemia in those with selected health care needs across the lifespan.

Prerequisite: HSC 597 Minimum Grade of C

HSC 601 Intro to Introprofessional Ed 1 cr

The purpose of this course is to introduce students to the concepts of interprofessional education. Students will gain an understanding of their own role in healthcare as well as the scope of the role of another health profession. Students will learn how to function in an interprofessional team and carry this knowledge, skill, and value into their future practice, ultimately providing interprofessional patient care as part of a collaborative team that is focused on improving patient outcomes. Interprofessional teams are composed of members from different health professions who have specialized knowledge, skills, and abilities with the goal of providing patient-centered care in a collaborative manner. The team establishes a common goal and using their individual expertise, and works in concert to achieve patient-centered care. In this model, joint decision making is valued and each team member is empowered. Students will be introduced to core competencies in interprofessional care and utilize Fennel's Four Phase Model for understanding and treating multiple chronic conditions for adults, elders, and returning veterans.

Corequisite: AHN 581, AHN 588

HSC 602 Team Building 1 cr

This online course will allow students to examine the specific impact of cultural, ethical, and religious factors on ethical health-care decision-making and focuses on the relationships among the professions, joint relationships with patients, the quality of cross-professional exchanges, and interprofessional considerations in health care delivery and in formulating public health policies, programs, and services. The focus of the course is derived from the approach utilized in the Core Competencies for Interprofessional Collaborative Practice (2016). Structured content introduces the topic and will allow teams of students to practice problem solving and ethical decision-making within an interprofessional team.

Prerequisite: HSC 601 Minimum Grade of C

Corequisite: AHN 591, AHN 592

HSC 603 Assmnt Vulnerable Populations 1 cr

This online interdisciplinary course will implement evidence based and collaborative models to assess the needs of vulnerable populations who have multiple physical needs such as those evidenced by adults, elders, and returning veterans with multiple chronic illnesses and/or acute injury. The student will synthesize, critique, and apply evidence to improve patient care outcomes. The student will work in groups to complete an assessment of need for vulnerable patient populations.

Prerequisite: HSC 602 Minimum Grade of C

Corequisite: AHN 595, AHN 596

HSC 690 Special Topics- 1-9 cr

Study of health professional topics at the doctoral level. Credit hours will vary based on student need and depth of course subject matter. Content will vary and may be repeated up to 9 credits. Requires special permission.

Maternal Child Nursing (MCN)**MCN 352 OB & GYN Nursing Care 2 cr**

Analysis of theories, concepts, evidence, and issues and trends in professional nursing care of the obstetric or gynecologic client and their families. Emphasis on the use of the nursing process and other systematic approaches to plan, implement, and evaluate health promotion and maintenance activities, illness care, and rehabilitation with individuals and families in various stages of pregnancy and childbirth, as well as the gynecologic care of women in a variety of acute and community settings.

Prerequisite: (NU 300 Minimum Grade of C and NU 301 Minimum Grade of C and CMN 350 (may be taken concurrently) Minimum Grade of C and CMN 351 (may be taken concurrently) Minimum Grade of C)

Corequisite: MCN 353

MCN 353 OB & GYN Nsg Care Clinical 2 cr

The purpose of this course is to provide students the opportunity to engage in clinical practice with obstetric and gynecologic clients and their families. Emphasis is on the role of the professional nurse in the application of concepts and theories related to health promotion and maintenance, illness care and rehabilitation with obstetric and gynecologic clients.

Prerequisite: (NU 300 Minimum Grade of C and NU 301 Minimum Grade of C and CMN 350 (may be taken concurrently) Minimum Grade of C and CMN 351 (may be taken concurrently) Minimum Grade of C)

Corequisite: MCN 352

MCN 354 Pediatric Nursing Care 2 cr

Analysis of theories, concepts, evidence, and issues and trends in professional nursing care of the pediatric client and their family. Emphasis on the use of the nursing process and other systematic approaches to plan, implement, and evaluate health promotion and maintenance activities, illness care, and rehabilitation with clients and families in various stages of development.

Prerequisite: (NU 300 Minimum Grade of C and NU 301 Minimum Grade of C and CMN 350 (may be taken concurrently) Minimum Grade of C and CMN 351 (may be taken concurrently) Minimum Grade of C)

Corequisite: MCN 355

MCN 355 Pediatric Nsg Care Clinical 2 cr

The purpose of this course is to provide students the opportunity to engage in clinical practice with the pediatric client and their family. Emphasis is on the role of the professional nurse in the application of concepts and theories related to health promotion and maintenance, illness care, and rehabilitation of clients and families in various stages of development.

Prerequisite: (NU 300 Minimum Grade of C and NU 301 Minimum Grade of C and CMN 350 (may be taken concurrently) Minimum Grade of C and CMN 351 (may be taken concurrently) Minimum Grade of C)

Corequisite: MCN 354

MCN 520 MCN MSN Incomplete Extension 1-5 cr**MCN 538 Intro to Women's Health NP 3 cr**

The purpose of this course is to expand the Women's Health Nurse Practitioner student's knowledge and skills for obtaining, recording and analyzing a systematic health assessment of women. Emphasis is on the synthesis and application of nursing and related theories and scientific knowledge to the development of differential/nursing diagnoses as a basis for health promotion and management.

Prerequisite: NU 545 (may be taken concurrently) Minimum Grade of C and NU 518 (may be taken concurrently) Minimum Grade of C

Corequisite: MCN 541

MCN 540 Women's Hlth NP CI Progression 1-4 cr

The purpose of this progression practicum is to facilitate student independence in the Women's Health Nurse Practitioner role. The focus is on the application and synthesis of knowledge and skills acquired in all previous courses and to develop the necessary skills to progress to the next level of competency in the Women's Health Nurse Practitioner role.

MCN 541 HPDP Women's Health NP 2 cr

The purpose of this didactic course is to prepare the Women's Nurse Practitioner student to identify and implement appropriate health promotion and disease prevention strategies across the lifespan. The focus is on the advanced practice nursing of individuals and families in primary care settings. Emphasis is placed on health promotion/disease prevention with strategic planning at the primary, secondary and tertiary levels of prevention. Various issues are explored pertinent to the advanced practice role.

Corequisite: MCN 538

MCN 542 Women's Health NP I 3 cr

The purpose of this didactic course is to prepare the Women's Health Nurse Practitioner student to assess, diagnose, and manage selected health care needs of women. The focus is on advanced practice nursing with women primary, acute, and chronic health care settings. Emphasis is on wellness and the pathophysiology and epidemiology underlying acute and chronic health problems.

Prerequisite: MCN 538 Minimum Grade of C and NU 578 (may be taken concurrently) Minimum Grade of C

Corequisite: MCN 543

MCN 543 Women's Health NP Pract I 3 cr

The purpose of this practicum course is to provide opportunities for the Women's Health Nurse Practitioner student to apply concepts from MCN 542 Advanced Women's Health Nursing II in select clinical settings. Focus is on advanced practice nursing with women and families in primary, acute, and chronic health care settings. The emphasis is on diagnostic reasoning and decision making/critical thinking.

Prerequisite: NU 578 Minimum Grade of C

Corequisite: MCN 542

MCN 544 Women's Health NP II 3 cr

The purpose of this course is to provide the Women's Health Nurse Practitioner student an in-depth study of the health care management of women within the framework of advanced nursing. The focus is on selected acute and chronic complex health care problems. Emphasis is on the interaction among health care providers in a culturally diverse environment.

Prerequisite: MCN 542 Minimum Grade of C

Corequisite: MCN 545

MCN 545 Women's Health NP Pract II 3 cr

The purpose of this course is to provide opportunity for the Women's Health Nurse Practitioner student to practice within an advanced nursing framework. The focus is on the role of the advanced practice nurse in the health care management of women. Emphasis is on collaboration with other health care providers in a culturally diverse environment.

Corequisite: MCN 544

MCN 546 Women's Health NP Prac III 4 cr

The purpose of this culminating course is to provide a preceptor and faculty facilitated experience in the Women's Health Nurse Practitioner role. The focus is on the application and synthesis of knowledge and skills acquired in all previous courses.

Prerequisite: MCN 544 Minimum Grade of C and NU 608 (may be taken concurrently) Minimum Grade of C and NU 607 (may be taken concurrently) Minimum Grade of C

Corequisite: MCN 547

MCN 547 Women's Health NP III 3 cr

The purpose of this course is to provide a forum for the evaluation of issues and trends encountered in advanced women's health nursing care. Emphasis is on critical analysis and management of issues by the Women's Health Nurse Practitioner student in an interdisciplinary health care system.

Prerequisite: NU 607 (may be taken concurrently) Minimum Grade of C and NU 608 (may be taken concurrently) Minimum Grade of C and NU 610 (may be taken concurrently) Minimum Grade of C and NU 613 (may be taken concurrently) Minimum Grade of C

Corequisite: MCN 546

MCN 548 Intro to Ped Primary Care NP 3 cr

The purpose of this first didactic course is to prepare Pediatric Primary Care Nurse Practitioner students to assess, diagnose, and manage selected health care needs of children. Emphasis is placed on synthesis and application of nursing and related theories and scientific knowledge to development of differential diagnoses as a basis for health promotion and management.

Prerequisite: NU 545 (may be taken concurrently) Minimum Grade of C and NU 518 (may be taken concurrently) Minimum Grade of C

Corequisite: MCN 551

MCN 551 HPDP Pediatric Primary Care NP 2 cr

The purpose of this didactic course is to prepare the Pediatric Primary Care Nurse Practitioner student to identify and implement appropriate health promotion and disease prevention strategies for children from birth to adolescence. The focus is on the advanced practice nursing of children and families in primary care settings. Emphasis is placed on health promotion/disease prevention with strategic planning at the primary, secondary, and tertiary levels of prevention. Various issues are explored pertinent to the advanced practice role.

Corequisite: MCN 548

MCN 552 Pediatric Prim Care NP I 3 cr

The purpose of this didactic course is to prepare the Pediatric Primary Care Nurse Practitioner student to assess, diagnose, and manage selected health care needs of children from birth to school age. The focus is on advanced practice nursing with children and families in primary care settings. Emphasis is on the wellness, and the pathophysiology and epidemiology underlying acute and chronic health problems.

Prerequisite: MCN 548 Minimum Grade of C and NU 578 (may be taken concurrently) Minimum Grade of C

Corequisite: MCN 553

MCN 553 Ped Prim Care NP Prac I 3 cr

The purpose of this practicum course is to provide opportunities for the Pediatric Primary Care Nurse Practitioner student to apply concepts in select clinical settings. Focus is on advanced practice nursing with children and families in primary care settings. The emphasis is on diagnostic reasoning and decision making/critical thinking.

Prerequisite: NU 578 Minimum Grade of C

Corequisite: MCN 552

MCN 554 Pediatric Primary Care NP II 3 cr

The purpose of this course is to provide the Pediatric Primary Care Nurse Practitioner student an in-depth study of the health care management of children from school age to adolescence within the framework of advanced nursing. The focus is on selected acute and chronic complex health problems. Emphasis is on the interaction among health care providers in a culturally diverse environment.

Prerequisite: MCN 552 Minimum Grade of C

Corequisite: MCN 555

MCN 555 Ped Prim Care NP Prac II 3 cr

The purpose of this course is to provide opportunity for the Pediatric Primary Care Nurse Practitioner student to practice within an advanced nursing framework. The focus is on the role of the advanced practice nurse in the health care management of children. Emphasis is on collaboration with other health care providers in a culturally diverse environment.

Corequisite: MCN 554

MCN 556 Ped Prim Care NP Pract III 4 cr

The purpose of this culminating course is to provide a preceptor and faculty facilitated experience in the Pediatric Primary Care Nurse Practitioner role. The focus is on the application and synthesis of knowledge and skills acquired in all previous courses.

Prerequisite: MCN 554 Minimum Grade of C and NU 608 (may be taken concurrently) Minimum Grade of C and NU 607 (may be taken concurrently) Minimum Grade of C

Corequisite: MCN 557

MCN 557 Pediatric Primary Care NP III 3 cr

The purpose of this course is to provide a forum for the evaluation of issues and trends encountered in advanced pediatric primary care health nursing. Emphasis is on critical analysis and management of issues by the Pediatric Primary Care Nurse Practitioner in an interdisciplinary health care delivery system.

Prerequisite: NU 607 (may be taken concurrently) Minimum Grade of C and NU 608 (may be taken concurrently) Minimum Grade of C and NU 610 (may be taken concurrently) Minimum Grade of C and NU 613 (may be taken concurrently) Minimum Grade of C

Corequisite: MCN 556

MCN 558 Intro Pediatric Acute Care NP 3 cr

The course will introduce the Acute Pediatric Nurse Practitioner student to entry level NP decision making, evidenced based practice, documentation and resource optimization with an introductory emphasis on critical thinking skills in the development of appropriate history and examination, assessment, differential diagnosis, as well as diagnostic and treatment plans for pediatric patients in primary and acute care settings, as they prepare to start clinical rotations.

Prerequisite: NU 518 (may be taken concurrently) Minimum Grade of C and NU 545 (may be taken concurrently) Minimum Grade of C

Corequisite: MCN 571

MCN 561 Peds Acute NP Clin Progression 1-4 cr

This course provides an opportunity for the Acute Care Pediatric Nurse Practitioner student to apply more clinical time so as to master clinical concepts and improve competence before moving on to the subsequent term, or in their last clinical course before graduation.

MCN 562 Pediatric Acute Care NP I 3 cr

This course provides Acute Care Pediatric Nurse Practitioner students to assess, diagnose, and manage selected health care needs of children. The focus is on advanced practice nursing with children and families in acute care settings, evaluation diagnostic probability, evidenced based care and managing both inpatient and primary health care needs. Emphasis is placed on wellness, pathophysiology and epidemiology underlying acute and chronic health problems, as well as diagnostic reasoning, articulation of evidence based management plans, decision making, critical thinking and resource optimization.

Prerequisite: MCN 558 Minimum Grade of C and NU 578 (may be taken concurrently) Minimum Grade of C and MCN 571 Minimum Grade of C
Corequisite: MCN 563

MCN 563 Ped Acute Care NP Prac I 3 cr

This course provides an opportunity for the Acute Care Pediatric Nurse Practitioner student to apply concepts from Acute Care Pediatric Nurse Practitioner I course in select clinical inpatient and outpatient settings. The emphasis is on diagnostic reasoning, articulation of evidence based management plans, decision making, critical thinking and resource optimization. Practicum experiences will include primary care, inpatient hospitalist rotations, pediatric surgery rotations and urgent care rotations.

Prerequisite: NU 578 Minimum Grade of C
Corequisite: MCN 562

MCN 564 Pediatric Acute Care NP II 3 cr

This course prepares Acute Care Pediatric Nurse Practitioner students to assess, diagnose, and manage selected health care needs of both acute and chronically ill children, focusing on technology dependent children, hematology, transplant, infectious disease as well as those with hematological, medical and surgical emergencies. Emphasis is on diagnostic reasoning, articulation of evidence based management plans, decision making, critical thinking and resource optimization.

Prerequisite: MCN 562 Minimum Grade of C and MCN 563 Minimum Grade of C
Corequisite: MCN 565

MCN 565 Ped Acute Care NP Prac II 3 cr

This course provides an opportunity for the Acute Care Pediatric Nurse Practitioner student to apply concepts from Acute Care Pediatric Nurse Practitioner II in select clinical inpatient and outpatient settings. The emphasis is on diagnostic reasoning, articulation of evidence based management plans, decision making, critical thinking and resources optimization. Practicum experiences will include chronic subspecialty clinics and inpatient environments.

Prerequisite: MCN 562 Minimum Grade of C and MCN 563 Minimum Grade of C
Corequisite: MCN 564

MCN 566 Ped Acute Care NP Pract III 4 cr

This course provides an opportunity for the Acute Care Pediatric Nurse Practitioner student to apply concepts from Acute Care Pediatric Nurse Practitioner III in select clinical inpatient and outpatient settings. The emphasis is on diagnostic reasoning, decision making/critical thinking and resource utilization. Practicum experiences will include emergency departments and critical care/intensive care units.

Prerequisite: MCN 564 Minimum Grade of C and MCN 565 Minimum Grade of C or NU 607 (may be taken concurrently) Minimum Grade of C or NU 608 (may be taken concurrently) Minimum Grade of C or NU 610 (may be taken concurrently) Minimum Grade of C or NU 613 (may be taken concurrently) Minimum Grade of C
Corequisite: MCN 567

MCN 567 Pediatric Acute Care NP III 3 cr

This course prepares the Acute Care Pediatric Nurse Practitioner student to appropriately assess, diagnose and manage selected acute, emergent, unstable and life threatening pediatric health care conditions, focusing on psychiatric emergencies, trauma, shock, burns, organ failure, toxicology/ingestions, environmental exposures, neurological presentations, as well as those requiring life support and end of life/palliative care, as the student prepares to graduate and assume a professional ACPNP role. The focus is on application and synthesis of knowledge and skills acquired in all previous courses.

Prerequisite: NU 607 (may be taken concurrently) Minimum Grade of C and NU 608 (may be taken concurrently) Minimum Grade of C and NU 610 (may be taken concurrently) Minimum Grade of C and NU 613 (may be taken concurrently) Minimum Grade of C and MCN 564 Minimum Grade of C and MCN 565 Minimum Grade of C
Corequisite: MCN 566

MCN 568 Intro to Neonatal NP 3 cr

The purpose of this first didactic course is to prepare Advanced Neonatal Nurse Practitioner students to assess, diagnose, and manage selected health care needs of neonates. Emphasis is placed on synthesis and application of nursing and related theories and scientific knowledge to the development of differential/nursing diagnoses as a basis for health promotion and management.

Prerequisite: NU 545 (may be taken concurrently) Minimum Grade of C and NU 518 (may be taken concurrently) Minimum Grade of C
Corequisite: MCN 571

MCN 571 HPDP NNP/Peds Acute NP 2 cr

The purpose of this didactic course is to prepare the Neonatal and Acute Care Pediatric Nurse Practitioner students to identify and implement appropriate health promotion and disease prevention strategies for the neonate to age 21 years. The focus is on the advanced practice nursing of individuals and families in primary care settings. Emphasis is placed on health promotion/disease prevention with strategic planning at the primary, secondary and tertiary levels of prevention. Various issues are explored pertinent to the advanced practice role.

MCN 572 Neonatal NP I 3 cr

The purpose of this didactic course is to prepare the Advanced Neonatal Nurse Practitioner student to assess, diagnose, and manage selected health care needs of neonates. The focus is on neonates and families in primary, acute, and chronic health care settings. Emphasis is placed on wellness and the pathophysiology and epidemiology underlying acute and chronic health problems.

Prerequisite: MCN 568 Minimum Grade of C and NU 578 (may be taken concurrently) Minimum Grade of C
Corequisite: MCN 573

MCN 573 Neonatal NP Pract I 3 cr

The purpose of this practicum course is to provide opportunities for the Advanced Neonatal Nurse Practitioner student to apply concepts in select clinical settings. Focus is on advanced nursing practice with neonates and their families in primary, acute, and chronic health care settings. The emphasis is on diagnostic reasoning and decision making/critical thinking.

Prerequisite: NU 578 Minimum Grade of C

Corequisite: MCN 572

MCN 574 Neonatal NP II 3 cr

The purpose of this course is to provide the Advanced Neonatal Nurse Practitioner student an in-depth study of the neonate within the framework of nursing. The focus is on selected acute and chronic complex health problems of neonates in the primary, acute, and chronic care settings. Emphasis is on the interaction among health care providers in a culturally diverse environment.

Prerequisite: MCN 572 Minimum Grade of C

Corequisite: MCN 575

MCN 575 Neonatal NP Prac II 3 cr

The purpose of this course is to provide opportunity for the Advanced Neonatal Nurse Practitioner student to practice within an advanced nursing framework. The focus is on the role of the advanced practice nurse in the management of the neonate. Emphasis is on collaboration with other health care providers in a culturally diverse environment.

Corequisite: MCN 574

MCN 576 Neonatal NP Pract III 4 cr

The purpose of this culminating course is to provide a preceptor-faculty facilitated experience in the Advanced Neonatal Nurse Practitioner role. The focus is on the application and synthesis of knowledge and skills acquired in all previous courses.

Prerequisite: MCN 574 Minimum Grade of C and NU 607 (may be taken concurrently) Minimum Grade of C and NU 608 (may be taken concurrently) Minimum Grade of C

Corequisite: MCN 577

MCN 577 Neonatal NP III 3 cr

The purpose of this course is to provide a forum of the evaluation of issues and trends encountered in advanced neonatal nursing care. Emphasis is on critical analysis and management of issues by the Advanced Neonatal Nurse Practitioner in an interdisciplinary health care system.

Prerequisite: NU 607 (may be taken concurrently) Minimum Grade of C and NU 608 (may be taken concurrently) Minimum Grade of C and NU 610 (may be taken concurrently) Minimum Grade of C and NU 613 (may be taken concurrently) Minimum Grade of C

Corequisite: MCN 576

MCN 578 Neonatal NP Clin Progression 1-4 cr

The purpose of this culminating course is to provide a preceptor-faculty supervised experience in the Neonatal Nurse Practitioner role with a focus on the application and synthesis of knowledge and skills acquired in all previous courses.

MCN 581 Peds Primary NP CI Progression 1-4 cr

The purpose of this progression practicum is to facilitate student independence in the Pediatric Primary Care Nurse Practitioner role. The focus is on the application and synthesis of knowledge and skills acquired in all previous courses and to develop the necessary skills to progress to the next level of competency in the Pediatric Primary Care Nurse Practitioner role.

MCN 604 Pediatric Acute Care NP PP&D 3 cr

This course assists the Pediatric Acute Care Nurse Practitioner DNP student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the Acute Care Pediatric Nurse Practitioner students' selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination.

Prerequisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 (may be taken concurrently) Minimum Grade of C)

MCN 617 Pediatric Acute Care NP Res I 3 cr

Theories of leadership, motivation, power, and change are used to influence change in health care organizations. This course will implement evidence-based clinical models and evaluate their effectiveness in health outcomes. The student will synthesize, critique, and apply evidence to support quality clinical or organizational practices. In this mentored and supervised experience, the student will work with the primary faculty advisor to complete projects and advance their selected practice area. The student will have access to and authority for expanded scope of practice to master the DNP competencies. Residency sites will depend upon the student's career trajectory and approval by collaborating faculty. During the residency semester, students must participate in scheduled scholarly seminars online. Clinical hours of direct practice/management is required.

Prerequisite: MCN 604 Minimum Grade of S and NU 615 (may be taken concurrently) Minimum Grade of C

MCN 618 Pediatric Acute Care NP Res II 3 cr

Provides students the opportunity to fully express all DNP competencies. The student, guided by the faculty facilitator, will implement the scholarly doctoral system's change project.

Prerequisite: MCN 617 Minimum Grade of C and NU 616 (may be taken concurrently) Minimum Grade of C

MCN 619 Pediatric Acute Care NP Res III 3 cr

Final course in residency series as student continues to implement and evaluate project plan. Provides student the opportunity to fully express all DNP competencies. The student, guided by the core faculty and advisor, completes quality improvement evidence-based system's change project.

Prerequisite: MCN 618 Minimum Grade of C and NU 612 (may be taken concurrently) Minimum Grade of C

MCN 644 Women's Health NP PP&D 3 cr

This course assists the women's health nurse practitioner DNP student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the women's health nurse practitioner student's selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination.

Prerequisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 (may be taken concurrently) Minimum Grade of C)

MCN 645 Women's Health NP Residency I 3 cr

Theories of leadership, motivation, power, and change are used to influence change in health care organizations. This course will implement evidence-based clinical models and evaluate their effectiveness in health outcomes. The women's health nurse practitioner student will synthesize, critique, and apply evidence to support quality clinical or organizational practices. In this mentored and supervised experience, the women's health nurse practitioner student will work with the primary faculty advisor to complete projects and advance their selected practice area. The women's health nurse practitioner student will have access to and authority for expanded scope of practice to master the DNP competencies. Residency sites will depend upon the women's health nurse practitioner student's career trajectory and approval by collaborating faculty. During the residency semester, the women's health nurse practitioner student must participate in scheduled scholarly seminars online. Clinical hours of direct practice/management is required.

Prerequisite: MCN 644 Minimum Grade of S and NU 615 (may be taken concurrently) Minimum Grade of C

MCN 646 Women's Health NP Residency II 3 cr

Provides women's health nurse practitioner students the opportunity to fully express all DNP competencies. The women's health nurse practitioner student, guided by the faculty facilitator, will implement the scholarly doctoral system's change project.

Prerequisite: MCN 645 Minimum Grade of C and NU 616 (may be taken concurrently) Minimum Grade of C

MCN 647 Women's Health NP Res III 3 cr

Final course in residency series as women's health nurse practitioner student continues to implement and evaluate project plan. Provides women's health nurse practitioner student the opportunity to fully express all DNP competencies. The women's health nurse practitioner student, guided by the core faculty and advisor completes quality improvement evidence-based system's change project.

Prerequisite: MCN 646 Minimum Grade of C and NU 612 (may be taken concurrently) Minimum Grade of C

MCN 654 Pediatric Primary Care NP PP&D 3 cr

This course assists the pediatric primary care nurse practitioner DNP student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the pediatric primary care nurse practitioner student's selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination.

Prerequisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 (may be taken concurrently) Minimum Grade of C)

MCN 655 Ped Prim Care NP Residency I 3 cr

Theories of leadership, motivation, power, and change are used to influence change in health care organizations. This course will implement evidence-based clinical models and evaluate their effectiveness in health outcomes. The pediatric primary care nurse practitioner student will synthesize, critique, and apply evidence to support quality clinical or organizational practices. In this mentored and supervised experience, the pediatric primary care nurse practitioner student will work with the primary faculty advisor to complete projects and advance their selected practice area. The pediatric primary care nurse practitioner student will have access to and authority for expanded scope of practice to master the DNP competencies. Residency sites will depend upon the pediatric primary care nurse practitioner student's career trajectory and approval by collaborating faculty. During the residency semester, the pediatric primary care nurse practitioner student must participate in scheduled scholarly seminars online. Clinical hours of direct practice/management is required.

Prerequisite: MCN 654 Minimum Grade of S and NU 615 (may be taken concurrently) Minimum Grade of C

MCN 656 Ped Primary Care NP Res II 3 cr

Provides pediatric primary care nurse practitioner students the opportunity to fully express all DNP competencies. The pediatric primary care nurse practitioner student, guided by the faculty facilitator, will implement the scholarly doctoral system's change project.

Prerequisite: MCN 655 Minimum Grade of C and NU 616 (may be taken concurrently) Minimum Grade of C

MCN 657 Ped Primary Care NP Res III 3 cr

Final course in residency series as the Pediatric Primary Care Nurse Practitioner student continues to implement and evaluate project plan. Provides the Pediatric Primary Care Nurse Practitioner student the opportunity to fully express all DNP competencies. The Pediatric Primary Care Nurse Practitioner student, guided by the core faculty and advisor completes quality improvement evidence-based system's change project.

Prerequisite: MCN 656 Minimum Grade of C and NU 612 (may be taken concurrently) Minimum Grade of C

MCN 674 Neonatal NP PP&D 3 cr

This course assists the neonatal nurse practitioner DNP student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the neonatal nurse practitioner students' selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination.

Prerequisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 (may be taken concurrently) Minimum Grade of C)

MCN 675 NNP Residency I 3 cr

Theories of leadership, motivation, power, and change are used to influence change in health care organizations. This course will implement evidence-based clinical models and evaluate their effectiveness in health outcomes. The neonatal nurse practitioner student will synthesize, critique, and apply evidence to support quality clinical or organizational practices. In this mentored and supervised experience, the neonatal nurse practitioner student will work with the primary faculty advisor to complete projects and advance their selected practice area. The neonatal nurse practitioner student will have access to and authority for expanded scope of practice to master the DNP competences. Residency sites will depend upon the neonatal nurse practitioner student's career trajectory and approval by collaborating faculty. During the residency semester, the neonatal nurse practitioner student must participate in scheduled scholarly seminars online. Clinical hours of direct practice/management is required.

Prerequisite: MCN 674 Minimum Grade of S and NU 615 (may be taken concurrently) Minimum Grade of C

MCN 676 NNP Residency II 3 cr

Provides neonatal nurse practitioner students the opportunity to fully express all DNP competencies. The neonatal nurse practitioner student, guided by the faculty facilitator, will implement the scholarly doctoral system's change project.

Prerequisite: MCN 675 Minimum Grade of C and NU 616 (may be taken concurrently) Minimum Grade of C

MCN 677 NNP Residency III 3 cr

Final course in residency series as neonatal nurse practitioner student continues to implement and evaluate project plan. Provides neonatal nurse practitioner student the opportunity to fully express all DNP competences. The neonatal nurse practitioner student, guided by the core faculty and advisor completes quality improvement evidence-based system's change project.

Prerequisite: MCN 676 Minimum Grade of C and NU 612 (may be taken concurrently) Minimum Grade of C

MCN 692 MCN DNP Incomplete Extension 3 cr

Students will register for this course to complete residency course work under supervision of faculty. Students must remain continuously enrolled until all residency requirements are completed.

Nursing (NU)**NU 101 Freshman Seminar in Nursing 2 cr**

The purpose of this course is to introduce the unique requirements and opportunities of professional nursing to beginning students who have declared nursing as their major and are considering nursing as a major. The course focuses on the value of higher education as a base for a career in nursing and develops an awareness of activities and support services available within the University to enhance student success. Academic rules and regulations and policies related to admission, progression, and graduation in the University and College are discussed.

NU 300 Foundations of Prof Nsg 5 cr

The purpose of the course is to provide students the opportunity to appraise theories, concepts, evidence, issues and trends in promoting the health of an adult-geron population experiencing commonly occurring health care needs. Emphasis is on the use of the nursing process and other systematic approaches to assess, plan, implement, and evaluate health promotion and maintenance activities, illness care, and rehabilitation with adults in a variety of acute and community settings.

Prerequisite: NU 325 Minimum Grade of C and NU 327 Minimum Grade of C and HSC 343 Minimum Grade of C and NU 311 Minimum Grade of C and HSC 342 Minimum Grade of C

Corequisite: NU 301

NU 301 Foundations of Prof Nsg Clin 3 cr

Application of concepts and theories related to health promotion and maintenance, illness care, and rehabilitation with an adult-geron population experiencing commonly occurring health care needs.

Emphasis is the role of the professional nurse and on the use of the nursing process with an adult-geron population in a variety of acute and community based settings.

Prerequisite: NU 325 Minimum Grade of C and NU 327 Minimum Grade of C and (HSC 243 Minimum Grade of C or HSC 343 Minimum Grade of C) and NU 311 Minimum Grade of C and HSC 342 Minimum Grade of C

Corequisite: NU 300

NU 302 Essentials of Professional Nsg 4 cr

The purpose of this course is to provide an overview of pathophysiology, pharmacology, clinical skills assessment, and medication administration. The course focuses on the responsibility of the professional nurse in ensuring quality and safety.

Prerequisite: (NU 325 (may be taken concurrently) or NU 311 (may be taken concurrently)) and (NU 327 (may be taken concurrently) or HSC 343 (may be taken concurrently))

NU 303 Essen of Medical-Surgical Nsg 4 cr

The purpose of this course is to provide an overview of pathophysiology, pharmacology, clinical skills assessment, and medication administration within the medical-surgical nursing environment. The course focuses on the responsibility of the professional nurse in ensuring quality and safety in providing medical-surgical care for diverse populations across the lifespan.

NU 304 Evidence Based Practice NU- W 3 cr

The purpose of this course is to introduce evidence-based practice (EBP), including the basic components of the research process to the undergraduate nursing student. Emphasis within the course is on evaluation of research relevant to nursing practice, and the implications of its application to care provided to the patient. Implications of research and EBP are examined, including the roles of clinical expertise, ethics, and patient values and preferences. This course requires professional component standing. This is a writing (W) course. NU 304 Course Objective Changes 1. Demonstrate foundational understanding of the research process, theory, and evidence-based practice process. 2. Integrate evidence into clinical practice by applying ethical and legal implications of research and using a systematic approach to evidence-based practice processes. 3. Evaluate evidence relevant to nursing practice. 4. Integrate professional writing standards in nursing research and evidence-based practice.

Prerequisite: (NU 311 Minimum Grade of C and NU 312 Minimum Grade of C and NU 325 Minimum Grade of C and NU 327 Minimum Grade of C and HSC 343 Minimum Grade of C)

NU 305 Essen of OB/Peds/Psych Nsg 4 cr

The purpose of this course is to provide an overview of pathophysiology, pharmacology, clinical skills assessment, and medication administration within specialty areas of foci including the maternal, child, and mental health settings. The course focuses on the responsibility of the professional nurse in ensuring quality and safety in providing specialty care to women and children, and to those with mental health needs across the lifespan.

NU 306 Essentials of Adult Geron Nsg 4 cr

The purpose of this course is to provide an overview of pathophysiology, pharmacology, clinical skills assessment, and medication administration within the adult gerontological nursing environment. The course focuses on the responsibility of the professional nurse in ensuring quality and safety in providing care for diverse populations across the adult lifespan.

NU 307 Concepts of Profess Nsg Pract 4 cr

The purpose of this course is to provide an opportunity for students to remediate on practice accountability or professionalism in order to be successful post-graduation. The course focuses on the responsibility of the professional nurse in ensuring quality and safety in providing care to diverse populations across the lifespan, interacting as a member of an interdisciplinary health care team, and demonstrating accountability for personal actions within the professional practice environment.

NU 311 Clinical Nursing Skills 3 cr

The purpose of this course is to provide students the opportunity to acquire basic nursing care skills. The emphasis is on the responsibilities of the professional nurse in ensuring quality and safety. Students are introduced to simulation as an approach to sharpen clinical reasoning and communication skills in a safe environment. Prerequisites: Admission or special permission of instructor.

Corequisite: NU 325

NU 312 Clinical Skills Immersion 1 cr

Application of concepts and theories related to health promotion and maintenance, illness care, and rehabilitation with an adult-gerontology population experiencing commonly occurring health care needs. Emphasis on the role of the professional nurse and on the use of the nursing process with an adult-gerontology population in a variety of community based settings.

Prerequisite: (NU 325 (may be taken concurrently) Minimum Grade of C and NU 311 (may be taken concurrently) Minimum Grade of C)

NU 325 Health Assessment 3 cr

The purpose of the course is to provide students the opportunity to acquire basic nursing assessment skills. The emphasis is on the assessment skills of the whole person, including physical, psychological, sociocultural, and spiritual aspects of persons from all stages of life. Students will learn skills associated with obtaining a health history and performing health assessments across the lifespan. Prerequisite: Admission to professional component or special permission of instructor.

Corequisite: NU 311

NU 325B Health Assessment 3 cr

The purpose of the course is to provide students the opportunity to acquire basic nursing assessment skills. The emphasis is on the assessment skills of the whole person, including physical, psychological, sociocultural, and spiritual aspects of persons from all stages of life. Students will learn skills associated with obtaining a health history and performing health assessments across the lifespan. Prerequisite: Admission to professional component or special permission of instructor. Restricted to students in the RN to BSN program.

Corequisite: NU 311

Cross-Listed: NU 325

NU 327 Patho Basis of Nursing 3 cr

The purpose of the course is to provide students the opportunity to acquire the theory and evidence applicable to the physiology and alterations in physiology of individuals across the lifespan. The emphasis of this course is alterations in cardiovascular, pulmonary, genitourinary, gastrointestinal, immune, neurological, musculoskeletal, and endocrine systems. Prerequisite: Admission to professional component or special permission of instructor.

Prerequisite: (NU 311 (may be taken concurrently) Minimum Grade of C and NU 325 (may be taken concurrently) Minimum Grade of C)

NU 327B Patho Basis of Nursing 3 cr

The purpose of the course is to provide students the opportunity to acquire the theory and evidence applicable to the physiology and alterations in physiology of individuals across the lifespan. The emphasis of this course is alterations in cardiovascular, pulmonary, genitourinary, gastrointestinal, immune, neurological, musculoskeletal, and endocrine systems. Prerequisite: Admission to professional component or special permission of instructor. Restricted to students in the RN to BSN program.

NU 332 Clinical Nutrition 2 cr

The purpose of this course is to provide students the opportunity to acquire nutritional theory and evidence required for health promotion and disease prevention of individuals across the lifespan.

Prerequisite: (NU 325 Minimum Grade of C and NU 327 Minimum Grade of C and NU 311 Minimum Grade of C and NU 312 Minimum Grade of C and HSC 343 Minimum Grade of C and HSC 342 Minimum Grade of C)

NU 390 Sp Top - 1-8 cr

Study of a significant topic or problem in Nursing and the Health Professions. This course may be repeated for a total of four credits. Requires special permission.

NU 394 Directed Study - 1-4 cr

Individual study in a nursing area chosen in consultation with instructor. Requires special permission.

NU 395 Study Abroad Cultural Exp 9 cr

The purpose of this course for the undergraduate student is to develop an improved understanding of culture, Leininger's theory of Diversity and Universality, to recognize any cultural practices that affect health care, to incorporate this understanding into the provision of care. Culture will be examined through writing, cultural experiences, through collaboration. The course is underpinned by Dr. Leininger's definition of culture and her theory of culture care.

NU 404 EBP & Informatics 3 cr

This course is designed for Registered Nurse students to apply principles of research, evidence-based practice (EBP) and informatics to practice problems. The focus of the course is interpreting and incorporating research for the improvement of health care. Emphasis is on critical appraisal of research and use of data in quality improvement.

NU 409 Leadership and Management 3 cr

The purpose of this course is to provide students the opportunity to integrate leadership roles and functions, management strategies, and continued professional development into a personal lifelong learning plan. Emphasis is on the professional nurse as a leader in improving patient care and cost effectiveness of health care.

Prerequisite: CMN 350 Minimum Grade of C and CMN 351 Minimum Grade of C and MCN 347 Minimum Grade of C and MCN 348 Minimum Grade of C and NU 304 Minimum Grade of C and HSC 342 Minimum Grade of C

Corequisite: AHN 447, AHN 448

NU 412 Dec Making Prof Nsg Practice 3 cr

This course focuses on continuing the leadership development of the student within the context of providing professional nursing care to patients and families across the lifespan. Decision-making, delegation, and motivation competencies are emphasized.

Prerequisite: (CMN 420 (may be taken concurrently) Minimum Grade of C and CMN 421 (may be taken concurrently) Minimum Grade of C and AHN 447 Minimum Grade of C and AHN 448 Minimum Grade of C and NU 414 (may be taken concurrently) Minimum Grade of C)

Corequisite: NU 460

NU 414 Issues & Trends Healthcare -W 3 cr

The purpose of this web based course is to provide students the opportunity to integrate leadership roles and functions, management strategies, current issues and trends affecting nursing and health care and continued professional development, into a personal lifelong learning plan. Emphasis is on the professional nurse as a leader in improving patient care and cost effectiveness of health care and the development of a current nursing workforce. National interest areas such as patient safety, policy, patient centered care, and the process for quality improvement are primary focuses.

Prerequisite: (AHN 447 (may be taken concurrently) Minimum Grade of C and AHN 448 (may be taken concurrently) Minimum Grade of C and NU 311 Minimum Grade of C and NU 304 Minimum Grade of C and NU 312 Minimum Grade of C and NU 325 Minimum Grade of C)

Corequisite: NU 412

NU 415 Seminar in Issues & Trends 3 cr

The purpose of this course is to introduce Registered Nurse students to a comprehensive array of current issues and trends affecting nursing and health care in society. Emphasis is on the development of professional nursing contributions to the healthcare environment. The focus is on comprehending factors affecting policy generation and implementation. Prerequisites: Completion of all non-nursing prerequisites.

NU 422 Healthcare Leadership & Collab 3 cr

The purpose of this course is to continue the professional development of Registered Nurse students through initiation leadership and collaborative roles in healthcare or community settings. The course focuses on professionalism, leadership roles and functions, management strategies, and emerging trends in nursing and health care. The emphasis of the course is on the professional nurse as a leader in improving health care. Activities include a practice integrated experience application of quality improvement process to promote optimal health care delivery.

NU 430 Nsg Care Critical Ill Patient 3 cr

The purpose of this course is to provide students the opportunity to analyze theories and concepts related to caring for the critically ill patient across the lifespan. Content related to higher level nursing skills commonly used in the critical care setting and environmental factors affecting the care of critically ill patients will be emphasized. The role of the professional nurse in health promotion and maintenance, illness care, and rehabilitation of the critically ill will be a focus.

Prerequisite: (AHN 330 Minimum Grade of C or AHN 447 Minimum Grade of C) and (AHN 331 Minimum Grade of C or AHN 448 Minimum Grade of C)

NU 450 Lead/Mang Roles Prof Nsg Pra-W 4 cr

The purpose of this course is the continued development of conceptual and practical knowledge of professional nursing leadership and management roles in a complex adaptive healthcare system. Content includes but is not limited to: management, systems leadership, professional values, personal vs organizational philosophy, quality improvement, and performance appraisal. Other topics related to professional nursing include social, political, legal, and ethical issues.

NU 451 Current Issues/Trends Prof Nsg 4 cr

Current issues and trends affecting nursing and healthcare in society will be reviewed. Emphasis will be on the development of professional nursing contributions to the changing healthcare environment. Content includes but is not limited to: Issues in the healthcare environment including social, legal, ethical, safety and political.

Prerequisite: (NU 450 (may be taken concurrently) Minimum Grade of C)

NU 452 Clinical Preven & Pop Health 4 cr

Theoretical concepts related to healthcare promotion/disease prevention to improve health at individual, family, and population level in the global community. Content includes but is not limited to: health behaviors, health literacy, at-risk populations, genetics, chronic illness, socioeconomic status, environmental exposures, ethics, advocacy, social justice, civic responsibility and strategies of risk reduction and improvement in disparities in outcomes are evaluated and applied to population health.

Prerequisite: (NU 450 (may be taken concurrently) Minimum Grade of C)

NU 453 Infor Manag & Tech in Hlthcare 4 cr

This course will prepare Registered Nurse students to recognize the critical role of information management and patient care technology in identifying technological solutions to enhance delivery of quality patient care and outcomes. Content includes but is not limited to: nurse sensitive indicators (assessment, pathophysiology), safety, ethical and legal aspects.

Prerequisite: NU 450 Minimum Grade of C

NU 454 Research & EBP Practicum-W 4 cr

This course allows Registered Nurse students to analyze basics research process and methodology. Students will complete direct and indirect clinical care experiences, identify practice issues, levels of evidence, identify and synthesize evidence, and propose practice initiatives by participating in quality improvement in a variety of diverse healthcare or community systems. Content includes but is not limited to: organizational models, change theory, critical thinking, ethical, legal and political influences. *Practice integrated experience - develop a quality improvement initiative to address a system or community health need or problem. This is a direct and indirect clinical course.

Prerequisite: (NU 450 Minimum Grade of C and NU 451 Minimum Grade of C and NU 452 (may be taken concurrently) Minimum Grade of C and NU 453 (may be taken concurrently) Minimum Grade of C and NU 455 (may be taken concurrently) Minimum Grade of C) or EH 102 Minimum Grade of C or EH 105 Minimum Grade of C

NU 455 Concept Interprofessional Care 4 cr

Develop skills to support communication and collaboration among healthcare professionals and delivery of safe, high quality patient care. Focus on applying current Interprofessional Education Collaborative (IPEC) competencies, including collaborative strategies and resource management in complex healthcare systems.

Prerequisite: NU 450 Minimum Grade of C

NU 460 Practicum 5 cr

Culminating clinical practice course to provide students an in-depth learning experience in a selected area of nursing practice. The leadership, management, and caregiver roles of the professional nurse with patients and their families in a selected area of nursing practice is emphasized. Students are assigned to nurse preceptors and with faculty guidance focus on leadership and management, and application of the nursing process theories, concepts, research, issues and trends in caring for patients in a variety of preceptorship placements in acute and community settings.

Prerequisite: CMN 420 (may be taken concurrently) Minimum Grade of C and CMN 421 (may be taken concurrently) Minimum Grade of C and AHN 447 Minimum Grade of C and AHN 448 Minimum Grade of C and NU 414 (may be taken concurrently) Minimum Grade of C

Corequisite: NU 412

NU 461 Integration Prof Practice - W 4 cr

The purpose of this course is to provide Registered Nurse students the opportunity to integrate professional role characteristics with a capstone practice integrated experience. This in-depth learning activity draws on prior work in evidence-based practice, nursing role development, scientific and humanistic foundations, and collaboration. The focus is on application of principles of leadership to create a substantive activity contributing to healthcare improvement. Emphasis is on implementation and evaluation of an initiative in a selected practice setting addressing a health need or problem.

NU 490 Special Topics 9 cr

Study of a significant topic or problem in nursing and the health professions. This course may be repeated for a total of four credits. Requires special permission.

NU 496 Service Abroad Hlth Related EX 9 cr

This is a service learning course that will culminate in select communities in the international setting. Emphasis is on providing culturally competent care by providing and immersion experience.

NU 499 NU Honors Senior Project 1-6 cr

The purpose of the course is to provide students the opportunity to investigate scholarly undergraduate research, service-learning, or study abroad experiences resulting in development of the written honors thesis. Nursing Honors Program. Requires special permission.

Prerequisite: HON 301 (may be taken concurrently) Minimum Grade of D

NU 500 Explore Culture Sexual Assault 2 cr

The purpose of this course is to provide nursing students an in-depth exploration of forensic nursing concepts and principles related to caring for the victim and survivor of sexual violence from a population health care perspective with a cultural emphasis. A spectrum of compassionate care incorporating cultural understanding and respect that is cognizant from assault to post trauma aftermath including life-long sequelae and its prevention is utilized. Prevention and health promotion models of care within the context of transcultural global health priorities are reviewed. Forensic nursing concepts and principles related to caring for the victim of sexual violence from a culturally congruent population healthcare perspective across the lifespan are explored including compassionate continued care post-sexual assault.

NU 502 Sexual Assault Vic Practicum 1 cr

The purpose of this course is to provide nursing students opportunities to apply didactic principles to ensure competency in the care of the sexually traumatized patient with particular emphasis on complex forensic histories involving special populations and challenging treatment situations. Students will conduct forensic interviews, exams, preserve evidence, and determine proper techniques involving patients from diverse cultural backgrounds. Students will identify, critical analyze, determine follow up, and evaluate patient responses that may include a variety of cultural, economic, and physical challenges.

Prerequisite: NU 500 (may be taken concurrently) Minimum Grade of C

NU 503 Trauma Care Sexual Assault Vic 2 cr

The purpose of this course is to expand the graduate nursing student's knowledge of trauma, particularly sexual trauma. The focus is on examining ongoing threats to safety among individuals, communities, and witnesses to trauma. The course will facilitate students to create policy initiatives, community service activities, and to become violence prevention advocates. The student will understand NP leadership in collaboration with SART, professional nurse testimony and participation in the legal process to empower victims, decrease revictimization, and ensure social justice and healthcare access to the victim, suspect, witness and communities impacted by sexual violence.

Prerequisite: NU 500 Minimum Grade of C

NU 504 Adv Pharm Care Post Assault 2 cr

The purpose of this course is to examine the pharmacological principles and the current treatment modalities of post-sexual assault care.

The focus is the selection and monitoring of drug therapy of sexual assault victims throughout the the lifespan and across post trauma disease processes. Motivational patient education and follow-up to incentivize adherence and prevent complications will be explored using the pathology of infectious and communicable disease, psychosocial science, pediatric growth and development, and the legal systems as its framework.

Prerequisite: NU 500 Minimum Grade of C

NU 505 Sup Care Comorbid Post Assault 2 cr

The purpose of this course is to increase the graduate student's knowledge of the victim/survivor's response to trauma, particularly sexual trauma. The focus is on examining the behavioral, psychological, and physiologic response of victims/survivors across the lifespan with consideration of gender and socio-cultural factors. The emphasis is on patient centered care and includes a multidisciplinary team approach to developing individualized plans of care to facilitate restorative healing for victims/survivors of sexual trauma.

Prerequisite: NU 500 Minimum Grade of C

NU 506 EBP & Informatics Prof Nurses 4 cr

This course assists students who have completed Registered Nurse training to apply principles of evidence-based practice (EBP) and informatics to modern nursing practice issues. The focus of the course is on the application, interpretation, and incorporation of research principles to promote improvement of health care outcomes. Emphasis is on critical appraisal of research and use of data in quality improvement.

NU 507 Leadership & Management Roles 4 cr

This course assists students who have completed Registered Nurse training to development conceptual and practical knowledge of professional nursing leadership and management roles in a complex adaptive healthcare system. The focus of the course is on nursing roles related to management, system leadership, professional values, personal vs organizational philosophy, quality improvement, and performance appraisal. Social, political, legal, and ethical issues surrounding professional nursing leadership will be evaluated.

NU 508 Clinical Prevention & Pop Hlth 4 cr

The purpose of this graduate course for Registered Nurse students is to promote knowledge and understanding of theoretical concepts related to the professional nurses' role in population health promotion. Emphasis will be on healthcare promotion/disease prevention to improve health at individual, family, and population levels in the global community. Content related to health behaviors, health literacy, at-risk populations, genetics, chronic illness, socioeconomic status, environmental exposures, ethics, advocacy, social justice, civic responsibility and strategies of risk reduction and improvement in disparities in outcomes are evaluated and applied by the registered nurse to population health will be a focus.

NU 509 Bioethics Advan Practice Nsg 1 cr

This course examines bioethical topics that emerge in contemporary health care and explores the socio-political, legal, technological, and economic variables that contribute to these issues. Students will gain understanding of ethical and legal concepts and apply the principles in advanced nursing practice

NU 510 Addictions Practicum I 1 cr

This course serves as a one of three practicum courses in the Addictions Subspecialty nursing program. The purpose of this practicum course is preparation in prevention, screening, assessment, diagnosing, and management/treatment including recovery care of OUD/SUD integrated health care and telehealth settings across the lifespan. While preparation is across the life span, emphasis will be focused on child, adolescent, and transitional-age populations.

Corequisite: HSC 580

NU 511 Addictions Practicum II 2 cr

This course serves as a one of three practicum courses in the Addictions Subspecialty nursing program. The purpose of this practicum course is preparation in prevention, screening, assessment, diagnosing, and management/treatment including recovery care of OUD/SUD integrated health care and telehealth settings across the lifespan. While preparation is across the life span, emphasis will be focused on child, adolescent, and transitional-age populations.

Prerequisite: (NU 510 Minimum Grade of C and HSC 580 Minimum Grade of C)

Corequisite: HSC 581

NU 512 Addictions Practicum III 2 cr

This course serves as a one of three practicum courses in the Addictions Subspecialty nursing program. The purpose of this practicum course is preparation in prevention, screening, assessment, diagnosing, and management/treatment including recovery care of OUD/SUD integrated health care and telehealth settings across the lifespan. While preparation is across the life span, emphasis will be focused on child, adolescent, and transitional-age populations.

Prerequisite: (NU 510 Minimum Grade of C and NU 511 Minimum Grade of C and HSC 580 Minimum Grade of C and HSC 581 Minimum Grade of C)

Corequisite: HSC 582

NU 513 Addictions Practicum IV 4 cr

This course serves as an optional fourth practicum in the Addictions Specialty nursing program. The purpose of this practicum course is reinforcement of prevention, screening, assessment, diagnosing, and management/treatment including recovery care of OUD/SUD and other addiction disorders within integrated health care and telehealth settings across the lifespan. Emphasis will be focused on child through geriatric age population.

Prerequisite: (NU 510 Minimum Grade of C and NU 511 Minimum Grade of C and NU 512 Minimum Grade of C and HSC 580 Minimum Grade of C and HSC 581 Minimum Grade of C and HSC 582 Minimum Grade of C)

NU 515 Clinical Concepts/CNS Role I 2 cr

The purpose of this course is to introduce students to the role of the Clinical Nurse Specialist and examine the epidemiologic, assessment, diagnostic, management and evaluation of adolescent/adult/old adult patients across the continuum of healthcare services (from wellness through acute care). The course focuses on health promotion, health protection, and disease management of patients with cardiovascular, pulmonary, and musculoskeletal health issues to include differential diagnoses and pharmacotherapeutics. The course explores the dynamic interplay between the pathophysiologic basis of disease and the psychosocial and socio-cultural responses to acute illness and injury as clinical decision-making skills are developed. Emphasis within the course is placed on synthesizing and applying the core competencies of the Clinical Nurse Specialist.

Prerequisite: NU 545 (may be taken concurrently) Minimum Grade of C and NU 578 (may be taken concurrently) Minimum Grade of C and NU 518 (may be taken concurrently) Minimum Grade of C and NU 608 (may be taken concurrently) Minimum Grade of C

Cross-Listed: AHN 515

NU 516 Clinical Concepts/CNS Role II 3 cr

The purpose of this course is to integrate advanced pharmacology and pathophysiology, and assessment for the provision of advanced nursing care across the continuum of healthcare services (from wellness through acute care) to meet the specialized needs of adolescent/adult/old adult patients. The course focuses on health promotion, health protection, and disease management of patients with endocrine, neurologic, gastrointestinal, renal, and genitourinary health problems. Emphasis within the course is placed on the CNS's influence on health care incorporating the perspectives of technology, social justice, fiscal stewardship, patient advocacy, and evidence-based practice.

Prerequisite: NU 515 Minimum Grade of C and AHN 516 Minimum Grade of C

Corequisite: AHN 517

NU 517 Clinical Concepts/CNS Role III 3 cr

The purpose of this course is to provide a forum for the analysis, synthesis, and application of knowledge required for the CNS role in the management of acute and chronic problems as well as management and prevention of exacerbations of chronic health problems from adolescent/adult/older adult age groups. The course focuses on health promotion, health protection, and disease management of patients with hematology/oncology, immunology, infectious disease, integumentary, and psychosocial health issues. The emphasis is on the CNS spheres of influence to identify problems, manage resources and fiscal outcomes, design and select therapeutic interventions, and evaluate products and devices for use with patients and health team members from diverse cultural and ethnic backgrounds. Potential for contributions and entrepreneurial opportunities within nursing will be addressed.

Prerequisite: NU 516 Minimum Grade of C and AHN 517 Minimum Grade of C and NU 607 (may be taken concurrently) Minimum Grade of C and NU 610 (may be taken concurrently) Minimum Grade of C and NU 613 (may be taken concurrently) Minimum Grade of C

Corequisite: AHN 518

NU 518 Adv Nursing Assessment 3 cr

This course is designed to further develop the student's advanced knowledge and skills for obtaining and recording a systematic health history and advanced physical examination of individuals and families across the lifespan. The course involves synthesis and application of nursing, biologic, psychologic, and socio-cultural knowledge and theories in comprehensive health assessment for the purposes of health promotion, differential diagnosis, and development of health records. The central objective is the development of cognitive and clinical skills needed to provide comprehensive care to individuals of all ages in primary, secondary, and tertiary care settings.

NU 520 NU MSN Incomplete Extension 1-5 cr**NU 526 Trauma-Informed Integrated Behavioral Healthcare Practicum I 1 cr**

The purpose of this practicum course is to prepare graduate nursing students in interprofessional behavioral health assessment, and professionalism in trauma-informed care in integrated settings serving patients across the life-span. While preparation is across the life span with emphasis focused on child through transitional age population.

Corequisite: HSC 512

NU 527 Trauma-Informed Integrated Behavioral Healthcare Practicum II 2 cr

This course serves as the second of three practicum courses in the Trauma-Informed Integrated Behavioral Healthcare nursing subspecialty. The purpose of this practicum course is to prepare the graduate nursing student to apply knowledge of screening, intake, intervention and trauma-informed care in integrated telehealth settings serving across the lifespan with emphasis on child through transitional age populations.

Prerequisite: (NU 526 Minimum Grade of C and HSC 512 Minimum Grade of C)

Corequisite: HSC 511

NU 528 Trauma-Informed Integrated Behavioral Healthcare Practicum III 2 cr

This course serves as the third of three practicum courses in the Trauma-Informed Integrated Behavioral Healthcare nursing subspecialty. The purpose of this practicum course is to prepare graduate nursing students to participate in screening, intake, intervention, and trauma-informed care in integrated settings serving across the lifespan with emphasis on child through transitional age populations.

Prerequisite: (NU 526 Minimum Grade of C and NU 527 Minimum Grade of C and HSC 511 Minimum Grade of C and HSC 512 Minimum Grade of C)

Corequisite: HSC 510

NU 535 Clin Ldr Role & Competencies 3 cr

The purpose of this courses is to explore the role and function of the clinical nurse leader. The course focuses on the implementation of the role which will vary across settings and facilities. The emphasis is on evidenced-based practice and knowledge and skills that the CNL role requires for successful enactment of the role.

Prerequisite: NU 607 Minimum Grade of C and NU 518 (may be taken concurrently) Minimum Grade of C and NU 545 (may be taken concurrently) Minimum Grade of C and NU 578 (may be taken concurrently) Minimum Grade of C

Corequisite: NU 536

NU 536 Clin Nurse Ldr Pract I 5 cr

The purpose of this first of two capstone Clinical Nurse Leader courses is to provide students an in-depth preceptor-based clinical experience in a selected area of nursing practice. The focus of the course is on the CNL as caregiver, leader, and care manager. Emphasis is on the application of the nursing process, theories, concepts, research, issues and trends in providing care in complex patient situations and managing the care of a group of patients.

Prerequisite: (NU 607 Minimum Grade of C and NU 578 Minimum Grade of C)

Corequisite: NU 535

NU 537 Clin Nurse Leader Synthesis 3 cr

The purpose of this culminating synthesis course for the CNL role is provide students an opportunity to analyze and evaluate actual CNL practice patterns. The course focuses on continuing to build the students competencies in clinical decision making, problem identification, resource management, and outcome measurement for a selected patient population at the point of care. The emphasis is on working with patients and health team members from diverse cultural and ethnic background, accountability for coordination, delegation and supervision of care within a multidisciplinary team.

Prerequisite: (NU 535 Minimum Grade of C and NU 536 Minimum Grade of C) and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 607 Minimum Grade of C

Corequisite: NU 538

NU 538 Clinical Nurse Ldr Prac II 4 cr

The purpose of this second of two capstone Clinical Nurse Leader courses is to provide students an immersion experience in the CNL role in a selected area of nursing practice. The focus of the course is to further develop CNL competencies with emphasis on team leading and building, advocacy, communication, resource and outcomes management, and evidenced based practice.

Prerequisite: NU 535 Minimum Grade of C and NU 536 Minimum Grade of C

Corequisite: NU 537

NU 539 Intro to Nursing Informatics 3 cr

The purpose of this course is to provide the student an introduction to nursing informatics and the evolving importance of the application and evaluation of information technology in nursing and health care. The emphasis of the course is to provide the students the expertise and knowledge to function effectively in the modern health care information technology (IT) environment.

NU 545 Physio-Patho Basis of Adv Nsg 3 cr

The purpose of this course is to provide the advanced practice nurse with knowledge of normal physiology and alterations in physiology in individuals across the life span. The focus is theory and research applicable to organ systems and cellular events. Emphasis is on regulatory and compensatory functions in health and in pathophysiological conditions.

NU 553 Administrative Concepts 2 cr

The purpose of this course is to examine concepts, theories and current trends in healthcare administration. The focus is the identification of leadership and management strategies in the management of physical, financial, and human resources in healthcare systems. Emphasis is placed on organizational leadership and management theories, ethical and legal issues, human resource management, and teamwork and collaboration to meet the health care needs of vulnerable populations in culturally diverse communities.

Prerequisite: NU 607 (may be taken concurrently) Minimum Grade of C

Corequisite: NU 554

NU 554 Resource Manag Field Study 1 cr

The purpose of the supervised field study activity is to provide the student with a clinical experience to investigate the purpose and structure of a health care agency in the community. The course focus is on administration and resource management in health care organizations. Emphasis within the course is placed on the synthesis of the knowledge acquired in previous courses.

Prerequisite: NU 607 (may be taken concurrently) Minimum Grade of C
Corequisite: NU 553

NU 556 Informatics & Qual Care Improv 3 cr

The purpose of this course is to focus on quality improvement models and methods which will use client outcome measures across a broad range of health care settings. Emphasis will be placed on Continuous Quality Improvement (CQI) methods and their relationships with current health care systems.

Prerequisite: ISC 555 Minimum Grade of C and NU 565 (may be taken concurrently) Minimum Grade of C and NU 539 (may be taken concurrently) Minimum Grade of C and ISC 550 (may be taken concurrently) Minimum Grade of C and NU 554 Minimum Grade of C
Corequisite: NU 557

NU 557 Clinical Informatics Pract I 2 cr

This clinical course allows students to integrate concepts and theories in clinical informatics in selected health care settings. This practicum offers students an opportunity to work closely with a health care vendor and integrate concepts/theories in clinical informatics. Additionally students will begin to learn how to configure and customize operating systems. Students will also begin to identify their site for Clinical Informatics Practicum II.

Corequisite: NU 556

NU 558 Seminar in Nursing Informatics 3 cr

This course will provide students the opportunity to discover the responsibilities of the Nursing Informatics Specialist's role by applying legal/ethical concepts to selected case studies in a variety of situations.

Prerequisite: NU 607 (may be taken concurrently) Minimum Grade of C and NU 610 (may be taken concurrently) Minimum Grade of C and NU 613 (may be taken concurrently) Minimum Grade of C and NU 608 (may be taken concurrently) Minimum Grade of C

Corequisite: NU 559

NU 559 Clinical Informatics Pract II 2 cr

This clinical course allows students to integrate and apply informatics competencies in the nurse informatics specialty role while working closely with a guided preceptor. This role may take place within a variety of health care settings.

Corequisite: NU 558

NU 560 Adm & Mgt for Adv Nsg Practice 3 cr

The purpose of this course is to examine concepts and methods of nursing administration. The focus is on management of physical, financial, and human resources in dynamic healthcare systems. Emphasis is on leadership, communication, interprofessional team functioning, and collaboration and to meet healthcare needs in culturally diverse populations.

Prerequisite: NU 607 (may be taken concurrently) Minimum Grade of C and NU 613 (may be taken concurrently) Minimum Grade of C

NU 561 Nursing Admin Concepts-Theory 3 cr

The purpose of this course is to introduce the role of the nurse executive. The course focuses on role expectations and professional competency requirements. Emphasis within the course is placed on the influential role of the nurse executive in improving patient care, improving health of populations, and reducing healthcare costs.

Corequisite: NU 566

NU 563 Exec Admin Clin Progression 1-4 cr

The purpose of this progression practicum is to facilitate student independence in the Executive Nurse Administrator role. The focus is on the application and synthesis of knowledge and skills acquired in all previous courses and to develop the necessary skills to progress to the next level of competency in the Executive Nurse Administrator role.

NU 565 Nursing Administration Finance 3 cr

The purpose of this course is to introduce nurse administrators to healthcare financial management. The course focuses on reimbursement and expenditures for healthcare delivery. Emphasis within the course is placed on basic accounting, financial decision-making, statement analysis, & staffing plans.

Prerequisite: NU 607 (may be taken concurrently) Minimum Grade of C

NU 566 Nursing Admin Field Study 4 cr

The purpose of this first practicum course is to provide the nurse executive student a faculty and preceptor facilitated clinical experience in a healthcare setting. The course focuses on the professional role and competencies of the nurse executive. Emphasis within the course is placed on the application and synthesis of knowledge and skills acquired in previous courses.

Prerequisite: NU 565 Minimum Grade of C and NU 554 Minimum Grade of C and HSC 571 Minimum Grade of C

Corequisite: NU 561

NU 567 Nursing Admin Internship 3 cr

The purpose of this culminating practicum course is to provide students a faculty and preceptor facilitated clinical experience in a healthcare setting. The course focuses on continued professional role and competencies development of the nurse executive. Emphasis within the course is placed on the application and synthesis of knowledge and skills acquired in previous courses.

Prerequisite: NU 566 Minimum Grade of C and NU 539 Minimum Grade of C and NU 607 (may be taken concurrently) Minimum Grade of C and NU 608 (may be taken concurrently) Minimum Grade of C and NU 610 (may be taken concurrently) Minimum Grade of C and NU 613 (may be taken concurrently) Minimum Grade of C

Corequisite: NU 568

NU 568 Nursing Admin Seminar 3 cr

The purpose of this course is to prepare students for the role of nurse executive. The course focuses on professional competency development. Emphasis within the course is placed on strategic planning, governance, regulations, politics, and current issues trend.

Prerequisite: NU 539 Minimum Grade of C and NU 561 Minimum Grade of C and NU 566 Minimum Grade of C

Corequisite: NU 567

NU 570 Emergency NP I 2 cr

This course is the first course in a series of four didactic courses for the Emergency Nurse Practitioner student. The purpose of this didactic course is to prepare Emergency Nurse Practitioner students to assess, diagnose, and manage the health care needs of patients across the lifespan in emergent, urgent, and ambulatory care settings. Emphasis is placed on (1) synthesis and application of critical thinking, diagnostic reasoning, and scientific knowledge in the development of differential as a basis of care management; (2) treatment of acute health problems across the lifespan based on current evidence-based practice; and (3) collaboration and communication among health care providers in culturally diverse environment. The focus of this course is on the advanced practice nursing role in caring for individuals in the emergency care settings with thoracic-respiratory and cardiovascular disorders.

Corequisite: NU 571

NU 571 Emergency NP Practicum I 1-3 cr

This course is the third course in a series of four practicum courses for the Emergency Nurse Practitioner student that will provide intensive study into clinical specialty. The purpose of this practicum course is to provide the Emergency Nurse Practitioner student the opportunity to apply and integrate knowledge acquired through coursework. Development and refinement of clinical expertise in advanced emergency nursing is expected throughout the four clinical courses. The focus is on advanced practice nursing role in caring for individuals of all ages in the emergency care setting.

Prerequisite: NU 578 Minimum Grade of C

Corequisite: NU 570

NU 572 Emergency NP II 2 cr

This course is the second course in a series of four didactic courses for the Emergency Nurse Practitioner student. The purpose of the didactic courses is to prepare Emergency Nurse Practitioner students to assess, diagnose, and manage the health care needs of patients across lifespan in emergent, urgent, ambulatory care settings. Emphasis is placed on (1) synthesis and application of critical thinking, diagnostic reasoning, and scientific knowledge in acute health problems across the lifespan based on current evidence based practice; and (3) collaboration and communication among health care providers in culturally diverse environment. The focus is on the advanced practice nursing role in caring for individuals in the emergency care setting with dermatologic, abdominal, and non-traumatic musculoskeletal disorders.

Prerequisite: NU 570 Minimum Grade of C and NU 571 Minimum Grade of C

Corequisite: NU 573

NU 573 Emergency NP Practicum II 1-3 cr

This course is the second course in a series of three practicum courses for the Emergency Nurse Practitioner student that will provide intensive study into clinical specialty. The purpose this practicum course is to provide the Emergency Nurse Practitioner student the opportunity to apply and integrate knowledge acquired through coursework. Development and refinement of clinical expertise in advanced emergency nursing is expected throughout the four clinical courses. The focus is on advanced practice nursing role in caring for individuals of all ages in the emergency care setting.

Prerequisite: NU 570 Minimum Grade of C and NU 571 Minimum Grade of C

Corequisite: NU 572

NU 574 Emergency NP III 2 cr

This course is the third course in a series of four didactic courses for the Emergency Nurse Practitioner student. The purpose of the didactic courses is to prepare Emergency Nurse Practitioner students to assess, diagnose, and manage the health care needs of patients across the lifespan in emergent, urgent, ambulatory care settings. Emphasis is placed on (1) synthesis and application of critical thinking, diagnostic reasoning, and scientific knowledge in the development of differential diagnosis as a basis for care management; (2) the treatment of acute health problems across the lifespan based on current evidence based practice; and (3) collaboration and communication among health care providers in a culturally diverse environment. The focus is on the advanced practice nursing role in caring for individuals in the emergency care setting with renal, genitourinary, endocrine, nervous, and head, eye, ear, nose, and throat system disorders.

Prerequisite: NU 570 Minimum Grade of C and NU 571 Minimum Grade of C and NU 572 Minimum Grade of C and NU 573 Minimum Grade of C

Corequisite: NU 575

NU 575 Emergency NP Practicum III 1-3 cr

This course is the third course in a series of four practicum courses for the Emergency Nurse Practitioner student that will provide intensive study into clinical specialty. The purpose of this practicum course is to provide the Emergency Nurse Practitioner student the opportunity to apply and integrate knowledge acquired through coursework. Development and refinement of clinical expertise in advanced emergency nursing is expected throughout the four clinical courses. The focus is on advanced practice nursing role in caring for individuals of all ages in the emergency care setting.

Prerequisite: NU 570 Minimum Grade of C and NU 571 Minimum Grade of C and NU 572 Minimum Grade of C and NU 573 Minimum Grade of C

Corequisite: NU 574

NU 576 Emergency NP IV 2 cr

This course is the final course in a series of four didactic courses for the Emergency Nurse Practitioner student. The purpose of the didactic courses is to prepare Emergency Nurse Practitioner students to assess, diagnose, and manage the health care needs of patients across the lifespan in emergent, urgent, ambulatory care settings. Emphasis is placed on (1) synthesis and application of critical thinking, diagnostic reasoning, and scientific knowledge in the development of differential diagnosis as a basis for care management; (2) the treatment of acute health problems across the lifespan based on current evidence based practice; and (3) collaboration and communication among health care providers in a culturally diverse environment. The focus is on advanced practice nursing role in caring for individuals in the emergency care setting with traumatic and psychiatric disorders.

Prerequisite: NU 570 Minimum Grade of C and NU 571 Minimum Grade of C and NU 572 Minimum Grade of C and NU 573 Minimum Grade of C and NU 574 Minimum Grade of C and NU 575 Minimum Grade of C

Corequisite: NU 577

NU 577 Emergency NP Practicum IV 1-3 cr

This course is the final course in a series of four practicum courses for the Emergency Nurse Practitioner student that will provide intensive study into clinical specialty. The purpose of this practicum course is to provide the Emergency Nurse Practitioner student the opportunity to apply and integrate knowledge acquired through coursework. Development and refinement of clinical expertise in advanced emergency nursing is expected throughout the four clinical courses. The focus is on the advanced practice nursing role in caring for individuals of all ages in the emergency care setting.

Prerequisite: NU 570 Minimum Grade of C and NU 571 Minimum Grade of C and NU 572 Minimum Grade of C and NU 573 Minimum Grade of C and NU 574 Minimum Grade of C and NU 575 Minimum Grade of C

Corequisite: NU 576

NU 578 Pharm Adv Practice Nurses 3 cr

The purpose of this course is to expand the pharmacological knowledge of the advanced practice nurse. The focus is the selection and monitoring of drug therapy for persons throughout the lifespan. Emphasis is on pharmacokinetics and pharmacotherapeutics of major drug classifications.

Prerequisite: NU 545 (may be taken concurrently) Minimum Grade of C

NU 580 Hlth Promo & Ds Prev/FNP/ENP 2 cr

The purpose of this course is to prepare the emergency nurse practitioner student to identify and implement appropriate and culturally competent health promotion and disease prevention strategies across the lifespan. The focus is on the advanced practice nursing of individuals and families in primary and emergency care settings. Emphasis is placed on health promotion and disease prevention with strategic planning at the primary, secondary and tertiary levels of prevention. Various issues are explored pertinent to the advanced practice nurse role.

NU 581 Family/Emergency NP I 5 cr

This course is the first course in a series of four didactic courses for the emergency nurse practitioner student. The purpose of this didactic course is to prepare emergency nurse practitioner students to assess, diagnose, and manage the health care needs of patients across the lifespan in emergent, urgent, and primary care settings. Emphasis is placed on (1) synthesis and application of critical thinking, diagnostic reasoning, and scientific knowledge in the development of differential diagnosis as a basis for care management; (2) the treatment of acute health problems across the lifespan based on current evidence-based practice; and (3) collaboration and communication among health care providers in a culturally diverse environment. The focus of this course is on the advanced practice nursing role in caring for individuals in the primary and emergency care setting with disorders of selected body systems.

Corequisite: NU 582

NU 582 Family/Emerg NP Practicum I 2 cr

This course is the first course in a series of four practicum courses for the emergency nurse practitioner student that will provide intensive study into the family nurse practitioner role and the emergency nurse practitioner specialty. The purpose of this practicum course is to provide the emergency nurse practitioner student the opportunity to apply and integrate knowledge acquired through coursework. Development and refinement of clinical expertise in primary and emergency care is expected throughout the four clinical courses.

Prerequisite: NU 578 Minimum Grade of C

Corequisite: NU 581

NU 583 Family/Emergency NP II 5 cr

This course is the second course in a series of four didactic courses where the Emergency Nurse Practitioner student will continue to develop and define assessment, diagnostic, and management skills needed to care for patients across the lifespan in emergent, urgent, and primary care settings. Emphasis is placed on (1) synthesis and application of critical thinking, diagnostic reasoning, and scientific knowledge in the development of differential diagnosis as a basis for care management; (2) the treatment of acute and chronic health problems across the lifespan based on current evidence-based practice; and (3) collaboration and communication among health care providers in a culturally diverse environment. The focus of this course is on the advanced practice nursing role in caring for individuals in the primary and emergency care setting with disorders of selected body systems.

Prerequisite: NU 581 Minimum Grade of C and NU 582 Minimum Grade of C

Corequisite: NU 584

NU 584 Family/ Emerg NP Practicum II 4 cr

This course is the second course in a series of four practicum courses for the emergency nurse practitioner student that will provide intensive study into the family nurse practitioner role and the emergency nurse practitioner specialty. The purpose of this practicum course is to provide the emergency nurse practitioner student the opportunity to apply and integrate knowledge acquired through coursework. Development and refinement of clinical expertise in primary and emergency care is expected throughout the four clinical courses.

Prerequisite: NU 581 Minimum Grade of C and NU 582 Minimum Grade of C

Corequisite: NU 583

NU 585 Family/Emergency NP III 5 cr

This course is the third course in a series of four didactic courses where the emergency nurse practitioner student will continue to develop and define assessment, diagnostic, and management skills needed to care for patients across the lifespan in emergent, urgent, and primary care settings. Emphasis is placed on (1) synthesis and application of critical thinking, diagnostic reasoning, and scientific knowledge in the development of differential diagnosis as a basis for care management; (2) the treatment of acute and chronic health problems across the lifespan based on current evidence-based practice; and (3) collaboration and communication among health care providers in a culturally diverse environment. The focus of this course is on the advanced practice nursing role in caring for individuals in the primary and emergency care setting with disorders of selected body systems.

Prerequisite: (NU 583 Minimum Grade of C and NU 584 Minimum Grade of C)

Corequisite: NU 586

NU 586 Family/Emerg NP Practicum III 4 cr

This course is the third course in a series of four practicum courses for the emergency nurse practitioner student that will provide intensive study into the family nurse practitioner role and the emergency nurse practitioner specialty. The purpose of this practicum course is to provide the emergency nurse practitioner student the opportunity to apply and integrate knowledge acquired through coursework. Development and refinement of clinical expertise in primary and emergency care is expected throughout the four clinical courses.

Prerequisite: (NU 583 Minimum Grade of C and NU 584 Minimum Grade of C)

Corequisite: NU 585

NU 587 Family/Emergency NP IV 5 cr

This course is the final course in a series of four didactic courses where the Emergency Nurse Practitioner student will continue to develop and define assessment, diagnostic, and management skills needed to care for patients across the lifespan in emergent, urgent, and primary care settings. Emphasis is placed on (1) synthesis and application of critical thinking, diagnostic reasoning, and scientific knowledge in the development of differential diagnosis as a basis for care management; (2) treatment of acute and chronic health problems across the lifespan based on current evidence-based practice; and (3) collaboration and communication among health care providers in a culturally diverse environment. The focus of this course is on the advanced practice nursing role in caring for individuals in the primary and emergency care setting with disorders of selected body systems.

Prerequisite: NU 585 Minimum Grade of C and NU 586 Minimum Grade of C

Corequisite: NU 588

NU 588 Family/Emerg NP Practicum IV 4 cr

This course is the final course in a series of four practicum courses for the emergency nurse practitioner student that will provide intensive study into the family nurse practitioner role and the emergency nurse practitioner specialty. The purpose of this practicum course is to provide the emergency nurse practitioner student the opportunity to apply and integrate knowledge acquired through coursework. Development and refinement of clinical expertise in primary and emergency care is expected throughout the four clinical courses.

Prerequisite: NU 585 Minimum Grade of C and NU 586 Minimum Grade of C

Corequisite: NU 587

NU 589 Family/Emerg NP CI Progression 1-4 cr

This course is a practicum progression course for the emergency nurse practitioner student that will provide intensive study into the family nurse practitioner role and the emergency nurse practitioner specialty. The purpose of this practicum course is to provide the emergency nurse practitioner student the opportunity to apply and integrate knowledge acquired through coursework. Development and refinement of clinical expertise in primary and emergency care is expected throughout the four clinical courses. At the discretion of the Emergency Nurse Practitioner track coordinator, satisfactory completion of this course may be required.

Prerequisite: NU 582 Minimum Grade of C

NU 590 Special Topics - 9 cr

Study of significant topics or problems in nursing and the health professions. Content will vary. May be repeated.

NU 594 Directed Studies 1-11 cr

Directed study under the direction of a member of the graduate faculty.

NU 595 Study Abroad Cultural Exp 9 cr

The purpose of this course for the graduate student is to develop an improved understanding of the culture, Leininger's theory of Diversity and Universality, to recognize any cultural practices that affect health care and to incorporate this understanding into the provision of care. Culture will be examined through writing cultural experiences, and through collaboration. The course is underpinned by Dr. Leininger's definition of culture and her theory of culture care.

NU 596 Service Abroad Hlth Related Ex 0 cr

This is a service learning course that will culminate in select communities in the international setting. Emphasis is providing culturally competent care by providing an immersion experience.

NU 597 Intro to Scholarly Writing 3 cr

The purpose of the course is to enhance scientific writing skills and provide a review of basic and advanced grammar, and development of rhythm, voice, and purpose in writing. There will be a focus on developing skills to utilize bibliographic search methodology and the American Psychological Association (APA) editorial format.

NU 607 Scientific Underpinnings Adv Nsg 3 cr

The purpose of this course is for the MSN/DNP student to explore the scientific underpinnings that define the nature of health and healthcare delivery and to provide the basis for practice at the highest level of nursing. The focus of this course is to explore the structure and nature of nursing science as it relates to advanced nursing practice. The course emphasis is on the exploration of a clinically relevant phenomena of interest that will be examined from the philosophical, theoretical, ethical, and conceptual context.

NU 608 EBP & Quality Improvement HCS 3 cr

The purpose of this course is to provide the MSN/DNP student with the foundational components required for effective utilization of evidence based practice within the scope of advanced nursing practice. The course focuses on the use of analytic methods to critically appraise existing literature and other evidence to determine and implement the best evidence for practice. The course emphasis is on the application of quantitative, qualitative, and quality improvement methodologies to promote safe, effective care within healthcare systems.

NU 610 Healthcare Policy & Finance 3 cr

The purpose of this course for the MSN/DNP student is to develop advanced nursing leaders who have the knowledge and skills to design, analyze, influence, and implement policies that frame health care financing, practice regulation, access, safety, quality, and efficacy. The course focuses on major contextual factors and policy triggers that influence health policy making at various levels. Principles of finance, business, and health care economics will be presented. The course emphasis is on developing essential competencies in health care policy advocacy and health care financing.

NU 611 Translat Evidence Practice Sys 3 cr

The purpose of this course for the DNP student is to provide the methodological basis for translating evidence into practice systems in a variety of healthcare settings. The course focuses on locating, evaluating, synthesizing, channeling, applying, and explaining appropriate findings from laboratory and experimental settings to improve the efficiency and effectiveness of nursing care. The course emphasis is on the use of applied techniques for evidence translation with an exploration of ethics and the protection of human research subjects.

Prerequisite: NU 608 (may be taken concurrently) Minimum Grade of C and NU 607 (may be taken concurrently) Minimum Grade of C

NU 612 Clinical Prev Population Hlth 3 cr

The purpose of this course for the DNP student is to explore the multifaceted issues pertaining to population health and health promotion in the local, regional, national, and global populations across the lifespan. The course focuses on health issues and strategies to eliminate health disparities across all population groups. The course emphasizes the use of health surveillance measures and determinants of health to characterize geographical locations and population groups as well as effective health promotion and disease and accident prevention strategies.

Prerequisite: NU 608 (may be taken concurrently) Minimum Grade of C and NU 607 (may be taken concurrently) Minimum Grade of C

NU 613 Organizational & Sys Leadrshp 3 cr

The purpose of this course for the MSN/DNP student is to synthesize leadership and organizational theory within the context of complex healthcare systems. The course focuses on the exploration and application of principles of advanced communication, collaboration, and team building to the process of systems change to prepare the student for advanced roles in leading change. Emphasis within the course is placed on assessment of organizational culture as a basis for improvement of individual and aggregate healthcare outcomes; models of quality improvement and project planning, implementation, and evaluation are also examined.

NU 615 Qual Improv & Outcomes Assmnt 3 cr

The purpose of this course is to build on the foundation established in NU 608 Evidence Based Practice and Quality Improvement in Healthcare Systems to provide the DNP student with additional knowledge and skills to develop, implement, and evaluate programs that improve health outcomes. The course focuses on the design, implementation, and evaluation of quality improvement methodologies. The course places emphasis on applying quality improvement processes to evaluate outcomes of practice against national benchmarks to determine variances in practice outcomes and population trends.

Prerequisite: NU 607 (may be taken concurrently) Minimum Grade of C and NU 608 (may be taken concurrently) Minimum Grade of C and NU 611 (may be taken concurrently) Minimum Grade of C

NU 616 Data & Dec Mking Healthcare Sys 3 cr

The purpose of this course is to prepare the DNP student to be proficient in the evaluation and use of technology and information systems appropriate to specialized areas of advanced nursing practice. The course focuses on information systems and current technology in the management of healthcare outcomes. Within the course, emphasis is placed on the use of information systems and technology based resources to support clinical and administrative decision making.

Prerequisite: (NU 611 Minimum Grade of C and NU 615 Minimum Grade of C)

NU 620 Prin Teach/Learn/Assess Nu Ed 3 cr

The purpose of this course is to provide a foundation of principles of teaching and learning, including theories, styles, and application to the diverse learner. Emphasis is on analysis of teaching in the classroom and clinical setting, assessment techniques, and implementation of technology, all while incorporating evidence-based teaching practices

NU 621 Curr Design/Outcome Eval Nu Ed 3 cr

Analysis and synthesis of theories and concepts related to systematic curriculum development and outcomes evaluation in nursing education. Emphasis is on institutional purposes, goals, nursing curricula design, and outcomes evaluation that supports the requirements of the institution, the program, and accrediting agencies.

NU 622 Current Topics in Nu Education 2 cr

The purpose of this course is to engage the student in an analysis of concepts and theories basic to the nurse educator role in academic and in practice settings. Emphasis is on current issues and trends in nursing education, the role of the academic nurse educator, and professional, social, political, legal, cultural, and other issues related to nursing education.

NU 623 Nsg Educ Synthesis Practicum 3 cr

The purpose of this course is the synthesis of nursing education theory in practicum experience. Focus is on the application of nursing education theory in developing, teaching, and evaluating an education unit, exemplifying the nurse educator role, and adhering to institutional and legal guidelines.

Prerequisite: NU 620 Minimum Grade of C and NU 621 (may be taken concurrently) Minimum Grade of C and NU 622 (may be taken concurrently) Minimum Grade of C

NU 656 Nursing Informatics PP&D 3 cr

This course assists the Nursing Informatics DNP student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the Nursing Informatics students' selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination.

Prerequisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 (may be taken concurrently) Minimum Grade of C)

NU 657 Nursing Informatic Residency I 3-6 cr

Theories of leadership, motivation, power, and change are used to influence change in health care organizations. This course will implement evidence-based clinical models and evaluate their effectiveness in health outcomes. The Nursing Informatics student will synthesize, critique, and apply evidence to support quality clinical or organizational practices. In this mentored and supervised experience, the Nursing Informatics student will work with the primary faculty advisor to complete projects and advance their selected practice area. The Nursing Informatics student will have access to and authority for expanded scope of practice to master the DNP competencies. Residency sites will depend upon the Nursing Informatics student's career trajectory and approval by collaborating faculty. During the residency semester, student must participate in scheduled scholarly seminars online.

Prerequisite: NU 656 Minimum Grade of S and NU 615 (may be taken concurrently) Minimum Grade of C

NU 658 NU Informatics Residency II 3-6 cr

Provides Nursing Informatics students the opportunity to fully express all DNP competencies. The Nursing Informatics student, guided by the faculty facilitator, will implement the scholarly doctoral system's change project.

Prerequisite: NU 657 Minimum Grade of C and NU 616 (may be taken concurrently) Minimum Grade of C

NU 659 NU Informatics Residency III 3-6 cr

Final course in residency series as Nursing Informatics student continues to implement and evaluate project plan. Provides Nursing Informatics student the opportunity to fully express all DNP competencies. The Nursing Informatics student, guided by the core faculty and advisor completes quality improvement evidence-based system's change project.

Prerequisite: NU 612 (may be taken concurrently) Minimum Grade of C and NU 658 Minimum Grade of C

NU 661 Executive Nsg Admin PP&D 3 cr

This course assists the Nurse Executive Administration DNP student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the Nurse Executive Administration students' selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination.

Prerequisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 (may be taken concurrently) Minimum Grade of C)

NU 662 Nurse Exec Admin Res I 3-6 cr

Theories of leadership, motivation, power, and change are used to influence change in health care organizations. This course will implement evidence-based clinical models and evaluate their effectiveness in health outcomes. The Nurse Executive Administration student will synthesize, critique, and apply evidence to support quality clinical or organizational practices. In this mentored and supervised experience, the Nurse Executive Administration student will work with the primary faculty advisor to complete projects and advance their selected practice area. The Nurse Executive Administration student will have access to and authority for expanded scope of practice to master the DNP competencies. Residency sites will depend upon the student's career trajectory and approval by collaborating faculty. During the residency semester, the Nurse Executive Administration student must participate in scheduled scholarly seminars online. Clinical hours of direct practice/management is required.

Prerequisite: NU 661 Minimum Grade of S and NU 615 (may be taken concurrently) Minimum Grade of C

NU 663 Nurse Exec Admin Res II 3-6 cr

Provides Nurse Executive Administration students the opportunity to fully express all DNP competencies. The student, guided by the faculty facilitator, will implement the scholarly doctoral system's change project.

Prerequisite: NU 662 Minimum Grade of C and NU 616 (may be taken concurrently) Minimum Grade of C

NU 664 Nurse Exec Admin Res III 3-6 cr

Final course in residency series as the Nurse Executive Administration student continues to implement and evaluate project plan. Provides the Nurse Executive Administration student the opportunity to fully express all DNP competencies. The student, guided by the core faculty and advisor, completes quality improvement evidence-based system's change project.

Prerequisite: NU 663 Minimum Grade of C and NU 612 (may be taken concurrently) Minimum Grade of C

NU 680 Family/Emergency NP PP&D 3 cr

In this course, students will begin a systematic investigation of a clinically based topic relevant to the practice of the emergency nurse practitioner. Integration of scientific underpinnings, human caring values, ethical principles, and cultural competencies is expected. Emphasis is placed on developing a proposal for the Doctor of Nursing Practice scholarly project. Students will select and analyze strategies, models, and theories to plan, implement, and evaluate the scholarly project.

Prerequisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 (may be taken concurrently) Minimum Grade of C)

NU 681 Family/Emerg NP Residency I 3 cr

This course is the first course in a progressive sequence of three residency courses that will develop the Emergency Nurse Practitioner student into a practice scholar. The purpose of the residency course is to integrate the application of leadership, theoretical, and specialty knowledge to improve patient and population health outcomes in the emergency care setting. The focus of this residency course is to provide the Emergency Nurse Practitioner student with faculty supervised and preceptor mentored experiences to begin the development and implementation of the Doctor of Nursing Practice scholarly project.

Prerequisite: (NU 680 Minimum Grade of C and NU 615 (may be taken concurrently) Minimum Grade of C)

NU 682 Family/Emerg NP Residency II 3 cr

This course is the second course in a progressive sequence of three residency courses that will develop the Emergency Nurse Practitioner student into a practice scholar. The purpose of the residency course is to integrate the application of leadership, theoretical, and specialty knowledge to improve patient and population health outcomes in the emergency care setting. The focus of this residency course is to provide the Emergency Nurse Practitioner student with faculty supervised and preceptor mentored experiences to implement the Doctor of Nursing Practice scholarly project.

Prerequisite: (NU 681 Minimum Grade of C and NU 616 (may be taken concurrently) Minimum Grade of C)

NU 683 Family/Emerg NP Residency III 3 cr

This course is the final course in a progressive sequence of three residency courses that will develop the Emergency Nurse Practitioner student into a practice scholar. The purpose of the residency course is to integrate the application of leadership, theoretical, and specialty knowledge to improve patient and population health outcomes in the emergency care setting. The focus of this residency course is to provide the Emergency Nurse Practitioner student with faculty supervised and preceptor mentored experiences to evaluate the effectiveness of and disseminate the findings of the Doctor of Nursing Practice scholarly project.

Prerequisite: (NU 682 Minimum Grade of C and NU 612 (may be taken concurrently) Minimum Grade of C)

NU 690 Sp Top - 1-9 cr

Selected topics in Nursing Science and/or Nursing Education. Requires special permission.

NU 692 NU DNP Incomplete Extension 3 cr

Students will register for this course to complete residency course work under the supervision of faculty. Students must remain continuously enrolled until all residency requirements are completed.

NU 694 Directed Study and Research 1-6 cr

Directed study and research facilitated by a member of the graduate faculty. Requires special permission.

Faculty

Adult Health Nursing

Faculty Name	Faculty Department	Faculty Position	Degrees Held
ADAMS, AMY DAWN (amyadams@southalabama.edu)	Adult Health Nursing	Assistant Professor	BSN, University of South Alabama MSN, University of South Alabama DNP, University of South Alabama
ANDERSON, JENNIFER ANN (janderson@southalabama.edu)	Adult Health Nursing	Assistant Professor	BSN, University of South Alabama MSN, Spring Hill College DNP, University of South Alabama
BAUGHN, CHRISTINA LEE (christinabaughn@southalabama.edu)	Adult Health Nursing	Assistant Professor	BSN, University of South Alabama MSN, University of South Alabama DNP, Samford University
BENTLEY, EMILY SAWYER (ebentley@southalabama.edu)	Adult Health Nursing	Assistant Professor	BSN, University of South Alabama MSN, University of South Alabama DNP, University of South Alabama
BOLTON, MARYANNE (mbolton@southalabama.edu)	Adult Health Nursing	Assistant Professor	BSN, Rutgers The St U Central Offic MSN, University of South Alabama DNP, University of South Alabama
BYDALEK, KATHERINE ANITA (kbydalek@southalabama.edu)	Adult Health Nursing	Associate Professor	BS, University of Saint Francis MSN, University of South Alabama PHD, Touro College
BYRD, LISA M. (lbyrd@southalabama.edu)	Adult Health Nursing	Assistant Professor	BSN, Mississippi College MSN, Mississippi U For Women PHD, University of Southern Miss
CAMPBELL, AMY CALVERT (amycalvertcampbell@southalabama.edu)	Adult Health Nursing	Assistant Professor	BA, University of Mississippi BSN, University of South Alabama MSN, University of South Alabama DNP, University of South Alabama
COOPER, KIM M. (kimcooper@southalabama.edu)	Adult Health Nursing	Instructor	BSN, William Carey College MSN, William Carey College
DAVIS, WESLEY DANIEL (wesleydavis@southalabama.edu)	Adult Health Nursing	Assistant Professor	BSN, Chamberlain College of Nursing
DIXON, NERKISSA CURTIS (kcurtisidixon@southalabama.edu)	Adult Health Nursing	Assistant Professor	MSN, University of South Alabama DNP, University of South Alabama BSN, University of South Alabama MSN, University of South Alabama EDD, Walden University
FERRY, JOSEPH FRANK (jferry@southalabama.edu)	Adult Health Nursing	Assistant Professor	BSN, University of Tennessee-Knox MSN, University of South Alabama DNP, University of South Alabama
GILLIGAN, MARIE AARON (agilligan@southalabama.edu)	Adult Health Nursing	Assistant Professor	BSN, University of South Alabama MSN, University of South Alabama
GRAVES, REBECCA JERMYN (rgraves@southalabama.edu)	Adult Health Nursing	Associate Professor	BS, University of Southern Miss BSN, University of South Alabama MSN, University of South Alabama PHD, University of Tennessee-Knox
GUY, MISTY DAWN (mguy@southalabama.edu)	Adult Health Nursing	Assistant Professor	BSN, University of South Alabama MSN, University of South Alabama CERTG, University of South Alabama
			DNP, University of South Alabama

HABOUSH, CHRISTINE H. (haboush@southalabama.edu)	Adult Health Nursing	Assistant Professor	BBA, American Univ in Beirut MS, National University BSN, Linfield College MSN, Vanderbilt University DNP, Oregon Health Sciences U ND, Portland Community College ND, Cuny Hunter College ND, Cuny Borough of Manhattan Comm
HARLAN, SHANA MARIE (sharlan@southalabama.edu)	Adult Health Nursing	Assistant Professor	BSN, University of South Alabama MSN, University of South Alabama DNP, University of South Alabama
HOLLEY, AMY GOODWIN (amyholley@southalabama.edu)	Adult Health Nursing	Assistant Professor	BSN, University of North Alabama MSN, University of North Alabama DNP, Samford University
HORTON, HEATHER VANCE (horton@southalabama.edu)	Adult Health Nursing	Assistant Professor	BSN, University of South Alabama MSN, University of South Alabama DNP, University of South Alabama
JOHNSON, PAMELA TATE (pamjohnson@southalabama.edu)	Adult Health Nursing	Associate Professor	BSN, Auburn University MSN, University of South Alabama DNP, University of South Alabama
JOHNSON, PATRICIA A. (patriciajohnson@southalabama.edu)	Adult Health Nursing	Assistant Professor	BSN, University of Mobile MSN, University of Mobile DNP, Samford University
JOHNSON, ROSANNA (rjohnson@southalabama.edu)	Adult Health Nursing	Assistant Professor	BS, Spring Hill College BSN, University of South Alabama MSN, University of South Alabama DNP, University of South Alabama
JONES, LORETTA (lorettajones@southalabama.edu)	Adult Health Nursing	Assistant Professor	BSN, University of Mobile MSN, University of Mobile PHD, Univ of Alabama-Birmingham
JONES, TRACY LARUE (tracyljones@southalabama.edu)	Adult Health Nursing	Instructor	BS, Univ of Mississippi Med Center MSN, Univ of Mississippi Med Center
JORDAN, KIMBERLY DAVIS (kimberlyjordan@southalabama.edu)	Adult Health Nursing	Assistant Professor	BSN, University of South Alabama MSN, University of South Alabama DNP, Samford University
LAWRENCE, SHERRY MOTES (slawrence@southalabama.edu)	Adult Health Nursing	Associate Professor	BSN, University of South Alabama MSN, University of Mobile DNP, University of South Alabama
LAWSON, ROBIN MELANIE (robinlawson@southalabama.edu)	Adult Health Nursing	Professor	BSN, University of South Alabama MSN, University of South Alabama DNP, University of South Alabama
LEVI, PAULA MILLER (plevi@southalabama.edu)	Adult Health Nursing	Assistant Professor	BSN, University of South Alabama PHD, Univ of Alabama-Birmingham
LEWIS, ANGELIA D (lialewis@southalabama.edu)	Adult Health Nursing	Assistant Professor	AS, College of Central Florida BSN, University of Mobile MSN, University of Mobile DNP, University of Alabama
LYNCH, COLLEEN MARTIN (colleenlynch@southalabama.edu)	Adult Health Nursing	Assistant Professor	BS, Francis Marion University BS, Francis Marion University MSN, Univ of Alabama-Birmingham DNP, University of South Alabama
MILLER, JENNIFER JOHNSON (jennifermiller@southalabama.edu)	Adult Health Nursing	Assistant Professor	AS, Troy University-Main BSN, Troy University-Main MSN, University of South Alabama DNP, University of South Alabama

MOORE, ELLEN PEYTON (ellenmoore@southalabama.edu)	Adult Health Nursing	Assistant Professor	BA, Mississippi State University BSN, University of South Alabama MSN, University of South Alabama DNP, University of South Alabama
MOORE, LORI PREWITT (lmoore@southalabama.edu)	Adult Health Nursing	Assistant Professor	BSN, University of South Alabama MSN, University of South Alabama DNP, University of South Alabama
MYERS, CHARLENE MARIE (cmyers@southalabama.edu)	Adult Health Nursing	Associate Professor	BSN, University of South Alabama MSN, University of South Alabama DNP, University of South Alabama
OTTS, JO ANN (jotts@southalabama.edu)	Adult Health Nursing	Assistant Professor	BA, Graceland College MSN, Loyola University-New Orleans DNP, Loyola University-New Orleans
RIDNER, STANLEY LEE (ridner@southalabama.edu)	Adult Health Nursing	Professor	BSN, University of Kentucky MSN, University of Kentucky PHD, University of Kentucky
RUSS, CHONDRA NAKEIVA (chondraruss@southalabama.edu)	Adult Health Nursing	Assistant Professor	BS, University of LA at Lafayette BSN, University of South Alabama MSN, University of South Alabama DNP, University of Alabama
SIKES-DOGGETT, TELINA MICHELLE (tdoggett@southalabama.edu)	Adult Health Nursing	Assistant Professor	BSN, University of South Alabama MSN, University of South Alabama DNP, Samford University
STAUTER, KELLY JEANNETTE (kstauter@southalabama.edu)	Adult Health Nursing	Assistant Professor	BS, University of South Alabama BSN, University of South Alabama MSN, University of South Alabama DNP, University of South Alabama
STREETER, DONNA JANE (dcopeland@southalabama.edu)	Adult Health Nursing	Associate Professor	BSN, University of South Alabama MSN, University of South Alabama DNP, University of South Alabama
STUART, WILMA POWELL (wstuart@southalabama.edu)	Adult Health Nursing	Associate Professor	BSN, University of Texas Health Sc MA, Univ Of Texas At Tyler PHD, Univ of Alabama-Birmingham
STURM, TERRY ANN MARCEN (tsturm@southalabama.edu)	Adult Health Nursing	Assistant Professor	BS, Montana State U-Northern MSN, University of South Alabama DNP, University of Alabama
SWANZY, DEBRA MONTGOMERY (dswanzy@southalabama.edu)	Adult Health Nursing	Associate Professor	BSN, University of South Alabama MSN, University of South Alabama DNP, University of South Alabama
TAYLOR, COURTNEY ALLISON (courtneytaylor@southalabama.edu)	Adult Health Nursing	Instructor	BSN, University of Mobile MSN, Univ of Alabama-Birmingham
VANDEWAA, ELIZABETH (evandewaa@southalabama.edu)	Adult Health Nursing	Professor	BS, Hope College PHD, Michigan State University
WAWERU-SMITH, SYLVIA MUTHONI (swaweru@southalabama.edu)	Adult Health Nursing	Assistant Professor	BS, Univ of Alabama-Birmingham MS, Univ of Alabama-Birmingham
WOODMANSEE, BRENDA KAY (bwoodmansee@southalabama.edu)	Adult Health Nursing	Assistant Professor	AS, Mississippi Gulf Coast CC BSN, University of South Alabama MSN, University of South Alabama DNP, Samford University
WRIGHT, THERESA FIELDS (twright@southalabama.edu)	Adult Health Nursing	Associate Professor	BSN, University of South Alabama MSN, University of South Alabama DNP, University of South Alabama
YOUNCE, ALICE BARRON (ayounce@southalabama.edu)	Adult Health Nursing	Assistant Professor	BSN, Troy University-Main MSN, Univ of Alabama-Birmingham DNP, University of South Alabama

Community Mental Health Nursing

Faculty Name	Faculty Department	Faculty Position	Degrees Held
BAKER, MELANIE RENEE (melaniebaker@southalabama.edu)	Community Mental Health Nsg	Assistant Professor	AS, Delgado Community College BSN, University of South Alabama MSN, University of South Alabama DNP, University of South Alabama
BEASLEY, AMY MARIE (amybeasley@southalabama.edu)	Community Mental Health Nsg	Assistant Professor	BS, University of Alabama BSN, University of Alabama MSN, University of Alabama CERT, University of Alabama DNP, University of Alabama

- PSY 120 is required

Additional Information

Bachelor of Science in Nursing – Accelerated BSN Pathway

The College of Nursing has a special Accelerated BSN Pathway for academically qualified and highly-motivated individuals. The pre-professional component, as listed below, must be completed prior to admission to the professional component. The professional component of the curriculum, which normally takes 5 semesters to complete, can be completed in 12 months of full-time study. The curriculum and credit hours are the same as required for the traditionally taught BSN degree offered by the College, except that the course schedule is accelerated and is not confined by the traditional academic calendar. Students in the first 12 months of the Accelerated BSN Pathway follow the same promotion/progression policies as the students in the traditionally-taught BSN.

Students having difficulty maintaining the pace of the program may request a transfer to the traditional program if they are in good academic standing. At the end of the 12-months of study, students are awarded the BSN degree and are prepared for the RN licensure (NCLEX) examination.

Students who have completed the pre-nursing requirements, may apply for admission to the Professional Component of the Accelerated BSN Pathway.

Admission Criteria for Accelerated BSN Pathway

1. Graduate of a regionally accredited baccalaureate program with a minimum prerequisite GPA of 2.75 on a 4.0 scale.
2. A minimum grade of "C" in following prerequisite courses: Biology with Lab, Anatomy and Physiology I with Lab, Anatomy and Physiology II with Lab, Microbiology with Lab, Chemistry with Lab, Statistics, and General Psychology.

Pilot Program

A limited number of students admitted to the Traditional BSN program may be offered a seat in the accelerated BSN program. Selection is highly competitive.

Application Procedures Accelerated Pathway

Applicants must submit an application for admission to the Professional Component of the BSN degree program. The application form is available on the College of Nursing's website. Applications are reviewed carefully to determine that students have satisfied all pre-nursing requirements of conduct, health, scholastic achievement, and aptitude for nursing. The College of Nursing Admissions Committee and the Dean of the College of Nursing reserve the right to select the applicants best qualified for and most likely to succeed in the study of nursing. Failure to comply with legal, moral, and legislative standards for licensure to practice as a registered nurse in the State of Alabama merits immediate dismissal from the nursing program.

Application Procedures

1. Submission of a completed application to the College of Nursing via Accelerated BSN Online Application (https://secure.touchnet.net/C21704_ustores/web/store_main.jsp?STOREID=44&SINGLESTORE=true).
2. Payment of \$50 non-refundable application fee via debit or credit card. There is a \$20.00 fee for non-sufficient fund.
3. Transfer credit must comply with College of Nursing policies.

Contingency for Admission and Initial Registration

Admission and initial registration is contingent on completion of the following requirements:

1. Acceptance Packet
2. Negative Drug Screen
3. Acceptable Background Check
4. All Health Requirements as outlined in the Medical Documents Manager

Notification of missing documents will be sent to your JagMail email account. Only students who have successfully completed the Acceptance packet in its entirety, have a negative drug screen and acceptable background check, and completed all required portions of the Medical Documents Manager will be permitted to register for classes.

Application Deadlines

- Fall Semester Deadline is March 15
- Spring Semester Deadline is July 15

In keeping with the dynamic changes in the nursing and health field, the baccalaureate curriculum may undergo change. Changes in curricula and/or admission requirements will be published as far in advance as possible. Advisors are available to assist students in adapting to those changes and planning their course of study accordingly. Applicants must meet with their advisor before applying to the Professional Component.

Veteran's Policy For College of Nursing

The College of Nursing commits to accept students from the Veteran population into the Bachelor of Science programs. The CON will accept five Veteran students into the traditional program and two Veteran students into the accelerated program each semester. Veteran students must apply for the program and meet the general admission requirements. Veteran Students must also provide documentation verifying veteran status. If there are no veteran students available to take these seats, the seats will go to the general population of student applicants.

Academic Partnership Between The University of South Alabama Department of Military Science And Leadership (Army ROTC) And Department of Nursing

1. Both the Department of Nursing and Army ROTC will actively recruit qualified nursing candidates for joint enrollment. Both programs will actively supervise and mentor enrolled ROTC will actively supervise and mentor enrolled ROTC Nurse Cadets and will keep each other informed of candidate's progress.
2. The Department of Nursing will accept two Army ROTC Nurse Cadets annually into the BSN programs, if they meet the Department of Nursing's academic acceptance requirements.
3. The Department of Nursing will provide a dedicated nursing academic advisor for all ROTC Nurse Cadets. This academic advisor will act as faculty liaison between the departments.
4. All Army ROTC Nursing Cadets will be required to participate in the nursing department's clinical training throughout the nursing nursing program with no resistance from the ROTC department.

5. Army ROTC will provide opportunities per academic year in the Army's Nurse Summer Training Program (NSTP), a summer internship/preceptorship offered at Army hospitals in the U.S. and overseas, typically between junior and senior years.

- a. conviction of a crime,
- b. disciplinary action against a nursing license in Alabama or any other state,
- c. positive drug test,
- d. adverse background check, or
- e. disruptive behavior including online behavior.
All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours of any of the above stated incidents.

Academic Progression Policy for Accelerated BSN

The University of South Alabama College of Nursing will recommend for promotion only those students who, in the judgment of the faculty, satisfy the requirements of emotional and physical health, conduct, scholastic achievement, and aptitude for nursing. Students continually in adjustment difficulties may be dropped from the nursing program.

1. A grade of "C" or higher is required for all nursing courses. A student may only repeat on failed nursing course.
2. Student receiving a failing grade in either a didactic course or a clinical course that are co-requisites must repeat both courses the following semester to progress in the program.
3. Students at risk of failing a didactic course or clinical course at midterm (course average 68% or below) must make an appointment and meet with an academic advisor.
4. Accelerated students earning a first grade of "D", "F", or "U" are advised regarding the benefit of moving to the traditional BSN program.
5. A second "D", "F", or "U" will result in an academic dismissal from the College of Nursing. Students who are academically dismissed may apply one time for readmission to the Traditional BSN program only.
6. A minimum cumulative GPA of 2.0 at USA is required to continue in the nursing program. Students with a GPA below 2.0 may not register for nursing courses.
7. A dosage calculation test is required prior to promotion to NU 300/NU 301, MCN 352/MCN 353, MCN 354/MCN 355, AHN 447/AHN 448, and NU 460. A score of 100% on one of three attempts or successful completion of standards based grading opportunities must be achieved to pass.
8. After completion of the ATI Capstone course embedded into NU 412, all students are required to complete the ATI RN Comprehensive Predictor. The ATI Capstone course will be a component of NU 412. If the student does not score at least 72% on the ATI RN Comprehensive Predictor, the student will be required to complete the Virtual ATI review course. Upon successful completion of a prescribed number of modules in Virtual ATI, a grade of Satisfactory (S) will be given for the course. If the required Virtual ATI is not completed by the end of the semester, a grade of Incomplete (I) will be given. Once the student has completed required Virtual ATI, the grade will be changed to Satisfactory (S) for the course. Failure to complete the virtual ATI requirements as stated in the syllabus by the end of the following semester will result in a grade of Unsatisfactory (U) for the course.
9. Failure to show good ethical and moral character including but not limited to any of the following may result in dismissal from the program:
 10. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours following an arrest. Failure to report an arrest may result in removal of the program.
 11. All students are subject to testing for controlled substances and must submit to random drug testing as requested. A positive test or refusal to submit to testing will result in removal from the program.
 12. All students are subject to a background check and must submit to additional background checks as requested. An adverse finding or refusal to submit to a background check may result in removal from the program.
 13. Once students are admitted to the professional component of the BSN curriculum, the program must be completed within 5 years. If a student's progression is interrupted for any reason, it is the student's responsibility to contact the Office of Student Services and apply for readmission. Students are readmitted on a space-available basis. Any alteration in usual progression may lengthen the student's program. In keeping with dynamic changes in health care and nursing, the curriculum may undergo change. Changes in curricula and/or admission requirements will be published as far in advance as possible. Advisors are available to assist students in adapting to those changes and planning their course of study accordingly.

Uniform Policy

The Uniform policy is provided to students at the time of admission.

Clinical Attendance

Students will be expected to attend clinical as scheduled. Some courses may require more than 20 hours per week of clinical attendance. Clinical orientation is mandatory.

Graduation Requirements

Accelerated BSN students who will complete all degree requirements are required to apply for graduation by the application deadline established by the Registrar's Office. Deadlines for each semester application are located on the Registrar's Graduation Website (<https://www.southalabama.edu/departments/registrar/commencement/>).

Eligibility For National Licensure

Graduates are eligible and prepared to complete the National Council Licensure Examination (NCLEX-RN exam) (<https://www.ncsbn.org/membership/us-members/contact-bon.page>) and apply for licensure to practice as a Registered Nurse and to continue with graduate study. The

program meets state educational requirements for licensure in Alabama and all other states in the U.S. and its territory.

Area V

A. Select one of the following Microbiology Courses: 4

BLY 213 & BLY 214	Microbiology and Lab Studies Microbiology
-------------------	---

BMD 210 & 210L	Microbiology in Healthcare and Microbiology in Healthcare Lab	
B. Complete the following Human Anatomy & Physiology Courses:		
BMD 251	Human Anatomy & Physiology I	4
BMD 252	Human Anatomy & Physiology II	4
C. Select one of the following Statistics Courses:		
ST 210	Stat Reason and Application	3
BUS 245	Data Analytics I	
PSY 220	Res Design and Analysis I	
ST 305	Applied Stat Health Sciences	
D. Select one of the following Computer Courses:		
CIS 140	Intro to Tech for Healthcare (see footnote table below (p. 666))	3
or CIS 150	Intro to Computer Applications	
or CIS 010	Computer Proficiency Exam	
Total Hours		65

Footnote

¹ Students who complete CIS 010 Computer Proficiency Exam, must replace the credit hours with a 3 credit hour computer course.

Notes:

All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major or minor.

Additional Information

RN to BSN and RN to BSN/MSN Pathways for Associate Degree and Diploma Nurses

The College of Nursing has a Pathway designed especially for registered nurses pursuing the Bachelor of Science in Nursing Degree. The RN to BSN Prerequisites consist of eighteen (18) courses, totaling 59 semester credit hours. These general education courses may be completed at any regionally accredited institution. They must be successfully completed before admission to the Professional Component. It is the policy of the College of Nursing to average grades for all coursework repeated.

Online RN to BSN Professional Component

1. The Professional Component consists of six (6) fully online nursing courses for a total of 24 Credit hours.
2. These courses must be completed at the University of South Alabama.
3. Upper division nursing courses taken at another institution will not transfer or apply toward the 24 Credit hours required to earn the BSN degree at USA.
4. Students proceed through the six online nursing courses at their desired pace.
5. The Professional Component may be completed in a minimum of two (2) semesters.
6. The Professional Component must be completed within five (5) years of beginning the BSN curriculum.

7. Thirty credit hours of nursing credit are awarded the semester students graduate.
8. Nine credit hours are applied as residential credit during the final semester of the pathway.

Admission Criteria for RN-BSN Pathways

1. Citizen or Permanent Resident of the United States of America.
2. Current registered nurse licensure with no restrictions. Nurses with any restrictions on their license, including participation in a voluntary disciplinary alternative program, cannot be admitted.
3. Completion of an accredited diploma or associate degree in nursing. Degrees must be from a regionally accredited institution
4. Complete all eighteen (18) required pre-requisite courses at a regionally accredited school. These 59 Credit hours of general education courses are in addition to the nursing courses completed to become a Registered Nurse.
5. Minimum grade of "C" in all pre-requisite courses.
6. RN-BSN Pathway: Minimum GPA of 2.5 on all prerequisite courses and Minimum University GPA of 2.0.
7. RN-BSN/MSN Pathway: Minimum Prerequisite GPA of 2.50. In addition, a minimum cumulative GPA of 3.0 is required on all academic course work completed at all institutions, including repeated courses.

Application Procedures

RN to BSN and RN to BSN/MSN applicants are required to complete a Primary Application in NursingCAS, as well as a supplemental application available on the College of Nursing's website. Students who drop out of the program for two or more consecutive semesters must apply for readmission through the Office of the Admission. Readmission is not automatic.

Admission Procedures For RN-BSN Pathway

Completion of Primary and Supplemental Applications are required for admission.

1. Primary Application (<https://nursingcas.org/>) submitted through Nursing Centralized Application System (NursingCAS) (<http://bulletin.southalabama.edu/programs-az/nursing/nursing/nursing-rn-bsn/www.Nursingcas.org>). Official transcripts of all college and university studies, regardless of the outcome of enrollment, must be sent directly from the home institution to the NursingCAS. These documents become the property of the NursingCAS and will not be returned to the applicant. Applicants are responsible for any fees required by NursingCAS for their services. Primary Application in NursingCAS VERIFIED prior to submitting Supplemental Application.
2. Supplemental Application (https://secure.touchnet.net/C21704_ustores/web/store_main.jsp?STOREID=48&SINGLESTORE=true) submitted online. This application requires a non-refundable processing fee of \$50.00, by the deadline. Application can be submitted via credit or debit card. There is a \$20.00 fee for non-sufficient funds.

Contingency for Admission and Initial Registration

Admission and initial registration is contingent on completion of the following requirements:

1. Acceptance Packet
2. Negative Drug Screen
3. Acceptable Background Check
4. All Health Requirements as outlined in the Medical Documents Manager.

Notification of missing documents will be sent to your JagMail email account. Only students who have successfully completed the Acceptance Packet in its entirety, have a negative drug screen and acceptable background check, and completed all required portions of the Medical Documents Manager will be permitted to register for classes.

Application Deadline

- Fall Semester Deadline is March 15
- Spring Semester Deadline is July 15
- Summer Semester Deadline is January 15

The deadlines for admission to RN-BSN program are rolling. Applications will be accepted past the stated deadline for the RN-BSN and RN-BSN/MSN pathways.

Academic Progression Policy for RN-BSN

The University of South Alabama College of Nursing will recommend for promotion only those students who, in the judgment of the faculty, satisfy the requirements of emotional and physical health, conduct, scholastic achievement, and aptitude for nursing.

1. In accordance with University policy, students may not use the Grade Replacement Policy to replace professional nursing courses.
2. A grade of "C" or higher is required for all professional nursing courses. A student may repeat only one nursing course in the curriculum. A second "D", "F", or "U" will result in an academic dismissal from the nursing program. Students who are academically dismissed may not return to the RN-BSN program.
3. A minimum GPA of 2.0 at the University of South Alabama is required to continue in the program and for graduation.
4. Students in the RN-BSN/MSN program must maintain a minimum cumulative GPA of 3.0 on all work attempted in the program at USA. Student must complete the degree requirements for the RN-BSN program prior to applying for admission to the MSN degree program.
5. Failure to show good ethical and moral character including but not limited to any of the following may result in dismissal from the program:
 - a. conviction of a crime,
 - b. disciplinary action against a nursing license in Alabama or any other state,
 - c. positive drug screen,

- d. adverse background check, or
- e. disruptive behavior including online behavior.

All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours of any of the above stated incidents.
6. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours following an arrest. Failure to report an arrest may result in removal from the program.
7. All students are subject to testing for controlled substances and must submit to random drug testing as requested. A positive test or refusal to submit to testing will result in removal from the program.
8. All students are subject to a background check and must submit to additional background checks as requested. An adverse finding or refusal to submit to testing will result in removal from the program.
9. Students must complete the RN-BSN program with 5 years. If a student's progression is interrupted for any reason, it is the student's responsibility to contact the Office of Student Services.

Graduation

RN-BSN students who will complete all BSN degree requirements are required to apply for graduation by the application deadline established by the Registrar's Office. Deadlines for each semester application are located on the Registrar's Graduation Website (<https://www.southalabama.edu/departments/registrar/commencement/>).

RN-BSN Students May Continue to MSN Program

Students who have completed the RN-BSN program at the University of South Alabama may continue on to pursue the MSN degree at the University. Once the RN-BSN student applies to graduate with the BSN degree, the student may apply for admission to start the MSN program after graduation.

Students in this pathway are guaranteed seats in non-Nurse Practitioner tracks upon successful completion of the BSN component of the pathway. Students may pursue the following specialties toward the completion of their MSN degree: Informatics, Nursing Administration, Clinical Nurse Leader, or Clinical Nurse Specialist in Adult-Gerontological Nursing.

Students who wish to pursue nurse practitioner preparation must obtain a minimum of 2 years of clinical experience before beginning clinical nurse practitioner specialty courses and have a competitive overall undergraduate GPA to compete for a seat in the NP specialty selected. Students are admitted to a specialty track and may not change their track without permission. Students must be in good standing with all academic institutions/nursing programs they have attended in order to be admitted to the MSN program. Courses for the specialty component of the curriculum are offered on-line. Clinical requirements are completed in faculty-facilitated preceptorships. Curricula for all MSN specialties are located in the graduate section under Master of Science in Nursing.

Admission to Graduate Program

Upon satisfactory completion of the BSN degree the RN-BSN/MSN student will contact the Graduate Advisors at congradapp@southalabama.edu for additional information regarding the Supplemental Application needed for admission as a graduate student to

continue through the MSN program. Applicants must meet the admission requirements for the MSN program.

Academic Progression Policy

RN-BSN/MSN students will follow the Academic Progression Policy for the RN-BSN program while completing the BSN degree. Students will then follow the Academic Progression Policy for the MSN program while in the second portion of the program.

Program Completion Requirements

Students in the RN-BSN/MSN pathway will graduate with both BSN and MSN degrees. Deadlines for each semester application are located on the Registrar's Graduation Website (<https://www.southalabama.edu/departments/registrar/commencement/>)

Area V Major In Nursing Requirements

A. Select four hours of the following Microbiology Courses:			
BLY 213 & BLY 214	Microbiology and Lab Studies Microbiology		4
or BMD 210 & 210L	Microbiology in Healthcare and Microbiology in Healthcare Lab		
B. Complete the following Human Anatomy & Physiology Courses:			
BMD 251	Human Anatomy & Physiology I		4
BMD 252	Human Anatomy & Physiology II		4
C. Select one of the following Statistic Courses:			3
ST 210	Stat Reason and Application		
BUS 245	Data Analytics I		
PSY 220	Res Design and Analysis I		
ST 305	Applied Stat Health Sciences		
D. Select one of the following Computer Courses:			
CIS 140	Intro to Tech for Healthcare ³		3
or CIS 150	Intro to Computer Applications		
E. Select one of the following Economics Courses:			
ECO 215	Prin of Microeconomics		3

or ECO 216 Prin of Macroeconomics

Total Hours**62****Footnote**

¹ Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136)

² PSY 120 is required

All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major or minor.

Additional Information**Bachelor of Science in Nursing Program (BSN)**

The BSN program prepares graduates for professional nursing practice. Upon completion of the program graduates are eligible to apply for the National Council Licensure Examination (NCLEX) to become licensed as a Registered Nurse.

The BSN program is offered in a traditional four- year format with nursing courses concentrated in the junior and senior years. The BSN program is also offered in an accelerated format for Associate Degree and diploma-prepared nurses.

BSN Program Learning Outcomes

Upon completion of the Baccalaureate Program, graduates should be able to:

1. Deliver professional nursing care for diverse populations across the lifespan to optimize health care outcomes.
2. Demonstrate the application of theory and evidence from contemporary nursing science and related disciplines as a basis for clinical reasoning, management, and evaluation of professional nursing care through the use of professional writing and clinical judgment.
3. Model responsibility and accountability for one's personal and delegated nursing care and lifelong learning to ensure excellence in nursing practice.
4. Translate evidence into professional nursing practice to individualize patient care designed to improve care outcomes.
5. Select principles of leadership and management that guide nursing, influence health policy, and transform health care delivery systems.
6. Collaborate with inter-professional health care teams and consumers in delivering and advocating for safe and effective use of health care resources.
7. Integrate professional nursing values in meeting current and emerging health needs in a dynamic, global society.
8. Evaluate effective use of technology and information management to provide patient-centered care across the lifespan in a variety of environments.

Bachelor of Science in Nursing – Traditional Pathway

Students wishing to complete the Bachelor of Science in Nursing degree who have not completed a prior bachelor degree, may apply to the

University of South Alabama as a pre-nursing student. Upon completion of the pre-nursing requirements, students may apply for admission to the Professional Component of the Traditional BSN Pathway.

Admission Criteria

1. A minimum prerequisite GPA of 2.75 on all prerequisite courses for the Traditional Pathway.
2. A minimum grade of "C" in all prerequisite courses.
3. Minimum University of South Alabama GPA of 2.5 and be in good standing within the University.
4. Students dismissed from a previous nursing program may be considered as follows:
 - a. Admission will only be considered for the Traditional BSN program
 - b. Students will compete for a seat among all other applicants to the program.
 - c. All previous nursing courses will be evaluated and accepted based on college and University requirements.

Application Procedures

Applicants must submit an application for admission to the Professional Component of the BSN degree program. The application form is available on the College of Nursing's website. Applications are reviewed carefully to determine that students have satisfied all pre-nursing requirements, and satisfy the requirements of emotional and physical health, conduct, scholastic achievement, and aptitude for nursing. The College of Nursing Admissions Committee and the Dean of the College of Nursing reserve the right to select the applicants best qualified for and most likely to succeed in the study of nursing. Failure to comply with legal, moral, and legislative standards for licensure to practice as a registered nurse in the State of Alabama merits immediate dismissal from the nursing program.

1. Online submission of Traditional BSN Application (https://secure.touchnet.net/C21704_ustores/web/store_main.jsp?STOREID=47&SINGLESTORE=true) to the College of Nursing is required.
2. Payment of \$50 non-refundable application fee via debit or credit card. There is a \$20.00 fee for non-sufficient funds.
3. Transfer credit must comply with College of Nursing policies.
4. Submit unofficial transcripts from other universities to the College of Nursing via email (conbsn@southalabama.edu) for review of prerequisite courses.
5. Students who have attended a Nursing program at another school are required to provide the following to the College of Nursing email at conbsn@southalabama.edu (<http://bulletin.southalabama.edu/programs-az/nursing/nursing/nursing-bsn-traditional/conbsn@southalabama.edu>)
 - a. Letter of Good Standing (verifying student was in good moral, ethical, and legal standing with no previous disciplinary action) from the Nursing Program, signed by the Nursing Administrator of the program

- b. Transcript of all nursing courses taken with the grades earned
- c. Transfer credit will be considered upon review of course syllabi

Contingency for Admission and Initial Registration

Admission and initial registration is contingent on completion of the following requirements.

1. Acceptance Packet
2. Negative Drug Screen
3. Acceptable Background Check
4. All Health Requirements as outlined in the Medical Documents Manager.

Notification of missing documents will be sent to your JagMail email account. Only students who have successfully completed the Acceptance Packet in its entirety, have a negative drug screen and acceptable background check, and completed all required portions of the Medical Documents Manager will be permitted to register for classes.

Application Deadlines

- Fall Semester Deadline is March 15
- Spring Semester Deadline is July 15
- Summer Semester Deadline is January 15

In keeping with the dynamic changes in nursing and healthcare field, the baccalaureate curriculum may undergo change. Changes in curricula and/or admission requirements will be published as far in advance as possible. Advisors are available to assist students in adapting to those changes and planning their course of study accordingly. Applicants **MUST** meet with their advisor at least two semesters before applying to the Professional Component.

College of Nursing Early Acceptance Program (CONEAP) High School Early Acceptance

The College of Nursing has an early acceptance program for highly qualified high school seniors who demonstrate leadership qualities and motivation toward the study of nursing. Students participating in the early acceptance program are guaranteed admission to the upper division professional component of the nursing curriculum when they meet the following requirements. Students who meet early acceptance requirements must also submit a Traditional BSN Application to the Professional Component by the deadline on the Traditional BSN webpage that corresponds to the semester you wish to begin the Professional Component.

Academic Requirements

1. Have a minimum high school GPA of 3.5 based on 4.0 scale as computed by USA Office of Admissions
2. Submit an ACT score of at least 22 composite (or 1100 SAT).
3. Apply for admission to USA.
4. Apply for admission to the Professional Component of the BSN program.

Upon Admission to USA - Student Requirements

1. USA students must maintain a minimum GPA of 3.2 on all coursework, as computed by the USA Office of Admissions, before entering the professional component.
2. Students are encouraged to complete all pre-professional nursing courses at USA.

3. Make a grade of C or better on all final grades.
4. Must be continuously enrolled in a minimum of 12 credit hours each semester (No minimal credit hour requirement for summer semesters).
5. Be approved by the Associate Dean for Academic Affairs for the College of Nursing.

The College of Nursing priority deadline for the High School Early Acceptance Program is February 15th. Early admission is determined upon receipt of an application to the University of South Alabama for admission to the pre-nursing program. Applications received at other times will be considered on a space available basis. For questions and applications, contact:

USA Admissions
2500 Meisler Hall
Mobile, Alabama 36688-0002
or call (800) 872-5247 or (251) 460-6141

Freshman Early Acceptance

A second opportunity for participation in the CONEAP is available to students who have completed their freshman year of pre-nursing prerequisite courses at USA and have achieved an overall GPA of 3.2 or above (as computed by the USA Registrar's Office). Students who meet early acceptance requirements must also submit a Traditional BSN Application to the Professional Component by the deadline on the Traditional BSN webpage that corresponds to the semester you wish to begin the Professional Component.

Academic Requirements

Applicants must:

1. Have a minimum GPA of 3.2 on all coursework completed at USA, as computed by the USA Office of Admissions
2. Complete the freshman year of college
3. Complete the following courses: BLY 101 with Lab, MA 110 or 112, and CH 101 with Lab
4. Maintain a 3.2 GPA throughout all coursework.
5. Make a grade of C or better on all final grades.
6. Apply for admission to the Professional Component of the BSN program.
7. Be approved by the Associate Dean for Academic Affairs for the College of Nursing

Freshman Early Admission Application Form (https://docs.google.com/forms/d/e/1FAIpQLSedUCjTFFLH3UfmoOfQOV0D8wakD9C8EFew8N4LD4_q2YPI_A/viewform/) - Return by August 1st.

Veteran's Policy for College of Nursing

The College of Nursing commits to accept students from the Veteran population into the Bachelor of Science programs. The CON will accept five Veteran students into the traditional program and two Veteran students into the accelerated program each semester. Veteran students must apply for the program and meet the general admission requirements. Veteran students must also provide documentation verifying veteran status. If there are no veteran students available to take these seats, the seats will go to the general population of student applicants.

Academic Partnership Between The University Of South Alabama Department Of Military Science And Leadership (Army ROTC) And Department Of Nursing

1. Both the Department of Nursing and Army ROTC will actively recruit qualified nursing candidates for joint enrollment. Both programs will actively supervise and mentor enrolled ROTC Nurse Cadets and will keep each other informed of candidate's progress.
2. The Department of Nursing will accept two Army ROTC Nurse Cadets annually into the BSN nursing programs, if they meet the Department of Nursing's academic acceptance requirements.
3. The Department of Nursing will provide a dedicated nursing academic advisor for all ROTC Nurse Cadets. This academic advisor will act as faculty liaison between the departments.
4. All Army ROTC Nursing Cadets will be required to participate in the nursing department's clinical training throughout the nursing program with no resistance from the ROTC department.
5. Army ROTC will provide opportunities per academic year in the Army's Nurse Summer Training Program (NSTP), a summer internship/preceptorship offered at Army hospitals in the U.S. and overseas, typically between junior and senior years.

Nursing Honors

The College of Nursing has two paths to attaining honors designation upon graduation: 1) University Honors in Nursing and 2) Departmental Honors in Nursing. Students admitted to the Honors College at any time prior to beginning the nursing program are automatically accepted into Nursing Honors. University Honors students must maintain all requirements set forth by the Honors College for graduation with the honors designation. University Honors students are required to complete additional upper division courses. Students are encouraged to meet with an Honors College advisor and a Nursing advisor to ensure attainment of requirements needed to receive the Honors designation.

For students with strong academic backgrounds who desire to participate in honors research, Departmental Honors is offered for students who desire to add honors coursework after starting the Nursing professional component.

Honors students are required to complete additional upper division courses. Students are not allowed to take nursing honors courses until the second semester of nursing. Departmental Honors students may apply for honors during or after the first semester of nursing; however, the student must have enough time left in the program to complete two full-term semesters of honors courses.

Academic Progression Policy

The University of South Alabama College of Nursing will recommend for promotion only those students who, in the judgment of the faculty, satisfy the requirements of emotional and physical health, conduct, scholastic achievement, and aptitude for nursing. Students continually in adjustment difficulties may be dropped from the nursing program.

1. A grade of "C" or higher is required for all nursing courses. A student may only repeat one nursing course. Students retaking a course must take NU 302 Essentials of Professional Nursing at the same time.
2. Students receiving a failing grade in either a didactic course or a clinical course that are co-requisites must repeat both courses the following semester to progress in the program.

3. Students at risk of failing a didactic course or clinical course at midterm (course average 68% or below) must make an appointment and meet with an academic advisor.
4. A second "D", "F", or "U" will result in an academic dismissal from the College of Nursing. Students who are dismissed may apply one time for readmission to the Traditional BSN program only.
5. A minimum cumulative GPA of 2.0 at USA is required to continue in the nursing program. Students with a GPA below 2.0 may not register for nursing courses.
6. A dosage calculation test is required in NU 300/301, MCN 352/353, MCN 352/353/354/355, and AHN 447/448 and NU 460. A score of 100% on one of three attempts or successful completion of standards-based grading opportunities must be achieved to pass.
7. After completion of the ATI Capstone course embedded into NU 412, all students are required to complete the ATI RN Comprehensive Predictor. If the student is unsuccessful on the ATI RN Comprehensive Predictor, the faculty-selected NCLEX remediation questions will be assigned with completion necessary to pass the course. All students, regardless of ATI RN Comprehensive Predictor performance, are also required to attend the 3-day ATI Live Review given on campus each semester. Failure to complete the ATI Capstone course, ATI RN Comprehensive Predictor and/or remediation, other course requirements as stated in the syllabus, and attend the ATI Live Review will result in a grade of Unsatisfactory (U) for the NU 412 course. If a grade of U is earned, the student must repeat NU 412 the next term. If the student does not score at least 72% on the ATI RN Comprehensive Predictor, the student will be required to purchase the Virtual ATI review course. Upon successful completion of a prescribed number of modules in Virtual ATI, a grade of Satisfactory (S) will be given for the course. If the required Virtual ATI is not completed by the end of the semester, a grade of Incomplete (I) will be given. Once the student has completed the required Virtual ATI, the grade will be changed to Satisfactory (S) for the course. Failure to complete virtual ATI requirements as stated in the syllabus by the end of the following semester will result in a grade of Unsatisfactory (U) for the course.
8. Failure to show good ethical and moral character including but not limited to any of the following may result in dismissal from the program:
 - a. conviction of a crime,
 - b. disciplinary action against a nursing license in Alabama or any other state,
 - c. positive drug test,
 - d. adverse background check, or
 - e. disruptive behavior including online behavior. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours of any of the above stated incidents.
9. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours following an arrest. Failure to report an arrest may result in removal from the program.
10. All students are subject to testing for controlled substances and must submit to random drug testing as requested. A positive test or refusal to submit to testing will result in removal from the program.
11. All students are subject to a background check and must submit to additional background checks as requested. An adverse finding or refusal to submit to a background check may result in removal from the program.

12. Once students are admitted to the professional component of the curriculum the program must be completed within 5 years. If a student's progression is interrupted for any reason, it is the student's responsibility to contact the Office of Student Services and apply for readmission. Students are readmitted on a space-available basis. Any alteration in usual progression may lengthen the student's program. In keeping with dynamic changes in healthcare and nursing, the curriculum may undergo change. Changes in curricula and/or admission requirements will be published as far in advance as possible.

Updated 05/02/2023

Readmission Policy

Students who are academically dismissed from either the Accelerated BSN or the Traditional BSN program may apply for readmission one time. Students may only apply to the Traditional BSN program after an academic dismissal from either program. All policies in place at the time of readmission will be applicable to readmitted students.

Uniform Policy

The Uniform policy is provided to students at the time of admission.

Clinical Attendance

Students will be expected to attend clinical as scheduled. Some courses may require more than 20 hours per week of clinical attendance. Clinical orientation is mandatory.

Graduation Requirements

Traditional BSN students who will complete all degree requirements are required to apply for graduation by the application deadline established by the Registrar's Office. Deadlines for each semester application are located on the Registrar's Graduation Website (<https://www.southalabama.edu/departments/registrar/commencement/>).

Eligibility for National Licensure

Graduates are eligible and prepared to complete the National Council Licensure Examination (NCLEX-RN® exam) (<https://www.ncsbn.org/membership/us-members/contact-bon.page>) and apply for licensure to practice as a Registered Nurse and to continue with graduate study. The program meets state educational requirements for licensure in Alabama and all other states in the U.S. and its territory.

Additional Information

Master of Science in Nursing (MSN)

Organized within the graduate school at the University, the College of Nursing has several pathways, specialization, and sub-specialization options within the MSN program. In addition to admitting baccalaureate-prepared registered nurses, the college offers a special pathway for highly qualified associate degree and diploma nurses who do not hold a baccalaureate degree, and tracks for MSN-prepared nurses who are interested in certification in a new specialty area.

Master of Science in Nursing Program Learning Outcomes

Upon completion of the Master of Science in Nursing Program, graduates should be able to:

1. Integrate advanced knowledge, evidence, and theories from nursing and related disciplines into a specialized area of advanced nursing practice through the use of scholarly writing.
2. Demonstrate competence in advanced nursing roles to meet current and emerging health needs of a global changing society.
3. Use scientific inquiry to identify problems and individualize patient care designed to improve care outcomes.
4. Apply advanced knowledge of leadership and management to influence health policy to transform care delivery systems.
5. Contribute to the focus and direction of the nursing profession.

Areas of Specialization

Several concentration areas are offered to meet the career goals of students. Students may prepare as a clinical nurse leader or for advanced nursing practice in one of the nurse practitioner roles or the clinical nurse specialist role. Available NP include Adult- Gerontological Acute Care Nursing, Adult-Gerontological Primary Care Nursing, Dual Role (Family Nursing/Adult-Gerontological Acute Care Nursing), Dual Role (Family Nursing/Emergency Nursing), Family Nursing, Neonatal Nursing, Pediatric Acute Care Nursing, Pediatric Primary Care Nursing, Psychiatric Mental Health Nursing, Women's Health Nursing. Clinical Nurse Specialist is available in Adult-Gerontological Nursing. Concentrations are also available for students pursuing careers in Clinical Nurse Leader, Executive Nursing Administration and Nursing Informatics. Sub-specializations are available in Addictions Nursing, Advanced Forensic Nursing Care, Cardiovascular, Clinical Lipidology, Diversity, Equity, and Inclusion in Healthcare, Nurse Educator, Palliative Care, and Trauma-Informed Integrated Behavioral Healthcare. Emergency Nurse Practitioner is offered only as a post graduate certificate. See the MSN section for additional course listings.

Graduate Assistantships

A limited number of graduate assistantships are available to students in full-time status. Additional information and an application can be obtained by contacting the College of Nursing graduate office.

BSN-Prepared RN'S

Regular Admission Criteria

1. Citizen or Permanent Resident of the United States of America.
2. Current registered nurse licensure with no restrictions. Nurses with any restrictions on their license, including participation in a voluntary disciplinary alternative program, cannot be admitted.
3. Graduate of an approved regionally accredited bachelors program with a major in nursing.
4. A minimal grade-point average of 2.75 on all BSN work (A=4.00).
5. Submission of a résumé which documents clinical experience.
6. Prior to enrolling in nurse practitioner clinical course, students are required to have at least 2 years of experience in an area appropriate to the specialty track.
7. Students are admitted to a specialty track and may not change their track without permission.
8. Students must be in good standing with all academic institutions/ nursing programs that they have attended in order to be admitted to the MSN program.

Non-Degree Admission Criteria

1. Citizen or Permanent Resident of the United States of America.
2. Current registered nurse licensure with no restrictions. Nurses with any restrictions on their license, including participation in a voluntary disciplinary alternative program, cannot be admitted.
3. Hold a bachelor's degree from an approved regionally accredited institution.
4. A minimal grade-point average of 2.75 on all BSN work (A=4.00).
5. Students must be in good standing with all academic institutions/ nursing programs that they have attended in order to be admitted
6. Enrollment in selective courses may not be available to non-degree students due to class size or required prerequisite.

Contingency for Admission and Initial Registration

Admission and initial registration is contingent on completion of the following requirements:

1. Acceptance Packet
2. Negative Drug Screen
3. Acceptable Background Check
4. All Health Requirements as outlined in the Medical Documents Manager.

Notification of missing documents will be sent to your JagMail email account. Only students who have successfully completed the Acceptance

Packet in its entirety, have a negative drug screen and acceptable background check, and completed all required portions of the Medical Documents Manager will be permitted to register for classes.

Application Procedures

Admission to the program is limited and selective. Application forms and other information may be obtained from the College of Nursing's Website (<https://www.southalabama.edu/colleges/con/msn/msnadm.html>) or by contacting the college directly at:

College of Nursing
University of South Alabama
Mobile, Alabama 36688
congradapp@southalabama.edu
Telephone: (251) 445-9400

To be considered for admission to the MSN program, the applicant must submit the following requirements:

1. Completion of the Primary Application:
 - a. Primary Application (<http://bulletin.southalabama.edu/programs-az/nursing/nursing/nursing-msn-bsn-prepared-rns/www.NursingCAS.org>) submitted through Nursing Centralized Application System (NursingCAS).
 - b. Official transcripts of all college and university studies, regardless of the outcome of enrollment, must be sent directly from the home institution to the NursingCAS. These documents become the property of the NursingCAS and will not be returned to the applicant. Applicants are responsible for any fees required by NursingCAS for their services.
 - c. Personal Goal Statement is required. The Personal Goal Statement is a description of the applicant's purpose for completing the graduate degree. This essay serves as a writing sample to be reviewed by the Graduate Admissions Committee to determine the applicant's scholarly writing skills.
 - d. Submission of a résumé which documents clinical experience.
2. Completion of the Supplemental Application:
 - a. The Supplemental Application (<https://explore.southalabama.edu/account/register/?r=https%3a%2f%2fexplore.southalabama.edu%2fapply%2f%3fsr%3d870af7f1-de34-492d-b275-be6ef1c6297a>) is submitted electronically directly to the MSN Office at the USA College of Nursing. Under Academic Information please select the appropriate semester for admission. Select "graduate" under both student type and academic level of interest. A new option will appear asking if you are applying for a graduate nursing program, select "yes" and this will take you into the nursing application.
 - b. Please note that the Supplemental Application should be completed **AFTER** you have completed your NursingCAS application and it has moved through the following stages: received, complete then **VERIFIED**. Once it is verified you may complete the Supplemental Application.
 - c. Applicants are responsible for ensuring that their completed Supplemental Application is submitted by the deadline for the semester for which they are applying. Incomplete applications will not be processed.

- d. This application requires a non-refundable processing fee of \$100.00.

Application Deadlines

Applications are accepted year round, and must adhere to the following application deadlines:

- Fall Semester Deadline is March 1
- Spring Semester Deadline is July 15
- Summer Semester Deadline is December 1

Academic Progression Policy

Students in the BSN-MSN program must meet the following requirements to progress in the program:

1. Maintain an overall GPA of 3.0. Any term in which a graduate student drops below a 3.0 Program GPA, the student is placed on probationary status and has a period of two terms to attain a 3.0 Program GPA or be dismissed.
2. Students in this program can have a maximum of two Cs.
3. A maximum of two (2) courses with a grade of "C" can be counted towards a degree; however, only one (1) "C" is permitted in support or specialization courses. If a second "C" or lower is earned in a support (NU 518, NU 545, NU 578) or specialization course, the course in which the second "C" or lower is obtained must be repeated before a student may move forward with a specialty course. All corresponding specialty clinical and didactic courses must be taken in sequence.
4. A student earning a third "C" or lower will be academically dismissed from the program.
5. A student earning two grades of "F" in the program will be academically dismissed.
6. Failure to show good ethical and moral character including but not limited to any of the following may result in dismissal from the program:
 - a. conviction of a crime,
 - b. disciplinary action against a nursing license in Alabama or any other state,
 - c. positive drug test,
 - d. adverse background check, or
 - e. disruptive behavior, including online behavior.
All student must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours of any of the above stated incidents.
7. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours following an arrest. Failure to report an arrest may result in removal from the program.
8. All students are subject to testing for controlled substances and must submit to random drug testing as requested. A positive test or refusal to submit to testing will result in removal from the program.

9. All students are subject to a background check and must submit to additional background checks as requested. An adverse finding or refusal to submit to a background check may result in removal from the program.

10. A student who has been academically dismissed is not eligible for readmission to the MSN program.

Graduation Requirements for BSN-prepared RN'S

The MSN program must be completed within 5 years of matriculation. MSN students who will complete all degree requirements are required to apply for graduation by the application deadline established by the Registrar's Office. Deadlines for each semester application are located on the Registrar's Graduation Website (<https://www.southalabama.edu/departments/registrar/commencement/>).

Additional Information

RN - MSN Pathway for RN's with a Non-Nursing Baccalaureate Degree

This pathway is available to persons who are registered nurses and have a baccalaureate degree from a regionally accredited institution in a discipline other than nursing.

Admission Criteria

1. Citizen or Permanent Resident of the United States of America.
2. Current registered nurse licensure with no restrictions. Nurses with any restrictions on their license, including participation in a voluntary disciplinary alternative program, cannot be admitted.
3. Graduate of an approved regionally accredited Associate Degree program with a major in nursing.
4. A minimal grade-point average of 2.75 on all BSN work (A=4.00).
5. Submission of a résumé which documents clinical experience.
6. Prior to enrolling in nurse practitioner clinical course, students are required to have at least 2 years of experience in an area appropriate to the specialty track.
7. Students are admitted to a specialty track and may not change their track without permission.
8. Students must be in good standing with all academic institutions/nursing programs that they have attended in order to be admitted to the MSN program.

Contingency for Admission and Initial Registration

Admission and initial registration is contingent on completion of the following requirements:

1. Acceptance Packet
2. Negative Drug Screen
3. Acceptable Background Check
4. All Health Requirements as outlined in the Medical Documents Manager

Notification of missing documents will be sent to your JagMail email account. Only students who have successfully completed the Acceptance Packet in its entirety, have a negative drug screen and acceptable background check, and completed all required portions of the Medical Documents Manager will be permitted to register for classes.

Application Procedures

Admission to the program is limited and selective. Application forms and other information may be obtained from the College of Nursing's Website (<https://www.southalabama.edu/colleges/con/msn/msnadmiss.html>) or by contacting the college directly at:

College of Nursing
University of South Alabama
Mobile, Alabama 36688
congradapp@southalabama.edu
Telephone: (251) 445-9400

To be considered for admission to the RN-MSN program, the applicant must submit the following:

Application Deadlines

1. Completion of the Primary Application:
 - a. Primary Application (<http://bulletin.southalabama.edu/programs-az/nursing/nursing/nursing-msn-rn-nonnursing-baccalaureate/www.NursingCAS.org>) submitted through Nursing Centralized Application System (NursingCAS).
 - b. Official transcripts of all college and university studies, regardless of the outcome of enrollment, must be sent directly from the home institution to the NursingCAS. These documents become the property of the NursingCAS and will not be returned to the

applicant. Applicants are responsible for any fees required by NursingCAS for their services.

- c. Personal Goal Statement is required. The Personal Goal Statement is a description of the applicant's purpose for completing the graduate degree. This essay serves as a writing sample to be reviewed by the Graduate Admissions Committee to determine the applicant's scholarly writing skills.
- d. Submission of a résumé which documents clinical experience.

2. Completion of the Supplemental Application:

- a. The Supplemental Application (<https://explore.southalabama.edu/account/register/?r=https%3a%2f%2fexplore.southalabama.edu%2fapply%2f%3fsr%3d870af7f1-de34-492d-b275-be6ef1c6297a>) is submitted electronically directly to the MSN Office at the USA College of Nursing. Under Academic Information please select the appropriate semester for admission. Select "graduate" under both student type and academic level of interest. A new option will appear asking if you are applying for a graduate nursing program, select "yes" and this will take you into the nursing application.
- b. Please note that the Supplemental Application should be completed **AFTER** you have completed your NursingCAS application and it has moved through the following stages: received, complete then **VERIFIED**. Once it is verified you may complete the Supplemental Application.
- c. Applicants are responsible for ensuring that their completed Supplemental Application is submitted by the deadline for the semester for which they are applying. Incomplete applications will not be processed.
- d. This application requires a non-refundable processing fee of \$100.00.

Application Deadlines

Applications are accepted year round, and must adhere to the following application deadlines:

- Fall Semester Deadline is March 1
- Spring Semester Deadline is July 15
- Summer Semester Deadline is December 1

Academic Progression Policy

Students in the RN-MSN program must meet the following requirements to progress in the program:

1. Maintain an overall GPA of 3.0. Any term in which a graduate student drops below a 3.0 Program GPA, the student is placed on probationary status and has a period of two terms to attain a 3.0 Program GPA or be dismissed.
2. Students in these programs can have a maximum of two "C"s.
3. A maximum of two (2) courses with a grade of "C" can be counted towards a degree; however, only one (1) "C" is permitted in support or specialization courses. If a second "C" or lower is earned in a support or specialization course, the course in which the second "C" or lower is obtained must be repeated before a student may move forward with a specialty course. All corresponding specialty clinical and didactic courses must be taken in sequence.

4. A student earning a third "C" or lower will be academically dismissed from the program.
5. A student earning two grades of "F" in the program will be academically dismissed.
6. Failure to show good ethical and moral character including but not limited to any of the following may result in dismissal from the program:
 - a. conviction of a crime,
 - b. disciplinary action against a nursing license in Alabama or any other state,
 - c. positive drug test,
 - d. adverse background check, or
 - e. disruptive behavior, including online behavior.
 All student must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours of any of the above stated incidents.
7. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours following an arrest. Failure to report an arrest may result in removal from the program.
8. All students are subject to testing for controlled substances and must submit to random drug testing as requested. A positive test or refusal to submit to testing will result in removal from the program.
9. All students are subject to a background check and must submit to additional background checks as requested. An adverse finding or refusal to submit to a background check may result in removal from the program.
10. A student who has been academically dismissed is not eligible for readmission to the MSN program.

Graduation Requirements

The MSN program must be completed within 5 years of matriculation. MSN students who will complete all degree requirements are required to apply for graduation by the application deadline established by the Registrar's Office. Deadlines for each semester application are located on the Registrar's Graduation Website (<https://www.southalabama.edu/departments/registrar/commencement/>).

Nursing Post-Graduate Certificate Program

The Nursing Post-Graduate Certificate Program is designed for registered nurses with a graduate degree in nursing who seek academic preparation in a new specialty or subspecialty area of advanced practice nursing. Nursing Post-graduate certificate students can select any of the specialty options offered by the program. Each certificate program is designed to be in compliance with national certification requirements including required support courses, didactic specialty courses, and clinical hours.

Nursing Post-Graduate Certificate Program Learning Outcomes

Upon completion of the Nursing Post-Graduate Certificate Program, graduates should be able to:

1. Integrate advanced knowledge and theories from nursing and related disciplines into a specialized area of advanced nursing practice.

2. Demonstrate competence in advanced nursing roles to meet current and emerging health needs of a specific population or system.
3. Use scientific inquiry to identify problems within an organization or specific patient population to improve care outcomes.
4. Apply advanced knowledge of leadership and management to transform care delivery systems in a specialized area of advanced nursing practice.
5. Contribute to the focus and direction of the nursing profession within a specialized area of advanced nursing practice.
6. Demonstrate professional skills through collecting, organizing, and communicating information in professional writing and presentations.

Admission Criteria

1. Citizen or Permanent Resident of the United States of America.
2. Current registered nurse licensure with no restrictions. Nurses with any restrictions on their license, including participation in a voluntary disciplinary alternative program, cannot be admitted.
3. Graduate of an approved regionally accredited master's or doctoral program with a major in nursing.
4. A minimal grade-point average of 2.75 on all graduate work (A=4.00).
5. Submission of a résumé which documents clinical experience.
6. Prior to enrolling in nurse practitioner clinical course, students are required to have at least 2 years of experience in an area appropriate to the specialty track.
7. Students are admitted to a specialty track and may not change their track without permission.
8. Students must be in good standing with all academic institutions/ nursing programs that they have attended in order to be admitted to the Post-Graduate Certificate program.
9. Enrollment in selective courses may not be available to non-degree students due to class size or required prerequisite.

Contingency for Admission and Initial Registration

Admission and initial registration is contingent on completion of the following requirements:

1. Acceptance Packet
2. Negative Drug Screen
3. Acceptable Background Check
4. All Health Requirements as outlined in the Medical Documents Manager.

Notification of missing documents will be sent to your JagMail email account. Only students who have successfully completed the Acceptance Packet in its entirety, have a negative drug screen and acceptable background check, and completed all required portions of the Medical Documents Manager will be permitted to register for classes.

Application Procedures

Admission to the program is limited and selective. Application forms and other information may be obtained from the College of Nursing's website (<https://www.southalabama.edu/colleges/con/dnp/dnpapplic.html>) or by contacting the college directly at:

College of Nursing
University of South Alabama
Mobile, Alabama 36688

- Spring Semester Deadline is July 15
- Summer Semester Deadline is December 1

Academic Progression Requirements for the Nursing Post-Graduate Certificate

Students in the Nursing Post-Graduate Certificate program must meet the following requirements to progress in the program:

1. Maintain an overall GPA of 3.0. Any term in which a graduate student drops below a 3.0 Program GPA, the student is placed on probationary status and has a period of two terms to attain a 3.0 Program GPA or be dismissed.
2. Students in these programs can have a maximum of two "C"s.
3. A maximum of two (2) courses with a grade of "C" can be counted towards a degree; however, only one (1) "C" is permitted in support or specialization courses. If a second "C" or lower is earned in a support or specialization course, the course in which the second "C" or lower is obtained must be repeated before a student may move forward with a specialty course. All corresponding specialty clinical and didactic courses must be taken in sequence.
4. A student earning a third "C" or lower will be academically dismissed from the program.
5. A student earning two grades of "F" in the program will be academically dismissed.
6. Failure to show good ethical and moral character including but not limited to any of the following may result in dismissal from the program:
 - a. conviction of a crime,
 - b. disciplinary action against a nursing license in Alabama or any other state,
 - c. positive drug test,
 - d. adverse background check, or
 - e. disruptive behavior, including online behavior.
 All student must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours of any of the above stated incidents.
7. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours following an arrest. Failure to report an arrest may result in removal from the program.
8. All students are subject to testing for controlled substances and must submit to random drug testing as requested. A positive test or refusal to submit to testing will result in removal from the program.
9. All students are subject to a background check and must submit to additional background checks as requested. An adverse finding or refusal to submit to a background check may result in removal from the program.
10. A student who has been academically dismissed is not eligible for readmission to the College of Nursing Graduate programs.

Program Completion

Students in the Nursing Post Graduate Certificate Pathway are required to complete all specialty courses and any support courses not previously completed. Nursing Post-Graduate certificate students are not required to complete graduate core or research courses (see the previous section on MSN Curriculum for the BSN-prepared RN for a listing of courses for each specialty area). The Nursing Post-Graduate Certificates Program must be completed within 2 years from the semester the specialty option coursework begins.

Additional Information

BSN to DNP Pathway

The BSN to DNP curriculum consist of 69 to 87 credit hours. The program can be completed in ten semesters of full-time study or in sixteen semesters of part-time study. Full-time study is defined as six or more

credit hours per semester. Permission to take more than twelve credit hours per semester must be obtained from the Associate Dean for Academic Affairs prior to the student enrolling. The program must be completed within 7 years of matriculation.

Course work is offered on-line and students are required to come to campus at least one time when they begin the clinical portion of their specialty program for an intensive classroom, clinical skills, and evaluation sessions. Specialty tracks within the College of Nursing's graduate program require a practice component. Faculty assist students in locating a site and preceptor if it is indicated. Students who are unsuccessful in being accepted by an agency in their home community may have to travel to another area to complete practice requirements.

The program does not require a thesis or dissertation; however, students are required to complete a major synthesis project that results in a quality improvement change and has a substantial effect on health care outcomes. Residency requirements for the synthesis project can be completed in the student's home region with an approved mentor.

Admission Criteria

To be considered for admission to the DNP program, the applicant must meet the following requirements:

1. Citizen or Permanent Resident of the United States of America.
2. Current registered nurse licensure with no restrictions. Nurses with any restrictions on their license, including participation in a voluntary disciplinary alternative program, cannot be admitted.
3. Graduate of an approved regionally accredited bachelors program with a major in nursing.
4. Applicants to the BSN to DNP pathway must have a minimal grade-point average of 3.0 on all BSN work (A=4.00).
5. Submission of a résumé which documents clinical experience.
6. Prior to enrolling in nurse practitioner clinical course, students are required to have at least 2 years of experience in an area appropriate to the specialty track.
7. Students are admitted to a specialty track and may not change their track without permission.
8. Students must be in good standing with all academic institutions/ nursing programs that they have attended in order to be admitted to the DNP program.

Contingency for Admission and Initial Registration

Admission and initial registration is contingent on completion of the following requirements:

1. Acceptance Packet
2. Negative Drug Screen
3. Acceptable Background Check
4. All Health Requirements as outlined in the Medical Documents Manager.

Notification of missing documents will be sent to your JagMail email account. Only students who have successfully completed the Acceptance Packet in its entirety, have a negative drug screen and acceptable

background check, and completed all required portions of the Medical Documents Manager will be permitted to register for classes.

Application Procedures

Admission to the program is limited and selective. Application forms and other information may be obtained from the College of Nursing's website (<https://www.southalabama.edu/colleges/con/dnp/dnpapplic.html>) or by contacting the college directly at:

College of Nursing
University of South Alabama
Mobile, Alabama 36688
condnpadmit@southalabama.edu
Telephone: (251) 445-9400.

1. Completion of the Primary Application:
 - a. Primary Application (<http://bulletin.southalabama.edu/programs-az/nursing/nursing/nursing-practice-dnp-bsn/www.NursingCAS.org>) submitted through Nursing Centralized Application System (NursingCAS).
 - b. Official transcripts of all college and university studies, regardless of the outcome of enrollment, must be sent directly from the home institution to the NursingCAS. These documents become the property of the NursingCAS and will not be returned to the applicant. Applicants are responsible for any fees required by NursingCAS for their services.
 - c. Personal Goal Statement is required. The Personal Goal Statement is a description of the applicant's purpose for completing the graduate degree. This essay serves as a writing sample to be reviewed by the Graduate Admissions Committee to determine the applicant's scholarly writing skills.
 - d. Submission of a résumé which documents clinical experience.
2. Completion of the Supplemental Application:
 - a. The Supplemental Application (<https://explore.southalabama.edu/account/register/?r=https%3a%2f%2fexplore.southalabama.edu%2fapply%2f%3fsr%3d870af7f1-de34-492d-b275-be6ef1c6297a>) is submitted electronically directly to the DNP Office at the USA College of Nursing. Under Academic Information please select the appropriate semester for admission. Select "graduate" under both student type and academic level of interest. A new option will appear asking if you are applying for a graduate nursing program, select "yes" and this will take you into the nursing application.
 - b. Please note that the Supplemental Application should be completed **AFTER** you have completed your NursingCAS application and it has moved through the following stages: received, complete then **VERIFIED**. Once it is verified you may complete the Supplemental Application.
 - c. Applicants are responsible for ensuring that their completed Supplemental Application is submitted by the deadline for the semester for which they are applying. Incomplete applications will not be processed.
 - d. This application requires a non-refundable processing fee of \$100.00.

Application Deadlines

Applications are accepted three times a year, and must adhere to the following application deadlines:

- Fall Semester Deadline is March 1
- Spring Semester Deadline is July 15
- Summer Semester Deadline is December 1

Academic Progression Policy

Students in the BSN-DNP program must meet the following requirements to progress in the program:

1. Maintain an overall GPA of 3.0. Any term in which a graduate student drops below a 3.0 Program GPA, the student is placed on probationary status and has a period of two terms to attain a 3.0 Program GPA or be dismissed.
2. Students in these programs can have a maximum of two "C"s.
3. A maximum of two (2) courses with a grade of "C" can be counted towards a degree; however, only one (1) "C" is permitted in support or specialization courses. If a second "C" or lower is earned in a support (NU 518, NU 545, NU 578) or specialization course, the course in which the second "C" or lower is obtained must be repeated before a student may move forward with a specialty course. All corresponding specialty clinical and didactic courses must be taken in sequence.
4. A student earning a third "C" or lower will be academically dismissed from the program.
5. A student earning two grades of "F" in the program will be academically dismissed.
6. The final outcome of the DNP Project Planning and Development course and the DNP Incomplete Extension course is "Successful/ Unsuccessful." Students receiving two grades of "U" in these courses will be academically dismissed.
7. Failure to show good ethical and moral character including but not limited to any of the following may result in dismissal from the program:
 - a. conviction of a crime,
 - b. disciplinary action against a nursing license in Alabama or any other state,
 - c. positive drug test,
 - d. adverse background check, or
 - e. disruptive behavior, including online behavior.
All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours of any of the above stated incidents.
8. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours following an arrest. Failure to report an arrest may result in removal from the program.

9. All students are subject to testing for controlled substances and must submit to random drug testing as requested. A positive test or refusal to submit to testing will result in removal from the program.
10. All students are subject to a background check and must submit to additional background checks as requested. An adverse finding or refusal to submit to a background check may result in removal from the program.
11. A student who has been academically dismissed is not eligible for readmission to the DNP program and is not eligible for admission to the MSN program.

DNP Residency Coursework Policy

The DNP Residency Coursework includes the DNP Project Planning and Development, Residency I, Residency II, and Residency III. Students who do not meet all requirements in a course must complete a DNP Incomplete Extension Course prior to moving forward with the next course in the DNP Residency progression.

Scientific Review Committee Policy

The DNP project will be reviewed by the USA College of Nursing DNP Scientific Review Committee to evaluate rigor and feasibility. The review process will occur during Project Planning and Development. The DNP project must be reviewed by the Scientific Review Committee before enrolling in Residency I.

Graduation Information

Students in the BSN-DNP program will apply for two separate graduations. Applications should be submitted to the Registrar's Office the semester before the anticipated graduation. Each candidate must submit an application for the Master of Science in Nursing degree upon completion of the degree requirements. Upon completion of requirements for the Doctor of Nursing Practice degree, each candidate must submit an application for that degree. The student's curriculum schedule indicates the semester in which each degree should be awarded. See the Registrar's Graduation Website (<https://www.southalabama.edu/departments/registrar/commencement/>) for specific application deadlines.

Additional Information

MSN in Clinical Nurse Leader Bridge to DNP Executive Nursing Administration

MSN to DNP Clinical Nurse Leader with Advanced Concentration in Leadership Bridge to Executive Nursing Administration Pathway is for students who completed their MSN in the area of Clinical Nurse Leader with Advanced Concentration in Leadership and want to complete their DNP in the specialty area of Executive Nursing Administration.

Students may pursue a DNP in the specialty area of Nursing Executive Administration after receiving an MSN degree with Advanced Concentration in Leadership.

Students would be required to complete 36 credit hours of the DNP program and two bridge courses to matriculate from the Clinical Nurse Leader with Advanced Concentration in Leadership to the Nursing Executive Administration specialty. Graduates of this program would complete a total of 42 credit hours.

Admission Criteria

To be considered for admission to the DNP program, the applicant must meet the following requirements:

1. Citizen or Permanent Resident of the United States of America.
2. Current registered nurse licensure with no restrictions. Nurses with any restrictions on their license, including participation in a voluntary disciplinary alternative program, cannot be admitted.
3. Graduate of an approved regionally accredited master's program with a major in nursing.
4. Applicants to the MSN to DNP pathway must have a minimal GPA of 3.0 on all MSN work (A=4.00).
5. Submission of a résumé which documents clinical experience.
6. Prior to enrolling in nurse practitioner clinical course, students are required to have at least 2 years of experience in an area appropriate to the specialty track.
7. Students are admitted to a specialty track and may not change their track without permission.
8. Students must be in good standing with all academic institutions/nursing programs that they have attended in order to be admitted to the MSN program.

Contingency for Admission and Initial Registration

Admission and initial registration is contingent on completion of the following requirements:

1. Acceptance Packet
2. Negative Drug Screen
3. Acceptable Background Check
4. All Health Requirements as outlined in the Medical Documents Manager.

Notification of missing documents will be sent to your JagMail email account. Only students who have successfully completed the Acceptance Packet in its entirety, have a negative drug screen and acceptable background check, and completed all required portions of the Medical Documents Manager will be permitted to register for classes.

Application Procedures

Admission to the program is limited and selective. Application forms and other information may be obtained from the College of Nursing's website (<https://www.southalabama.edu/colleges/con/dnp/dnpapplic.html>) or by contacting the college directly at:

College of Nursing
University of South Alabama
Mobile, Alabama 36688
condnpadmit@southalabama.edu

Telephone: (251) 445-9400.

1. Completion of the Primary Application:

- a. Primary Application (<http://bulletin.southalabama.edu/programs-az/nursing/nursing/nursing-practice-dnp-msn-clinical-leader-bridge-executive-administration-pathway/www.NursingCAS.org>) submitted through Nursing Centralized Application System (NursingCAS).
- b. Official transcripts of all college and university studies, regardless of the outcome of enrollment, must be sent directly from the home institution to the NursingCAS. These documents become the property of the NursingCAS and will not be returned to the applicant. Applicants are responsible for any fees required by NursingCAS for their services.
- c. Personal Goal Statement is required. The Personal Goal Statement is a description of the applicant's purpose for completing the graduate degree. This essay serves as a writing sample to be reviewed by the Graduate Admissions Committee to determine the applicant's scholarly writing skills.
- d. Submission of a résumé which documents clinical experience.

2. Completion of the Supplemental Application:

- a. The Supplemental Application (<https://explore.southalabama.edu/account/register/?r=https%3a%2f%2fexplore.southalabama.edu%2fapply%2f%3fsr%3d870af7f1-de34-492d-b275-be6ef1c6297a>) is submitted electronically directly to the MSN Office at the USA College of Nursing. Under Academic Information please select the appropriate semester for admission. Select "graduate" under both student type and academic level of interest. A new option will appear asking if you are applying for a graduate nursing program, select "yes" and this will take you into the nursing application.
- b. Please note that the Supplemental Application should be completed **AFTER** you have completed your NursingCAS application and it has moved through the following stages: received, complete then **VERIFIED**. Once it is verified you may complete the Supplemental Application.
- c. Applicants are responsible for ensuring that their completed Supplemental Application is submitted by the deadline for the semester for which they are applying. Incomplete applications will not be processed.
- d. This application requires a non-refundable processing fee of \$100.00.

Application Deadlines

Applications are accepted three times a year, and must adhere to the following application deadlines:

- Fall Semester Deadline is March 1
- Spring Semester Deadline is July 15
- Summer Semester Deadline is December 1

Academic Progression Policy

Students in the MSN Clinical Nurse Leader Bridge to DNP Executive Nursing Administration Pathway program must meet the following requirements to progress in the program:

1. Maintain an overall GPA of 3.0. Any term in which a graduate student drops below a 3.0 Program GPA, the student is placed on probationary status and has a period of two terms to attain a 3.0 Program GPA or be dismissed.
2. Students in these programs can have a maximum of one "C". A student earning a second "C" or lower will be academically dismissed from the program.
3. A student earning one grade of "F" in the program will be academically dismissed.
4. The final outcome of the DNP Project Planning and Development course and the DNP Incomplete Extension course is "Successful/ Unsuccessful." Students receiving two grades of "U" in these courses will be academically dismissed. Failure to show good ethical and moral character including but not limited to any of the following may result in dismissal from the program:
 - a. conviction of a crime,
 - b. disciplinary action against a nursing license in Alabama or any other state,
 - c. positive drug test,
 - d. adverse background check, or
 - e. disruptive behavior, including online behavior.
 All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours of any of the above stated incidents.
5. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours following an arrest. Failure to report an arrest may result in removal from the program.
6. All students are subject to testing for controlled substances and must submit to random drug testing as requested. A positive test or refusal to submit to testing will result in removal from the program.
7. All students are subject to a background check and must submit to additional background checks as requested. An adverse finding or refusal to submit to a background check may result in removal from the program.
8. A student who has been academically dismissed is not eligible for readmission to the DNP program and is not eligible for admission to the MSN program.

DNP Residency Coursework Policy

The DNP Residency Coursework includes the DNP Project Planning and Development, Residency I, Residency II, and Residency III. Students who do not meet all requirements in a course must complete a DNP Incomplete Extension Course prior to moving forward with the next course in the DNP Residency progression.

Scientific Review Committee Policy

The DNP project will be reviewed by the USA College of Nursing DNP Scientific Review Committee to evaluate rigor and feasibility. The review process will occur during Project Planning and Development. The DNP project must be reviewed by the Scientific Review Committee before enrolling in Residency I.

Graduation Information

The program must be completed in five years of matriculation for the MSN Clinical Nurse Leader Bridge to DNP Executive Nursing Administration Pathway. Each candidate for the Doctor of Nursing practice degree must submit an application for the degree the semester preceding their anticipated graduation through the Registrar's Office. See the University Calendar for specific deadlines. Deadlines for each semester application are located on the Registrar's Graduation Website (<https://www.southalabama.edu/departments/registrar/commencement/>).

Additional Information

Doctor of Nursing Practice Degree Program

The Doctor of Nursing Practice (DNP) is a professional degree and prepares graduates to provide the most advanced level of nursing care for individuals and communities. This includes the direct care of individual patients, management of care for individuals and populations, administration of health care and nursing systems, and the development and implementation of health policy. The program is designed to be in compliance with The Essentials of Doctoral Education for Advanced Nursing Practice as put forth by the American Association of Colleges of Nursing.

The College of Nursing has several pathways, specialization, and sub-specialization options within the DNP program. The pathways include the MSN to DNP for Advanced Nursing Practice roles, MSN to DNP adding a new advanced practice certification area, MSN to DNP Clinical Nurse Leader Bridge to Executive Nursing Administration, and the BSN to DNP.

Areas of Specialization

Several concentration areas are offered to meet the career goals of students. Available Nurse Practitioner options include Adult-Gerontological Acute Care Nursing, Adult-Gerontological Primary Care Nursing, Dual Role (Family Nursing/Adult-Gerontological Acute Care Nursing), Dual Role (Family Nursing/Emergency Nursing), Family Nursing, Psychiatric Mental Health Nursing, Neonatal Nursing, Pediatric Acute Care Nursing, Pediatric Primary Care Nursing, Women's Health Nursing. Clinical Nurse Specialist is available in Adult-Gerontological Nursing. Concentrations are also available for students pursuing careers in Executive Nursing Administration, Nursing Informatics, and Clinical Nurse Leader Bridge to DNP Executive Nursing Administration. Emergency Nursing is offered only as a post-graduate certificate. Sub-specializations are available in Addictions Nursing, Advanced Forensic Nursing Care, Cardiovascular, Clinical Lipidology, Diversity, Equity, and Inclusion in Healthcare, Nursing Education, Palliative Care and Trauma-Informed Integrated Behavioral Healthcare Subspecialty.

Doctor of Nursing Practice Program Learning Outcomes

1. Upon completion of the Doctor of Nursing Practice program, graduates should be able to:
2. Assume organizational and system leadership in the analysis, delivery, and management of nursing care.

3. Implement the highest level of advanced nursing care to produce high-quality, cost-effective outcomes for diverse patient outcomes.
4. Use theories, concepts, and analytic methodologies to design, implement, and evaluate practice by applying evidence to transform nursing systems.
5. Contribute to the knowledge of best-practices and dissemination of outcomes through professional writing and presentations.
6. Develop practice standards based on the integration of ethics and evidence-based nursing care.
7. Build interdisciplinary professional collaboration through leadership and mentorship.

MSN to DNP Adding a New Concentration Pathway

Students pursuing the MSN to DNP for adding a new specialty certificate area will follow the same requirements as the BSN to DNP program students. Since these students should already possess a MSN degree in an area of advanced practice nursing, they should have already completed the support courses (NU 518, NU 545, and NU 578). If they have not previously completed these courses they are required to complete them if required for their specialization. Students in the Executive Nursing Administration and Nursing Informatics specialties are not required to take these three courses to complete their programs.

The MSN to DNP adding a new certificate area curriculum consists of 69 to 87 credit hours. Students who graduated with an MSN from the University of South Alabama College of Nursing and completed the following courses NU 607, NU 608, NU 610, and NU 613 during the MSN coursework must complete the new certificate and the remaining 24 credit hours of the DNP program within the seven year time limit. The program can be completed in 10 semesters of full-time study or in twelve semesters of part-time study. Full-time study is defined as six or more credit hours per semester. Permission to take more than 12 Credit hours per semester must be obtained from the Associate Dean of Academic Affairs. Part-time study is also available.

The MSN to DNP Adding a new certificate program must be completed in seven years of matriculation.

Electives can be taken but are not required. The program does not require a thesis or dissertation; however, students are required to complete a major synthesis project that results in a quality improvement change and has a substantial effect on health care outcomes. Residency requirements for the synthesis project can be completed in the student's home region with an approved mentor.

Admission Criteria

To be considered for admission to the DNP program, the applicant must meet the following requirements:

1. Citizen or Permanent Resident of the United States of America.
2. Current registered nurse licensure with no restrictions. Nurses with any restrictions on their license, including participation in a voluntary disciplinary alternative program, cannot be admitted.
3. Graduate of an approved regionally accredited master's program with a major in nursing.
4. Applicants to the MSN to DNP pathway must have a minimal grade-point average of 3.0 on all MSN work (A=4.00).
5. Submission of a résumé which documents clinical experience.

6. Prior to enrolling in nurse practitioner clinical course, students are required to have at least 2 years of experience in an area appropriate to the specialty track.
7. Students are admitted to a specialty track and may not change their track without permission.
8. Students must be in good standing with all academic institutions/ nursing programs that they have attended in order to be admitted to the DNP program.

Contingency for Admission and Initial Registration

Admission and initial registration is contingent on completion of the following requirements:

1. Acceptance Packet
2. Negative Drug Screen
3. Acceptable Background Check
4. All Health Requirements as outlined in the Medical Documents Manager.

Notification of missing documents will be sent to your JagMail email account. Only students who have successfully completed the Acceptance Packet in its entirety, have a negative drug screen and acceptable background check, and completed all required portions of the Medical Documents Manager will be permitted to register for classes

Application Procedures

Admission to the program is limited and selective. Application forms and other information may be obtained from the College of Nursing's website (<https://www.southalabama.edu/colleges/con/dnp/dnpapplic.html>) or by contacting the college directly at:

College of Nursing
University of South Alabama
Mobile, Alabama 36688
condnpadmit@southalabama.edu
Telephone: (251) 445-9400.

1. Completion of the Primary Application:
 - a. Primary Application (<http://bulletin.southalabama.edu/programs-az/nursing/nursing/nursing-practice-dnp-msn-adding-new-concentration-area/www.NursingCAS.org>) submitted through Nursing Centralized Application System (NursingCAS).
 - b. Official transcripts of all college and university studies, regardless of the outcome of enrollment, must be sent directly from the home institution to the NursingCAS. These documents become the property of the NursingCAS and will not be returned to the applicant. Applicants are responsible for any fees required by NursingCAS for their services.
 - c. Personal Goal Statement is required. The Personal Goal Statement is a description of the applicant's purpose for completing the graduate degree. This essay serves as a writing sample to be reviewed by the Graduate Admissions Committee to determine the applicant's scholarly writing skills.
 - d. Submission of a résumé which documents clinical experience.

2. Completion of the Supplemental Application:

- a. The Supplemental Application (<https://explore.southalabama.edu/account/register/?r=https%3a%2f%2fexplore.southalabama.edu%2fapply%2f%3fsr%3d870af7f1-de34-492d-b275-be6ef1c6297a>) is submitted electronically directly to the DNP Office at the USA College of Nursing. Under Academic Information please select the appropriate semester for admission. Select "graduate" under both student type and academic level of interest. A new option will appear asking if you are applying for a graduate nursing program, select "yes" and this will take you into the nursing application.
- b. Please note that the Supplemental Application should be completed **AFTER** you have completed your NursingCAS application and it has moved through the following stages: received, complete then **VERIFIED**. Once it is verified you may complete the Supplemental Application.
- c. Applicants are responsible for ensuring that their completed Supplemental Application is submitted by the deadline for the semester for which they are applying. Incomplete applications will not be processed.
- d. This application requires a non-refundable processing fee of \$100.00.

Unsuccessful." Students receiving two grades of "U" in these courses will be academically dismissed.

7. Failure to show good ethical and moral character including but not limited to any of the following may result in dismissal from the program:
 - a. conviction of a crime,
 - b. disciplinary action against a nursing license in Alabama or any other state,
 - c. positive drug test,
 - d. adverse background check, or
 - e. disruptive behavior, including online behavior. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours of any of the above state incidents.
8. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours following an arrest. Failure to report an arrest may result in removal from the program.
9. All students are subject to testing for controlled substances and must submit to random drug testing as requested. A positive test or refusal to submit to testing will result in removal from the program.
10. All students are subject to a background check and must submit to additional background checks as requested. An adverse finding or refusal to submit to a background check may result in removal from the program.
11. A student who has been academically dismissed is not eligible for readmission to the DNP program and is not eligible for admission to the MSN program.

Application Deadlines

Applications are accepted three times a year, and must adhere to the following application deadlines:

- Fall Semester Deadline is March 1
- Spring Semester Deadline is July 15
- Summer Semester Deadline is December 1

Academic Progression Policy

Students in the MSN-DNP Adding a Concentration program must meet the following requirements to progress in the program:

1. Maintain an overall GPA of 3.0. Any term in which a graduate student drops below a 3.0 Program GPA, the student is placed on probationary status and has a period of two terms to attain a 3.0 Program GPA or be dismissed.
2. Students in these programs can have a maximum of two "C"s.
3. A maximum of two (2) courses with a grade of "C" can be counted towards a degree; however, only one (1) "C" is permitted in support or specialization courses. If a second "C" or lower is earned in a support (NU 518, NU 545, NU 578) or specialization course, the course in which the second "C" or lower is obtained must be repeated before a student may move forward with a specialty course. All corresponding specialty clinical and didactic courses must be taken in sequence.
4. A student earning a third "C" or lower will be academically dismissed from the program.
5. A student earning two grades of "F" in the program will be academically dismissed.
6. The final outcome of the DNP Project Planning and Development course and the DNP Incomplete Extension course is "Successful/

DNP Residency Coursework Policy

The DNP Residency Coursework includes the DNP Project Planning and Development, Residency I, Residency II, and Residency III. Students who do not meet all requirements in a course must complete a DNP Incomplete Extension Course prior to moving forward with the next course in the DNP Residency progression.

Scientific Review Committee Policy

The DNP project will be reviewed by the USA College of Nursing DNP Scientific Review Committee to evaluate rigor and feasibility. The review process will occur during Project Planning and Development. The DNP project must be reviewed by the Scientific Review Committee before enrolling in Residency I.

Graduation Information

The MSN to DNP adding a new Concentration program must be completed in seven years of matriculation. Students in this program will receive a post-graduate certificate from the College of Nursing upon the completion of all certificate requirements. All post-graduate certificate requirements must be completed within 2 years from the semester the specialty option coursework begins. No application is required for the completion of the post-graduate certificate.

Students will only apply to graduate when they have completed all the requirements for the DNP degree.

Deadlines for each semester application are located on the Registrar's Graduation Website (<https://www.southalabama.edu/departments/registrar/commencement/>).

Additional Information

Doctor of Nursing Practice Degree Program

The Doctor of Nursing Practice (DNP) is a professional degree and prepares graduates to provide the most advanced level of nursing care for individuals and communities. This includes the direct care of individual patients, management of care for individuals and populations, administration of health care and nursing systems, and the development and implementation of health policy. The program is designed to be in compliance with The Essentials of Doctoral Education for Advanced Nursing Practice as put forth by the American Association of Colleges of Nursing.

The College of Nursing has several pathways, specialization, and sub-specialization options within the DNP program. The pathways include the MSN to DNP for Advanced Nursing Practice roles, MSN to DNP adding a new advanced practice certification area, MSN to DNP Clinical Nurse Leader Bridge to Executive Nursing Administration, and the BSN to DNP.

Areas of Specialization

Several concentration areas are offered to meet the career goals of students. Available Nurse Practitioner options include Adult-Gerontological Acute Care Nursing, Adult-Gerontological Primary Care Nursing, Dual Role (Family Nursing/Adult-Gerontological Acute Care Nursing), Dual Role (Family Nursing/Emergency Nursing), Family Nursing, Psychiatric Mental Health Nursing, Neonatal Nursing, Pediatric Acute Care Nursing, Pediatric Primary Care Nursing, Women's Health Nursing. Clinical Nurse Specialist is available in Adult-Gerontological Nursing. Concentrations are also available for students pursuing careers in Executive Nursing Administration, Nursing Informatics, and Clinical Nurse Leader Bridge to DNP Executive Nursing Administration. Emergency Nursing is offered only as a post-graduate certificate. Sub-specializations are available in Addictions Nursing, Advanced Forensic Nursing Care, Cardiovascular, Clinical Lipidology, Diversity, Equity, and Inclusion in Healthcare, Nursing Education, Palliative Care and Trauma-Informed Integrated Behavioral Healthcare Subspecialty.

Doctor of Nursing Practice Program Learning Outcomes

Upon completion of the Doctor of Nursing Practice program, graduates should be able to:

1. Assume organizational and system leadership in the analysis, delivery, and management of nursing care.
2. Implement the highest level of advanced nursing care to produce high-quality, cost-effective outcomes for diverse patient outcomes.
3. Use theories, concepts, and analytic methodologies to design, implement, and evaluate practice by applying evidence to transform nursing systems.
4. Contribute to the knowledge of best-practices and dissemination of outcomes through professional writing and presentations.
5. Develop practice standards based on the integration of ethics and evidence-based nursing care.
6. Build interdisciplinary professional collaboration through leadership and mentorship.

MSN to DNP for Advanced Nursing Roles Pathway

The DNP curriculum consists of 36 Credit hours for the student holding a Master of Science in Nursing degree with preparation in an area of advanced practice nursing. Students who graduated with an MSN from the University of South Alabama College of Nursing and completed the following courses NU 607, NU 608, NU 610, and NU 613 during the MSN coursework may complete the DNP program with an additional 24 Credit hours if the previous coursework is within the seven year limit. The MSN to DNP program can be completed in four semesters of full-time study. Full-time study is defined as six or more credit hours per semester. Permission to take more than 12 Credit hours per semester must be obtained from the Associate Dean of Academic Affairs. Part-time study is also available.

The program must be completed in five years of matriculation for the MSN to DNP for Advanced Practice Nursing Roles Pathway.

Course work for the MSN to DNP program is offered completely on-line. Students are not required to come to campus during the MSN to DNP program. Electives can be taken but are not required. The program does not require a thesis or dissertation; however, students are required to complete a major synthesis project that results in a quality improvement change and has a substantial effect on health care outcomes. Residency requirements for the synthesis project can be completed in the student's home region with an approved mentor.

Admission Criteria

To be considered for admission to the DNP program, the applicant must meet the following requirements:

1. Citizen or Permanent Resident of the United States of America.
2. Current registered nurse licensure with no restrictions. Nurses with any restrictions on their license, including participation in a voluntary disciplinary alternative program, cannot be admitted.
3. Graduate of an approved regionally accredited master's program with a major in nursing.

4. Applicants to the MSN to DNP pathway must have a minimal grade-point average of 3.0 on all MSN work (A=4.00).
5. Submission of a résumé which documents clinical experience.
6. Prior to enrolling in nurse practitioner clinical course, students are required to have at least 2 years of experience in an area appropriate to the specialty track.
7. Students are admitted to a specialty track and may not change their track without permission.
8. Students must be in good standing with all academic institutions/nursing programs that they have attended in order to be admitted to the DNP program.

Contingency for Admission and Initial Registration

Admission and initial registration is contingent on completion of the following requirements:

1. Acceptance Packet
2. Negative Drug Screen
3. Acceptable Background Check
4. All Health Requirements as outlined in the Medical Documents Manager.

Notification of missing documents will be sent to your JagMail email account. Only students who have successfully completed the Acceptance Packet in its entirety, have a negative drug screen and acceptable background check, and completed all required portions of the Medical Documents Manager will be permitted to register for classes.

Application Procedures

Admission to the program is limited and selective. Application forms and other information may be obtained from the College of Nursing's Website (<https://www.southalabama.edu/colleges/con/dnp/dnpapplic.html>) or by contacting the college directly at:

College of Nursing
University of South Alabama
Mobile, Alabama 36688
condnpadmit@southalabama.edu
Telephone: (251) 445-9400.

1. Completion of the Primary Application:
 - a. Primary Application (<http://bulletin.southalabama.edu/programs-az/nursing/nursing/nursing-practice-dnp-msn-advanced-roles/www.NursingCAS.org>) submitted through Nursing Centralized Application System (NursingCAS).
 - b. Official transcripts of all college and university studies, regardless of the outcome of enrollment, must be sent directly from the home institution to the NursingCAS. These documents become the property of the NursingCAS and will not be returned to the applicant. Applicants are responsible for any fees required by NursingCAS for their services.
 - c. Personal Goal Statement is required. The Personal Goal Statement is a description of the applicant's purpose for completing the graduate degree. This essay serves as a writing

sample to be reviewed by the Graduate Admissions Committee to determine the applicant's scholarly writing skills.

- d. Submission of a résumé which documents clinical experience.
2. Completion of the Supplemental Application:
 - a. The Supplemental Application (<https://explore.southalabama.edu/account/register/?r=https%3a%2f%2fexplore.southalabama.edu%2fapply%2f%3fsr%3d870af7f1-de34-492d-b275-be6ef1c6297a>) is submitted electronically directly to the DNP Office at the USA College of Nursing. Under Academic Information please select the appropriate semester for admission. Select "graduate" under both student type and academic level of interest. A new option will appear asking if you are applying for a graduate nursing program, select "yes" and this will take you into the nursing application.
 - b. Please note that the Supplemental Application should be completed **AFTER** you have completed your NursingCAS application and it has moved through the following stages: received, complete then **VERIFIED**. Once it is verified you may complete the Supplemental Application.
 - c. Applicants are responsible for ensuring that their completed Supplemental Application is submitted by the deadline for the semester for which they are applying. Incomplete applications will not be processed.
 - d. This application requires a non-refundable processing fee of \$100.00.

Application Deadlines

Applications are accepted three times a year, and must adhere to the following application deadlines:

- Fall Semester Deadline is March 1
- Spring Semester Deadline is July 15
- Summer Semester Deadline is December 1

Academic Progression Policy

Students in the MSN-DNP for Advanced Practice Nursing Roles program must meet the following requirements to progress in the program:

1. Maintain an overall GPA of 3.0. Any term in which a graduate student drops below a 3.0 Program GPA, the student is placed on probationary status and has a period of two terms to attain a 3.0 Program GPA or be dismissed.
2. Students in these programs can have a maximum of one "C". A student earning a second "C" or lower will be academically dismissed from the program.
3. A student earning one grade of "F" in the program will be academically dismissed.
4. The final outcome of the DNP Project Planning and Development course and the DNP Incomplete Extension course is "Successful/Unsuccessful." Students receiving two grades of "U" in these courses will be academically dismissed.

5. Failure to show good ethical and moral character including but not limited to any of the following may result in dismissal from the program:
 - a. conviction of a crime,
 - b. disciplinary action against a nursing license in Alabama or any other state,
 - c. positive drug test,
 - d. adverse background check, or
 - e. disruptive behavior, including online behavior.
All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours of any of the above stated incidents.
6. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours following an arrest. Failure to report an arrest may result in removal from the program.
7. All students are subject to testing for controlled substances and must submit to random drug testing as requested. A positive test or refusal to submit to testing will result in removal from the program.
8. All students are subject to a background check and must submit to additional background checks as requested. An adverse finding or refusal to submit to a background check may result in removal from the program.
9. A student who has been academically dismissed is not eligible for readmission to the DNP program and is not eligible for admission to the MSN program.

DNP Residency Coursework Policy

The DNP Residency Coursework includes the DNP Project Planning and Development, Residency I, Residency II, and Residency III. Students who do not meet all requirements in a course must complete a DNP Incomplete Extension Course prior to moving forward with the next course in the DNP Residency progression.

Scientific Review Committee Policy

The DNP project will be reviewed by the USA College of Nursing DNP Scientific Review Committee to evaluate rigor and feasibility. The review process will occur during Project Planning and Development. The DNP project must be reviewed by the Scientific Review Committee before enrolling in Residency I.

Graduation Information

The program must be completed in five years of matriculation for the MSN to DNP for Advanced Practice Nursing Roles Pathway. Each candidate for the Doctor of Nursing Practice degree must submit an application for the degree the semester preceding their anticipated graduation through the Registrar's Office. See the University Calendar for specific deadlines. Deadlines for each semester application are located on the Registrar's Graduation Website (<https://www.southalabama.edu/departments/registrar/commencement/>).

Graduate School Administrative Staff

Title	Name
Dean	J. Harold Pardue
Associate Director	DeAnna Cobb
Assistant Director, Academic Affairs	Amy Clay
Business Services	
Assistant Director, Academic Programs & Reporting	Ashley Gibson
Assistant Director, Graduate School Services	Avery Robinson

Graduate School Academic Standards

Applicability

All students enrolled in graduate courses or graduate programs are subject to Graduate School Academic Standards and Procedures. This includes those students who are in graduate programs, graduate certificate programs, non-degree graduate students, and transient graduate students.

Grade Standards

Courses for which the grade of "D" was assigned may not be counted toward a degree program (Please note D grades are no longer granted on the graduate level). A maximum of two courses with the grade of "C" may be counted toward a degree program. However, some programs accept no grades of "C"; see specific program.

Grades and Grade-Points (Graduate)

Students are graded on the basis of the following guidelines:

Grade	Guideline
A	4 grade-points per semester hour
B	3 grade-points per semester hour
C	2 grade-points per semester hour
F	Failure, no grade-points (weighted)
F*	Failure in cases where the student does not officially withdraw, but who failed to attend or participate in class activities, or who stopped attending or participating in class activities prior to the end of classes. No grade points.
S	Satisfactory, no grade-points (unweighted)
U	Unsatisfactory, no grade-points (unweighted)
U*	Unsatisfactory in cases where the student does not officially withdraw, but who failed to attend or participate in class activities, or who stopped attending or participating in class activities prior to the end of classes. No grade points.

The following symbols are substitutes for grades. They are not grades:

Symbol	Guideline
I	Incomplete (see below)
WD	Withdrawal in good standing
P	Course in progress (see below)
AU	Audit
UA	Unsatisfactory Audit (did not meet attendance requirements)
N	No grade or invalid grade (assigned only by the Registrar)

The symbol "I" (Incomplete) is assigned when, for reasons beyond the student's control, the student is unable to fulfill all the normal course requirements. The situation warranting an "I" must be a medical condition, an equipment problem, or other mitigating circumstance that is patently demonstrable to be beyond the student's control. This symbol is not used to provide time for completion of extra work beyond the normal course requirements for improving the student's grade, or to permit the student to avoid probation, suspension, or dismissal. The "I" symbol should not be assigned unless the amount of incomplete work can reasonably be completed in the time period allotted for an "I" grade without additional extensions. Extensions of "I" grades should only be granted in rare cases where additional and unanticipated circumstances beyond a student's control have prevented completion. All records of the symbols "I" must be cleared by the specified deadline of the next term; if they are not, grades of "F" will be recorded by the Registrar.

The symbol "P" (In Progress) is assigned only in a limited number of approved courses which require more than one term for completion. P grades remain in effect until they are changed to a letter grade, or until the time limits for a graduate degree have expired, when it will be changed to a F grade.

Change of Grade

Grades reported by instructors to the Registrar may not be changed unless there was an error in recording or in evaluation. Grade changes require the approval of the primary instructor of record and the signature of the department chair and the dean of the college in which the course is taught (or, for graduate students, the Director of Graduate Studies and the Dean of the Graduate School.) A Dean may delegate this responsibility to an Assistant/Associate Dean or to a Director or other academic administrator in their college when appropriate. All grade changes involving an F* or U* grade will also require the signature of the Associate Vice President for Academic Affairs. Grades on record for one calendar year may not be changed. The approval authority of the Dean is not intended to impede or restrict the right of the faculty to request and be granted approval to change a grade when it has been erroneously entered into the official academic records of the University.

Dismissals

1. Academic Dismissal

- The Dean of the Graduate School has authority to dismiss graduate students from the Graduate School.
- Any semester in which a graduate student drops below a 3.0 Program GPA, the student is placed on probationary status and has a period of two semesters to attain a 3.0 Program GPA or be dismissed.
- A student will be dismissed from the Graduate School after two unsuccessful attempts to pass the comprehensive examination or the Qualifying Exam.

- A student who has been academically dismissed is eligible to reapply to the Graduate School subject to the approval of the director of graduate studies of the specific new program and the Dean of the Graduate School. This is not intended to include the program from which the student has been dismissed. See exception listed below.
- Students who have been previously academically dismissed from the Graduate School may apply for readmission. The student must present compelling evidence that it is probable the student will perform at the level required to satisfactorily complete the degree requirements of the program (see Readmission after Academic Dismissal form). The program's graduate faculty and the Dean of the Graduate School must verify the student's circumstances have changed and/or the student has substantially improved such that the student can satisfactorily complete the degree requirements of the program. The program coordinator/director must include a plan of study for the student (see Readmission after Academic Dismissal Approval form). As part of readmission, the program graduate coordinator/director may request the student be allowed to repeat up to two (2) courses for grade replacement. The request must be approved by the Graduate School Dean. Individual programs reserve the right to 1) limit the number of courses that can be repeated and 2) restrict which courses can be repeated. The grade for a first courses is excluded from the student's GPA calculation if higher than the original grade; only grade points from the repeated course will be counted toward degree completion. The student's transcript will show all grades earned. Grade replacement is irrevocable. Only courses taken at USA may be used for grade replacement. Grades associated with a charge of academic misconduct may not be used for grade replacement.

2. Non-Academic Dismissal

- A student dismissed from a graduate program as the result of an academic misconduct penalty or research misconduct will be automatically dismissed from the Graduate School and the University of South Alabama and will not be eligible to apply for readmission.

Final Grade Grievance Policy

A student may initiate an inquiry under procedures set forth by the Undergraduate Final Grade Grievance Policy. A copy of this policy is available in the dean's office of each college and is published in The Lowdown (Student Handbook) and in the Faculty Handbook.

English Language Proficiency

English is the language of instruction at the University of South Alabama. Any remedial work in English language skill, which may be found needed after a student has been admitted to the Graduate School, may be specified and requested by the director of the graduate program in which the student is enrolled.

Academic Procedures

Full Load of Course Work in a Semester

A full load is three to ten credit hours. Permission to take more than ten credit hours must be obtained within the college/department.

Transfer Credit

1. Transfer credit to masters programs

A maximum of twelve (12) semester hours of approved transfer credit from another institution is allowed for a master's degree.

Transfer credit from regionally accredited universities may be accepted by certain programs. In the event that the university is non-accredited, the individual USA graduate program will determine if the quality and content of the course meets the standards of the program. Students may also transfer a maximum of twelve (12) semester hours of appropriate courses taken while at USA while in a non-degree graduate status or taken while in another program. Approval of the program's graduate coordinator, the college director of graduate studies, and the Graduate Dean is required. Only courses with "A", "B", or "S" grades are acceptable for transfer. The Graduate School does not award graduate credit for prior portfolio-based experiential learning.

2. Transfer credit to doctoral programs

A maximum of one half of the minimum hours required for the degree is normally allowed as transfer credit. Exceptions are allowed under unusual circumstances, but in no case will the number of transfer credit hours exceed two thirds of the minimum hours required for the degree. Transfer credit from regionally accredited universities may be accepted by certain programs. In the event that the university is non-accredited, the individual USA graduate program will determine if the quality and content of the course meets the standards of the program. Students may also transfer appropriate courses taken while at USA while in non-degree graduate status or taken while in another graduate program. Some programs will allow graduate courses applied to certain master's degrees to be transferred in and also count towards the doctoral degree, subject to the limits of maximum transfer credit hours. The University of South Alabama does not award graduate credit for prior portfolio-based experiential learning. Approval of the program's graduate coordinator and the college director of graduate studies is required. Only courses with "A", "B", or "S" grades are acceptable for transfer.

Change of Program

A student wishing to change from one graduate program to another in a separate college or school must apply to the new program through the Office of Admissions. If the new program is a related program within the same college or school, the student should first consult the Director of Graduate Studies of the new program.

Application for Degree

Each candidate for the Master's, Specialist's, or Doctoral degree must make application for the degree during the semester preceding the semester of graduation, with the Registrar's Office. The dates are specified in the University Calendar.

Student Responsibility

While the University of South Alabama will endeavor to provide timely and accurate advisement, it is the responsibility of the student to know and satisfy the degree requirements of the academic program, to be aware of the University calendar and to understand and comply with University academic policies and procedures.

Thesis and Dissertations

Guidelines for Theses and Dissertations

1. Students who intend to write a thesis or dissertation should consult early in their programs with the department chair or program director/coordinator for a list of Members of the Graduate Faculty from which to select an advisor to supervise and direct their research.
2. If the Member of the Graduate Faculty selected by the student consents to serve as an advisor, then the advisor and student initiate

a recommendation for a thesis/dissertation committee using the Appointment of Graduate Faculty to a Thesis, Dissertation, or COMP form.

3. A Master's thesis committee must include a minimum of three members of the Graduate Faculty and a dissertation committee must include at least four members of the Graduate Faculty. Master's thesis committees may be chaired by Associate or Full Members of the Graduate Faculty. Dissertation committees must include at least one Full Member of the Graduate Faculty who is the committee chair and usually is the student's advisor/major professor. Both thesis and dissertation committees must have at least one member from outside the student's department or program. Administratively appointed graduate faculty members may serve on thesis/dissertation committees for a specified student. At least half of the committee must be USA Associate or Full Members of the Graduate Faculty.
4. The Dean of the Graduate School is the appointing authority for thesis and dissertation committees. Once the Graduate Dean has appointed the committee, the student prepares a thesis or dissertation prospectus under the direction of the committee.
5. "A Guide for Preparing Theses and Dissertations", accessed at <https://www.southalabama.edu/colleges/graduateschool/thesis.html>, contains the guides for preparation of the prospectus and the thesis or dissertation. Diverse resources can also be found on this page.
6. Once a thesis or dissertation committee is appointed by the Dean of the Graduate School, the student may then enroll for 599 Thesis or 699/799 Dissertation credit with permission of the thesis/dissertation committee chair (advisor or major professor).
7. To be considered for approval by the Dean of the Graduate School, an acceptable thesis or dissertation must be submitted to the Graduate School office by the first submission deadline announced in the University Calendar.

Standards for Theses and Dissertations

1. A thesis/dissertation must demonstrate that the student has the capacity for original research, facility in the use of the English language, the ability to review appropriate background material, formulate and address (a) significant question(s), obtain, collate, and analyze relevant appropriate data and draw logical conclusions, and integrate the new knowledge in a meaningful way into the greater body of existing knowledge and state its significance. The final thesis/dissertation must be acceptable to the major professor, a majority of the thesis/dissertation committee, the chair of the student's department, the college/school director of graduate studies and the Dean of the Graduate School.
2. The thesis or dissertation must be an original research and/or creative project. This document will demonstrate the student's ability to:
 - A. Select a topic and delineate a problem that can be studied in terms of time, equipment needs and experimental population available to the faculty sponsor.
 - B. Search the literature for relevant studies on the topic of choice.
 - C. Organize and analyze the information that is available, using logical and/or statistical analysis appropriate for the project.
 - D. Present the results orally and in a written form to the satisfaction of the thesis/dissertation committee and the Graduate Faculty.
 - E. Present a final document as the Thesis or Dissertation to the Graduate School Office in an acceptable form and by the

procedures outlined in the Guide for Preparing Theses and Dissertations, University of South Alabama.

3. All theses/dissertations should meet current standards relative to responsible conduct of research.

Graduate Certificate Program Requirements

A graduate certificate program is a related cluster of credit bearing graduate courses that constitutes a coherent body of study within a discipline or set of related disciplines.

1. Admissions follows the same graduate school standards and procedures as used for admission to a master's level graduate program. The individual graduate certificate program may impose more restrictive standards as necessary for the purposes of the specific program.
2. Available graduate certificate programs are listed here <https://www.southalabama.edu/colleges/graduateschool/certificateslist.html>. The curriculum is defined by the individual graduate certificate program per university standards and procedures. See: https://www.southalabama.edu/departments/academicaffairs/resources/policies/guidelinesforcertificateprogramsJuly11_11.pdf
3. Upon approval by the graduate program and Graduate School, a student may transfer from another regionally accredited institution to a USA graduate certificate program: a maximum of fifty percent of the required graduate credit hours composing the certificate or 12 credit hours. Transfer credit must meet the guidelines established for master's level programs.
4. Graduate School academic standards policy applies to certificate programs.
5. Completion of a graduate certificate does not guarantee admission into a graduate degree program. Credit hours earned in a certificate program may or may not be used in a future graduate degree program.
6. The graduate certificate program must be completed within four years.

Graduate Interdisciplinary Programs

- Chemical And Biomolecular Engineering (p. 713)
 - Chemical and Biomolecular Engineering (PhD) (p. 714)
- Clinical and Counseling Psychology (p. 715)
 - Clinical and Counseling Psychology (PhD) (p. 722)

Admission Requirements and Procedures

The Dean of the Graduate School, advised by the Graduate Council, establishes and monitors the standards by which students are admitted for study in degree programs under its jurisdiction.

Each student must be qualified for admission to the Graduate School. The fact of qualification does not guarantee admission. Admission may be restricted because of capacity limitations. Official notice of actions on applications for admission is provided by the Office of Admissions. Any other correspondence between student and faculty members, department chairs, and/or administrative officers does not constitute nor does it imply admission to the Graduate School.

Application forms and other materials are available on-line at <https://www.southalabama.edu/departments/admissions/graduate.html>.

The Office of Admissions contact information (for students who have graduated from a U.S. accredited university/college):

2500 Meisler Hall, University of South Alabama
Mobile, Alabama 36688-0002
telephone (251)460-6141 or toll-free telephone number (800)872-5247
The e-mail address is admiss@southalabama.edu

The Office of Immigration and International Admissions contact information (for students who have graduated from an international university/college):

2200 Meisler Hall, University of South Alabama
Mobile, Alabama 36688-0002
telephone (251)460-6050
The email address is internationaladmissions@southalabama.edu

Specific information regarding academic programs may be obtained by contacting the Director of Graduate Studies in the appropriate colleges.

Deadlines for Applications

Applications deadlines are posted at <https://www.southalabama.edu/departments/admissions/graduate-deadlines.html> and may be program specific. Not all programs admit students each semester and some programs set earlier application deadlines. Please see appropriate section of the Bulletin for exceptions. New graduate students who do not register for coursework in the semester for which they were accepted must contact their program for permission if they wish to enroll in a future semester.

Deadlines for applications and supporting documents for new international students are posted at <https://www.southalabama.edu/departments/international/requirements-deadline.html>.

Please note: The College of Education and Professional Studies and the College of Nursing evaluates files each semester and acceptance is only valid for the semester in which they apply.

USA graduate students who have not attended for three consecutive semesters must file for readmission with the Office of Admissions by the published deadlines found at <https://www.southalabama.edu/departments/eforms/admissions> (<https://www.southalabama.edu/departments/eforms/admissions/>). If a student has been absent from first enrollment in a Master's program for more than 7 years or from a doctoral program for more than 10 years, the student must apply through the Office of Admissions. Please note some programs may have shorter time limits.

Documents Required for Admission

Transcripts and test scores must be official, i.e., mailed or sent electronically from the home institution or testing agency directly to the address specified by the Office of Admissions, and become the property of the University of South Alabama. If a student changes programs, a new application must be submitted.

Admission Requirements

Each program has specific requirements for admission that may exceed the requirements listed as follows for admission to the Graduate School.

Applicants seeking admission must satisfy the following requirements:

1. Have earned a bachelor's degree from a regionally accredited United States institution of higher education or an international institution of higher education with an equivalent degree (including 3 year first level Bologna Process degrees).
2. Have earned the minimum grade-point average required by the relevant graduate program. See the individual program descriptions for details.
3. Possess sufficient coursework in the major subject to qualify for graduate study in the relevant graduate program. Students with a deficiency in required coursework may be required by the admitting graduate program to take pre-requisite courses.
4. International students who do not meet the exception listed above or below must submit an official language test (Please note some programs may require higher scores to prove English proficiency):
TOEFL minimum score of 71
IELTS minimum score of 6
iTEP minimum score of 3.7
PTE Academic minimum score of 48
Duolingo minimum score of 100

Certain graduate programs waive the English proficiency requirement for international applicants who are citizens of or who have attended school in specific countries where English is an official language and/or the medium of instruction. Approved countries are listed below. See individual program requirements elsewhere in this Bulletin.

- Antigua and Barbuda
- Australia
- Bahamas
- Barbados
- Belize
- Bermuda
- Botswana
- Canada, with the exception of Quebec
- Cayman Islands
- Dominica
- Ghana
- Grenada
- Guyana
- Irish Republic
- Jamaica
- Kenya
- Malawi
- New Zealand
- Nigeria
- Rwanda
- Singapore
- Saint Lucia
- St. Kitts and Nevis
- St. Vincent and the Grenadines
- Sierra Leone
- South Africa Tanzania
- Trinidad & Tobago
- Uganda
- United Kingdom (England, Scotland, Northern Ireland, Wales)
- Virgin Islands (British & US)

- Zambia
- Zimbabwe

5. Standardized test scores may be required by specific graduate programs for admission. See the individual program descriptions for details.
6. Performance at the graduate level may be taken into consideration for students who have completed a prior graduate degree program, as well as undergraduate performance. An earned advanced degree may substitute for some admission requirements (see specific program requirements).
7. Non-Degree Admission - Students holding baccalaureate degrees from regionally accredited institutions of higher education who are not seeking graduate degrees or who need to complete prerequisites for particular degree programs may enroll as Non-Degree graduate students. A suitable background for the courses to be taken is expected. A minimum grade point average of 2.5 on all undergraduate work ("A" = 4.0) is required to enroll as a Non-Degree graduate student. Some graduate programs may impose additional requirements.
Because of limited class size and resources, academic units may limit the enrollment of Non-Degree students. After admission, permission to enter each course is obtained from the Graduate Director/Coordinator in the appropriate college, school and/or department.
International students must submit documentary evidence showing acceptable language test scores (see Admission Requirements above for acceptable language test scores), or bachelor's or graduate degrees earned at a regionally accredited United States institution of higher education.
8. Non-Degree students subsequently seeking admission into one of the graduate degree programs of the University must submit a formal application through the Office of Admissions to the Graduate Director/ Coordinator of the appropriate college, school and/or department. Students may be subject to further conditions, such as the completion of necessary undergraduate prerequisite courses. The student's record in graduate courses taken while in the Non-Degree status may be considered. Students may be able to transfer courses toward a graduate degree program (see section on Transfer Credit). Non-Degree graduate students are subject to the Graduate School Dismissal Policy. For dismissal purposes, program GPA will be calculated based on all credits earned while in non-degree graduate status.

Dual Masters Degrees

A student may enroll in and pursue two master's degrees simultaneously. The student must apply to and be accepted in each of the two programs individually. One program has to be designated as primary and the other as a secondary degree program. All requirements for each degree have to be met, including the requirement for time to degree. A maximum of nine (9) credit hours may be counted towards both degrees if approved by each of the two degree programs. Although the start date of the two programs does not have to be the same date, the two degrees will be awarded on the same date after completion of both degrees. All requirements for the two degrees must be completed within seven calendar years of admission to the first graduate program.

Transient Enrollment

Students in good standing in the graduate school of other universities may enroll in the Graduate School of the University of South Alabama, provided they have the written permission of the Dean of the Graduate School of the University of South Alabama. Enrollment as a transient

student in no way implies future admission as a degree or non-degree graduate student. Students who wish to remain in transient status for more than one semester must submit the University's Transient Student Form and a readmission form (available from the Office of Admissions) each semester prior to the deadline (see "Readmission to the University").

Graduate Study for Advanced Undergraduates

With permission of the department chair and appropriate director of graduate studies, a student who has completed 90 semester hours with a "B" (3.0) average may register for graduate courses. Each course can be applied to an undergraduate degree or perhaps a future graduate degree. The same course cannot be applied to both an undergraduate and a graduate degree (except for accelerated master's degrees and undergraduate/graduate dual degrees). Up to 12 graduate credit hours may be transferred to a future graduate degree at USA. If and when a student has applied to and been admitted into graduate school, courses can be evaluated for transfer provided they were not taken any more than seven years ago.

Accelerated Bachelor's to Master's Program

Program Description

The USA Accelerated Bachelor's to Master's (ABM) Program provides exceptional undergraduate students the opportunity to earn a bachelor's and a master's degree at an accelerated pace in select academic programs. ABM students may count up to 12 credit hours of graduate coursework towards either the undergraduate or graduate degrees in approved programs. ABM students typically complete the master's degree within one academic year after completing the undergraduate degree.

Eligibility Requirements

Undergraduate students must meet the following criteria:

- 3.0 cumulative undergraduate GPA
- have completed at least 90 credit hours
- have completed at least 30 credit hours at USA

Credit Hour Requirements

Completion of the ABM program requires students complete at least 150 approved unique credit hours. To qualify for a baccalaureate degree, a student must complete at least 120 approved semester hours. To qualify for a master's degree a student must complete a minimum of 30 approved semester hours. Generally, undergraduate students are not approved to take more than 12 credit hours of graduate coursework.

Admission

Application of graduate coursework taken at the undergraduate level requires ABM students to be admitted to a graduate program. ABM students must meet all requirements for admission to the Graduate School. However, each degree program has specific requirements that may exceed Graduate School minimums. An ABM student must meet all requirements of their specific degree program. A complete Graduate School application is required.

A student who withdraws or is dismissed from the ABM program may not count graduate coursework towards both degrees. Graduate courses for which an undergraduate student did not earn an "A" or "B" grade, may not be counted towards the graduate degree.

An ABM student must be enrolled full time and must complete all degree requirements for the master's degree within three semesters after admission into the Graduate School. An exception for a fourth semester may be granted if an additional semester is required for final revisions to and submission of a defended thesis. Exceptions to the ABM policy are at the discretion of the Dean of the Graduate School.

Contact the program coordinator to discuss individual program requirements. Application deadlines vary by program.

Assistantships and Fellowships

Information concerning assistantships and fellowships may be obtained from the college or department concerned or on-line at <https://www.southalabama.edu/colleges/graduateschool/information.html>. A completed graduate assistantship/fellowship application must be submitted. Tuition remission granted for a graduate assistantship/fellowship may not be applied to courses outside of the degree program.

Research Integrity and Professional Ethics

Graduate programs may require instruction in research integrity and professional ethics.

Requirements for the Master's Degree

1. A minimum of 30 semester hours of credit in a program approved by the graduate program and the Dean of the Graduate School is required. The following limitations apply:
 - A. No more than 18 hours of dual-listed courses (400-and 500-level listing for the same course) may be counted toward meeting the minimum hours required for a degree. Graduate students will only receive graduate credit for the 500 level version of dual-listed courses.
 - B. A maximum of twelve (12) semester hours of graduate credit obtained at another accredited institution may be approved for transfer to the University of South Alabama. Transfer credit must have the recommendation of the graduate program and appropriate director of graduate studies and the approval of the Dean of the Graduate School. Only grades of "A", "B", or "S" or the equivalent may be accepted as transfer credit. Grade equivalency must be verified by the appropriate director of graduate studies. Course work completed more than seven years prior to the date for graduation may not be counted for degree credit. Students must meet all degree residency requirements.
 - C. A course applied toward credit for a degree at this institution, or elsewhere, will not be acceptable as credit toward a subsequent master's degree, except in approved dual-master's programs where a maximum of nine (9) hours may be counted in both programs (or accelerated bachelor's to master's degree).
2. A minimum overall 3.0 grade-point average on all coursework attempted in the student's specific program of study as well as an overall 3.0 grade-point average on all work attempted while enrolled in the current program of study is required. Courses for which the grade of "D" was assigned may not be counted toward a degree program. A maximum of two courses with the grade of "C" may be counted toward a degree program; however, some programs accept no grades of "C" (see specific program).
3. A minimum of 21 semester hours of degree program credit in residence at the University of South Alabama is required.

4. All requirements for a master's degree must be completed within seven calendar years from admission as a graduate student at the University of South Alabama. Under extraordinary circumstances, an appeal may be made to the Graduate Dean for a time extension. The appeal form may be found on the Forms and Policies web page of the Graduate School. Some degree programs may set shorter time limits.
5. Each student will be evaluated to ensure achievement of program outcomes. This evaluation may be in the form of a comprehensive exam or other measurement tools. If unsatisfactory, after corrective action, the evaluation may be repeated once. The comprehensive exam committee must be comprised of at least 3 graduate faculty members. For details see specific programs.
6. Submission of a standardized test score may be required. For details, see specific programs.
7. A foreign language may be required. For details see specific programs.
8. Thesis
 - A. A program may require or allow a candidate for the Master's degree to prepare a thesis. A maximum of nine (9) semester hours of 599 thesis credit may be counted toward meeting the minimum hours required for a degree; some programs may allow fewer than nine hours (see specific program), but no fewer than three (3) hours.
 - B. A letter grade is assigned for each semester a student is enrolled in a thesis credit hour course.
 - C. A student on a thesis option program will be required to prepare a thesis prospectus.
 - D. An oral defense of the thesis is required.
 - E. The student must be enrolled in at least one hour of thesis during the semester in which the student defends their thesis. Normally, thesis students should be enrolled in 599 continuously from inception of the project until final approval of the thesis by the Dean of the Graduate School. Students who are not on campus or using University resources during the semester of their graduation may appeal to the Graduate Dean for an exception to this policy.
 - F. See Guidelines for Theses and Dissertations and Standards for Theses and Dissertations.

Requirements for the Doctoral Degree

1. The specific requirements for doctoral degrees vary among the specialties. Each program leading to the completion of a doctoral degree has specific requirements regarding courses, seminars, laboratory studies, directed studies, workshops, and research. In general, a minimum of 60 credits of graduate work will be required for the doctoral degree. Transfer of graduate credit from regionally accredited universities may be accepted by certain programs. Prior approval of the college director of graduate studies is required. Only courses with "A" or "B" grades are acceptable for transfer. The quality of the student's program and performance are emphasized and are considered as important as the fulfillment of requirements. Completion of original research, and writing and defending a dissertation are requirements for the doctoral degree.
2. Students who are candidates for the doctoral degree must be enrolled for Research Dissertation during the semester in which the open defense of the dissertation is completed. Students who are not on campus or using University resources during the semester of their graduation may appeal to the Graduate Dean for an exception to this policy.

3. All requirements for a doctoral degree must be completed within ten calendar years from admission to a doctoral program at the University of South Alabama. Under extraordinary circumstances, an appeal may be made to the Graduate Dean for a time extension. Some degree programs may set shorter time limits.

Degrees Offered

The Graduate School offers twenty different graduate degrees (Au.D., M.A., M.Acc., M.B.A., M.D., M.Ed., M.F.A., M.H.S., M.P.A., M.S., D.N.P., D.P.T., Ed.S., Ed.D., Ph.D. in a wide variety of programs, with numerous areas of concentration. For specific admission and degree requirements, in addition to those of the Graduate School, see individual program webpages.

Graduate Programs

The following graduate degree programs are offered through the Graduate School of the University. Further information is available under the Colleges and Schools listings elsewhere in this Bulletin. Navigate to Degrees and Programs for a complete listing of graduate programs and certificates.

The Pat Capps Covey College of Allied Health Professions

- Master of Science in Biomedical Sciences
- Master of Science in Speech and Hearing Sciences
- Master of Science in Occupational Therapy
- Master of Science of Physical Therapy
- Master of Rehabilitation Science in Occupational Therapy
- Master of Rehabilitative Science in Speech Language Pathology
- Master of Health Sciences in Physician Assistant Studies
- Doctor of Philosophy in Communication Sciences and Disorders
- Doctor of Audiology
- Doctor of Physical Therapy

College of Arts and Sciences

- Master of Science in Biological Sciences
- Master of Arts in Communication
- Master of Arts in English
- Master of Arts in History
- Master of Science in Mathematics
- Master of Music
- Master of Public Administration
- Master of Music
- Master of Public Administration
- Master of Science in Psychology
- Master of Fine Arts in Creative Technologies and Practice

School of Marine and Environmental Sciences

- Master of Environmental Toxicology
- Master of Science in Marine Conservation and Resource Management
- Master of Science in Marine Sciences
- Doctor of Philosophy in Marine Sciences

Mitchell College of Business

- Master of Accounting
- Master of Business Administration
- Doctor of Philosophy in Business Administration
These programs are given in the evenings and are designed for those individuals presently engaged in managerial or technical positions with business, industry, or government.
- A limited residence Doctor of Business Administration is also offered.

The School of Computing

- Master of Computer Science
- Master of Information Systems
- Ph.D. in Computing

The College of Education and Professional Studies

- Alternative Master of Education in Art Education
- Alternative Master of Education in Early Childhood Education
- Alternative Master of Education in Elementary Education
- Alternative Master of Education in English for Speakers of Other Languages
- Alternative Master of Education in Secondary Education
- Alternative Master of Education in Special Education
- Master of Education in Art Education
- Master of Education in School Counseling
- Master of Education in Early Childhood Education
- Master of Education in Early Childhood Education with Reading Certificate
- Master of Education in Educational Administration
- Master of Education Educational Media
- Master of Education Elementary Education
- Master of Education in Elementary Education with Reading Cert
- Master of Education Physical Education - P-12 Teacher Certification
- Master of Education in Physical Education - Health Education
- Master of Education in Secondary Education
- Master of Education in Special Education
- Master of Science in Clinical Mental Health Counseling
- Master of Science in Educational Media and Technology
- Master of Science in Exercise Science
- Master of Science in Health Education
- Master of Science in Instructional Design and Development
- Master in Sport Management
- Educational Specialist in Early Childhood Education
- Educational Specialist in Elementary Education
- Educational Specialist Instructional Leadership
- Educational Specialist in Reading Specialist
- Educational Specialist in Secondary Education
- Educational Specialist in Special Education
- Educational Specialist in Teacher Leader
- Education Doctorate in Educational Leadership
- Doctor of Philosophy in Exercise Science and Performance Nutrition
- Doctor of Philosophy in Instructional Design and Development

The College of Engineering

- Master of Science in Chemical and Biomolecular Engineering
- Master of Science in Civil, Coastal, and Environmental Engineering
- Master of Science in Electrical and Computer Engineering
- Master of Science in Mechanical Engineering
- Master of Science in Systems Engineering
- Doctor of Philosophy in Systems Engineering

The College of Medicine

- Doctor of Philosophy degree in Basic Medical Sciences. The objective of the program is to produce graduates with training and knowledge in basic human biology with an in-depth knowledge of one of the basic medical sciences (Biochemistry and Molecular Biology, Microbiology and Immunology, Molecular and Cellular Pharmacology, Physiology, Cell Biology and Neuroscience). A combined program leading to the awarding of both the Ph.D. and M.D. degree is available to highly qualified applicants.
- Medical Doctorate in Medical Sciences

The College of Nursing

- Master of Science in Nursing
- Doctor of Nursing Practice

Interdisciplinary Graduate Program

- Doctor of Philosophy in Chemical and Biomolecular Engineering
- Doctor of Philosophy in Clinical and Counseling Psychology

USA Education/Study Abroad

- Graduate students are encouraged to incorporate international experiences in their academic program through participation in study, research, internship and work abroad experiences. For more information please contact your academic advisor and the Office of International Education (<https://www.southalabama.edu/departments/international/>).

Certificate Programs

- Graduate Certificate in Applied Statistics
- Graduate Certificate in Spanish for Healthcare Professionals
- Graduate Certificate in Gerontology
- Graduate Certificate in Clinical Mental Health Counseling
- Graduate Certificate in Computer Science Cybersecurity
- Graduate Certificate in Human Performance Improvement
- Graduate Certificate in Information Systems Cybersecurity
- Graduate Certificate in Instructional Design and Development
- Graduate Certificate in Reading Specialist
- Graduate Certificate in Systems Engineering
- Graduate Certificate in Nursing Subspecialty Options
- Certification in Post-Graduate Nursing

Chemical And Biomolecular Engineering

Department Information

The USA Graduate School offers an interdisciplinary PhD program in Chemical and Biomolecular Engineering. The purpose of the PhD program is to produce graduates who can apply the fundamental

principles of thermodynamics, mass transfer, and reaction kinetics to a variety of technical areas, such as drug discovery, industrial chemistry, biological systems, and environmental engineering. As an interdisciplinary program housed in the Graduate School, the PhD in Chemical and Biomolecular Engineering aligns with the mission of the University of South Alabama by delivering high quality graduates who will promote discovery, health, and learning to the citizens of Alabama and the Gulf Coast region.

Because the program is built upon the application of chemistry, the central science, and is interdisciplinary by design, graduates will find careers in diverse areas such as petrochemical, chemical processing, biotechnology, green technologies, pharmaceuticals, and private consulting. However, the program will also qualify graduates for academic appointments as professors, post-graduate researchers, and research scientists in university programs and laboratories. There is a growing demand for PhD graduates who possess the analytical skills to move from molecular design to process design using state-of-the-art, cutting-edge technologies, and this program will meet this need.

Succinctly list at least four (4) but no more than seven (7) of the most prominent student learning outcomes of the program. These outcomes should lend themselves to subsequent review and assessment of program accomplishments.

Graduates of the program will be able to:

1. integrate and apply advanced chemical and biomolecular analytical tools and techniques to solve problems in a specific science, technology, engineering, or math domains
2. formulate a significant research question and demonstrate the ability to carry out a research plan from inception to dissemination to answer such a question
3. obtain employment in chemical and biomolecular related positions in industry, academia, or government
4. work effectively on an interdisciplinary team in a variety of laboratory settings
5. present research findings in professional and academic journals

Admissions

The admission requirements required by the Graduate School of the USA as listed below.

- Statement of purpose
- Three letters of recommendation
- Curriculum vita
- Official transcripts from all previous institutions attended
- A baccalaureate or graduate degree in a closely related field. A graduate degree is not required for admission
- An undergraduate minimum GPA of 3.0 overall or a graduate minimum of 3.5 overall (4 point scale)
- Official scores for the Graduate Records Examination (GRE)
- A completed application for admission to the Graduate School
- For international students, an official TOEFL, IELTS, iTEP, or Pearson (PTE Academic) score, or an equivalent level of competence as exhibited by a bachelor or graduate degree from an accredited university in the United States is required. The minimum required test scores are: TOEFL – 525 on the paper version, 197 on the computer version, or 71 on the internet version; IELTS – 6.0; iTEP – 3.7; Pearson's (PTE Academic) - 4

- Some variances in these admissions requirements may be allowed as approved by the program coordinator.

Degrees, Programs, or Concentrations

- Chemical and Biomolecular Engineering (PhD) (p. 714)

Chemical and Biomolecular Engineering (PhD)

Admission Requirements

- A Bachelor's degree in chemical engineering or a related field such as chemistry, physics, mathematics, or engineering.
- A grade point average of 3.0 or greater (A=4.0) on all undergraduate work.
- International applicants whose native language is not English must have a minimum score of 550 on the written TOEFL, or a minimum score of 79 in the internet-based TOEFL, or a minimum band score of 6.5 on the IELTS, or a minimum overall score of 58 on the PTE academic test, or a minimum score of 100 on the Duolingo test.
- A GRE score is **not** required. Each application will be reviewed by the Admissions committee, which carries out a holistic review of all applications. This committee may reserve the right to evaluate additional credentials, such as but not limited to course work taken and letters of recommendation.

Degree Requirements

The core classes for this program are defined as CHE 510 Advanced Chemical Thermodynamics, CHE 520 Advanced Transport Phenomena I, and CHE 525 Chemical Reactor Analysis. For the proposed degree program, the student will complete a minimum of 43 credit hours of classwork courses and 18 credit hours for thesis research. In addition, a doctoral student must pass a PhD doctoral examination, which is comprised of the qualifying exam and a preliminary oral examination, to be admitted to candidacy. The qualifying exam requirement is satisfied by obtaining a B or better in the core courses defined above. The preliminary oral exam is completed at the end of the 6th semester, or earlier, where the student presents their proposed research. A doctoral plan of study must be submitted to the USA graduate school by the time the student completes 30 hrs of credit towards a doctorate. A final oral dissertation defense of the written dissertation is required to be presented to the students committee and a majority of the committee must approve.

Clinical and Counseling Psychology

Department Information

The University of South Alabama offers a Doctor of Philosophy in Clinical and Counseling Psychology (CCP). This program is a collaborative effort between the Department of Psychology in the College of Arts and Sciences and the Department of Counseling and Instructional Sciences in the College of Education and Professional Studies. The program combines an asset-strength model from Counseling Psychology with a health psychology/wellness model from Clinical Psychology. The Clinical and Counseling Psychology program prepares professionals to provide the most effective and culturally sensitive types of psychological care for individuals and communities. Further, the program is based on a scientist-practitioner model of training, meaning that graduates will develop competence in clinical practice, scientific research, and ability to integrate these two domains. Graduates of the program will have a set of competencies which will also enable them to work successfully with a variety of other health care professionals for the purposes of health promotion and to prevent and remediate mental health conditions in the world. Graduates might be employed in a variety of settings, including counseling centers in colleges and universities, medical centers, Veterans Administration hospitals, schools, private practices, health and wellness facilities, state and federal agencies, family counseling services, academic departments in higher education institutions, and professional associations. Such responsibilities would include direct service to individuals and the management of psychological services for individuals and groups using evidence-based interventions as well as research, advocacy, teaching, supervision and/or training other health professionals.

Program Admission Requirements**Routes To Admission**

Applicants can apply at one of two stages of their education.

1. Admission having only previously completed with a Bachelor's Degree: Students admitted at this stage must complete the requirements of the master's degree in psychology (Clinical & Counseling Psychology Concentration) along the way to earning their Ph.D. (see required coursework). Such students are automatically granted admission to the Ph.D. program of study once their M.S. coursework and degree requirements are completed. Students who fail to complete the requirements of the master's degree in psychology within 2 years may be prohibited from entering the doctoral program.
2. Admission having already earned with a Master's Degree: Students who have completed a master's degree (Master of Science/Arts/Education) at another institution will enter the doctoral training program upon admission. Students are still held to course and program requirements of the Masters' Degree in Psychology (Clinical & Counseling Psychology Concentration). Such students may submit requests to have these requirements waived based on prior graduate level coursework and other program requirements (e.g., master's thesis). The core faculty of the CCP program evaluate prior graduate coursework and may waive some of the foundational course requirements if they are equivalent to USA's version of the same course. Students who enter the CCP with a master's degree will invariably have a number of courses that need to be remediated, particularly students with master's degrees in fields other than psychology.

Students are admitted to start the program in the fall semester only. No spring or summer admissions are permitted. Participation in the program is full-time and, with the exception of an assistantship, students are discouraged from engaging in any outside employment. Applications to the CCP program should be completed by December 15th for admission for the following fall semester. In addition to the Graduate School application form and required supporting documentation, the Clinical and Counseling Psychology program requires submission of a program application form, a statement of purpose, curriculum vitae (CV), and three letters of academic recommendation. The following criteria supplement the Graduate School criteria for admission:

In addition to meeting graduate school requirements for regular admission, applicants to the Clinical and Counseling Psychology program must meet the following criteria:

- a. Although there is no minimum score on the Graduate Record Examination a summed score of 305 or greater on the verbal and quantitative subtests, and a score of 4 or higher on the Writing subtest is preferred.
- b. Completion of an undergraduate or graduate degree in psychology, counseling or a similar program from an accredited institution. Applicants must have completed at least 21 semester hours of prior psychology courses (usually at the undergraduate level) including a statistics course, and a course in research design and methods.
- c. The program's model of admission heavily values the degree of match between the student's clinical and research interests and that of their faculty mentor. Students are assigned a mentor at the time they are offered admission, and usually this individual is their primary advisor, mentor as well as thesis and dissertation chair. Thus, students will ideally articulate their clinical and research interests as well as identify the faculty member(s) with whom these best fit in their applications materials.

Required Psychological Foundations

Students must complete graduate coursework and demonstrate competency in the following foundation areas. These courses will be completed in the student's master's degree program for those admitted with a Bachelor's Degree. Although students entering with a Master's Degree may request waivers for these competency area courses such students will invariably have a number of courses that need to be remediated, particularly students with master's degrees in fields other than psychology. For the courses in the Master's Degree in Psychology (Clinical & Counseling Psychology Concentration) that correspond to the domains listed below see the bulletin page for this program of study:

<https://www.southalabama.edu/bulletin/current/degrees-programs/psychology/psychology-ms/index.html> (<https://www.southalabama.edu/bulletin/current/degrees-programs/psychology/psychology-ms/>)

Students entering the doctoral program after completing a bachelor's degree will take these M.S. courses and earn the M.S. degree before transferring to the Ph.D. program of study.

- Biological, Cognitive, & Affective Bases of Behavior Cognitive
- Neuroscience
- Applied Psychology & Diagnostic Interviewing
- Evidence Based Psychological Practice
- Statistics
- Lifespan Development
- Personality & Affected Assessment
- Psychopathology
- Social & Personal Psychology
- Clinical Practicum in Psychotherapy & Assessment

Applicants should submit the following materials electronically by December 15th to the below link:

<https://southalabama.liaisoncas.com/applicant-ux/#/loginlogin>

- Official GRE scores
- Official copies of all undergraduate and graduate academic transcripts
- Statement of purpose
- Three letters of academic recommendation
- Clinical and Counseling Psychology program application form
- Curriculum Vitae (CV)

An interview either in-person or via video-conference/telephone must be completed with faculty designated by the Director of Clinical Training prior to a potential admissions offer being made.

Graduate Assistantships

Graduate assistantships are available annually on a competitive basis. Applicants interested in receiving an assistantship will complete the graduate assistantship application form upon being admitted into the program.

Comprehensive Examination

Students must pass a comprehensive examination following successful completion of six semesters of clinical practica coursework. Passing the exam is one of the required components for admission to candidacy for the doctoral degree. The content of the comprehensive examination will

be determined by the comprehensive examination committee and may consist of a written as well as an oral component.

Candidacy

Admission to candidacy for the doctoral degree requires completion of the following:

- successful completion of required academic work, except the capstone internship
- successful completion of the comprehensive examination
- approval of a dissertation research project

The doctoral candidate is, therefore, a student who has fulfilled all requirements for the Ph.D. degree with the exception of completing the dissertation research and the required internship.

Dissertation Hours and Defense

Nine credit hours of dissertation research may be applied to and are required for completion of the doctoral program of studies in Clinical and Counseling Psychology. However, a student must be continually enrolled in CCP 799 (Dissertation Research) until the final defense of the dissertation is completed and the dissertation document has been approved by the Graduate School. The final defense is scheduled following the completion of and preparation of the final written report of the dissertation research. Revisions of the dissertation may be required for final approval by the student's advisory committee or as a condition of the Graduate School's evaluation of the written report.

The Limit

After being admitted to candidacy for the Ph.D. degree in Clinical and Counseling Psychology, the student has a maximum of three years to complete the dissertation.

Residency Requirement

Prior to beginning their capstone internship, students must have completed a minimum of 3 years of graduate study in the clinical and counseling psychology program. Years spent in the M.S. portion of the program can count towards this requirement, but at least 1 of these 3 years must occur in the Ph.D. portion of the program.

Degrees, Programs, or Concentrations

- Clinical and Counseling Psychology (PhD) (p. 722)

Courses

Clinical Counseling Psy (CCP)

CCP 742 Advanced Psych Assessment 3 cr

This course will offer an in-depth understanding of the assessment of complex cases, which includes both mental illness and physical disorders, as well as the impact of complex social issues, such as culture, ethnicity, and economic issues. The course covers topics pertaining to adults and children. The emphasis will be on the integration of nomothetic and empirical perspectives with idiographic approaches in an evidence-based assessment model. Topics covered will be assessing special populations (e.g., severely mentally ill, trauma, forensic, parents), therapeutic assessment, person-centered report writing, providing feedback, theoretical and scientific issues in assessment, and current controversies.

Prerequisite: CCP 706 (may be taken concurrently) Minimum Grade of B

CCP 745 Teaching of Psychology 3 cr

This course will offer an in-depth understanding of the teaching of psychology at the post secondary level.

CCP 750 Applied Psychophys Biofeedback 3 cr

This course will survey theory, research, and applications of psychophysiology and biofeedback in the prevention and treatment of illness and the enhancement and maintenance of health.

Prerequisite: CCP 706 Minimum Grade of B

CCP 752 Clinical Neuropsychology 3 cr

This course will offer an in-depth understanding of the different theories of brain function in humans. Assessment methods for detecting abnormal functioning and the localization of functioning by behavioral methods will also be examined. The possible etiologies of abnormal functioning as well as their treatment will be reviewed.

Prerequisite: CCP 706 Minimum Grade of B and CCP 742 Minimum Grade of B

CCP 756 Practicum Therapy 1-3 cr

Supervised experience with child and/or adult populations; includes case conference and seminars. This course may include supervised placement in an applied setting.

Prerequisite: CCP 706 (may be taken concurrently) Minimum Grade of B or PSY 506 (may be taken concurrently) Minimum Grade of B

CCP 758 Psychology Resilience & Trauma 3 cr

This course will offer an in-depth understanding of resilience, as it manifests across the lifespan in response to various types of traumas (natural vs. manmade; community-wide versus family- or individually-specific). Prevention and reduction of psychological impact related to trauma and the development, enhancement, and maintenance of resilience in the face of adversity will be emphasized.

Prerequisite: CCP 706 (may be taken concurrently) Minimum Grade of B

CCP 759 Group and Systems Theory 3 cr

This course will survey group and systems theories and the interventions that have been derived from this perspective. The dynamics of group processes will be delineated.

Prerequisite: CCP 706 Minimum Grade of B

CCP 763 Prevention Treat Public Health 3 cr

This course will survey the basic theory and techniques underlying the study of public health problems. Research related to the prevention and treatment of several specific public health problems (e.g. suicide, HIV/AIDS, youth violence) will be covered in depth.

CCP 764 Consult Psych Program Develop 3 cr

This course provides an overview of approaches to psychological consulting and program development in individual, small group and large organization contexts. Specific aspects of psychological consulting in mental health, business, and educational settings will be reviewed

CCP 766 Clinical Supervision 3 cr

This course provides an overview of the various theoretical approaches to supervision of professional psychological services, particularly psychotherapy services. In addition, relevant research findings in the area of supervision are reviewed. Students also have the opportunity to receive feedback on audio/video tapes of their supervision sessions with a junior graduate student clinician

Prerequisite: CCP 706 Minimum Grade of B and CCP 756 Minimum Grade of S

CCP 772 Child Family Psychopath Interv 3 cr

This course provides an overview of current theory and research findings relevant to psychological disorders typically occurring in childhood and adolescence. In addition, evidence-based interventions for various childhood disorders are reviewed. A focus will be upon an ecological and developmental view of childhood psychopathology that integrates family, community, and societal forces in a comprehensive view of such disorders.

Prerequisite: CCP 706 Minimum Grade of B

CCP 777 Seminar on Suicide 3 cr

This graduate seminar will examine the topic of suicide and self-harm in depth. Theoretical and empirical perspectives from sociology, psychology, and genetics/neuroscience will be considered. Additionally, we will examine suicide as both a clinical phenomenon and as a public health issue. Accordingly, cultural, political, and policy issues related to suicide will be explored alongside risk factors, mental health, and individual patient-level factors. This course will utilize focused readings, group discussions, and writing assignments to achieve the course objectives.

CCP 780 Applied Health Psychology 3 cr

This course will survey theory, research, and applications of health psychology in the prevention and treatment of illness and the enhancement and maintenance of health.

Prerequisite: CCP 706 (may be taken concurrently) Minimum Grade of B

CCP 782 Advanced Practicum 1-3 cr

Supervised experience with child and/or adult populations in a variety of settings; includes case conferences and advanced psychological assessment and interventions and supervision of lower level graduate students.

Prerequisite: CCP 756 Minimum Grade of B

CCP 790 Special Topics- 3 cr

Selected topics in psychology and may be repeated or credit when course varies.

CCP 795 Multicultural Counseling 3 cr

CCP 795 Multicultural Counseling in Professional Psychology. Provides a foundation in multicultural awareness, knowledge, and skills from a clinical and counseling psychology perspective.

CCP 796 Directed Studies 1-3 cr

Directed study and research.

CCP 797 Psychology Internship 3 cr

The predoctoral internship is a supervised learning experience in a work setting similar to that in which students will eventually be employed. The internship provides students with an opportunity to apply the theories and concepts learned during their graduate program. Not more than 18 hours may be taken.

CCP 799 Dissertation Research 1-6 cr

Completion and oral defense of a dissertation based upon original research. May be repeated for up to 12 hours credit. A minimum of nine hours is required to meet degree requirements.

Psychology (PSY)**PSY 120 Introduction to Psychology 3 cr**

A survey of the basic theories, concepts, principles, and research findings in the field of Psychology. Core course.

Cross-Listed: PSY 121

PSY 121 Honors Gen Psychology - H 3 cr

This course will provide a survey of the basic theories, concepts, principles, and research findings in the field of Psychology. Along with the broad overview provided by the course, students will participate in a more in-depth examination of selected special topics (e.g. those topics generating controversy in the research community and in our society) as selected by the instructor. By contrast with the PSY 120 Introduction to Psychology course already being taught, the Honors General Psychology course will provide a more thorough coverage of selected topics. **Prerequisite:** Special permission.

Cross-Listed: PSY 120

PSY 220 Res Design and Analysis I 3 cr

Research methods in psychology with an emphasis on the experimental method.

Prerequisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D) and (EH 102 Minimum Grade of D or EH 105 Minimum Grade of D)

PSY 221 Research Desgn/Analysis I-Apps 1 cr

Laboratory in research methods in psychology with an emphasis on the experimental method.

Prerequisite: (PSY 120 Minimum Grade of D or PSY 210 Minimum Grade of D) or PSY 121 Minimum Grade of D and (EH 102 Minimum Grade of D or EH 105 Minimum Grade of D)

Corequisite: PSY 220

PSY 250 Life Span Development 3 cr

An overview of human development from conception to death. Special emphasis will be placed on cognitive and social development. Core course.

PSY 270 Psy of Black Experience 3 cr

Theories and principles of psychology pertaining to the experience of black Americans. Includes the development of the black psychological perspective, African-American historical developments and philosophy, identity development and the determinants of the black personality, and contemporary issues in the black community.

PSY 290 Special Topics - 1-3 cr

Selected topics in psychology. May be repeated for credit when course content varies for a total of 12 credit hours.

Prerequisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D)

PSY 310 Biological Psychology I 3 cr

An introductory survey of research and theory in neuroscience as it applies to the understanding of behavior. Focus will be on understanding basic mechanisms of neuron function and general coverage of topics such as sensory and motor systems, motivation and emotion, learning and memory, language and thinking, and mental disorders.

Prerequisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D)

PSY 317 Applied Behavior Analysis I 3 cr

An introduction to the principles of behavior intended as a prerequisite to the specific strategies and procedures practiced by behavior analysts. This course will present the historical and scientific foundations of behavior analysis as applied in educational and other human service settings.

Prerequisite: (PSY 120 Minimum Grade of C or PSY 121 Minimum Grade of C or PSY 210 Minimum Grade of C) and (PSY 220 Minimum Grade of C or PSY 222 Minimum Grade of C)

PSY 320 Res Design-Analysis II-W 3 cr

Experience in applying methodological and statistical concepts introduced in PSY 220 and ST 210, as well as instruction in additional topics such as research and analysis. The course will emphasize the use of computers in conducting behavioral research (e.g. literature searches, collecting data, analyzing data, writing reports).

Prerequisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D) and (PSY 220 Minimum Grade of D or PSY 222 Minimum Grade of D) and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C)

PSY 321 Research Desgn/Analysis II-App 1 cr

Laboratory in research methods in psychology with an emphasis on applying methodological and statistical concepts introduced in PSY 220 and PSY 320.

Prerequisite: (PSY 120 Minimum Grade of D or PSY 210 Minimum Grade of D) or PSY 121 Minimum Grade of D and (PSY 220 Minimum Grade of D and PSY 222 Minimum Grade of D) and (EH 102 Minimum Grade of D and EH 105 Minimum Grade of D)

Corequisite: PSY 320

PSY 340 Abnormal Psychology 3 cr

Nature and development of deviant behavior.

Prerequisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D)

PSY 350 Child and Adolescent Dev 3 cr

The development and psychosocial aspects of childhood and adolescence.

Prerequisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D)

PSY 394 Directed Study 1-3 cr

Specific topics and research findings introduced through the reading of appropriate professional and scientific literature. Requires special permission. May be repeated for a total of 8 credit hours.

Prerequisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D)

PSY 395 Psychology Practicum 1-6 cr

Supervised experience in an area of psychology. May include supervised placement in an applied setting. May be repeated for a total of 12 credit hours.

Prerequisite: (PSY 120 Minimum Grade of C or PSY 121 Minimum Grade of C or PSY 210 Minimum Grade of C)

PSY 412 History-Systems Psy - W 3 cr

The historical foundations of modern psychology and the development of major theories in psychology.

Prerequisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D) and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C)

PSY 414 Introduction to Clin Psych 3 cr

This course serves as a practical capstone for Psychology students interested in careers in professional Psychology. Through a series of lectures, readings, exercises, films, and demonstrations, this course will introduce student to the ways that clinical psychologists approach the conceptualization, assessment, diagnosis, and treatment of health problems. The course will focus on the scientific basis for the practice of clinical psychology.

Prerequisite: PSY 120 Minimum Grade of D or EH 102 Minimum Grade of D or EH 105 Minimum Grade of D

PSY 416 Cognition 3 cr

An overview of psychological research and theory in cognitive psychology. The course will emphasize how people gather, process, represent, and use information to guide thought and action. This course is an approved elective for students seeking gerontology certification.

Prerequisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D) and (PSY 220 Minimum Grade of D or PSY 222 Minimum Grade of D)

PSY 417 Applied Behav Analysis I-Intro 3 cr

An introduction to the principles of behavior intended as a prerequisite to the specific strategies and procedures practiced by behavior analysts. This course will present the historical and scientific foundations of behavior analysis as applied in educational and other human service settings. Prerequisites: PSY 120 or PSY 121 and PSY 220 or Education Teacher candidacy.

Prerequisite: (PSY 120 Minimum Grade of C or PSY 121 Minimum Grade of C or PSY 210 Minimum Grade of C) and (PSY 220 Minimum Grade of C or PSY 222 Minimum Grade of C)

PSY 418 Applied Behav Analysis II-Meth 3 cr

Behavioral assessment techniques and operant and respondent methods for deceleration of inappropriate behavior will be covered. Operant methods for accelerating appropriate behaviors, teaching new behaviors, and maintaining behaviors will be covered. Data-based decision making strategies will be used in developing and altering individual programs.

Prerequisite: PSY 317 Minimum Grade of C

PSY 419 App Behav Analysis III-Adv App 3 cr

Behavioral assessment techniques and experimental designs for the evaluation of behavior change programs will be covered. Data-based decision making strategies for formative program evaluation and modification are also included.

Prerequisite: PSY 417 Minimum Grade of C

PSY 420 Psychology of Learning 3 cr

Theories, experimental findings, and methods of investigation in learning.

Prerequisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D) and (PSY 220 Minimum Grade of D or PSY 222 Minimum Grade of D)

PSY 425 Mental Health and Law 3 cr

Selected topics in psychology and criminal Justice. An overview of the relevant federal and state laws, federal regulations and court rulings which address the issues of justice for preserving the rights of individuals with mental illness.

Prerequisite: PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D

PSY 428 Perception 3 cr

A critical analysis of the main theories and research trends in sensation and perception. This course will include computer simulations and demonstrations, and will also emphasize computer applications for data collection, data analysis, and for reporting results. This course is an approved elective for students seeking gerontology certification.

Prerequisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D) and (PSY 220 Minimum Grade of D or PSY 222 Minimum Grade of D) and (PSY 310 Minimum Grade of D or PSY 380 Minimum Grade of D)

PSY 435 Social Psychology 3 cr

A survey and analysis of major theoretical and experimental topics of interest in social psychology, such as how we perceive others, attitude, interpersonal attraction, aggression, prejudice and altruism.

Prerequisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D)

PSY 440 Psychology of Personality 3 cr

A survey and critical analysis of major historical and current theories about personality. The course will also examine research relevant to the different approaches and consider various techniques of personality assessment.

Prerequisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D)

PSY 456 Adult Development and Aging- 3 cr

The development and psychosocial aspects of adulthood and late life. This course is an approved elective for gerontology certification.

Prerequisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of C or PSY 210 Minimum Grade of D)

Cross-Listed: PSY 356

PSY 460 Industrial Psychology 3 cr

Application of psychological principles and techniques to business, industry, and government.

Prerequisite: PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D

PSY 465 Intro to Measurements-Tests 3 cr

This course will provide a survey of the methodology of assessment, test design and construction, test administration and scoring, achievement and intelligence testing, personality observations and inventories, and issues in ethics and applications of testing.

Prerequisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or ST 210 Minimum Grade of D)

PSY 470 Intellectual Disabilities 3 cr

The study of theories and research in intellectual disabilities and related areas.

Prerequisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D)

PSY 475 Comparative Evolutionary Psy 3 cr

A critical analysis of the main theories and research trends in comparative and evolutionary psychology. This course is an approved elective for students seeking gerontology certification.

Prerequisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D) and (PSY 220 Minimum Grade of D or PSY 222 Minimum Grade of D)

PSY 480 Health Psychology - W 3 cr

Current theories, research and applications in health psychology.

Prerequisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D) and (PSY 220 Minimum Grade of D or PSY 222 Minimum Grade of D) and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C)

PSY 485 Psychology of Gender 3 cr

The study of psychological research on gender differences and theories regarding the origins of these differences.

Prerequisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or ST 210 Minimum Grade of D)

PSY 490 Special Topics 1-3 cr

Selected topics in psychology. May be repeated for a total of 12 credit hours when course content varies.

Prerequisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D)

PSY 492 Seminar - 1-3 cr

A survey of basic theories, concepts, principles, and research findings in a particular focal topic in psychology. Students will study topics in depth by reading and presenting research reports, review papers and book chapters, and through active in-class discussion of the reading materials. Requires permission of department chair. May be repeated up to 2 times when content varies for a total of 6 credit hours.

Prerequisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D) and (PSY 220 Minimum Grade of D or PSY 222 Minimum Grade of D)

PSY 494 Directed Studies - 1-3 cr

Directed study and research. Requires special permission. May be repeated for a total of 8 hours.

Prerequisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D)

PSY 499 Honors Senior Thesis-H 3-6 cr

Student conducts an independent research project under the supervision of a faculty sponsor. Recommended for psychology majors planning graduate school. Permission of department chair is required prior to registration. Requires GPA of 3.3 or higher. May be repeated for a total of 6 credit hours.

Prerequisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D) and (PSY 220 Minimum Grade of D or PSY 222 Minimum Grade of D)

PSY 500 Proseminar in Psychology 1 cr

Research presentations will be given by faculty and advanced graduate students. In addition, discussion of project and thesis requirements and procedures will take place. Required of all students registered for PSY 500, 502, and 503.

PSY 501 Research Design and Stats I 3 cr

Theories and principles of research design and elements of modern statistics. Introduction to computer programs for statistical analysis will be included.

Corequisite: PSY 500

PSY 502 Research Design and Stats II 3 cr

Theories and principles of advanced research design and elements of modern statistics. The use of computer applications such as SPSS to analyze empirical data sets will be covered.

Prerequisite: PSY 501 Minimum Grade of B or PSY 521 Minimum Grade of B

Corequisite: PSY 500

PSY 503 Quantitative Methods II 3 cr

Elements of modern statistics with emphasis on application to psychological research. Multivariate statistical techniques to include multiple regression, multivariate analysis of variance, discriminant, canonical, and factor analysis will be discussed.

Prerequisite: (PSY 502 Minimum Grade of B or PSY 522 Minimum Grade of B)

Corequisite: PSY 500

PSY 506 Prof Ethics and Standards 3 cr

An introduction to professional and ethical issues as they pertain to psychology. Focus is on the development of an ethical and professional awareness in the practice of psychology, including teaching and research.

PSY 507 History of Psych & Prof Ethics 3 cr

This course provides instruction through readings, lecture, and case studies in the application of ethics in the professional practice of psychology. In addition, the course focuses on the philosophical foundations, professional identity, and standards of practice found in both clinical psychology and counseling psychology.

PSY 510 Physiological Psychology 3 cr

This course provides a foundation in the techniques of advanced psychophysiological methods. The course covers the history of psychophysiology, including the electrical properties of cells, and major organ systems, with particular emphasis on the electroencephalogram (EEG) and neuroimaging techniques. Students are introduced to the principles of psychophysiological recording, common applications of psychophysiology, safety and ethics in psychophysiological research, instrumentation, and research design issues in psychophysiology. Relevant statistical treatment of psychophysiological data will be discussed, including multiple regression, complex ANOVA, scaling of data, and non-parametric alternatives such as bootstrapping.

PSY 512 Adv History/Systems Psychology 3 cr

An advanced course in the historical foundations of modern psychology and the development of major theories in psychology.

PSY 514 Learning 3 cr

A survey of research and theory in learning.

PSY 516 Cognitive Psychology 3 cr

An advanced survey of research and theory in cognitive psychology. Topics include pattern recognition, attention, memory, language processing, decision making, and problem solving. This course is an approved elective for students seeking gerontology certification.

PSY 520 Personality Res and Theory 3 cr

A critical analysis and evaluation of major theories and current research trends in personality.

PSY 522 Soc & Personality Psychology 3 cr

This course provides a foundation for conducting quantitative research in personality and social psychology. Topics covered will include (a) measurement of personality and individual differences (e.g., narcissism, self-esteem), (b) measurement of cognitive and behavioral outcomes in laboratory and non-laboratory settings (e.g. decision-making, implicit cognitions), and (c) data analytic techniques (e.g. testing for mediation/moderation, structural equation modeling).

PSY 524 Lifespan Development 3 cr

Analysis of theories, research methods, and major findings of sensory, perceptual, social, and cognitive changes across the lifespan, from infancy to late life. Research in social and cognitive development, including cognitive disabilities, the underlying mechanisms involved in thinking and learning processes, and age-related cognitive models are central to this course. **This course is an approved elective for students seeking gerontology certification.

PSY 528 Sensation and Perception 3 cr

This course provides a multidisciplinary analysis of how the sensory systems analyze physical stimuli to support perception and successful actions. Consideration is given to how the anatomy and physiology of the major sensory systems extract information using low- and high-level mechanisms to create meaningful percepts. Other topics include psychophysics, comparative studies, communication, production and performance, face and object recognition, attention, and event perception.

PSY 530 Applied Psy & Dx Interviewing 3 cr

Theories, principles and techniques of interviewing, behavioral observation and classification of psychological disorders.

PSY 532 Psychopathology 3 cr

Current research and theoretical aspects of psychopathology in children and adults.

PSY 540 Psychometrics 3 cr

Theories and methods of test construction and principles of measurement and evaluation in the behavioral sciences.

PSY 542 Cognitive Assessment 3 cr

Principals and methods of individual intelligence testing, including the administration of the Wechsler and the Stanford-Binet tests. Practical experience in the administration, interpretation and report writing of a psychological evaluation using intelligence tests.

Prerequisite: PSY 530 Minimum Grade of B and (PSY 540 Minimum Grade of B or PSY 571 Minimum Grade of B)

PSY 544 Personality & Affective Assmt 3 cr

Theory, development and interpretation of selected personality assessment instruments. Methods and procedures in administering and interpreting personality, aptitude and career interest tests.

Prerequisite: (PSY 540 Minimum Grade of B or PSY 571 Minimum Grade of B) and (PSY 542 Minimum Grade of B or PSY 575 Minimum Grade of B)

PSY 550 Evidenced Based Clin/Coun Prac 3 cr

Study of the theoretical and empirical foundations of the major systems of psychotherapeutic change.

PSY 552 Multicultural Issues in Psy 3 cr

This course will focus on theoretical models, research, techniques, and interventions for working with culturally diverse populations in various settings. Specific issues to be addressed include world views, acculturation and acculturative stress, prejudice and prejudice-reduction techniques, racial/ethnic identity, culture and assessment, and the nature of multicultural competence in Psychology. Issues related to ethnic and racial identity will form the primary focus; however, other types of diversity (e.g., religion, gender, sexual orientation, physically challenged) will also be considered.

Prerequisite: (PSY 550 Minimum Grade of B or PSY 589 Minimum Grade of B) and PSY 506 Minimum Grade of B and PSY 530 Minimum Grade of B and (PSY 532 Minimum Grade of B or PSY 561 Minimum Grade of B)

PSY 554 Cognitive Behavior Therapy 3 cr

A follow up course to PSY 550, this course will survey theory, research and application of cognitive behavior therapy. Focus will be on treatment strategies and application to a variety of psychological disorders of adults and children.

Prerequisite: PSY 530 Minimum Grade of B and (PSY 532 Minimum Grade of B or PSY 561 Minimum Grade of B) and (PSY 550 Minimum Grade of B or PSY 589 Minimum Grade of B)

PSY 556 Practicum 1-3 cr

Supervised experience with adult and children clients. Includes case conference and seminars. May include supervised placement in an applied setting. May be repeated up to five times for a total of 18 credit hours.

Prerequisite: (PSY 532 Minimum Grade of B or PSY 561 Minimum Grade of B) and (PSY 550 Minimum Grade of B or PSY 589 Minimum Grade of B)

PSY 558 External Practicum 3-5 cr

Supervised placement in an applied setting. May be repeated four times for a total of 15 credit hours.

Prerequisite: PSY 552 Minimum Grade of B and PSY 554 Minimum Grade of B

PSY 570 Intel Disable/Autism Spec Dis 3 cr

A study of theories and research related to Intellectual Disabilities and Autism Spectrum Disorders.

PSY 572 Child Psychopathology 3 cr

The description and etiology of deviant behavior patterns in children and adolescents.

Prerequisite: (PSY 532 Minimum Grade of B or PSY 561 Minimum Grade of B)

PSY 575 Comparative Psychology 3 cr

An in-depth analysis of the proximal and ultimate causes of animal and human behavior examined from the perspectives of comparative and evolutionary psychology, psychobiology and ethology. Relevant research in animal models of biological and cognitive systems, learning and motivation, lifespan development and related biopsychosocial factors will be included. ** This course is an approved elective for students seeking gerontology certification.

PSY 586 Cognitive Neuroscience 3 cr

This course includes an advanced and integrative study of the experimental study of cognition and neuroscience. Topics include sensation and perception, memory, learning, language, metacognition, intelligence, problem solving, decision making, mental imagery, consciousness, attention, and the development of cognition through the life span. Major theoretical perspectives and current research within the fields of cognition and neuroscience are discussed. This course also provides students with a basic understanding of the neural underpinnings of a variety of cognitive processes.

PSY 590 Sp Top in Psychology - 1-3 cr

Selected topics in psychology. May be requested for credit when course content varies for a total of 12 credit hours.

PSY 594 Dir Individual Study 1-3 cr

Individual study under the direction of a member of the graduate faculty. May be repeated for up to 9 hours credit.

PSY 598 Project in Psychology 1-6 cr

Completion of a research project, program proposal, program evaluation, major literature review or other comparable experience under the direction of a member of the graduate faculty. IRB or Animal Use and Care Committee approval may be required for some projects. May be repeated for up to 6 hours credit. A minimum of 3 hours is required to meet degree requirements.

PSY 599 Thesis Research 1-6 cr

Completion and oral defense of a master's thesis based upon original research. May be repeated for up to 9 hours credit. A minimum of 6 hours is required to meet degree requirements. Prerequisite: Approval of research prospectus including IRB or Animal Use and Care Committee approval if applicable.

Clinical and Counseling Psychology (PhD)

Degree Requirements

Program Completion Requirements

A minimum of 66 credit hours of doctoral level courses taken at the University of South Alabama is required for the doctoral degree in Clinical and Counseling Psychology.

Code	Title	Hours
Core Courses		
IDE 630	Quantitative Methods III (Multivariate Statistics in Psychology)	3
CCP 780	Applied Health Psychology	3
CCP 758	Psychology Resilience & Trauma	3
PSY 512	Adv History/Systems Psychology	3
CCP 795	Multicultural Counseling	3
CCP 766	Clinical Supervision	3
CCP 759	Group and Systems Theory	3
PSY 556	Practicum	9
CCP 756	Practicum Therapy	9
CCP 782	Advanced Practicum	6
CCP 797	Psychology Internship	3
CCP 799	Dissertation Research	9
Elective Courses		
Elective courses as approved by the Director of Clinical Training		9
Total Hours		66

Note: This list above represents the minimum requirements for completion of the doctoral program of studies. A student may be required or elect to take additional course work in a specific area if needed to enhance skills or to support an area of specialization. Each candidate for the Ph.D. degree in clinical psychology takes practicum courses in the psychological clinic and must also complete a one-year internship in an accredited facility. The internship is taken after completion of coursework and passing of the doctoral preliminary exam, and is a degree requirement.

Honors College

Honors College Administrative Staff

Title	Name
Dean	Doug Marshall
Honors Academic Advisor	Lauren Williams
Administrative Assistant	Pamm Chastang-Howard
Coordinator	Ruby Staten
Development Officer	Evans Wilks

The University of South Alabama Honors College offers a program designed to cultivate the thinking and communication skills of

exceptionally qualified and highly motivated students in any major or course of study. To this end, the Honors College challenges students with enhanced course offerings and scholarly creative activity while offering them expanded opportunities to engage in cultural enrichment, travel, service, leadership, and community. The Honors College is built around three major pillars: Intellectual Curiosity, Leadership, and the Creation of Knowledge and Culture.

At the convenience and price of a midsize regional university, the Honors College at South combines the personal attention and human scale of a small liberal arts college, with the diversity, breadth and depth of expertise, and wide range of opportunities usually associated with a large 'research-intensive' university.

Program Description

The Honors College experience includes curricular (course-work), co-curricular (mentorship projects), and extra-curricular (field trips, movie/game nights) dimensions throughout a student's undergraduate career. Honors students take some, but not all, of their courses as enriched 'Honors' courses, which allow them to dive deeper into the subject matter, to study unique and uniquely interesting topics from an interdisciplinary perspective, and to be more than a Jag Number to their instructors (with most Honors sections having around 15 students). Students eventually choose a mentor (usually in their major or minor) who works with the student on a two or more-semester project that culminates in their senior mentorship project (for which the students receive course credit towards their graduation requirements).

In addition to a challenging academic curriculum, the Honors College offers a variety of experiences that extend learning beyond the classroom, including social and cultural events and community service projects. Honors students often participate in international programs, such as study abroad or exchange programs, and off-campus internship opportunities.

Students who complete the requirements of both the Honors College and of the selected major with an institutional grade-point average of 3.50 or higher will receive the relevant designation on the transcript and the diploma.

Qualifications for Consideration for the Honors College

Applicants typically have a 27 or higher ACT Composite (or comparable SAT score) and a minimum 3.5 high school grade-point average (4.0 unweighted), as computed by the University of South Alabama. But our admissions process is holistic and looks at more than the numbers, so students who are below but close to these benchmarks are encouraged to use our application essays and resume (see below) to make the case for their admission on other grounds.

Procedure to Apply for the Honors College

1. Apply for admission to the University of South Alabama and complete all necessary steps for acceptance.
2. After admission to the university, complete and submit the Honors College Application found on the Honors College website (<https://www.southalabama.edu/colleges/honors/apply.html>) (<https://www.southalabama.edu/colleges/honors/apply.html>).
3. Based upon these materials, successful applicants will be invited to interview for a spot in the next entering class.

Other Honors Options

For transfer students, or others, who have completed significant credits toward graduation, the specific curriculum requirements for the University Honors College may be impracticable. Additionally, other non-honors students may find certain honors courses desirable while being unable to commit to the entire honors curriculum. Options available in these cases include enrollment in specific honors courses (indicated on the transcript as honors credit) with permission of the instructor and the Honors College Dean when space is available, and/or completing an appropriate Departmental Honors project. Students interested in these options should consult with the Honors College Dean.

USA International Education/Study Abroad

Honors College students are encouraged to participate in an international experience through study, research, internship or work abroad. Honors students should seriously consider applying for one of the many international prestigious scholarship programs such as the Goldman Sachs Global Leaders Program, Winston Churchill Foundation Scholarship, George J. Mitchell Scholarship, Rhodes Scholarship, Fulbright Student Grants, Gates Cambridge, Rotary Ambassadorial Scholarships and NSEP Boren Scholarship and Gilman Scholarship. For more information contact your Honors advisor and the Office of International Education.

Honors Requirements

Honors College Curriculum Requirements

The following courses, or a substitute approved by the Honors College Dean, must be completed with a grade of "C" or better, in addition to general studies requirements and specific requirements of the major department, to graduate with Honors College recognition. Transfer students may petition to receive credit for honors courses taken elsewhere. High School AP and IBP credits may not substitute for Honors required courses.

Code	Title	Hours
HON 101	First-Year Honors Seminar (Recommended in first semester)	1
HON 201	Second-Year Honors Seminar	1
HON 301	Intro Senior Honors Project (Variable content)	1
One (1) Lower-level Honors elective (general elective, courses ranging between 100-299, variable content)		3
Three (3) Honors electives, either upper or lower level. (courses ranging between 100-499, variable content)		9
One (1) Upper-level Honors elective (courses ranging between 300-499, senior thesis project does not apply, variable content)		3
Honors Senior Thesis/Project (may count toward major) ¹		6
Total Hours		24

¹ Student should determine early in their program the requirements in their major.

Honors Seminars are special topics courses, and a variety are available each fall and spring semester for students to make their selection.

The Honors Electives requirements can be satisfied by taking any courses offered for Honors credit (courses with "Honors" in the title or an "H" suffix).

Departments of Instruction

- Honors Interdisciplinary Studies (p. 724)
 - Departmental Honors Designation (p. 724)
 - University Honors Designation (p. 725)

Honors College Membership Requirements

Honors students must maintain satisfactory progress in the required curriculum to remain in the Honors College. Scholarship recipients must meet any additional requirements of their specific award. To remain in good standing with the Honors College, honors students must maintain satisfactory progress in the required curriculum and must maintain an institutional GPA of 3.50 or higher after their first year. Scholarships that depend on GPA will not be reinstated after probation.

In order to maintain membership in the Honors College, students must also be a good citizen of the College and University. This is defined as:

1. Adhering to all standards of student conduct as laid out in The Lowdown (<https://www.southalabama.edu/departments/studentaffairs/lowdown/>) student handbook, and to the adjudication process described therein.
2. Abiding by the Bethel Use Agreement signed upon entering the Honors College.
3. Refraining from criminal and other destructive actions that could reflect badly on the Honors College.

By the junior year, each Honors student will identify a suitable faculty mentor and design an Honors Senior Project. The project represents a scholarly effort appropriate to the student, including a significant component of investigation and written presentation. The Honors Senior Project will total 6 credit hours. Graduating Honors seniors will present their Honors senior project at a defense before their committee in a professional format suitable for the project and discipline (e.g., an exhibition, research presentation or poster, or performance). The senior project will be evaluated and graded by a committee of three faculty members, and chaired by the honors project mentor. The senior project also must be approved by the Dean of the Honors College in order to graduate with an Honors designation.

Honors Interdisciplinary Studies

Department Information

The University of South Alabama Honors College is a diverse community of interdisciplinary excellence designed to stimulate the thinking and intellectual curiosity of highly motivated students. Here in Honors we challenge each other through discussion, research, creative scholarship, intercultural engagement and the arts so that together we create the feel of a small college environment in the midst of the opportunities provided by a large urban university.

Our graduates, equipped with this intensive education as well as a wide variety of additional learning experiences, are especially well-prepared for productive careers, committed citizenship and meaningful lives.

Degrees, Programs, or Concentrations

- Departmental Honors Designation (p. 724)
- University Honors Designation (p. 725)

Courses

HON 101 First-Year Honors Seminar 1 cr

This course introduces first-year Honors students to the Honors College, and sets them up to get the most out of their time at the University. The course emphasizes community-building, creativity, communication, motivation, success strategies, and academic planning. Reading, writing, and project assignments relevant to the student's first year experience are required.

Cross-Listed: HON 111

HON 201 Second-Year Honors Seminar 1 cr

This course helps students refine the thinking, creative, and communication skills necessary to be successful in Honors, graduate school, professional school, and in one's career. Emphasis is on getting students started on their Honors capstone projects, along with honing their presentation, networking, and application skills. Reading, writing, and project assignments relevant to the student's second-year experience are required.

Cross-Listed: HON 211

HON 290 Special Topics Honors 1-3 cr

Topics for USA Honors Students of an interdisciplinary or multidisciplinary nature. May be repeated when topic varies. Prerequisite: USA Honors Program

HON 301 Intro Senior Honors Project 1 cr

This course is designed to introduce juniors in the USA Honors Program to scholarly research and creative activities in diverse disciplines. The primary graded assignment of the course is the guided development of an approved Prospectus for the Senior Honors Project.

HON 390 Special Topics Honors 1-3 cr

Advanced topics for USA Honors students of an interdisciplinary or multidisciplinary nature. May be repeated when topic varies. Prerequisite: USA Honors Program

HON 499 Honors Senior Thesis 3 cr

In this course, students undertake the process of creating knowledge and/or culture. With the guidance of their honors mentor, students in HON 499 become experts in their research, creative, or interdisciplinary project through the process of researching, writing, and disseminating their senior thesis research. This course is designed for students with projects outside of their departmental major. Approval of instructor if prerequisites are not met.

Prerequisite: HON 301 (may be taken concurrently) Minimum Grade of B and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C)

Departmental Honors Designation

Degree Requirements

Students who have completed significant credits toward graduation before deciding to pursue an honors degree, and for whom completing the entire Honors curriculum would not be practical, may pursue "Departmental Honors". To receive a designation of "Departmental Honors," students must successfully complete an Honors thesis in their major or minor, have at least a 3.50 GPA, and meet the specific honors requirements of their major or minor department. These students may also elect to take Honors courses and participate in other Honors College activities. The Dean of the Honors College, the Dean of the relevant College or School, and the Chair or Director of the relevant minor must approve all Departmental Honors graduation designations. Please consult departmental sections of the Bulletin for any additional honors requirements specific to your major or minor.

Please consult departmental sections of the Bulletin for any additional honors requirements specific to your major

Mitchell College of Business

General Information

(251) 460-7167

Mitchell College of Business website

<https://www.southalabama.edu/colleges/mcob> (<https://www.southalabama.edu/colleges/mcob/>)

Title	Name
Interim Dean	Alvin Williams
Associate Dean	Kelly Woodford
Interim Assistant Dean of Graduate Studies & International	Gwendolyn Pennywell
Interim Assistant Dean of Financial Affairs	Reid Cummings

The Mitchell College of Business offers the degrees of Bachelor of Science in Business Administration, Master of Accounting, Master of Business Administration, and Doctor of Philosophy. The foundation of the College is quality instruction in all undergraduate and graduate programs. Our instructional mission is to prepare our graduate and undergraduate students for professional careers in the fields of accounting, economics, finance, real estate, management, marketing, international business, and supply chain management through a curriculum designed for both broad exposure to each field and in-depth coverage within a specific field of choice.

Mission

The Mitchell College of Business provides value-added experiential business education opportunities to undergraduate, masters, and doctoral students along the Gulf Coast through innovative engagement with constituents, while advancing the area's economic and social well-being.

Priorities

I. Instruction

The highest responsibility of the College is the instruction of its students and primary emphasis is placed on excellent teaching. In so doing, the College affirms its commitment to the University focus on excellence, lifelong learning and the education of the whole person. The College fulfills its instructional mission through the Bachelor of Science in Business Administration degree program for undergraduates and the Master of Business Administration, Master of Accounting, and Doctor of Philosophy programs at the graduate level.

II. Intellectual Contributions

The College encourages and supports faculty basic and applied scholarship as well as instructional development for the purposes of expanding knowledge, enhancing classroom instruction, and contributing to regional economic development. Scholarship is broadly defined to include investigative efforts that lead to the origination, the integration, or the application of knowledge pertinent to the various fields of business. A program of continuing scholarship is the responsibility of each faculty member. The College is responsible for using its resources to encourage, support, and reward faculty scholarship.

III. Service

The College's service mission is to engage in activities that support and contribute to the development of the University, community and region, and to provide a vehicle for the continuing development of faculty and staff through interaction with the College's numerous constituents. This mission is accomplished through participation in the College's external programs, and through the efforts of individual faculty and staff.

South Alabama Center for Business Analytics, Real Estate and Economic Development (SABRE)

SABRE offers a comprehensive range of services and resources for those in business, industry, government, education, and economic and community development. Drawing on the expertise of its staff and Mitchell College of Business faculty members, SABRE can customize strategic planning, personnel training, data analysis and visualization, consulting, economic impact analysis and forecasting, financial statement evaluation, site location assessment, and digital dashboard development, and much more, to best meet its clients' most critical needs. For those studying at the University of South Alabama, SABRE partners with Mitchell College of Business faculty and PhD students to pursue wide-ranging research opportunities. For undergraduates, SABRE provides support and advising for those pursuing the real estate concentration and also oversees USA Jaguar Realty, a first in the nation university-sanctioned company for real estate students, designed to educate and license the next generation of real estate professionals. Each year, SABRE also hosts and conducts multiple professional education seminars and conferences.

The Melton Center for Entrepreneurship and Innovation

The Melton Center impacts the Central Gulf Coast region by stimulating and nurturing entrepreneurship and innovation. The Center

leverages federal, state, and local resources to impact and expand the entrepreneurial culture at the University of South Alabama and the Central Gulf Coast region through education, engagement, and development opportunities. The activities of the Melton Center directly support the service mission of the Mitchell College of Business to contribute to the economic development of the region.

Career Services Center

The University Career Services Center acts as a liaison between employers and students. Business and professional firms of national significance visit the campus regularly to interview prospective graduates.

Scholarships

The Mitchell College of Business offers prestigious scholarships to entering freshmen students who are majoring in the Mitchell College of Business. Contact the Office of Enrollment Services, (251) 460-6494, for application procedures, deadline dates and more information about the Abraham Mitchell Business Scholarships. In addition, scholarships for eligible students in the Mitchell College of Business are made available by local and regional firms in Accounting, Management, Marketing, Real Estate, and Finance. (Refer to the Financial Aid section of this Bulletin for details.) Visit JagSPOT on the University's website to apply.

Cooperative Education Program

The Cooperative Education Program is available to students in the Mitchell College of Business. This program offers qualifying students opportunities to work part-time while attending school as a full-time student or alternate full-time employment with course work on a rotating semester basis. For details contact:

Director, Career Services Center
2100 Meisler Hall, University of South Alabama
Mobile, Alabama 36688-0002
(251) 460-6188

Transfer Students

The Office of Student Services in the Mitchell College of Business evaluates for credit all courses transferred from other colleges and universities. Degree credit will be given only for those courses which meet the requirements for the degree program of the College. Transfer credit for major-specific courses will only be given for courses taken at an AACSB accredited institution. Students transferring into the Mitchell College of Business with fewer than 45 hours will be required to take BUS 150, Introduction to Business. Students transferring into the College with 46-60 hours are highly encouraged to take BUS 150. Students transferring from a community college may have a maximum of 61 semester hours accepted toward the degree program. No junior or senior-level courses listed in the curriculum of the Mitchell College of Business will be accepted from a community college for degree credit.

Transient Course Credit

Students enrolled in the Mitchell College of Business must receive prior approval from the MCOB Dean's Office before enrolling in any courses at another institution. Approval will not be granted for dual enrollment for any semester in which the requested course is taught at USA. If the course is a major requirement, prior approval of the Department Chair is also required. Transient credit approval for upper division business courses will only be given for courses to be taken at AACSB accredited institutions.

Transient course approval may be granted to students in good academic standing who have not previously attempted the course at USA on one of the following conditions:

1. Students who are not residents of the area and who leave USA to return home for one or more semesters and the course is not offered on-line at USA during the at-home semester.
2. Students who move to another area prior to completing all degree requirements but who have met the residency requirements for the Mitchell College of Business and the courses needed to complete the degree are not offered on-line at USA.
3. Students who are scheduled to graduate and the course will not be offered at USA during the final term.

Except in extraordinary circumstances, transient approval will not be given for Pre-Major Courses (EH 101, EH 102 and MA 120) and courses in the 200-level Basic Business Technique Core. Transient approval for upper division major courses will only be given for approved courses taken at an AACSB accredited institution.

Failure to obtain prior approval may result in loss of transfer credit for the course work. The Transient Approval form may be downloaded from the MCOB website and forwarded to the Office of Student Services for consideration.

Transient Approval will not be granted to students on probation or for previously-unsuccessful courses attempted at USA. Approval will not be granted for a course the student is not eligible to take at USA.

Admission to the Mitchell College of Business

Students may transfer from other colleges in the University to the Mitchell College of Business. Students transferring into the Mitchell College of Business with fewer than 45 hours will be required to take BUS 150, Introduction to Business. Students transferring into the College with 46-60 hours are highly encouraged to take BUS 150. Degree requirements are defined by the University Bulletin in effect for the semester of entry into the College.

College Requirements

Student classifications in MCOB are Pre-Business, Business Administration, and Declared Major. Freshmen who are admitted in the Pre-Business Classification will be restricted to enrollment in General Education classes, which can include ECO 215, ECO 216, CIS 150, CIS 250, BUS 101, and BUS 150. In order to advance to the Business Administration classification, students admitted in the Pre-Business classification must successfully complete any developmental studies requirements and MA 112 with a GPA of 2.0 or higher before enrolling in MCOB courses.

Students enrolling in the College, who are eligible to enroll in MA 112, are assigned to Business Administration as their major until they have completed EH 101, EH 102, MA 120, and the 200-level Basic Business Techniques Core listed below with a minimum grade of C in each course and have a 2.0 USA GPA. After fulfilling these requirements, students must declare a major selected from the fields of Accounting, Economics and Finance, Management, Marketing, International Business, Supply Chain Management, or General Business. In Economics and Finance, Management, and Marketing, a concentration must also be declared. Students must have completed or be in the process of completing eighteen (18) hours of the 200 Business Techniques Core before enrolling in the Upper Division Business Core. MCOB students should officially declare a major before taking major courses or business electives.

After declaring a major, students will be advised by a faculty advisor from that area.

Students attending other colleges, including community colleges, who are planning to enter the Mitchell College of Business must take at least 50% of the required business credit hours and at least six (6) out of nine (9) major courses at the University of South Alabama. Transfer credit

will only be awarded for upper division major courses taken at AACSB accredited institutions.

Each student is responsible for meeting all requirements of the degree program. Before registering for any course, students must complete any prerequisites listed in course descriptions in this Bulletin. The Office of Student Services is available to all students for the evaluation of their degree-program records. When an exception is made in a student's program, written approval of the exception by the Associate Dean must be placed in the student's file. Failure to properly document exceptions may delay graduation.

Requirements for a Second Major in Business, Dual Major Across Colleges, and Minors in Business

Undergraduate students enrolled in the Mitchell College of Business who plan to add a second major to their curriculum must meet all requirements for the second major. Courses included in the first major cannot be counted toward the second major requirements. Students not enrolled in the Mitchell College of Business who are interested in a dual major in business or a minor in business must meet with the Director of the MCOB Office of Student Services for information and course planning.

All Course Requirements for the Bachelor of Science in Business Administration Degree

All students enrolled in the Mitchell College of Business are required to take specified business courses and courses in other colleges of the University. Additionally, a major field of study must be selected in Accounting, Economics and Finance, Management, Marketing, International Business, General Business, or Supply Chain Management.

General Business is the only major with all upper division business courses available online. The 300 and 400 level courses necessary to complete the General Business major are delivered on-line at least one time each academic year. The tentative schedule for on-line delivery is available from the MCOB Office of Student Services.

To graduate, students must complete a minimum of 122 semester hours with an overall institution grade-point average of 2.0 (38 hours of general education requirements and 84 hours of business courses). In addition, a grade of at least C is required in each of the Basic Business Techniques courses, a 2.0 GPA is required in the 300-level business core courses, and a 2.0 GPA is required for all courses counted in the Major.

All students enrolling in the Mitchell College of Business must complete at least fifty percent of all business credit hours and at least six of the nine courses counted toward the major at the University of South Alabama.

All students must petition for graduation according to University requirements explained elsewhere in this Bulletin.

Minors

Minors in the Mitchell College of Business

The Mitchell College of Business offers minors for both business and non-business students. Business students, except General Business majors, may elect minors in Accounting, Data Analytics, Economics, Finance, I/O Psychology, Management, Marketing, and Real Estate. Because of the general nature of the General Business degree, General Business majors are not eligible for business minors. Students in other colleges may elect, with the approval of their department chair, a minor in the Mitchell College of Business. Minors for non-business majors are offered in Data Analytics, Economics, Entrepreneurship, Finance,

General Business, I/O Psychology, General Management, Marketing and Real Estate. A 2.0 is required for the courses applied toward the minor. Students must complete at least 50% of the courses counted towards the minor at the University of South Alabama. With the exception of psychology classes needed for the I/O Psychology minor, only courses taken at an AACSB accredited institution may count towards a business minor. Except as otherwise noted in the Bulletin, courses used for the business minor may not also count as major courses. Courses used for a first business minor may not be used for a second business minor. Specific course requirements for each minor may be found in the individual departments' bulletin information.

Title	Name
Interim Chair	Kenneth Hunsader
Professor Emeritus	Mark A. Segal
Professors	Baldwin, Hardin
Associate Professor	Hua, Hsu, Vann
Assistant Professors	Johnson, Rich
Instructors	DeRoy, Foster, Madden

Department of Accounting Mission

Our mission is to provide value-added accounting education, conduct research that improves accounting practice and instructional development, and provide service to the profession, university, and Gulf Coast Region constituencies. Our graduates should have the requisite accounting and information technology skills to become the future ethical leaders of the accounting profession.

Degrees, Programs, or Concentrations

- Accounting (BSBA) (p. 731)
- Accounting For Business Majors Minor (p. 734)

Courses

ACC 211 Financial Accounting 3 cr

The course provides an understanding of ways in which financial accounting information supports business decision-making. The focus is on the financial statements and the transactions and processes that produce them. ACC 211 and ACC 212 must be taken in sequence.

ACC 212 Managerial Accounting 3 cr

The course provides an understanding of ways in which managerial accounting information supports business decision-making. The focus is on identifying, measuring, analyzing, interpreting, and communicating financial information to managers for the pursuit of an organization's goals. ACC 211 and ACC 212 must be taken in sequence.

Prerequisite: ACC 211 Minimum Grade of C

ACC 310 Intro to Acc & Bus Software 3 cr

An introductory course in practical application and study of current accounting and business software. The course provides an overview of commonly used business and accounting software with practical applications.

Prerequisite: ACC 212 Minimum Grade of C

ACC 321 Acct for Entrepreneurial Bus 3 cr

A study of the analysis and use of accounting information by entrepreneurial businesses. Among the topic covered are typical financing sources of entrepreneurial businesses and valuation of closely held businesses. In addition, the course includes coverage of how financial statements can be used to: manage a business, monitor an entity's performance, determine credit decisions, manage cash flow, and prepare forecasted financial statements.

Prerequisite: ACC 212 Minimum Grade of C

ACC 331 Taxation of Individuals 3 cr

Basic federal income tax law and tax planning considerations relating to individuals.

Prerequisite: ACC 212 Minimum Grade of C

ACC 341 Accounting Information Systems 3 cr

The study of accounting as a comprehensive information system which provides for planning and control, special reports, and preparation of external financial statements.

Prerequisite: ACC 212 Minimum Grade of C and CIS 250 Minimum Grade of D

ACC 350 Financial Statement Analysis 3 cr

In-depth coverage of the principles and practices of effective analysis of the financial statements of firms for the purpose of understanding (1) the economic and financial characteristics and current conditions of the firm, (2) particular strategies the firm may select with which to compete, and (3) the accounting principles and procedures underlying the financial statements. The course integrates concepts from accounting, economics, finance and management. Credit cannot be received for both ACC 350 and FIN 350.

Prerequisite: ACC 212 Minimum Grade of C and (FIN 315 Minimum Grade of D or FIN 340 Minimum Grade of D)

Cross-Listed: FIN 350

ACC 371 Intermediate Accounting I 3 cr

Accounting theory as related to income measurement; preparation of balance sheets and income statements; recognition, measurement, and reporting of assets.

Prerequisite: ACC 212 Minimum Grade of C and (MA 112 Minimum Grade of D or MA 120 Minimum Grade of D or MA 125 Minimum Grade of D or MA 126 Minimum Grade of D)

ACC 372 Intermediate Accounting II 3 cr

Includes measurement, recognition and reporting of liabilities, equities, investments, and deferred taxes; EPS; and the preparation of cash flow statements. Coverage of selected professional pronouncements.

Prerequisite: ACC 313 Minimum Grade of C or ACC 371 Minimum Grade of C

ACC 380 Cost Accounting for Managers 3 cr

Managers must use cost and revenue data to make decisions about which products or services to produce. This course teaches managers about cost-accounting theory and practice including job-order and process-cost systems, cost-volume-profit relationships, budgets, standard costs, variance analysis, direct costing, and cost allocation.

Prerequisite: ACC 212 Minimum Grade of C

Cross-Listed: ACC 381

ACC 381 Cost Accounting 3 cr

Includes cost-accounting theory and practice involving such topics as job-order and process-cost systems, cost-volume-profit relationships, budgets, standard costs, variance analysis, direct costing, and cost allocation.

Prerequisite: ACC 212 Minimum Grade of C

ACC 410 Forensic Accounting 3 cr

An intro to principles for forensic accounting and professional ethics. Civil and criminal procedures and litigation services are covered. The course introduces forensic accounting topics such as fraud, bankruptcy, digital forensics, and financial statement misrepresentation.

Prerequisite: ACC 372 Minimum Grade of C

ACC 415 Data Analytics for Accounting 3 cr

This course focuses on the use of data analytic tools in the accounting profession. Students will learn the fundamentals of data analysis in a variety of accounting disciplines, how to interpret the output, and ways to communicate the results. Students will work on projects aimed at enhancing their competency in critical thinking, problem-solving, written and oral communication, and data analytic skills.

Prerequisite: (ACC 331 Minimum Grade of C and ACC 341 Minimum Grade of C and ACC 372 Minimum Grade of C and ACC 381 Minimum Grade of C)

ACC 416 Int'l and Advanced Accounting 3 cr

Study of accounting in a global context including standards and issues and the roles and responsibilities of accountants. Additional topics include: business combinations, government accounting, interim and segmented reporting.

Prerequisite: ACC 314 Minimum Grade of C or ACC 372 Minimum Grade of C

ACC 432 Tax of Partnerships and Corps 3 cr

An examination of the federal tax treatment of partnerships and corporations. Topics include: tax aspects of the formation of the entity, elements of gross income, treatment of property dispositions, allowable deductions and credits, determination of entity and investor basis, and liquidation of the entity.

Prerequisite: (ACC 331 Minimum Grade of C or ACC 411 Minimum Grade of D) and (ACC 314 Minimum Grade of C or ACC 372 Minimum Grade of C)

ACC 451 Auditing - W 3 cr

Theory and application of the attest function, ethical issues, and written communication for accountants. Includes standards, objectives, review of internal control structures, tests of controls, substantive testing and reporting. Ethical issues and the preparation of written letters and formal reports are covered.

Prerequisite: (ACC 314 Minimum Grade of C or ACC 372 Minimum Grade of C) and MGT 305 Minimum Grade of D

ACC 452 Advanced Auditing & Analytics 3 cr

Advanced study of the application of auditing standards, internal control evaluations, applications of statistics, audits of information systems, internal and operational auditing, and legal and reporting obligations.

Prerequisite: ACC 451 Minimum Grade of C

ACC 461 Acc for Gov and Not-For-Profit 3 cr

A study of the concepts and procedures underlying fund accounting, budgetary control, and financial reporting requirements for governmental and not-for-profit entities.

Prerequisite: ACC 314 Minimum Grade of C or ACC 372 Minimum Grade of C

ACC 490 Special Topics 3 cr

Designed to provide senior students an opportunity to study selected topics of particular interest. A student may count no more than six hours of Special Topics in the concentration. Prerequisite: Approval of Department Chair.

ACC 494 Directed Studies 3 cr

Primarily designed to give superior students an opportunity to study some phase of accounting of particular interest. Conferences, a bibliography, and a formal research report are required. Requires permission of Department Chair, 2.5 GPA or better and junior or senior standing.

ACC 496 Accounting Internship 3 cr

The internship program is designed to give students practical experience in their field of study. Students complete directed projects under the supervision of Department Chair.

Prerequisite: ACC 314 Minimum Grade of C or ACC 372 Minimum Grade of C

ACC 510 Forensic Acc. & Litig. Svcs. 3 cr

An intro to forensic accounting from the CPA perspective, focusing on civil and criminal procedures, and litigation services. Includes topics such as fraud, bankruptcy, digital forensics, and financial statement misrepresentations.

ACC 511 Financial Accounting Theory 3 cr

The evolution of general accounting theory leading up to and including the Conceptual Framework will be discussed as well as the specific theory underlying certain accounting topics of current interest.

ACC 516 Advanced Financial Accounting 3 cr

Study of Business combinations, consolidation issues, interim and segmented reporting, inflation accounting. Coverage of selected professional pronouncements.

ACC 521 Advanced Managerial Accounting 3 cr

Advanced managerial and cost accounting topics. Tools for planning and control, development of cost information for decision making, cost allocation, inventory management systems, capital budgeting, performance measurement, transfer pricing and multi-national considerations.

ACC 531 Tax Planning and Research 3 cr

An examination of tax research tools, their utilization, and various tax planning considerations. Students are required to conduct research and tax planning upon assigned topics, and write a report on their findings.

ACC 532 Tax Partnerships/Corporations 3 cr

An examination of the federal tax treatment of partnerships and corporations. Topics include: tax aspects of the formation of the entity, elements of gross income, treatment of property dispositions, allowable deductions and credits, determination of entity and investor basis, and liquidation of the entity.

ACC 534 Tax of Gifts, Trusts & Estates 3 cr

An examination of the federal tax treatment of gratuitous transfers made during life and at death.

ACC 535 Multi Tax 3 cr

This course addresses the increased importance of international and multi-jurisdictional taxation in today's global environment. It introduces students to the principles guiding nexus, geographic allocation of income and the avoidance of double taxation. The course helps students develop an understanding of the U.S. tax rules that may apply to income involving the U.S. and other countries. It also helps students understand multistate tax rules. Students will develop an understanding of the tax implications resulting from business that is conducting electronically. Students will apply multi-jurisdictional tax principles and rules to solve case studies.

ACC 541 Advanced Accounting Systems 3 cr

Analysis of accounting information system case studies in order to expose students to real-world system problems and applications. Course work includes hands-on work with a variety of computer-based accounting application packages.

ACC 552 Advanced Auditing & Analytics 3 cr

Advanced study of the application of auditing standards, internal control evaluations, applications of statistics, audits of information systems, internal and operational auditing, and legal and reporting obligations.

ACC 561 Acc of Government and NFPE 3 cr

A study of the concepts and procedures underlying fund accounting, budgetary control, and financial reporting requirements for governmental and not-for-profit entities.

ACC 570 Professional Accounting I 3 cr

A study of issues and responsibilities relevant to the public accounting profession, including financial, regulation, assurance, and business considerations.

ACC 571 Professional Accounting II 3 cr

A study of contemporary issues and responsibilities relevant to the accounting profession, including ethical, legal and international considerations.

ACC 572 Fraud Ex 3 cr

Overview of the nature of occupational fraud and how it is committed included an introduction to the actions that can be taken to determine the presence of occupational fraud and procedures that can be implemented to deter fraud. Students will also learn how financial statement fraud and reporting occur, including investigation and financial fraud prevention techniques.

ACC 580 Emerging Issues in Accounting 3 cr

A study of current and emerging issues and responsibilities relevant to the accounting profession, with special emphasis on technology advancements, new services, regulatory changes, and international developments in accounting and business.

ACC 590 Special Topics 3 cr

Designed to provide graduate students an opportunity to study selected topics. Prerequisites: Permission of Department Chair. A student may count no more than three hours of Special Topics in the MBA degree program.

ACC 594 Independent Study in Account 3 cr

Readings and research on selected topics. Conference and formal research report required. Permission of department chair.

Title	Name
Chair	
Professors	Hunsader, Swofford, Wood
Associate Professor	Affuso, Cummings, Huang, Istiak, Lawrey, Le, Pennywell
Assistant Professors	Harper, Jain

The Economics and Finance major is designed to prepare students for managerial positions in business and government. Three concentrations are available within the Economics/Finance major: Economics, Finance, and Real Estate. All Economics/Finance majors are required to take the following two courses and choose one concentration area:

Code	Title	Hours
ECO 315	Intermediate Microeconomics	3
FIN 343 or ECO 340	Money Mkts and Fin Instit Money and Banking	3

The Economics Concentration

The Economics program is designed to prepare students for professional careers in managerial positions, government, administration, education, and others. Positions in business economics and graduate study require knowledge of economics and the application of economic tools to analyze problems for decision-making.

The Finance Concentration

The Finance program is designed to provide an understanding of the various areas and principles of finance. Students will develop a body of specialized knowledge and analytical techniques that are used in the acquisition, allocation and management of financial resources. Finance careers are typically in industry and commercial businesses, public utilities and government agencies, banks, insurance companies, brokerage houses, investment companies and other financial institutions. The finance degree is appropriate for students who plan a career in corporate finance, financial planning, investment planning and research, or insurance.

The Real Estate Concentration

The Real Estate program is designed to educate and prepare students for the myriad of professional careers available in residential, commercial, and related real estate industries. Students will develop the specialized quantitative and qualitative skills necessary to elevate their knowledge of real estate as an asset class and investment vehicle. Studying real estate will better prepare students for the unique demands and complex risks associated with real estate practice and investment. Additionally, exposure to active real estate professionals through coursework and internships will provide students the opportunity to begin building a professional network that will add value to their education and enhance their career prospects upon graduation.

Degrees, Programs, or Concentrations

- Economics & Finance (BSBA) (p. 739)
- Economics & Finance (BSBA) - Economics Concentration (p. 740)
- Economics & Finance (BSBA) - Finance Concentration (p. 743)
- Economics & Finance (BSBA) - Real Estate Concentration (p. 746)
- Economics for Business Majors Minor (p. 749)
- Economics for Non-Business Majors Minor (p. 750)
- Finance for Business Majors Minor (p. 750)
- Finance for Non-Business Majors Minor (p. 750)
- Real Estate for Business Majors Minor (p. 750)
- Real Estate for Non-Business Majors Minor (p. 750)

Courses

Economics (ECO)

ECO 215 Prin of Microeconomics 3 cr

Functions of the price system in a market economy; role of households and business firms in mobilizing resources to meet human needs. The functional and personal distribution and use of income. Relevant problems are discussed.

ECO 216 Prin of Macroeconomics 3 cr

Economics as a science; its nature and functions. Analysis of the American economy from the macroeconomic viewpoint, stressing full employment, monetary and fiscal policy, national income accounting, and their application to current problems and issues.

ECO 300 Introduction to Economics 3 cr

Intensive study of micro-and macroeconomic principles with emphasis on application to current economic issues and problems of interest to public school teachers and students.

ECO 315 Intermediate Microeconomics 3 cr

Operation of the price system, with special reference to a market economy and to related public policies and business issues; analysis of the distribution of income; theories of consumer behavior, the firm, resource allocation, and product distribution.

Prerequisite: ECO 215 Minimum Grade of D or ECO 300 Minimum Grade of D

ECO 316 Intermediate Macroeconomics 3 cr

The nature and control of forces in a developed economy which determine levels of employment, income and use of resources, and rate and direction of economic growth.

Prerequisite: ECO 214 Minimum Grade of D or ECO 216 Minimum Grade of D or ECO 300 Minimum Grade of D

ECO 318 Prin of Managerial Economics 3 cr

Study of economic principles and methods in analyzing problems faced by management of a business or other type of organization; application of economic concepts to finding solutions of such problems that advance the best interest of such organizations.

Prerequisite: ECO 215 Minimum Grade of D or ECO 300 Minimum Grade of D

ECO 322 Economics of Industrial Org 3 cr

An analysis of the effect of modern industrial structure on competitive behavior and performance, in the light of contemporary price theory and the theory of workable competition; a critical evaluation of the legislative content, judicial interpretation, and economic effects of antitrust laws, current problems and proposed remedies.

Prerequisite: ECO 215 Minimum Grade of D or ECO 300 Minimum Grade of D

ECO 323 Public Finance 3 cr

The nature, purposes, and economic effects of various types of taxes in a federal government. Problems of tax administration, budgeting, and expenditure of tax revenues. Review of current problems.

Prerequisite: ECO 215 Minimum Grade of D or ECO 300 Minimum Grade of D

ECO 330 Current Global Economic Issues 3 cr

Application of the standard economic theory to markets to analyze major issues confronting U.S. consumers and businesses in the global economy. Topics include comparative advantage, commercial policy and protectionism, currency markets and foreign exchange rates, economic integration and free trade areas, international trade accounting, and financial aspects of international trade.

Prerequisite: ECO 215 Minimum Grade of D or ECO 300 Minimum Grade of D

ECO 340 Money and Banking 3 cr

Analysis of monetary, credit, and banking institutions in the American economy, emphasizing commercial banks, the Federal Reserve System, and the Treasury. Credit for both ECO 340 and FIN 343 is not allowed.

Prerequisite: FIN 315 Minimum Grade of D

Cross-Listed: FIN 343

ECO 343 Labor Economics 3 cr

United States population analyzed by age, sex, and other characteristics; study of the labor force and its composition; unemployment and underemployment. Education as an investment in productive resources. Economics of leisure, health, housing, recreation, and other areas of human-resource development.

Prerequisite: ECO 215 Minimum Grade of D or ECO 300 Minimum Grade of D

ECO 355 Sport & Entertainment Econ 3 cr

The analysis of the economics of decision making and trends in sports and entertainment media. This class will cover cases where economic analysis has caused in behavior, as well as cases where various groups appear to behaving irrationally. Prerequisites: ECO 215 or ECO 300 for non-business and non-economic major.

Prerequisite: ECO 215 Minimum Grade of D or ECO 300 Minimum Grade of D

ECO 363 International Economics 3 cr

Modern international trade theory; the balance of payments and the adjustments processes; the evolution of international economic institutions; critical analysis of current international economic policies - trade, monetary, and regional economics organizations.

Prerequisite: ECO 214 Minimum Grade of D or (ECO 212 Minimum Grade of D or ECO 215 Minimum Grade of D) or ECO 216 Minimum Grade of D or ECO 300 Minimum Grade of D

ECO 371 Economic Development 3 cr

Economic development theory with stress on the roles of technology, management, international financing, technical assistance organizations, and international private investment. Factors that control and influence the developmental and growth process either positively or negatively. Prerequisites: ECO 215 or ECO 300 for non-business and non-economics majors.

Prerequisite: ECO 215 Minimum Grade of C or ECO 300 Minimum Grade of C

ECO 372 Economics of Urban Development 3 cr

This course addresses contemporary issues of urban and metropolitan areas. The course focuses on understanding the main economic forces leading to the existence of cities and regional agglomeration. Students will also use neoclassical economic theory to critically analyze economic efficiency and the spatial structure of markets. The course includes a wide range of topics such as urban growth, business clusters, poverty, crime, urban transportation, positive and negative externalities in urban areas, land use theory, housing, and the role of local governments.

Prerequisite: ECO 215 Minimum Grade of D or ECO 300 Minimum Grade of D

ECO 383 Economic History of the US 3 cr

The evolution of the modern United States economic system. The parts played by exploitation of natural resources, investment from abroad, financial institutions, and technology in arriving at the present economic situation. Critical analysis of development just before, during, and after World War II, and of current economic problems.

Prerequisite: (ECO 215 Minimum Grade of D or ECO 212 Minimum Grade of D) and (ECO 214 Minimum Grade of D or ECO 211 Minimum Grade of D or ECO 216 Minimum Grade of D) or ECO 300 Minimum Grade of D

ECO 390 Environmental Economics 3 cr

This course introduces students to the economic and environmental implications of natural resource management. The course covers conceptual and methodological topics, including sustainability, which will be applied to contemporary issues i.e. depletion of renewable resources, land and water scarcity, and climate change. Specific topics include the economics of energy, fisheries, forestry, food and pollution.

Prerequisite: ECO 215 Minimum Grade of D or ECO 300 Minimum Grade of D

ECO 451 Mathematical Economics 3 cr

Application of business and economics concepts using economic models and equilibrium, matrix algebra, differentiation, comparative static analysis, optimization problems, and other selected techniques.

Prerequisite: MA 120 (may be taken concurrently) Minimum Grade of D and ECO 215 Minimum Grade of D and ECO 216 Minimum Grade of D or ECO 300 Minimum Grade of D

ECO 453 Intro to Econometrics 3 cr

Study of regression analysis and its application to business, economics, and other social-science problems; emphasis on model building, research writing, and econometric forecasting. Students are required to write a term paper on econometric applications under direct supervision of the instructor.

Prerequisite: (BUS 245 Minimum Grade of D or ST 210 Minimum Grade of D) and (ECO 215 Minimum Grade of D or ECO 216 Minimum Grade of D)

ECO 490 Special Topics 3 cr

Designed to provide senior students an opportunity to study selected topics of particular interest. A student may count no more than six hours of Special Topics in the concentration. Prerequisite: Approval of Department Chair.

ECO 491 History of Economic Thought -W 3 cr

Economic ideas from the Greeks to present with intensive study of the classical, neoclassical, and contemporary schools of economic thought.

Prerequisite: (ECO 215 Minimum Grade of D or ECO 212 Minimum Grade of D) or ECO 300 Minimum Grade of D

ECO 494 Dir St in Economics 3 cr

Reading and research on selected economic topics under guidance of the departmental faculty. Junior and senior standing, a cumulative GPA of 2.5 or better, and approval of the department chair following the evaluation of a written proposal.

ECO 496 Economics Internship 3 cr

The internship program is designed to give students practical experience in their field of study. Students complete directed projects under the supervision of Department Chair. Prerequisites: Junior or Senior standing, declared major in economics, overall GPA of at least 2.0, and Internship Agreement signed by the Department Chair.

ECO 506 Economic Theory 3 cr

An introduction to economic theory, including the basic theory of the market (supply and demand); elasticity; introduction to market structure; trade theory; international trade and balance of payments; national income accounting; money and the banking system; macroeconomic theories, and macroeconomic stabilization policy.

ECO 535 Forecasting Business Dynamics 3 cr

Application of business and economic concepts using business cycle models, international trade theories, dynamics of stock market, unemployment, tax policies, monetary policy regulation, and forecasting of important business indicators.

ECO 590 Sp Top - 3 cr

Designed to provide graduate students an opportunity to study selected topics. (A student may count no more than three hours of Special Topics in the MBA degree program.) Prerequisite: Approval of Department Chair.

ECO 594 Independent Study in Economics 3 cr

Readings and research on selected topics. Conferences and formal research report required. Approval of Department Chair.

ECO 609 Industrial Organiz Economics 3 cr

This course focuses on industrial organization topics such as consumer choice, market structure, and pricing. It is designed to give students fundamentals in economics and to help them start research agendas.

Finance (FIN)**FIN 300 Personal Finance 3 cr**

General principles and techniques of finance as applied to personal business transactions and the management of personal funds. Finance majors may not count this course as a finance elective.

FIN 305 Introduction to Finance 3 cr

A survey course covering corporate financial management. Basic concepts such as interest rates, time value of money, cost of capital, and risk are discussed and applied to stock, bond, and long-term investment valuation. Guidelines are developed for corporate financial decision-making in such areas as working capital management and capital structure policy, but with emphasis on short-term financial management and financial planning. The impact of ethical considerations and global financial markets are discussed. This course is for non-business and non-economics majors only.

Prerequisite: ACC 212 Minimum Grade of D and (ECO 212 Minimum Grade of D or ECO 215 Minimum Grade of D) and (BUS 245 Minimum Grade of D or ST 175 Minimum Grade of D or ST 210 Minimum Grade of D)

FIN 315 Business Finance 3 cr

A survey course covering corporate financial management. Basic concepts such as interest rates, time value of money, cost of capital, and risk are discussed and applied to stock, bond and long-term investment valuation. Guidelines are developed for corporate, financial decision making in the areas of capital structure policy, dividend policy, long-term financing, corporate control, and working capital management. The impact of ethical considerations and global financial markets are discussed.

Prerequisite: (ECO 215 Minimum Grade of D and ACC 211 Minimum Grade of D and MA 120 Minimum Grade of D or MA 121 Minimum Grade of D or MA 126 Minimum Grade of D or MA 125 Minimum Grade of D or MA 131 Minimum Grade of D or MA 287 Minimum Grade of D) and (BUS 245 Minimum Grade of D or ST 175 Minimum Grade of D or ST 210 Minimum Grade of D)

FIN 332 Multinational Finance 3 cr

Analysis of financial management of multinational firms. Introduces the environment of international capital and foreign exchange markets and examines the effects of international business environment on risk, capital budgeting, working capital management, and capital structure decisions of the firm.

Prerequisite: FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D

FIN 343 Money Mkts and Fin Instit 3 cr

An examination of the major financial institutions operating in our economy, and the environment in which they operate. In light of the changing environment of the financial institutions area, the changing roles of the various financial markets, major legislation, and the regulatory agencies are also studied in this course. Credit for both FIN 343 and ECO 340 is not allowed.

Prerequisite: FIN 315 (may be taken concurrently) Minimum Grade of D or FIN 341 (may be taken concurrently) Minimum Grade of D

Cross-Listed: ECO 340

FIN 344 Real Estate 3 cr

Introduction to the tools used to make intelligent decisions regarding real estate as a wealth-building asset. Topics include legal rights, valuation, financial analysis, contracts, and brokerage with practical applications. Emphasis is given to local supply and demand conditions and property location and their impact on typical consumer decisions.

FIN 345 Principles of Insurance 3 cr

Examines risks facing the individual and business organizations and applications of public and private insurance to reduce or eliminate such risks. This is a survey course involving all classes of insurance.

FIN 346 Alabama Real Estate Law & Reg 1 cr

Course required for students planning to take the Alabama Real Estate License Examination. Topics include current Alabama Real Estate License Law, Administrative Rules and regulations, Consumer Guides, State Court Cases and relevant readings in Real Estate Risk Management. Requires Consent of Instructor.

Prerequisite: FIN 344 (may be taken concurrently) Minimum Grade of D or MKT 345 Minimum Grade of D

FIN 350 Fin Stmt Analysis & Corp Strat 3 cr

In-depth coverage of the principles and practices of effective analysis of the financial statements of firms for the purpose of understanding (1) the economic and financial characteristics and current conditions of the firm, (2) particular strategies the firm may select with which to compete, and (3) the accounting principles and procedures underlying the financial statements. The course integrates concepts from accounting, economics, finance and management. Credit cannot be received for both ACC 350 and FIN 350.

Prerequisite: FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D

Cross-Listed: ACC 350

FIN 370 Short-Term Financial Management 3 cr

In-depth coverage of liquidity, management of working capital, corporate cash management, short term investment, financing and forecasting.

Prerequisite: FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D

FIN 410 Intermediate Bus Finance 3 cr

In-depth coverage of financial planning and management. including cost of capital, capital budgeting, valuation and other topics.

Prerequisite: (FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D) and (BUS 255 Minimum Grade of D or ST 275 Minimum Grade of D)

FIN 411 Advanced Business Finance - W 3 cr

Actual and simulated cases in finance from business and industry; includes businesses of all sizes.

Prerequisite: FIN 350 Minimum Grade of D and FIN 410 Minimum Grade of D or FIN 441 Minimum Grade of D

FIN 420 Investments 3 cr

Survey of the characteristics of investment alternatives and the investment environment, including market operations and regulations, sources and uses of information, and an introduction to capital market theory.

Prerequisite: (FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D) and (BUS 245 Minimum Grade of D or ST 175 Minimum Grade of D or ST 210 Minimum Grade of D)

FIN 421 Sec Analy-Portfolio Mgt 3 cr

The development of the theory and practice of security analysis and portfolio management. Security analysis involves the fundamental determination of security values through economic, industry, and firm analysis. Portfolio management addresses asset selection and allocation for the construction and maintenance of portfolios that meet specific investment objectives in a risk-return context.

Prerequisite: FIN 420 Minimum Grade of D or FIN 441 Minimum Grade of D

FIN 425 Student Managed Invest Fund I 3 cr

This is the first in a sequence of two courses whereby students manage a real portfolio of securities. The selected students research the prospective investments, generate reports, and make decisions to buy or sell the securities. Administrative responsibilities are assigned and analyst teams are formed. Students accepted into this course must enroll in FIN 426 (Student Managed Investment Fund II) the following term unless otherwise disqualified. Requires Department Chair permission.

Prerequisite: FIN 420 Minimum Grade of B

FIN 426 Student Managed Invest Fund II 3 cr

This is the second in a sequence of two courses whereby students manage a real portfolio of securities. The selected students research the prospective investments, generate reports, and make decisions to buy or sell the securities. Administrative responsibilities are assigned and analyst teams are formed. Students build on and add depth to skills and knowledge acquired in FIN 425. Requires Department Chair permission.

Prerequisite: FIN 425 Minimum Grade of B

FIN 430 Derivative Securities 3 cr

Covers principles of Options and Futures contracts and their economic functions. Options: basic strategies; combinations and spreads; pricing; and the various types of contracts. Futures: fundamentals of the market; contract specifications and their uses. Program trading and portfolio insurance.

Prerequisite: (FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D)

FIN 442 Real Estate Dev & Prop Mgmt 3 cr

This course provides an overview of the real estate development and property management processes, as well as introduces students to various disciplines, professionals, and industry sectors, and how they interact and participate in these processes.

Prerequisite: FIN 344 Minimum Grade of D

FIN 444 Real Estate Valuation - W 3 cr

Emphasis is given to the valuation process and the analysis that leads to valid estimates of value. The cost, sales comparison, and income approaches to value are examined and illustrated within the Uniform Standards of Professional Appraisal Practice requirements. Preparation of typical valuation reports is covered.

Prerequisite: FIN 344 Minimum Grade of D and MKT 345 Minimum Grade of D and EH 101 Minimum Grade of C and EH 102 Minimum Grade of C

FIN 445 Life and Disability Insurance 3 cr

Principles and practices of insurance used for family and income protection against premature death and disability; retirement and pension plans including group insurance and social security.

Prerequisite: FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D

FIN 446 Real Estate Finance & Invest 3 cr

Analysis of income property debt and equity instruments, financing documents, financial analysis and risk scenarios of different property types, and relevant local, state, and federal laws and court cases.

Prerequisite: FIN 344 Minimum Grade of D or MKT 345 Minimum Grade of D

FIN 448 Real Estate Law 3 cr

A detailed examination of the contracts, documents, and instruments used in a transaction on one or more of the real property rights, and relevant local, state, and federal laws and court cases.

Prerequisite: FIN 344 Minimum Grade of D or MKT 345 Minimum Grade of D

FIN 470 Depository Institution Mgt I 3 cr

Analysis of depository institution management processes focusing on management of capital, assets, and liabilities with emphasis on the regulatory environment in which depository institutions operate.

Prerequisite: (FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D)

FIN 471 Depository Institutions Mgt II 3 cr

In-depth analysis of consumer, real estate, commercial, and agricultural lending areas of depository institution.

Prerequisite: FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D

FIN 490 Special Topics 3 cr

Designed to provide senior students an opportunity to study selected topics of particular interest. A student may count no more than six hours of Special Topics in the concentration. Prerequisite: Approval of Department Chair.

Prerequisite: FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D

FIN 492 Seminar - Finance 3 cr

Oral reports on readings of various aspects of business finance.

Prerequisite: FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D

FIN 494 Directed Studies 3 cr

Primarily designed to give superior students an opportunity to study selected topics of particular interest. Grades are awarded on a satisfactory/unsatisfactory basis. Prerequisites: a cumulative GPA 2.5 and approval of Department Chair.

Prerequisite: (FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D) and FIN 343 Minimum Grade of D and FIN 410 Minimum Grade of D and FIN 350 Minimum Grade of D and (FIN 420 Minimum Grade of D or FIN 441 Minimum Grade of D)

FIN 496 Finance Internship 3 cr

The internship program is designed to give students practical experience in their field of study. Students complete directed projects under the supervision of the Department Chair. Prerequisites: Junior or Senior standing, declared major in finance, overall GPA of least 2.0, Internship Agreement signed by the Department Chair, FIN 315 Minimum grade of D.

Prerequisite: FIN 315 Minimum Grade of D

FIN 508 Introduction to Corp Finance 3 cr

Coverage of fundamental finance concepts and techniques. Major topics include time value of money, risk, asset valuation including fixed income securities and stock, financial markets, term structure of interest rates, risk management (derivatives), and multinational financial management issues. Cases will be used as appropriate.

FIN 590 Sp Top - 3 cr

Designed to provide graduate students an opportunity to study selected topics. (A student may count no more than 3 hours of Special Topics in the M.B.A. degree program). Prerequisites: Approval of Department Chair

Prerequisite: MBA Prerequisites P

FIN 594 Independent Study in Finance 3 cr

Reading and research on selected topics. Conference and formal research report required. Prerequisites: Approval of Department Chair.

Prerequisite: MBA Prerequisites P

WOOD, BOB G (bgwood@southalabama.edu)	Econ, Finance, and Real Estate	Professor	BS, Arkansas State University-Main MBA, Arkansas State University- Main PHD, Louisiana State University

Economics & Finance (BSBA)

Degree Requirements

Bachelor of Science Degree Requirements - Major in Economics and Finance

To graduate, students complete a minimum of 122 semester hours with an overall institution grade-point average (GPA) of 2.0 (38 hours of general education requirements and 84 hours of business courses). In addition, a grade of at least C is required in each of the Basic Business Techniques courses and a 2.0 GPA is required in the 300-level business core courses, and a 2.0 GPA is required for all courses counted in the Economics and Finance Major, which include the following:

Concentration in Economics

Code	Title	Hours
ECO 315	Intermediate Microeconomics	3
FIN 343 or ECO 340	Money Mkts and Fin Instit Money and Banking	3
ECO 316	Intermediate Macroeconomics	3
ECO 330	Current Global Economic Issues	3
ECO 491	History of Economic Thought -W	3
Select four electives from the following:		12
ECO 318	Prin of Managerial Economics	
ECO 322	Economics of Industrial Org	
ECO 323	Public Finance	
ECO 343	Labor Economics	
ECO 355	Sport & Entertainment Econ	
ECO 363	International Economics	
ECO 371	Economic Development	
ECO 372	Economics of Urban Development	

ECO 383	Economic History of the US
ECO 390	Environmental Economics
ECO 451	Mathematical Economics
FIN 420	Investments
FIN 430	Derivative Securities

Total Hours 27

Concentration in Finance

Code	Title	Hours
ECO 315	Intermediate Microeconomics	3
FIN 343 or ECO 340	Money Mkts and Fin Instit Money and Banking	3
FIN 332	Multinational Finance	3
FIN 350	Fin Stmt Analysis & Corp Strat	3
FIN 410	Intermediate Bus Finance	3
FIN 411	Advanced Business Finance - W	3
FIN 420	Investments	3
Select two electives from the following:		6
FIN 344	Real Estate	
FIN 345	Principles of Insurance	
FIN 370	Short-Term Financial Managemnt	
FIN 421	Sec Analy-Portfolio Mgt	
FIN 425	Student Managed Invest Fund I	
FIN 426	Student Managed Invest Fund II	
FIN 430	Derivative Securities	
FIN 445	Life and Disability Insurance	
FIN 446	Real Estate Finance & Invest	
FIN 470	Depository Institution Mgt I	

FIN 471	Depository Institutions Mgt II	
Total Hours		27
Concentration in Real Estate		
Code	Title	Hours
ECO 315	Intermediate Microeconomics	3
FIN 343 or ECO 340	Money Mkts and Fin Instit Money and Banking	3
FIN 344	Real Estate	3
FIN 444	Real Estate Valuation - W	3
FIN 446	Real Estate Finance & Invest	3
FIN 448	Real Estate Law	3
Select three electives from the following:		9
ECO 372	Economics of Urban Development	
FIN 345	Principles of Insurance	
FIN 350	Fin Stmt Analysis & Corp Strat	
FIN 420	Investments	
MGT 347	Franchising	
MKT 381	Sales Mgt & Personal Selling	
Total Hours		27

Economics & Finance (BSBA) - Economics Concentration

Degree Requirements

Code	Title	Hours
General Education Requirements		
Select General Education Requirements (p. 741)		59-62
Major Requirements		
<i>Freshman Core</i>		
BUS 150	Intro to Business and Mgt (or Transfer Student Elective see footnote table below (p. 740)) ¹	3
<i>Upper Division Business Core</i>		
A 2.0 GPA is required in the Upper Division Business Core		
A. Complete the following:		
ECO 453	Intro to Econometrics	3
B. Complete the following:		
FIN 315	Business Finance	3
MGT 300	Management Theory and Practice	3
MGT 305	Organizational Comm - W	3
MGT 325	Operations Management	3
MKT 320	Principles of Marketing	3
<i>Experiential Learning</i>		
A. Select three hours from the following:		3
BUS 101	Prof Experience I	
BUS 201	Professional Experience II	
BUS 301	Professional Experience III	
BUS 302	Professional Preparation	
B. Select one of the following:		3
ACC 496	Accounting Internship	
ECO 496	Economics Internship	
FIN 496	Finance Internship	

MGT 496	Management Internship	
MKT 496	Marketing Internship	
<i>Economic Concentration</i>		
A 2.0 GPA is required for the major courses		
A. Complete the following:		
ECO 315	Intermediate Microeconomics	3
ECO 316	Intermediate Macroeconomics	3
ECO 330	Current Global Economic Issues	3
ECO 491	History of Economic Thought -W	3
B. Complete the following:		
FIN 343 or ECO 340	Money Mkts and Fin Instit Money and Banking	3
C. Select four of the following:		
ECO 318	Prin of Managerial Economics	
ECO 322	Economics of Industrial Org	
ECO 323	Public Finance	
ECO 343	Labor Economics	
ECO 355	Sport & Entertainment Econ	
ECO 363	International Economics	
ECO 371	Economic Development	
ECO 372	Economics of Urban Development	
ECO 383	Economic History of the US	
ECO 390	Environmental Economics	
ECO 451	Mathematical Economics	
ECO 490	Special Topics	
FIN 420	Investments	
FIN 430	Derivative Securities	
<i>Business Electives</i>		
A. Select two courses from 300-494 Electives from ACC, ECO, FIN, MGT, MKT		6
<i>Business Policy Capstone</i>		
A. Complete the following:		
MGT 485	Bus Policy in Global Eco - W	3
MGT 486	Undergraduate Comp Exam	0
Minor Requirements		
A minor is not required for this degree program		0
Total Hours		122-125

Notes:

*Transfer credit will only be awarded for courses in the Economics Concentration if the course was taken at an AACSB accredited institution.

**Only one internship may be counted towards a business degree. Internship courses may only be used to fulfill the Experiential Learning requirement and may not be used as business electives or to fulfill any other degree requirement.

Footnote

¹ BUS 150 or Transfer Student Elective for students transferring into the College with more than 45 hours. Students transferring with 46-60 hours are highly encouraged to take BUS 150.

Area III – Natural Sciences & Mathematics			
A. Complete the following:			
MA 120	Calculus and Its Applications	3-4	
or MA 125	Calculus I		
B. Select 8-10 hours from the following:			
AN 121	Biological Anthropology	8-10	
& 121L	and Biological Anthropology Lab		
BLY 101	Life Science I		
& 101L	and Life Science I Laboratory		

or BLY 121 & 121L	General Biology I and General Biology I Lab
BLY 102 & 102L	Life Science II and Life Science II Lab
or BLY 122 & 122L	General Biology II and General Biology II Laboratory
CH 101 & 101L	Survey of Inorg and Org Chem and Survey Inorg-Org Chem Lab
CH 131 & 131L	General Chemistry I and General Chemistry I Lab
CH 132 & 132L	General Chemistry II and General Chemistry II Lab
GEO 101 & 101L	Environmental Geography and Environmental Geography Lab
GEO 102 & 102L	Earth and the Environment and Earth and the Environment Lab
GY 111 & 111L	Physical Geology and Physical Geology Lab
GY 112 & 112L	Earth History and Earth History Lab
MAS 134 & 134L	Ocean Science and Ocean Science Lab
PH 101 & 101L	Introduction to Astronomy and Introduction to Astronomy Lab
PH 104 & 104L	Concepts of Physics and Concepts of Physics Laboratory
PH 114 & 114L	Physics with Algebra-Trig I and Alg-Trig Based Physics I Lab
PH 115 & 115L	Physics with Algebra -Trig II and Alg-Trig Based Physics II Lab
PH 201 & 201L	Calculus-Based Physics I and Calculus-Based Physics I Lab
PH 202 & 202L	Calculus-Based Physics II and Calculus-Based Physics II Lab

Area IV – History, Social & Behavioral Sciences see footnote table below (p. 740)¹

A. Select one of the following:		3
HY 101	HY of Western Civilization I	
HY 102	HY of Western Civilization II	
HY 135	US History to 1877	
HY 136	US History since 1877	
B. Select one of the following:		3
AN 100	Intro to Cultural Anthropology	
AN 101	Intro Archaeology-Bio Anthro	
CA 100	Intro to Communication	
CA 211	Interpersonal Comm	
CJ 105	Introduction to Criminal Justice	
GEO 114	People, Places, Environment	
GEO 115	World Regional Geography	
GS 101	Intro to Gender Studies	
HY 101	HY of Western Civilization I	
HY 102	HY of Western Civilization II	
HY 135	US History to 1877	
HY 136	US History since 1877	
IS 100	Global Issues	

IST 201	Seasons of Life	
NAS 101	Intro Native American Studies	
PSC 130	Intro to US Government	
PSY 120	Introduction to Psychology	
PSY 250	Life Span Development	
SY 109	Introductory Sociology	
SY 112	Social Problems	

C. Complete the following:

ECO 215	Prin of Microeconomics	3
ECO 216	Prin of Macroeconomics	3

Area V 200-Level Business Core

A grade of at least C is required in each course

A. Complete the following:

ACC 211	Financial Accounting	3
ACC 212	Managerial Accounting	3

B. Complete the following:

BUS 245	Data Analytics I	3
BUS 255	Data Analytics II	3

C. Complete the following:

BUS 265	Legal Environ of Business I	3
---------	-----------------------------	---

D. Complete the following:

CIS 250	Advanced Comp Applications	3
---------	----------------------------	---

Total Hours 59-62

Footnote

¹ Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136).

Graduation Plan

- ⁴ Anything in MCOB at the 300 or 400 level not used to fulfill another requirement except internship courses.
- ⁵ Any finance course numbered above FIN 315 not used to fulfill another requirement.

Economics & Finance (BSBA) - Real Estate Concentration

Degree Requirements

Code	Title	Hours
General Education Requirements		
Select General Education Requirements (p. 747)		59-62
Major Requirements		
<i>Freshman Core</i>		
A. Complete the following:		
BUS 150	Intro to Business and Mgt (or Transfer Student Elective see footnote table below (p. 747)) ¹	3
<i>Upper Division Business Core</i>		
A. Complete the following:		
ECO 453	Intro to Econometrics	3
B. Complete the following:		
FIN 315	Business Finance	3
MGT 300	Management Theory and Practice	3
MGT 305	Organizational Comm - W	3
MGT 325	Operations Management	3
MKT 320	Principles of Marketing	3
<i>Experiential Learning</i>		
A. Select three hours from the following:		
BUS 101	Prof Experience I	3
BUS 201	Professional Experience II	
BUS 301	Professional Experience III	
BUS 302	Professional Preparation	

B. Select one of the following:	3
ACC 496 Accounting Internship	
ECO 496 Economics Internship	
FIN 496 Finance Internship	
MGT 496 Management Internship	
MKT 496 Marketing Internship	

Real Estate Concentration

A. Complete the following:	
ECO 315 Intermediate Microeconomics	3
FIN 344 Real Estate	3
FIN 444 Real Estate Valuation - W	3
FIN 446 Real Estate Finance & Invest	3
FIN 448 Real Estate Law	3

B. Complete the following:	
FIN 343 Money Mkts and Fin Instit	3
or ECO 340 Money and Banking	

C. Select two of the following:	6
ECO 372 Economics of Urban Development	
FIN 345 Principles of Insurance	
FIN 442 Real Estate Dev & Prop Mgmt	
FIN 350 Fin Stmt Analysis & Corp Strat	
FIN 420 Investments	
MGT 347 Franchising	
MKT 381 Sales Mgt & Personal Selling	

Business Electives

A. Select two courses from 300-494 Electives from ACC, ECO, FIN, MGT, MKT	6
---	---

Business Policy Capstone

A. Complete the following:	
MGT 485 Bus Policy in Global Eco - W	3
MGT 486 Undergraduate Comp Exam	0

Minor Requirements

A minor is not required for this degree program	0
---	---

Total Hours 119-122

Notes:

*Transfer credit will only be awarded for courses in the Real Estate Concentration if the course was taken at an AACSB accredited institution.

**Only one internship may be counted towards a business degree. Internship courses may only be used to fulfill the Experiential Learning requirement and may not be used as business electives or to fulfill any other degree requirement.

Footnote

¹ BUS 150 or Transfer Student Elective for students transferring into the College with more than 45 hours. Students transferring with 46-60 hours are highly encouraged to take BUS 150.

Instructor	Hunt, Smith D.

"Management is doing things right; leadership is doing the right things." - Peter Drucker

Discover Management

A majority of our faculty has extensive practical experience in their fields. They've dealt first hand with the challenges businesses and corporations face, and have a passion for sharing their knowledge. They're committed to nurturing the professional development of students so they graduate with the skills, initiative, integrity and sense of teamwork required in the workplace.

The Department of Management has the following degree options: Entrepreneurship, General Management, and Human Resource Management. The department also manages the On-line General Business Major. Transfer credits for upper division major courses will only be accepted from AACSB accredited institutions.

Entrepreneurship Concentration

Entrepreneurship is the key to economic growth for the United States and the Central Gulf Coast region. The Entrepreneurship concentration is designed to create an "innovation" focused mindset that produces entrepreneurs and entrepreneurial leaders in ALL sectors of the society including: starting businesses, working in financing careers, innovative educators, franchise owners, corporate entrepreneurs, economic development officials and social entrepreneurs. The concentration allows students to choose a combination of courses that best match their interests and entrepreneurial opportunities.

General Management Concentration

The General Management concentration offers courses designed to give students a solid foundation in the field of Management and enable them to become effective managers, problem-solvers, and decision-makers in the world of business, industry, and government. Emphasis is placed upon problem solving, and managerial decision-making. The thrust of the curriculum is to give students insight into the means for improving the productivity and efficiency of modern organizations.

Human Resource Management Concentration

Managers have become aware of the significant impact of effective utilization of the human resources in an organization. As a result, the Human Resource Manager has become a key person on the top management team. The Human Resource Management concentration provides students with the skills and knowledge to become a proficient practitioner in this leading organizational field.

On-line General Business Major

The on-line general business major is designed for students that have completed, or are in the process of completing, the freshman and sophomore level degree requirements and who desire to complete a

business degree through the on-line delivery of the junior and senior level requirements.

The program assumes the student has completed 62 credit hours of general education and sophomore level business requirements. Students enrolled in the general business on-line degree program must complete 60 credit hours of junior and senior requirements and all of these courses are available on-line each year, but not every semester.

The on-line courses curriculum allows the student to complete the program in two years or five semesters. Although the curriculum is set up for a five semester sequence, students are not required to complete the courses in the listed sequence. Additionally, students are not required to enroll in a certain number of courses each semester to participate in the on-line degree program.

For additional information about the on-line program or for academic advising, please contact the:

Courses

Business (BUS)

BUS 101 Prof Experience I 1 cr

An introduction to career success tools including: personality and career interest inventories, steps to succeed basic resume preparation, business ethics, personal branding, university and community involvement and other career preparation activities. This course is designed for students in their first and second semester within the MCOB.

Prerequisite: EH 101 (may be taken concurrently) Minimum Grade of C or EH 102 (may be taken concurrently) Minimum Grade of C

BUS 150 Intro to Business and Mgt 3 cr

A survey of the field of business, including profit-seeking firms, not-for-profit organizations, and new businesses created by entrepreneurs. Emphasis on the business environment, organization and management, current economic and international issues, and career opportunities. Societal and ethical issues are also examined. Open to University of South Alabama freshmen only.

Prerequisite: EH 101 (may be taken concurrently) Minimum Grade of C or EH 102 (may be taken concurrently) Minimum Grade of C

BUS 201 Professional Experience II 1 cr

Continued introduction to Career success tools including: resume building activities, cover letter and references development, career for a day shadowing, speed branding, dress for success, networking, career fair tools for success, university and community involvement and other career preparation activities. Prerequisite: C or better in BUS 101, Sophomore standing.

Prerequisite: BUS 101 Minimum Grade of C

BUS 245 Data Analytics I 3 cr

An introduction to data analytics in business that includes analysis to make data driven business decisions. This course utilizes statistical applications in business problems solving using descriptive statistics, probability theory, sampling distributions, methods of estimation, and tests of hypotheses. The course introduces students to basic predictive business modeling, and the communication of analytical results.

Prerequisite: University test - Math 75 or MyMathTest 080 or ACT Math 23 or MA 112 Minimum Grade of D or MA 113 Minimum Grade of D or MA 115 Minimum Grade of D or MA 120 Minimum Grade of D or MA 121 Minimum Grade of D or MA 125 Minimum Grade of D or MA 126 Minimum Grade of D or MA 131 Minimum Grade of D or MA 132 Minimum Grade of D or MA 171 Minimum Grade of D or MA 172 Minimum Grade of D or MA 287 Minimum Grade of D

BUS 255 Data Analytics II 3 cr

A second course in quantitative data analytics in business decision making utilizing methods of analysis including statistical inference, predictive, modeling, forecasting, correlation and regression analysis. It further develops fundamental knowledge and skills for making data driven business decisions including the use of computer applications for problem solving. This course relies heavily on project based learning to provide students with experience of solving data based business problems.

Prerequisite: (BUS 245 Minimum Grade of C or ST 175 Minimum Grade of D or ST 210 Minimum Grade of D) and (University test - Math 75 or (MA 112 Minimum Grade of D or MA 171 Minimum Grade of D) or (MA 113 Minimum Grade of D or MA 172 Minimum Grade of D) or (MA 115 Minimum Grade of D or MA 121 Minimum Grade of D) or (MA 120 Minimum Grade of D or MA 287 Minimum Grade of D) or (MA 125 Minimum Grade of D or MA 132 Minimum Grade of D) or (MA 126 Minimum Grade of D or MA 233 Minimum Grade of D))

BUS 265 Legal Environ of Business I 3 cr

A study of the global legal environment in which contemporary American business functions, including a review of legal thought and ethical considerations and the foundations and impacts of governmental regulation in areas such as labor and employment, environmental concerns, consumer protection, and antitrust. Contemporary issues, domestic and international concepts and institutions, and social forces that shape the legal environment are emphasized. Requires sophomore standing

BUS 301 Professional Experience III 1 cr

Career success tools including: personal professional strategic plan development, mock interviewing, dining etiquette, personal and professional mentoring, job search, application, and acceptance, job search ethics, creating a career plan, university and community involvement and other career preparation activities. Prerequisite: C or better in BUS 201, Junior standing.

Prerequisite: BUS 201 Minimum Grade of C

BUS 302 Professional Preparation 3 cr

Career success tools including personal professional strategic plan development, interviewing, personal and professional mentoring, job search, application, creating a career plan, university and community involvement, and other career preparation activities. Prerequisite: Junior transfer standing. Business students only.

BUS 305 Data Analytics III 3 cr

A course in quantitative data analytics in business decision making utilizing methods of analysis including linear programming, network optimization, binary integer programming, nonlinear optimization, decision analysis, and deep learning. It further develops fundamental knowledge and skills for making data driven business decisions including the use of computer applications for problem solving. This course relies heavily on project based learning to provide students with the experience of solving data based business problems.

Prerequisite: BUS 255 Minimum Grade of C and CIS 250 Minimum Grade of D

BUS 430 Business Data Visualization: Concepts and Applications 3 cr

The course provides an overview of the purposes, methods, and techniques of data visualization, that includes planning, data gathering, data validation, data analysis, and visual presentation. Additionally, the course covers data mining, data storytelling, and the use of data to support decision-making.

Prerequisite: BUS 305 Minimum Grade of C

BUS 440 Bus in Reg and Emerg Markets-W 3 cr

A comprehensive analysis of the issues in starting and maintaining business in emerging and developing markets, building on data and research skills acquired in foundational international business courses.

Prerequisite: MKT 310 Minimum Grade of D and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C) and (ECO 330 Minimum Grade of D or ECO 363 Minimum Grade of D or FIN 332 Minimum Grade of D or MGT 334 Minimum Grade of D or MGT 336 Minimum Grade of D)

BUS 490 Special Topics 3 cr

Designed to provide senior students an opportunity to study selected topics of particular interest. A student may count no more than six hours of Special Topics in the concentration. Prerequisite: Approval of Department Chair.

BUS 496 MCOB Honors Sr Project I - H 3 cr

Applied business project and paper prepared under the direction of a project advisor plus two other persons selected by the advisor in consultation with the student. The student must have developed a proposal for the project and paper in consultation with the advisor and received permission from the committee to proceed. In addition, the student must be entering his or her senior year and be a major in the Mitchell College of Business. The project proposal must be formulated no later than the end of the first semester of the student's senior year and the project must be completed by the student's graduation date. The student must have maintained his or her standing in the university honors program to be eligible to enroll in this course in his or her last full semester in school. The course may be counted in one of two ways: 1) as an additional course not counting towards the business degree, or 2) in special cases, as a major or business elective, to be decided by the committee.

Prerequisite: (HON 399 Minimum Grade of D or HON 301 Minimum Grade of D) and BUS 305 Minimum Grade of D and (FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D) and (MGT 300 Minimum Grade of D or MGT 322 Minimum Grade of D) and (MGT 305 Minimum Grade of D or MGT 324 Minimum Grade of D) and (MGT 310 Minimum Grade of D or MGT 322 Minimum Grade of D or MGT 422 Minimum Grade of D) and (MGT 325 Minimum Grade of D or MGT 396 Minimum Grade of D) and (MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D)

BUS 497 MCOB Honors Sr Project II - H 3 cr

Applied business project and paper prepared under the direction of a project advisor plus two other persons selected by the advisor in consultation with the student. The student must have developed a proposal for the project and paper in consultation with the advisor and received permission from the committee to proceed. In addition, the student must be entering his or her senior year and be a major in the Mitchell College of Business. The project proposal must be formulated no later than the end of the first semester of the student's senior year and the project must be completed by the student's graduation date. The student must have maintained his or her standing in the university honors program to be eligible to enroll in this course. The student will formally enroll in the course in his or her last full semester in school. The course may be counted in one or two ways: 1) as an additional course not counting towards the business degree, or 2) in special cases, as a major or business elective, to be decided by the committee. Requires completion of the business core with the exception of MGT 485.

Prerequisite: BUS 496 Minimum Grade of C

BUS 498 Mitchell Scholars Sr Project 3 cr

Applied business project and presentation prepared under the direction of the instructor in consultation with the student. This course will have irregular meetings scheduled by the instructor and will have both a classroom component and a project component. The student must have maintained his/her standing in the Mitchell Scholars program and be a senior to be eligible to enroll in this course. This class will be counted in one of three ways: 1) as a business elective, 2) as an additional course not counting towards the business degree; or 3) in special cases, as a major elective to be decided by the major department's faculty. Requires completion of the business core with the exception of MGT 485 and approval of Associate Dean.

Prerequisite: Mitchell Scholars 10 and BUS 305 Minimum Grade of D and FIN 315 Minimum Grade of D and MGT 300 Minimum Grade of D and MGT 305 Minimum Grade of D and MGT 310 Minimum Grade of D and MGT 325 Minimum Grade of D and MKT 320 Minimum Grade of D

BUS 555 Study Abroad 3-6 cr

Examines issues in business administration in an international setting at the graduate level. Specific topics selected from the fields of accounting, economics, finance, information systems, management or marketing depending on the instructor's area of expertise. Part or all of the course will be conducted outside the United States. Prerequisite: Permission to enroll in a relevant Mitchell College of Business study abroad program.

BUS 601 Sem in Org. Behavior 3 cr

This seminar provides an introduction to established theories and emerging trends in the field of organizational behavior. The course explores the thoughts, emotions, and behaviors of individuals within the context of work, teams, organizations and society. The emphasis is an organizational theory and development.

BUS 614 Sem in Int'l Bus 3 cr

This course provides students with exposure to management concepts and theories that form the basis of literature separate from other seminars in the doctoral program. Given that cultural, law and politics shape the different business environments around the world, it is unsurprising that different management concepts and theories are found in other places as well. This seminar introduces doctoral students to those elements of the international business environment that have an impact on management theory and practice on other business environments.

BUS 622 Multivar Analysis 3 cr

The course is designed to broaden and enrich student's knowledge and understanding of statistical methodology as it pertains to the study of multivariate techniques used in behavioral research.

BUS 628 Regress Analysis 3 cr

A study of applications of regression analysis used in business research. Topics include: a review of basic regression concepts and applications, multiple regression, residual analysis, model building, regression limitations and assumptions, time series modeling and forecasting, and case studies using regression techniques.

BUS 630 Struct Equ Mod 3 cr

The course provides students with a functional understanding of the path analysis theory and procedures of structural equation modeling. Students will learn to specify, estimate, and evaluate models using AMOS software.

BUS 700 Fund of Research 3 cr

This course provides students with the tools and perspective necessary to succeed in the DBA program. Readings are drawn from several sources and provide participants with a better understanding of the way to approach their work.

BUS 702 Applied Stat and Reg 3 cr

This course provides an examination of statistical concepts used for business research. Topics include: fundamentals of probability, sampling, statistical estimation, test of hypotheses, analysis of variance, chi-square analysis and regression analysis. Emphasis is placed on the use of statistical techniques for business research applications.

BUS 704 Multivariate Analysis 3 cr

The course is designed to broaden and enrich a student's knowledge and understanding of statistical methodology as it pertains to the study of multivariate techniques used in behavioral research.

BUS 705 Seminars in Business Analytics 3 cr

This course introduces the foundations of Data Science and Business Analytics with focus on research design and data analytic methods in Accounting, Economics, Finance, Management, Marketing, and Real Estate.

BUS 706 Research Design and Methods 3 cr

This course focuses on the general concepts related to conducting academic research and the various research methods commonly used in business research, including quantitative and qualitative analysis.

BUS 708 Adv Stats & App Res 6 cr**BUS 710 Struct Equation Modeling 3 cr**

This course provides students with a functional understanding of path analysis theory and procedures of structural equation modeling. Students will learn to specify, estimate, and evaluate models using software packages designed for this purpose.

BUS 751 Python for Business Analytics 3 cr

Python programming for Business Analytics, with applications and examples from statistics, finance economics, marketing, management, accounting, and other business-related disciplines.

BUS 753 Applied Business Analytics I 3 cr

This course covers a variety of concepts and applied analytical methods useful in business research and analytics, such as big data, data measurement and preparation, multi-source modeling files, data analysis and machine learning.

BUS 754 Seminars Business Analytics II 3 cr

This course focuses on applied analytics. Students will complete the continuum of analytics including data source identification, data prep, descriptive and exploratory analytics, confirmatory and inferential analytics.

BUS 757 Computational Business Stats 3 cr

This course is designed for students who seek to develop skills in statistical computing using the R programming language. Students will learn how to use R for data manipulation, data visualization, writing statistical function, and optimizing statistical functions.

BUS 759 Machine Learning and AI 3 cr

Advanced statistical and machine learning algorithms/techniques/methods for Business Analytics with applications from statistics, finance, economics, marketing, management, accounting, and other business-related disciplines.

BUS 789 Res and Teaching Concepts 1 cr

Presentations and discussions related to teaching and research concepts.

BUS 799 Dissertation Research 3-6 cr

Independent research by the student under the sponsorship of the graduate faculty.

Prerequisite: BUS 699 Minimum Grade of S

Master of Bus Admin (MBA)**MBA 501 Analysis using Info Sys 3 cr**

Advanced management requires the ability datasets, interpret data with datasets and calculate statistics from data. This course covers all the process of building, interpreting, calculating data and finally making decisions on the outcomes of that process. A significant part of the grade in this course comes from decision making exercises.

MBA 502 Managing Accounting Info 3 cr

This course focuses on making decisions using Accounting information which includes how to generate relevant and appropriate data and how to use accounting analysis to enhance success in making decisions.

Prerequisite: ACC 211 Minimum Grade of C

MBA 503 Managing in the Bus. Env't 3 cr

The course evaluates managerial decisions in a business environment impacted by ethical considerations, sustainability, social responsibility and stakeholder interests. The course also focuses on developing student skills in communication.

Prerequisite: ECO 215 Minimum Grade of C

MBA 504 Customers & Supply Chains 3 cr

This MBA course focuses on the role of customers and vendors on organizations. The course uses projects and decision scenarios to address the issues that result from managing supply chains and customer relationships.

MBA 505 Managing People 3 cr

This MBA course emphasizes the role of people within an organization and the issues and the decisions related to managing human assets. The course develops a number of techniques and scenarios that emphasize the importance of effective human resource management.

Prerequisite: MGT 300 Minimum Grade of C

MBA 506 Managing Finance and Capital 3 cr

Business managers must have a strong grasp of the role of finance and capital in the organization. The course focuses on establishing a strong knowledge base and the key decisions needed to be a successful manager.

Prerequisite: FIN 315 Minimum Grade of C

Cross-Listed: FIN 509

MBA 507 Managing Strategic Decisions 3 cr

The MBA Capstone course emphasizes decision making in a strategic context and builds upon all the courses taken prior to and concurrently with the course. The course includes decisions at the strategy development and strategy execution level. The evaluation exercises include an assessment of ethical, socially, responsible, and sustainability issues.

Corequisite: MGT 599

MBA 590 Special Topics 3 cr

The MBA Program includes courses that are designed to allow students the opportunity to learn management skills and applications through non-traditional formats. This course is designed to achieve that objective. Subject to the approval of the Director of Graduate studies.

Management (MGT)**MGT 300 Management Theory and Practice 3 cr**

Theories of organizational structures, practices, and behavior, and the effective management of organizations. Emphasis on developing patterns and strategies of organizational management in a dynamic environment as affected by the interaction of material and human resources using the technique of applied social and management sciences.

MGT 305 Organizational Comm - W 3 cr

A study of written and oral communication of organizations. Emphasis is given to communication theory, including organization flows and barriers to organizational communication. The preparation of neutral, negative, and persuasive written messages as well as formal written reports is covered in depth. In addition, oral presentations and employment interviews are discussed.

Prerequisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C)

MGT 306 Organizational Comm Non Bus 3 cr

A study of written and oral communication in organizations. Emphasis is given to communication theory, including organization flows and barriers to organizational communication. The preparation of neutral, negative, and persuasive written messages as well as formal written reports is covered in depth. In addition, oral presentations and employment interviews are discussed. For non-business majors.

Prerequisite: EH 102 Minimum Grade of C or EH 105 Minimum Grade of C

MGT 311 Legal Environ of Bus II 3 cr

An advanced treatment of the law of agency, commercial transactions, business organizations, property, negotiable instruments, secured transactions, professional liability, debtor-creditor relations, including applicable sections of Uniform Commercial Code.

Prerequisite: BUS 265 Minimum Grade of D or (MGT 310 Minimum Grade of D or MGT 332 Minimum Grade of D or MGT 422 Minimum Grade of D)

MGT 325 Operations Management 3 cr

Addresses concepts, problems, and managerial approaches applicable to the management of manufacturing and service operations. The course will examine the strategic and tactical considerations that are involved in creating a systematic framework that supports the creation of competitive advantages through effective operations and the production of high quality products. Topics covered include the role of operations in the overall organization, operations strategy development and implementation, product design and process selection, location and capacity planning, facilities layout, quality management, inventory management, production planning, scheduling and control, and project management. An important component of the overall course is the incorporation of computer applications for problem solving and decision making in operations.

Prerequisite: (MGT 300 Minimum Grade of D or MGT 322 Minimum Grade of D) and (BUS 255 Minimum Grade of D or ST 275 Minimum Grade of D)

MGT 334 International Mgt 3 cr

This course exposes students to the challenges that confront the managers of organizations & individuals in global settings. Special focus is on dealing with and benefitting from the diversity that exists across international cultures, markets, economics, governments, and organizations

Prerequisite: MGT 300 Minimum Grade of D or MGT 322 Minimum Grade of D

MGT 340 Organizational Behavior - W 3 cr

A study of human and group behavior in the workplace and within society. The focus is on individual characteristics and processes such as personality, perception, and motivation; interpersonal processes such as group behavior, leadership, communication, and decision making; and organizational processes such as culture, structure, power, and change. Requires Junior Standing.

Prerequisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C) and (MGT 300 Minimum Grade of D or MGT 322 Minimum Grade of D) and (MGT 305 Minimum Grade of D or MGT 324 Minimum Grade of D)

MGT 341 Organizational Behavior 3 cr

This course provides a basic survey of the field of Organizational Behavior. Our objective is to cover important topics such as job attitudes, work motivation, group dynamics, leadership and organizational culture. For non-business majors.

Prerequisite: (MGT 300 Minimum Grade of D or MGT 305 Minimum Grade of D or MGT 306 Minimum Grade of D)

Cross-Listed: MGT 340

MGT 345 Creativity and Innovation 3 cr

This course provides a broad framework for understanding the nature of entrepreneurship in multiple organizational settings. The course introduces students to the innovation and idea generation process and helps students determine the most desirable educational path for them to achieve their career goals. Sophomore standing.

MGT 347 Franchising 3 cr

This course is designed for students who are interested in learning about the opportunities and threats that abound in the modern world of franchising. Students will study existing franchising from both a historical and theoretical context. The logic of this course is that franchising is one of the development models that minimize risk for the "small business" focused student. Some franchising oriented people may want to start a franchise and grow it rapidly. This option is often a first step into business ownership for inexperienced owners. We discuss the applicability, opportunities, challenges, and implementation of the franchising model for expanding existing businesses. The format consists of case study and lecture discussion sequenced with extensive background readings, occasional guest lecturers, and a term case-based project culminating in a transactional plan.

MGT 351 Human Resource Management 3 cr

Principles, policies, and practices used to develop a sound human resource management program in the business organization. Among the topics included are job analysis, employment, organization development, employee development and evaluation, wage and salary administration and labor relations.

Prerequisite: (MGT 300 Minimum Grade of D or MGT 322 Minimum Grade of D)

MGT 355 Leg & Fin Aspects of Entrepren 3 cr

This course provides an overview of the legal and financial issues most frequently encountered by entrepreneurs and others involved in start-ups and small closely held, or family businesses. The course covers various aspects of financing and entrepreneurial venture. Major topics attracting seed and growth capital from sources such as venture capital, investment banking, government, and commercial banks; creating, protecting and leveraging intellectual property. Among the issues discussed are valuing a company, going public, selling out, acquisitions, bankruptcy, different legal forms or organizations, partnerships, and taxes.

MGT 356 Strategic Issues in Family Bus 3 cr

This course examines a new discipline that has developed in the last ten years and focuses on the unique aspects of family businesses. Organizational behavior, law, finance, operations, and basic small business concepts are being integrated into this course. Students will have an opportunity to consult with and develop transition plans for a family firm in a live field project.

MGT 357 Leadership 3 cr

This course includes a review of traditional as well as current thinking in Leadership theory. Students will complete several self-assessment exercises designed to assess one's leadership style and ability as a leader. A series of successful leaders will be studied in-depth.

Prerequisite: Junior or senior standing.

MGT 390 Total Quality Management 3 cr

Total Quality Management (TQM) is a management philosophy which emphasizes customer focus, continuous improvement, and employee involvement throughout the organization. This course is an introductory course which examines these components and their integration into a comprehensive quality management system.

Prerequisite: (MGT 300 Minimum Grade of D or MGT 322 Minimum Grade of D) and (MGT 325 Minimum Grade of D or MGT 396 Minimum Grade of D)

MGT 396 DEI in Organizations 3 cr

This course will develop students' critical thinking regarding diversity, equity, and inclusion in organizations. Topics may include age, bias, culture, discrimination, equality, equity, ethnicity, gender, identity, inclusion, power, privilege, race, and sexual orientation.

Prerequisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C)

MGT 430 Operations Research 3 cr

Reviews selected operations research concepts; nonlinear optimization methods, linear programming; dynamic programming; model building; and simulation methods. The student is expected to understand the concepts of operations research and to be able to use computer procedure to solve problems.

Prerequisite: MGT 325 Minimum Grade of D or MGT 396 Minimum Grade of D

MGT 441 Service Operations 3 cr

This course will provide students the opportunity to learn about service operations management, including service strategies and operations considerations and imperatives for service enterprises and how service systems are structured and operated. Students will also learn about various tools and techniques for managing service operations such as how to forecast service demand, determine capacity requirements, schedule activities, coordinate operations, plan and schedule service activities, and evaluate system performance.

Prerequisite: (MGT 325 Minimum Grade of D or MGT 396 Minimum Grade of D)

MGT 450 Organizational Staffing 3 cr

A detailed study of the function of employee staffing in a modern work organization. Emphasis on job analysis, criterion development, development and use of employment tests, validation of selection techniques, and statistical methods for making fair employment decisions. Course work includes a comprehensive staffing project.

Prerequisite: MGT 351 Minimum Grade of D and (BUS 245 Minimum Grade of D or ST 175 Minimum Grade of D or ST 210 Minimum Grade of D)

MGT 451 Employee Training -Development 3 cr

An applied course which details the training and development function. Content areas of job analysis, training needs analysis, training program development and implementation, and program evaluation will be incorporated in a comprehensive training and development project.

Prerequisite: MGT 340 Minimum Grade of D and MGT 351 Minimum Grade of D

MGT 452 Employment Law 3 cr

Analysis of significant workplace torts and laws regulating the employment relationship including: Title VII, FMLA, AOA, ADEA, FLSA, OSHA and related state laws. Emphasis on federal legislation and developing case law.

Prerequisite: MGT 351 Minimum Grade of D and (BUS 265 Minimum Grade of D or MGT 310 Minimum Grade of D or MGT 332 Minimum Grade of D or MGT 422 Minimum Grade of D)

MGT 454 Compensation Administration 3 cr

A study of the fundamentals of compensation administration in organizations. Topics include job analysis, KSA determination, job evaluation, wage structure development, incentive pay systems, legal aspects of compensation and new developments in compensation. Comprehensive course project required.

Prerequisite: MGT 351 Minimum Grade of D

MGT 455 Labor - Management Relations 3 cr

An examination of the organizing, negotiation, and contract administration phases of union-management relations. Case analyses, federal legislation and case law in labor relations, significant current issues, and a collective bargaining simulation are featured.

Prerequisite: MGT 351 Minimum Grade of D

MGT 456 Strategic Issues on Family Bus 3 cr

This course examines a new discipline that has developed in the last ten years and focuses on the unique aspects of family businesses. Organizational behavior, law, finance, operations, and basic small business concepts are being integrated into this course. Students will have an opportunity to consult with and develop transition plans for a family firm in a live field project.

Prerequisite: MGT 345 Minimum Grade of C

MGT 460 Organiz Development and Change 3 cr

Provides insight into the theory and practice of organization change and development. It bridges the gap between theory and practice and emphasizes the process of improving both organizations and individuals. Topics covered encompass understanding organizations and how they change, intervention strategies and methods for improving organizations, quality of work-life approaches and strategic considerations in system-wide change.

Prerequisite: MGT 300 Minimum Grade of D or MGT 322 Minimum Grade of D

MGT 462 Negotiatn/Disp Resolutn in Bus 3 cr

This course provides theoretical background and practical applications in business negotiation, conflict management, and alternative dispute resolution. Areas covered include positional and interest-based bargaining, business and employment arbitration, organizational conflict management strategies, mediation, and effective communications for negotiators and ADR participants.

Prerequisite: (MGT 300 Minimum Grade of D or MGT 322 Minimum Grade of D)

MGT 465 New Venture Creation 3 cr

How new businesses are organized and planned. Objectives are 1) understanding the knowledge, skills and abilities required of entrepreneurs, 2) creating and developing opportunities for new ventures, and 3) planning resources to convert those opportunities into businesses. Students work in teams to develop a business plan for a new venture they have chosen.

Prerequisite: MGT 345 Minimum Grade of C or MGT 355 Minimum Grade of C

MGT 470 High Performance Organizations 3 cr

Course examines the role of organization culture, leadership, employee involvement, work teams, and human resource practices in developing and sustaining high performance organizations that practice the principles of total quality management. Senior Standing.

Prerequisite: (MGT 300 Minimum Grade of D or MGT 322 Minimum Grade of D)

MGT 475 Strategic HRM 3 cr

This is a capstone course in human resource management that reviews essential human resource management topics to prepare students for the SHRM Assurance of Learning Exam. Topics covered include strategic HR, ethics, recruiting and selection, employee and organizational development, performance management, employment law, compensation administration, workplace safety, employee relations, labor relations, and general management topics including motivation, individual differences, organizational culture, and leadership. In addition, the course covers state of the art issues in human resource management, which are new and not well developed in existing texts.

Prerequisite: MGT 351 Minimum Grade of D and (MGT 340 Minimum Grade of D or MGT 320 Minimum Grade of D)

MGT 483 Social Entrepreneurship 3 cr

The course provides a broad theoretical perspective and practical framework for understanding social entrepreneurs and the social ventures they create ranging from local social organizations to large international social ventures leading global change. The course introduces students to the possibilities of social entrepreneurship and an introduction to the entire social venture creation process and life cycle. This course is a service-learning based and all students will participate in term-based community-based projects with local non-profit organizations. Extensive work outside of the normal classroom hours is required for this course.

MGT 485 Bus Policy in Global Eco - W 3 cr

The culmination course in business and management education. Interdisciplinary and global in nature, the course uses the case method to develop a top management perspective in which all business disciplines are integrated into the organization's effective total functioning.

Prerequisites: Seniors who have completed all core courses, have petitioned for graduation and are beginning the final semester.

Prerequisite: (BUS 305 Minimum Grade of D or MGT 350 Minimum Grade of D or ECO 453 Minimum Grade of D) and (FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D) and (MGT 305 Minimum Grade of D or MGT 324 Minimum Grade of D) and (MGT 310 Minimum Grade of D or BUS 265 Minimum Grade of D or MGT 332 Minimum Grade of D or MGT 422 Minimum Grade of D) and (MGT 325 Minimum Grade of D or MGT 396 Minimum Grade of D) and (MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D)

Corequisite: MGT 486

MGT 486 Undergraduate Comp Exam 0 cr

Comprehensive exam

Corequisite: MGT 485

MGT 490 Special Topics 3 cr

Designed to provide senior students an opportunity to study selected topics of particular interest. A student may count no more than six hours of Special Topics in the concentration. **Prerequisite:** Approval of Department Chair.

MGT 492 Management Analysis & Consult 3 cr

Designed to help students bridge the gap between management theory and the realities involved in the practice of management. Topics include (1) development of the human, social, and political skills of the student as an individual, (2) business ethics, (3) global management issues, and (4) current trends in society that affect business and management. Assignments include a project with a local organization to identify critical management issues, analyze alternatives, and present specific recommended solutions to company managers. Senior standing.

Prerequisite: (MGT 300 Minimum Grade of D or MGT 322 Minimum Grade of D) and (MGT 320 Minimum Grade of D or MGT 340 Minimum Grade of D) and MGT 351 Minimum Grade of D

MGT 494 Dir St in Management 1-3 cr

Primarily designed to give superior students an opportunity to study some phase of management of particular interest. Conferences, a bibliography, and a formal research report are required. Junior or senior standing, a cumulative GPA of 2.5 or better, and approval of the department chair following the evaluation of a written proposal.

MGT 496 Management Internship 3 cr

The internship program is designed to give students practical experience in their field of study. Students complete directed projects under the supervision of Department Chair. No more than three hours of internship credit may be counted toward a degree in the Mitchell College of Business. **Prerequisites:** Junior or Senior standing, declared major in management, overall GPA of at least 2.5, and Internship Agreement signed by department Chair.

MGT 510 Legal Environment of Business 3 cr

Detailed analysis of laws & regulations affecting contemporary business organizations. Emphasis on legal aspects of employment and labor relations, regulatory agencies, sales, warranties, products liability, consumer protection, anti-trust, securities, creditors' rights, and ethical considerations.

Prerequisite: MBA Prerequisites P

MGT 521 Data Analy for Bus Decisions 3 cr

An examination of basic statistical concepts used in business analysis. Topics include fundamental probability, sampling, statistical estimation, test of hypothesis, analysis of variance, and regression analysis. Emphasis is placed on the use of statistical techniques for business decision making.

MGT 522 Supply Chain & Operations Mgmt 3 cr

An integrative approach to the processes, operations, and information required to produce and transform resources into value-added outputs that maximize customer satisfaction. Particular emphasis is placed on strategic supply chain management, operations strategy, value chain analysis, demand management, process mapping, quality assurance, customer fulfillment strategies, order fulfillment processes, relationship and information management in supply networks, measuring operational performance, and analytical tools for managing operations and supply systems.

MGT 532 Legal & Ethical Environ of Bus 3 cr

Legal and Ethical Environment of Business is designed to develop an in-depth analytical understanding of selected legal/ethical issues and trends and their impact on management and other business functions. Students will analyze the legal and ethical implications of issues including products liability, professional regulations, corporate responsibility, workplace discrimination and harassment, privacy, workplace safety, restraints on trade, land use regulation, international law, and alternative dispute resolution.

MGT 562 MBA Exec Lect I 0 cr

The MBA Executive Lecture series exposes students to the thinking and analysis of distinguished visiting executives on such topics as economics and finance, strategic management, marketing, international business, and entrepreneurship. Seminars are held during fall and spring semesters.

Prerequisite: MGT 521 (may be taken concurrently) Minimum Grade of C or MGT 532 (may be taken concurrently) Minimum Grade of C

MGT 564 MBA Exec Lect II 0 cr

The MBA Executive Lecture series exposes students to the thinking and analysis of distinguished visiting executives on such topics as economics and finance, strategic management, marketing, international business, and entrepreneurship. Seminars are held during fall and spring semesters.

Prerequisite: ECO 506 (may be taken concurrently) Minimum Grade of C or MGT 530 (may be taken concurrently) Minimum Grade of C

MGT 570 MBA Exec Lect III 0 cr

The MBA Executive Lecture series exposes students to the thinking and analysis of distinguished visiting executives on such topics as economics and finance, strategic management, marketing, international business, and entrepreneurship. Seminars are held during fall and spring semesters.

Prerequisite: ACC 501 (may be taken concurrently) Minimum Grade of C or MKT 541 (may be taken concurrently) Minimum Grade of C

MGT 572 MBA Exec Lect IV 0 cr

The MBA Executive Lecture series exposes students to the thinking and analysis of distinguished visiting executives on such topics as economics and finance, strategic management, marketing, international business, and entrepreneurship. Seminars are held during fall and spring semesters.

Prerequisite: MGT 522 (may be taken concurrently) Minimum Grade of C or ACC 502 (may be taken concurrently) Minimum Grade of C

MGT 590 Sp Top - 3 cr

Designed to provide graduate students an opportunity to study selected topics. Approval of Department Chair. A student may count no more than three hours if Special Topics in the MBA degree program.

Prerequisite: MBA Prerequisites P

MGT 594 Independent Study - Management 3 cr

Readings and research on selected topics. Conferences and formal research report required. Prerequisites: Approval of Department Chair.

MGT 599 MBA Comprehensive Exam 0 cr

A corequisite course with MGT 580 with no credit hours which includes a graduate comprehensive business exam.

MGT 701 Sem in Org Behavior 3 cr

This seminar provides an introduction to established theories and emerging trends in the field of organizational behavior. The course explores the thoughts, emotions, and behaviors of individuals within the context of work, teams, organizations, and society. The emphasis is on organizational theory and development.

MGT 703 Seminar in Org Theory & Change 3 cr

This is a foundational overview seminar. The purposes of the seminar are to 1) provide an in-depth understanding of the dominant theoretical approaches used in organizational theory, 2) give a historical overview of the theories of organization change, and 3) develop student skills in evaluating, extending, and communicating ideas about organizational theory and/or change as it relates to the student's research.

MGT 705 Leadership 3 cr

This course includes a review of traditional as well as current thinking in leadership theory with a special emphasis on emotional and social intelligence and organizational citizenship behavior.

MGT 707 Strategic Management 3 cr

The course is designed to develop a thorough understanding of the primary frameworks of competitive strategy and corporate strategy. Topics covered in the course include: industry and competitive analysis, resource-based view of the firm, value chain analysis, competitive strategies, business models, scope of the firm, strategic alliances, and offensive and defensive strategies.

MGT 709 Sem. Sp. Topics 3 cr

This course will cover two broad areas. The first is a reprise and extension of Structural Equation Modeling (SEM). The second is an introduction to Game Theory (GT) and applications thereof.

MGT 799 Dissertation Research 1-6 cr

Independent Scholarship working with committee.

WOODFORD, KELLY COLLINS (kwoodford@southalabama.edu)	Management	Professor	BS, Spring Hill College JD, Georgetown University
WU, I-HENG (i-hengwu@southalabama.edu)	Management	Assistant Professor	BBA, Tamkang University MBA, National Chung-Hsing University MA, University of Minn-Twin Cities PHD, University of Iowa

Entrepreneurship for Non-Business Majors Minor

Degree Requirements

If a minor is required in your degree program, at least 9 (lower and/or upper-division) hours of courses in the minor must be completed at the University.

Code	Title	Hours
MGT 345	Creativity and Innovation	3
MGT 355	Leg & Fin Aspects of Entrepren	3
MGT 465	New Venture Creation	3
MGT 483	Social Entrepreneurship	3
Select two elective courses from the following:		6
MGT 300	Management Theory and Practice	
MKT 320	Principles of Marketing	
MGT 347	Franchising	
MGT 356	Strategic Issues in Family Bus	
MKT 350	Digital Marketing	
MKT 381	Sales Mgt & Personal Selling	
MGT 462	Negotiatn/Disp Resolutn in Bus	
Total Hours		18

General Business (BSBA) Degree Requirements

Code	Title	Hours
General Education Requirements		
Select General Education Requirements (p. 760)		59-62
Major Requirements		
<i>Freshman Core</i>		
A. Complete the following:		
BUS 150	Intro to Business and Mgt (or Transfer Student Elective see footnote table below (p. 760)) ¹	3
<i>Upper Division Business Core</i>		
A. Complete the following:		
BUS 305	Data Analytics III or ECO 453 Intro to Econometrics	3
B. Complete the following:		
FIN 315	Business Finance	3
MGT 300	Management Theory and Practice	3
MGT 305	Organizational Comm - W	3
MGT 325	Operations Management	3
MKT 320	Principles of Marketing	3
<i>Experiential Learning</i> see footnote table below (p. 760) ²		
A. Select three hours from the following:		3
BUS 101	Prof Experience I	
BUS 201	Professional Experience II	
BUS 301	Professional Experience III	
BUS 302	Professional Preparation	

B. Select one of the following:	3
ACC 496 Accounting Internship	
ECO 496 Economics Internship	
FIN 496 Finance Internship	
MGT 496 Management Internship	
MKT 496 Marketing Internship	
<i>General Business Major Courses</i>	
A. Complete the following:	
MGT 340 Organizational Behavior - W	3
MGT 351 Human Resource Management	3
MKT 385 Services Marketing	3
FIN 343 Money Mkts and Fin Instit	3
ECO 318 Prin of Managerial Economics	3
ACC 380 Cost Accounting for Managers	3
B. Select three of the following:	9
ECO 330 Current Global Economic Issues	
FIN 300 Personal Finance	
FIN 344 Real Estate	
MGT 311 Legal Environ of Bus II	
MGT 390 Total Quality Management	
MGT 441 Service Operations	
MKT 350 Digital Marketing	
MKT 380 Integrated Mkt Communications	
ACC 331 Taxation of Individuals	
<i>Business Electives</i>	
A. Select two courses from 300-494 Electives from ACC, ECO, FIN, MGT, MKT	6
<i>Business Policy Capstone</i>	
A. Complete the following:	
MGT 485 Bus Policy in Global Eco - W	3
MGT 486 Undergraduate Comp Exam	0
Minor Requirements	
A minor is not required for this degree program	0
Total Hours	122-125

Footnote

¹ BUS 150 or Transfer Student Elective for students transferring into the College with more than 45 hours. Students transferring with 46-60 hours are highly encouraged to take BUS 150.

² Only 1 internship may be counted toward a business degree. Internship courses may only be used to fulfill the Experiential Learning requirement and may not be used as business electives or to fulfill any other degree requirements.

Notes:

- Course substitutions are possible with approval of the student's advisor or the Dean.
- Transfer credits for General Business Major Courses will only be accepted from AACSB-accredited institutions.

PH 202 & 202L	Calculus-Based Physics II and Calculus-Based Physics II Lab

Area IV – History, Social & Behavioral Sciences see footnote table below (p. 766)¹

A. Select one of the following: 3

HY 101	HY of Western Civilization I
HY 102	HY of Western Civilization II
HY 135	US History to 1877
HY 136	US History since 1877

B. Select one of the following: 3

AN 100	Intro to Cultural Anthropology
AN 101	Intro Archaeology-Bio Anthro
CA 100	Intro to Communication
CA 211	Interpersonal Comm
CJ 105	Introduction to Criminal Justice
GEO 114	People, Places, Environment
GEO 115	World Regional Geography
GS 101	Intro to Gender Studies
HY 101	HY of Western Civilization I
HY 102	HY of Western Civilization II
HY 135	US History to 1877
HY 136	US History since 1877
IS 100	Global Issues
IST 201	Seasons of Life
NAS 101	Intro Native American Studies
PSC 130	Intro to US Government
PSY 120	Introduction to Psychology
PSY 250	Life Span Development
SY 109	Introductory Sociology
SY 112	Social Problems

C. Complete the following:

ECO 215	Prin of Microeconomics	3
ECO 216	Prin of Macroeconomics	3

Area V 200-Level Business Core

A. Complete the following:

ACC 211	Financial Accounting	3
ACC 212	Managerial Accounting	3

B. Complete the following:

BUS 245	Data Analytics I	3
BUS 255	Data Analytics II	3

C. Complete the following:

BUS 265	Legal Environ of Business I	3
---------	-----------------------------	---

D. Complete the following:

CIS 250	Advanced Comp Applications	3
Total Hours		59-62

Footnote

¹ Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136).

Management (BSBA) - Entrepreneurship Concentration

Degree Requirements

Code	Title	Hours
General Education Requirements		
Select General Education Requirements (p. 766)		59-62
Major Requirements		
<i>Freshman Core</i>		
A. Complete the following:		
BUS 150	Intro to Business and Mgt (or Transfer Student Elective see footnote table below (p. 766)) ¹	3
<i>Upper Division Business Core</i>		
A. Complete the following:		
BUS 305	Data Analytics III	3
	or ECO 453 Intro to Econometrics	
B. Complete the following:		
FIN 315	Business Finance	3
MGT 300	Management Theory and Practice	3
MGT 305	Organizational Comm - W	3
MGT 325	Operations Management	3
MKT 320	Principles of Marketing	3
<i>Experiential Learning</i> see footnote table below (p. 766) ³		
A. Select three hours from the following:		
BUS 101	Prof Experience I	
BUS 201	Professional Experience II	
BUS 301	Professional Experience III	
BUS 302	Professional Preparation	
B. Select one of the following:		
ACC 496	Accounting Internship	
ECO 496	Economics Internship	
FIN 496	Finance Internship	
MGT 496	Management Internship	
MKT 496	Marketing Internship	
<i>Management Core</i> see footnote table below (p. 766) ²		
A. Complete the following:		
MGT 334	International Mgt	3
MGT 351	Human Resource Management	3
MGT 340	Organizational Behavior - W	3
MGT 492	Management Analysis & Consult	3
<i>Entrepreneurship Concentration</i> see footnote table below (p. 766) ²		
A. Complete the following:		
MGT 345	Creativity and Innovation	3

MGT 355	Leg & Fin Aspects of Entrepren	3
MGT 465	New Venture Creation	3
MGT 483	Social Entrepreneurship	3
B. Select two of the following:		6
MGT 347	Franchising	
MGT 356	Strategic Issues in Family Bus	
MGT 462	Negotiatn/Disp Resolutn in Bus	
MKT 350	Digital Marketing	
MKT 381	Sales Mgt & Personal Selling	
MKT 384	Market Research	
FIN 370	Short-Term Financial Managemnt	

Business Electives

A. Select two courses from 300-494 Electives from ACC, ECO, FIN, MGT, MKT		6
---	--	---

Business Policy Capstone

A. Complete the following:		
MGT 485	Bus Policy in Global Eco - W	3
or MGT 486	Undergraduate Comp Exam	

Minor Requirements

A minor is not required for this degree program		0
---	--	---

Total Hours		125-128
--------------------	--	----------------

Footnote

¹ BUS 150 or Transfer Student Elective for students transferring into the College with more than 45 hours. Students transferring with 46-60 hours are highly encouraged to take BUS 150.

² Transfer credits for the Management Core and Entrepreneurship Concentration courses will only be accepted from AACSB-accredited institutions.

³ Only 1 internship may be counted toward a business degree. Internship courses may only be used to fulfill the Experiential Learning requirement and may not be used as business electives or to fulfill any other degree requirements.

General Education Requirements

Code	Title	Hours
Area I - Written Composition		
A. Complete the following:

"Business has only two functions - marketing and innovation." - Milan Kundera

Discover Marketing

Marketing is a dynamic process that creates and delivers value in competitive environments through customer-focused and market-driven actions. The Marketing major provides an integrative and substantive approach to marketing strategy development and implementation based on learning experiences that combine concepts and managerial practice. A well-designed, market-based curriculum allows students to experience the core of marketing through interactive courses, internships, directed study programs, and special topics courses designed to focus on specific areas of marketing interest. These goals are achieved through the Marketing Management, International Business, and Professional Sales concentrations.

Marketing Management Concentration

The Marketing Management concentration offers a holistic view of the marketing function, with special focus on consumer analysis, value creation and delivery, marketing segmentation, and marketing strategy development and execution, within the context of changing and competitive business environments. The Marketing Management concentration prepares students for career in sales, advertising and marketing communication, retailing, supply chain management, market research and related areas. It is good preparation for positions in health care marketing, sports marketing, tourism and hospitality, non-profit marketing, financial services marketing and a host of other growth industries.

Professional Sales Concentration

In globally-competitive organizations, sales professionals are increasingly responsible for market growth, value creation, customer relationship management, branding, and communication of product, service, and organizational benefits. The sales function is the engine that propels every aspect of the organization. The Professional Sales Concentration prepares students for rewarding careers in sales and related areas. Students completing this concentration have some proficiency

in relationship selling, buyer behavior, value creation and delivery, prospecting, sales call planning, communications skills, negotiating win/win solutions, and customer relationship management.

International Business Major

A degree in International Business prepares students for management positions in U.S. based companies that serve global markets and foreign based companies that provide products and services in the U.S. and other countries. Students will learn how conducting business on a global scale differs from domestic operations and will develop sensitivity and understanding of cultural differences and business etiquette to allow them to effectively negotiate and conduct business in a variety of cultures. The curriculum requires proficiency in a foreign language and includes courses in management, marketing, economics, finance, accounting, and business law to prepare students for a variety of jobs in multinational companies.

Students majoring in International Business are strongly encouraged to participate in a study abroad experience. Short-term study abroad immersion experiences are available, including the British Studies Program in London and the Asia-Pacific Business course in Australia, in addition to longer-term study abroad programs at one of our partner universities, accredited by the AACSB.

International exposure is a critical success factor for International Business majors. However, approved alternatives, including research with a major international component, projects with substantial international content, or other options suggested by the International Business faculty advisor, will be considered.

Students must complete an internship with an international focus. This is accomplished by completing an internship with a multinational company operating in the U.S. or by completing an internship with an U.S. or foreign based firm operating in another country.

Proficiency in a Second Language

Students majoring in International Business are required to demonstrate introductory-level proficiency in a second language by passing a foreign language proficiency examination as administered by the University of South Alabama Department of Foreign Languages and Literature or by successfully completing the second semester of any approved elementary sequence in a foreign language.

Supply Chain & Logistics Management Major

The Supply Chain and Logistics Management (SCLM) major is designed to equip students with the skill sets necessary for successful careers in supply chain-related fields. As supply chain management becomes more seminal in competitive strategy, it is important for business leaders to have a strong appreciation for and understanding of the mechanics of supply chain and logistics management and the resulting impact on organizational performance. Given the global nature of supply chains, talent is needed to ensure the proper planning, implementation, and assessment of market-centered, adaptive, and agile supply chains worldwide.

Supply chain and logistics management employment opportunities are wide and varied. The following represents a small sampling of the specific types of jobs available to program graduates: procurement specialists; sourcing analysts; materials manager; sourcing commodity specialists; logistics customer service; transportation sourcing specialists; material coordinator; operations manager; inventory control;

production scheduling; warehouse manager; logistics analysts; and quality manager.

Upon completion of the BSBA degree program in SCLM, students will be prepared to enter a wide-range of sectors, including manufacturing, distribution, services, and government. Additionally, the program provides a solid foundation for general MBA programs, as well as specialized programs in supply chain management, logistics management, production and operations management, distribution management, transportation, marketing, and related areas.

Courses

Marketing (MKT)

MKT 310 Intro International Business 3 cr

This course focuses on exploring the terminology, scope, status and evolving patterns of international business. Specifically, the course addresses the role of cultural, political, ethical, technological, and economic factors in the international business context and how businesses deal with uncertainty and risk. The course examines the impact of global forces on businesses at home and abroad, the role of governments in promoting and protecting business interests, the role of international agencies in the business environment.

MKT 320 Principles of Marketing 3 cr

Study of the institutions involved in creating transactions necessary to satisfy the needs of households, businesses and government and international customers. Topics include marketing planning, market segmentation, societal and ethical obligations, strategies for product, promotion and channel decisions.

MKT 336 International Marketing 3 cr

Examination of cultural, economic, and political factors that affect marketing of goods and services worldwide. Emphasis is placed on developing global marketing strategies of multinational corporations within existing trade structure and regulations. Both product and service flows between countries and regions are discussed.

Prerequisite: (MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D)

MKT 340 Marketing Analytics 3 cr

Contemporary marketers acquire large amounts of data. Marketing Analytics explains a) the most common marketing metrics, and b) how to compute and interpret these metrics to improve decision making.

Prerequisite: MKT 320 Minimum Grade of D and BUS 245 Minimum Grade of D

MKT 345 Real Estate 3 cr

Introduction to the tools used to make intelligent decisions regarding real estate as a wealth-building asset. Topics include legal rights, valuation, financial analysis, contracts, and brokerage with practical applications. Emphasis is given to local supply and demand conditions and property location and their impact on typical consumer decisions.

Prerequisite: (FIN 315 (may be taken concurrently) Minimum Grade of D or BMS 341 Minimum Grade of D or FIN 341 Minimum Grade of D)

Cross-Listed: FIN 346

MKT 346 Ala Real Estate Law and Reg 1 cr

Course required for students planning to take the Alabama Real Estate License Examination. Topics include current Alabama Real Estate License Law, Administrative Rules and Regulations, Consumer Guides, State Court Cases and relevant readings in Real Estate Risk Management. Prerequisite: Completion or current enrollment in MKT 345 and consent of instructor.

Prerequisite: MKT 345 (may be taken concurrently) Minimum Grade of D

MKT 348 Real Estate Valuation 3 cr

Emphasis is given to the valuation process and the analysis that leads to valid estimates of value. The cost, sales comparison, and income approaches to value are examined and illustrated within the Uniform Standards of Professional Appraisal Practice requirements. Typical valuation reports are discussed and illustrated.

Prerequisite: (MKT 345 Minimum Grade of D or FIN 346 Minimum Grade of D)

Cross-Listed: FIN 446

MKT 350 Digital Marketing 3 cr

Examination of the interactive processes and transactions involved in satisfying the needs of consumers, businesses, and government. Involves the study of marketing planning, consumer research, segmentation, and implementation of marketing strategies.

Prerequisite: (MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D)

MKT 355 Customer Relationship Mgt 3 cr

The course provides a comprehensive business model integrating customers and suppliers along the value chain. The focus is on the methodologies, tools, and techniques required for customer acquisition, retention, and profitability in competitive buyer/supplier environments.

Prerequisite: MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D

MKT 374 Consumer Behavior 3 cr

Study of the contributions of the behavioral sciences to the interpretation of market information. Involves the use of behavioral information which pertain to the analysis of consumers and organizational buyers in both domestic and international settings.

Prerequisite: MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D

MKT 376 Business to Business Marketing 3 cr

Study of the participants, channels, and relationships that govern the behavior of industrial buyers and marketers.

Prerequisite: MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D

MKT 377 Pricing Strategies 3 cr

Pricing strategies encompass the design and monitoring of an integrative framework for making pricing decisions. The purpose of this course is to synthesize economic and behavioral principles with marketing, accounting, and financial information, and to analyze the various pricing options within legal, market, and corporate constraints. This course covers both theory and application of pricing strategies for national and multinational concerns organized as either a profit or non-profit entity.

Prerequisite: (MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D)

MKT 379 Retailing 3 cr

Study of the management of retail operations. Topics include store location and layout, merchandise buying and planning, legal and ethical issues, promotion, pricing, human resource management, financial planning, information systems and customer services.

Prerequisite: MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D

MKT 380 Integrated Mkt Communications 3 cr

Study of the fundamentals of marketing communications from a strategic perspective. Examines the roles of and relationships between a variety of marketing communication elements including advertising, direct marketing, database marketing, interactive marketing, media planning, public relations, sales promotion, and personal selling.

Prerequisite: (MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D)

MKT 381 Sales Mgt & Personal Selling 3 cr

Study of the principles and practices of sales management in planning, organizing, directing, and controlling, the sales organization in both domestic and international markets. Included in the course are skills developed through presentation, discussion, and role playing. Special emphasis is directed to recruiting, selecting, training, evaluating, compensating, and supervising sales personnel and sales organizations.

Prerequisite: MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D

MKT 382 Brand Management 3 cr

Systematic examination of strategies involved in tangible and intangible product decisions. Issues and strategies involved in identifying and implementing the development of new goods and services for both domestic and international markets are examined in-depth, as well as the management of mature products.

Prerequisite: (MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D)

MKT 384 Market Research 3 cr

Study of information gathering techniques, research methods and procedures used to solve marketing problems in consumer and organizational in both domestic and international markets.

Prerequisite: (BUS 255 Minimum Grade of D or ST 275 Minimum Grade of D) and (MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D)

MKT 385 Services Marketing 3 cr

Study of the unique features of services marketing and the service sector. Examines the strategies and activities of organizations and industries whose core product is service, such as sports, hospitality, healthcare, financial services, information technology, and event marketing.

Prerequisite: (MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D)

MKT 445 Real Estate Fin and Investmnts 3 cr

Analysis of income property debt and equity instruments, financing documents, financial analysis and risk scenarios of different property types, and relevant local, state, and federal laws and court cases.

Prerequisite: (MKT 345 Minimum Grade of D or FIN 346 Minimum Grade of D)

MKT 448 Real Estate Law 3 cr

A detailed examination of the contracts, documents, and instruments used in a transaction on one or more of the real property rights, and relevant local, state, and federal laws and court cases.

Prerequisite: (MKT 345 Minimum Grade of D or FIN 346 Minimum Grade of D) or MKT 346 Minimum Grade of D

MKT 477 Export-Import Management 3 cr

Study of exporting and importing strategies used by both domestic and multinational firms including a concentration in the areas of international pricing, governmental assistance, and channel selection. Emphasis is placed on the best practices and procedures of packing and documentation.

Prerequisite: (MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D) and (MKT 336 Minimum Grade of D or MKT 383 Minimum Grade of D)

MKT 479 Marketing Policy - W 3 cr

The capstone course for marketing majors. Integration and application of marketing concepts requiring analysis of both domestic and international marketing problems.

Prerequisite: (MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D) and MKT 374 Minimum Grade of D and (MKT 373 Minimum Grade of D or MKT 384 Minimum Grade of D or MKT 474 Minimum Grade of D)

MKT 490 Special Topics 3 cr

Designed to provide senior students an opportunity to study selected topics of particular interest. A student may count no more than six hours of Special Topics in the concentration. Prerequisite: Approval of Department Chair.

Prerequisite: MKT 320 Minimum Grade of D

MKT 492 Applications in International Business 3 cr

This course may take several formats to allow students who have achieved senior status the best method of applying concepts learned in other courses to the international business environment. The formats include a case-based course, a lecture-based course, a experiential course or mixture of those and other alternatives.

Prerequisite: MKT 320 Minimum Grade of D and MKT 310 Minimum Grade of D

MKT 494 Directed Study in Marketing 1-3 cr

Primarily designed to give superior students an opportunity to study selected topics of particular interest. Conferences, a bibliography, and a formal research report are required. Grades are awarded on a satisfactory/unsatisfactory basis. Prerequisites: Junior or senior standing, a cumulative GPA of 2.5 or better, and approval of the department chair following the evaluation of a written proposal.

MKT 496 Marketing Internship 3 cr

The internship program is designed to give students practical experience in their field of study. Students complete directed projects under the supervision of Department Chair. No more than three hours of internship credit may be counted toward a degree in the Mitchell College of Business. Prerequisites: Junior or Senior standing, declared major in marketing, overall GPA of at least 2.5, and Internship Agreement signed by department Chair.

MKT 590 Special Topics - 3 cr

Designed to provide graduate students an opportunity to study selected topics. A student may count no more than 3 hours of Special Topics in the MBA degree program. Approval of Department Chair

MKT 594 Independent Study 3 cr

Readings and research on selected topics. Conferences and formal research report required. Approval of Department Chair

MKT 701 Marketing Management 3 cr

This seminar examines the theory underpinning the study of Marketing. The seminar uses the classic research in Marketing to frame modern theoretical developments and provide students with a strong fundamental platform for their future studies.

MKT 703 Supply Chain & Logistics 3 cr

The course examines the theory and applied research in the field of business to business logistics and supply chain management.

MKT 705 Sem. Marketing Communications 3 cr

This seminar investigates the theoretical and applied research in the field of marketing communications.

MKT 707 Seminar in Marketing Strategy 3 cr

Study of consumption behavior with an emphasis on underlying theories and relevant literature within the framework of both marketing and psychology. Examination of the influences on behaviors and the process of consumer decision making from conceptual and managerial perspectives.

MKT 709 Marketing: Sp Topic- 3 cr

This seminar focuses on special applications of Marketing. The instructor will develop an in-depth analysis on several contemporary areas of study.

MKT 799 Dissertation Research 1-6 cr

Independent Scholarship working with committee

Supply Chain & Logistics (SCL)**SCL 300 Supply Chain Management 3 cr**

This course encompasses the design and management of the supply chain that collectively provides for the exchange of title, physical movement, and storage activities in marketing, including the use of new technologies. This course examines the role of manufacturers and intermediaries in channel strategies including scope, methods, problems, and opportunities of total supply chain coordination.

Prerequisite: MKT 320 Minimum Grade of D

SCL 350 Intro to Business Logistics 3 cr

An integrative approach highlighting the supply chain component encompassing the flow of goods, services, and information in manufacturing and services organizations, that deliver consistent value to a range of upstream and downstream customers.

Prerequisite: (MKT 320 Minimum Grade of D and SCL 300 Minimum Grade of D)

SCL 351 Strategic Sourcing & Supply Mgt 3 cr

An integrative approach combining both strategic and operational components in planning for and acquiring the necessary inputs and resources for organizational success. Focal points include creating and delivering value through astute purchasing and supply management, across a range of organizations, including services, manufacturing, governmental, and non-profits.

Prerequisite: MKT 320 Minimum Grade of D and SCL 300 Minimum Grade of D

SCL 352 Port Management 3 cr

A comprehensive overview of global port management practices, including the associated economic, regulatory, financial, commercial, socio-political, and data environments influencing port operations.

Prerequisite: MKT 320 Minimum Grade of D and SCL 300 Minimum Grade of D

SCL 353 Distribution Center Mgt 3 cr

An integrative perspective of distribution center management and materials handling, encompassing distribution planning and control, warehousing management, replenishment strategies, and the design of storage and handling systems.

Prerequisite: MKT 320 Minimum Grade of D and SCL 300 Minimum Grade of D

SCL 400 Supply Chain Analytics 3 cr

A comprehensive overview of the analytical tools and techniques necessary to enhance supply chain efficiency and effectiveness to ensure customer satisfaction. Focal points will include data analysis, performance measurement, big data, forecasting, and tactical, sales and operations planning, and network management.

Prerequisite: MKT 320 Minimum Grade of D and SCL 300 Minimum Grade of D

SCL 405 Curr Issues in Sup Chain Mgt 3 cr

An integrative course highlighting the major managerial challenges in key components of the supply chain, including sourcing, production, and logistics, with special emphasis on supply chain integration, customer value and performance measurement.

Prerequisite: (MKT 320 Minimum Grade of D and SCL 300 Minimum Grade of D)

SCL 490 Special Topics 3 cr

Designed to provide senior students an opportunity to study selected topics of particular interest. A student may count no more than six hours of Special Topics in the concentration. Prerequisite: Approval of Department Chair.

Prerequisite: (MKT 320 Minimum Grade of D)

SCL 494 Directed Study 3 cr

Primarily designed to give superior students an opportunity to study selected topics of particular interest. Conferences, a bibliography, and a formal research report are required. Grades are awarded on a satisfactory/unsatisfactory basis. Prerequisites: Junior or senior standing, a cumulative GPA of 2.5 or better, and approval of the department chair following evaluation of a written proposal.

Prerequisite: (MKT 320 Minimum Grade of D)

SCL 496 Sup Chain Logistics Internship 3 cr

The internship program is designed to give students practical experience in their field of study. Students complete directed projects under the supervision of Department Chair. No more than three hours of internship credit may be counted toward a degree in the Mitchell College of Business. Must have an overall GPA of at least 2.0 and an Internship Agreement signed by Department Chair.

Data Analytics Minor Degree Requirements

If a minor is required in your degree program, at least 9 (lower and/or upper-division) hours of courses in the minor must be completed at the University.

Code	Title	Hours
BUS 305	Data Analytics III (see footnote table below (p. 780)) ¹	3
BUS 430	Business Data Visualization: Concepts and Applications	3
Select four of the following:		12
ECO 451	Mathematical Economics	
ECO 453	Intro to Econometrics (see footnote table below (p. 780)) ¹	
MGT 390	Total Quality Management	
MGT 430	Operations Research	
MKT 340	Marketing Analytics	
MKT 384	Market Research	
HI 410	Health Informatics	

ISC 305	Info Systems-Technology
ISC 353	Info Sys Appl Development
ST 335	Applied Regression Analysis

Total Hours **18**

Footnote

¹ Business majors may count either BUS 305 or ECO 453 towards both their upper division business core and the minor. Business majors may count their two business electives towards both the major and the minor. Business students may not count major specific courses to both the major and the minor.

A maximum of 6 hours may be taken from outside MCOB

International Business (BSBA) Degree Requirements

Code	Title	Hours
General Education Requirements		
Select General Education Requirements (p. 781)		59-62
Major Requirements		

Freshman Core

A. Complete the following:

BUS 150	Intro to Business and Mgt (or Transfer Student Elective see footnote table below (p. 781)) ¹	3
---------	---	---

Upper Division Business Core

A 2.0 GPA is required in the Upper Division Business Core

A. Complete the following:

BUS 305	Data Analytics III	3
or ECO 453	Intro to Econometrics	

B. Complete the following:

FIN 315	Business Finance	3
MGT 300	Management Theory and Practice	3
MGT 305	Organizational Comm - W	3
MGT 325	Operations Management	3
MKT 320	Principles of Marketing	3

Experiential Learning

A. Select three hours from the following: 3

BUS 101	Prof Experience I	
BUS 201	Professional Experience II	
BUS 301	Professional Experience III	
BUS 302	Professional Preparation	

B. Select one of the following: see footnote table below (p. 781)² 3

ACC 496	Accounting Internship	
ECO 496	Economics Internship	
FIN 496	Finance Internship	
MGT 496	Management Internship	
MKT 496	Marketing Internship	

International Business Major

A 2.0 GPA is required for all courses counted towards the major

A. Complete the following:

MKT 310	Intro International Business	3
ECO 330	Current Global Economic Issues	3
ECO 363	International Economics	3
FIN 332	Multinational Finance	3
MGT 334	International Mgt	3
MKT 336	International Marketing	3
BUS 440	Bus in Reg and Emerg Markets-W	3
MKT 492	Applications in International Business	3

B. Complete the following:

MGT 462	Negotiatn/Disp Resolutn in Bus	3
or MKT 375		

Business Electives

A. Select two courses from 300-494 Electives from ACC, ECO, FIN, MKT, MKT 6

Business Policy Capstone

A. Complete the following:

MGT 485	Bus Policy in Global Eco - W	3
MGT 486	Undergraduate Comp Exam	0

Minor Requirements

A minor is not required for this degree program 0

Total Hours 122-125**Footnote**

¹ BUS 150 or Transfer Student Elective for students transferring into the College with more than 45 hours. Students transferring with 46-60 hours are highly encouraged to take BUS 150.

² **International Internship Requirement:** Students must complete an internship with an international focus. This is accomplished by completing an internship with a multinational company operating in the U.S. or by completing an internship with an U.S. or foreign based firm operating in another country. Only one internship may be counted towards a business degree. Internship courses may only be used to fulfill the Experiential Learning requirement and may not be used as business electives or to fulfill any other degree requirement.

³ **Transfer Credits:** Transfer credits for International Business Major courses will only be accepted from AACSB-accredited institutions.

Notes:

- **Proficiency in a Second Language:** Students majoring in International Business are required to demonstrate introductory-level proficiency in a second language by passing a foreign language proficiency examination as administered by the University of South Alabama Department of Foreign Languages and Literature or by successfully completing the second semester of any approved elementary sequence in a foreign language.
- **Study Abroad Requirement:** Students majoring in International Business must participate in a study abroad experience. Short-term study abroad immersion experiences are available in the May semester and summer semester and students may also choose longer-term study abroad experiences for one or more semesters at one of our partner universities, which are accredited by the AACSB.

¹ See Area II for Foreign Language (LG) series options.

² Students majoring in International Business are required to demonstrate introductory-level proficiency in a second language by passing a foreign language proficiency examination as administered by the University of South Alabama Department of Foreign Languages and Literature or by successfully completing the second semester of any approved elementary sequence in a foreign language.

³ See General Education Requirements for options.

⁴ All students must complete either a literature or a history sequence. However, because International Business students are required to take a two course foreign language series fulfilling the Area II humanities requirements, International Business majors should elect the history sequence in Area IV unless they fulfill the foreign language proficiency through testing.

⁵ Anything in MCOB at the 300 or 400 level not used to fulfill another requirement except internship courses.

Marketing (BSBA)

Degree Requirements

Marketing Concentrations

Two concentrations are available within the Marketing major: Marketing Management and Professional Sales. The Marketing Department also manages the International Business major and Supply Chain Management major.

Marketing Management Concentration

The Marketing Management Concentration prepares students for entry-level positions in sales and sales management, supply chain management, retailing, advertising, and market research.

To graduate, students complete a minimum of 122 semester hours with an overall institution grade-point average (GPA) of 2.0 (38 hours of general education requirements and 84 hours of business courses). In addition, a grade of at least C is required in each of the Basic Business Techniques courses and a 2.0 GPA is required in the 300-level business core courses, and a 2.0 GPA is required for all courses counted in the Marketing major.

Professional Sales Concentration

Professional selling is one of the most rewarding career fields in business. Few careers allow for the flexibility, financial rewards, personal satisfaction and overall sense of achievement enjoyed by sales

professionals. A high percentage of marketing and business graduates identify the sales field as a career of choice upon graduation.

In globally-competitive organizations, sales professionals are increasingly responsible for market growth, value creation, customer relationship management, branding, and communication of product, service, and organizational benefits. The sales function is the engine that propels every aspect of the organization.

After completing the sales concentration, students are competitively positioned for jobs in a cross-section of firms across the globe. Specifically, you can 'market' yourself to organizations as having some degree of proficiency in relationship selling, buyer behavior, value creation and delivery, prospecting, sales call planning, presenting the core sales message, communications skills, negotiating win/win solutions, customer relationship management, management of high-impact sales teams, and understanding of sales force performance. These skill sets are among the most widely sought of any among successful professional marketers.

To graduate, students complete a minimum of 122 semester hours with an overall institution grade-point average (GPA) of 2.0 (38 hours of general education requirements and 84 hours of business courses). In addition, a grade of at least C is required in each of the Basic Business Techniques courses and a 2.0 GPA is required in the 300-level business core courses, and a 2.0 GPA is required for all courses counted in the Marketing major.

MKT 496	Marketing Internship	

Marketing Management Concentration

A 2.0 GPA is required for all courses counted towards the major

A. Complete the following:

MKT 336	International Marketing	3
MKT 374	Consumer Behavior	3
MKT 375		3
MKT 380	Integrated Mkt Communications	3
MKT 382	Brand Management	3
MKT 384	Market Research	3
MKT 385	Services Marketing	3
MKT 479	Marketing Policy - W	3

B. Select one of the following: 3

MKT 340	Marketing Analytics	
MKT 350	Digital Marketing	
MKT 376	Business to Business Marketing	
MKT 379	Retailing	
MKT 381	Sales Mgt & Personal Selling	

Business Electives

A. Select two courses from 300-494 Electives from ACC, ECO, FIN, MGT, MKT 6

Business Policy Capstone

A. Complete the following:

MGT 485	Bus Policy in Global Eco - W	3
or MGT 486	Undergraduate Comp Exam	

Minor Requirements

A minor is not required for this degree program 0

Total Hours 122-125

Footnote

¹ BUS 150 or Transfer Student Elective for students transferring into the College with more than 45 hours. Students transferring with 46-60 hours are highly encouraged to take BUS 150.

Notes:

- Transfer credit will only be awarded for courses in the Marketing Management Concentration if the course was taken at an AACSB accredited institution.
- Only one internship may be counted towards a business degree. Internship courses may only be used to fulfill the Experiential Learning requirement and may not be used as business electives or to fulfill any other degree requirement.

General Education Requirements

Code	Title	Hours
Area I - Written Composition		
A. Complete the following:		
EH 101	English Composition I	3

B. Complete the following:

EH 102	English Composition II	3
--------	------------------------	---

Area II - Humanities & Fine Arts

A. Select one of the following: see footnote table below (p. 787) ¹ 3

EH 215	Brit Lit before 1785	
EH 216	Brit Lit after 1785	
EH 225	Am Lit before 1865	
EH 226	Am Lit after 1865	
EH 235	World Lit before 1650	
EH 236	World Lit after 1650	

B. Select one of the following: 3

ARH 100	Survey of Art	
ARH 103	Art History I	
ARH 123	Art History II	
ARS 101	Art Appreciation	
DRA 110	Introduction to Theatre	
MUL 101	Introduction to Music	

C. Select six hours from the following: 6

AFR 101	Intro to African Amer Studies	
ARH 100	Survey of Art	
ARH 103	Art History I	
ARH 123	Art History II	
ARH 203	Survey of Non-Western Art	
ARS 101	Art Appreciation

REL 201	Survey of the New Testament

Area III – Natural Sciences & Mathematics

A. Select one of the following:

MA 120	Calculus and Its Applications	3-4
or MA 125	Calculus I	

B. Select 8-10 hours from the following: 8-10

AN 121 & 121L	Biological Anthropology and Biological Anthropology Lab
BLY 101 & 101L	Life Science I and Life Science I Laboratory
or BLY 121 & 121L	General Biology I and General Biology I Lab
BLY 102 & 102L	Life Science II and Life Science II Lab
or BLY 122 & 122L	General Biology II and General Biology II Laboratory

CH 101 & 101L	Survey of Inorg and Org Chem and Survey Inorg-Org Chem Lab
CH 131 & 131L	General Chemistry I and General Chemistry I Lab
CH 132 & 132L	General Chemistry II and General Chemistry II Lab
GEO 101 & 101L	Environmental Geography and Environmental Geography Lab
GEO 102 & 102L	Earth and the Environment and Earth and the Environment Lab
GY 111 & 111L	Physical Geology and Physical Geology Lab
GY 112 & 112L	Earth History and Earth History Lab
MAS 134 & 134L	Ocean Science and Ocean Science Lab
PH 101 & 101L	Introduction to Astronomy and Introduction to Astronomy Lab
PH 104 & 104L	Concepts of Physics and Concepts of Physics Laboratory
PH 114 & 114L	Physics with Algebra-Trig I and Alg-Trig Based Physics I Lab
PH 115 & 115L	Physics with Algebra -Trig II and Alg-Trig Based Physics II Lab
PH 201 & 201L	Calculus-Based Physics I and Calculus-Based Physics I Lab
PH 202 & 202L	Calculus-Based Physics II and Calculus-Based Physics II Lab

Area IV – History, Social & Behavioral Sciences see footnote table below (p. 787)¹

A. Select one of the following:		3
HY 101	HY of Western Civilization I	
HY 102	HY of Western Civilization II	
HY 135	US History to 1877	
HY 136	US History since 1877	
B. Select one of the following:		3
AN 100	Intro to Cultural Anthropology	
AN 101	Intro Archaeology-Bio Anthro	
CA 100	Intro to Communication	
CA 211	Interpersonal Comm	
CJ 105	Introduction to Criminal Justice	
GEO 114	People, Places, Environment	
GEO 115	World Regional Geography	
GS 101	Intro to Gender Studies	
HY 101	HY of Western Civilization I	
HY 102	HY of Western Civilization II	
HY 135	US History to 1877	
HY 136	US History since 1877	
IS 100	Global Issues	
IST 201	Seasons of Life	
NAS 101	Intro Native American Studies	
PSC 130	Intro to US Government	
PSY 120	Introduction to Psychology	
PSY 250	Life Span Development	

SY 109	Introductory Sociology	
SY 112	Social Problems	

C. Complete the following:

ECO 215	Prin of Microeconomics	3
ECO 216	Prin of Macroeconomics	3

Area V 200-Level Business Core

A grade of at least C is required for each course

A. Complete the following:

ACC 211	Financial Accounting	3
ACC 212	Managerial Accounting	3

B. Complete the following:

BUS 245	Data Analytics I	3
BUS 255	Data Analytics II	3

C. Complete the following:

BUS 265	Legal Environ of Business I	3
---------	-----------------------------	---

D. Complete the following:

CIS 250	Advanced Comp Applications	3
---------	----------------------------	---

Total Hours 59-62**Footnote**

¹ Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136).

Freshman Core

A. Complete the following:

BUS 150	Intro to Business and Mgt (or Transfer Student Elective see footnote table below (p. 792)) ¹	3
---------	---	---

Upper Division Business Core

A 2.0 GPA is required in the Upper Division Business Core

A. Select one of the following:

BUS 305	Data Analytics III	3
or ECO 453	Intro to Econometrics	

B. Complete the following:

FIN 315	Business Finance	3
MGT 300	Management Theory and Practice	3
MGT 305	Organizational Comm - W	3
MGT 325	Operations Management	3
MKT 320	Principles of Marketing	3

Experiential Learning

A. Select three hours from the following: 3

BUS 101	Prof Experience I	
BUS 201	Professional Experience II	
BUS 301	Professional Experience III	
BUS 302	Professional Preparation	

B. Select one of the following: 3

ACC 496	Accounting Internship	
ECO 496	Economics Internship	
FIN 496	Finance Internship	
MGT 496	Management Internship	
MKT 496	Marketing Internship	

Supply Chain & Logistics Management Major

A 2.0 GPA is required for all courses counted towards the major

A. Complete the following:

MKT 375		3
SCL 350	Intro to Business Logistics	3

SCL 351	Strategic Sourcing & Supply Mg	3
SCL 352	Port Management	3
SCL 353	Distribution Center Mgt	3
SCL 400	Supply Chain Analytics	3
MKT 405		3
B. Select one of the following:		
MKT 340	Marketing Analytics	3
or MKT 355	Customer Relationship Mgt	
C. Select one of the following:		
MKT 379	Retailing	3
MGT 441	Service Operations	
MGT 462	Negotiatn/Disp Resolutn in Bus	
<i>Business Electives</i>		
A. Select two courses from 300-494 Electives from ACC, ECO, FIN, MGT, MKT		
<i>Business Policy Capstone</i>		
A. Select one of the following:		
MGT 485	Bus Policy in Global Eco - W	3
or MGT 486	Undergraduate Comp Exam	
Minor Requirements		
A minor is not required for this degree program		
Total Hours		122-125

Footnote

¹ BUS 150 or Transfer Student Elective for students transferring into the College with more than 45 hours. Students transferring with 46-60 hours are highly encouraged to take BUS 150.

Notes:

- Transfer credits for Supply Chain & Logistics Management major courses will only be accepted from AACSB-accredited institutions.
- Only one internship may be counted towards a business degree. Internship courses may only be used to fulfill the Experiential Learning requirement and may not be used as business electives or to fulfill any other degree requirement.

² All students must complete either a literature or a history sequence.

³ If opted for Literature sequence, need Area IV; if opted for History sequence, need Area II.

⁴ Anything in MCOB at the 300 or 400 level not used to fulfill another requirement except internship courses.

⁵ Select from: MKT 340, MKT 355, MKT 381, MKT 385.

MCOB Graduate Programs

Department Information Graduate

In the event that a situation is not addressed below, the regulations governing that situation will be determined by the Graduate School.

Master of Business Administration

The Mitchell MBA degree is accredited by the Association for the Advancement of Collegiate Schools of Business. It is a professional degree designed to enable individuals to study advanced concepts of business, industry, and government operations. The business environment is constantly changing and the coursework in the MBA program is designed to facilitate decision making within ambiguous and changing conditions. The program requires ten (10) courses each carrying three semester hours of credit.

The Master of Accounting Degree Program

Students may earn a Master of Accounting degree in the Mitchell College of Business. The admissions requirements, academic regulations, and general degree requirements are similar to those required for the MBA Degree.

Students seeking the Master of Accounting degree are required to complete any of the foundation courses as designated by the Director of Graduate Studies. In addition, students must complete six (6) graduate accounting courses, two (2) general business courses, and two (2) elective courses. The entire program is on-line beginning fall semester 2018. Admission to the MAcc program is automatically approved upon application for USA Accounting graduates with an overall GPA of 3.0 and

a GPA in the major of 3.0. These applicants may apply for a waiver of the GMAT exam.

Admission Requirements for MBA and MAcc Programs

The Mitchell MBA has a Fall only admission policy. The MAcc program will consider admissions at other times of the academic year.

To be admitted to the graduate programs within the Mitchell College of Business, the following are required:

1. A bachelor's degree from an institution accredited by the appropriate United States accrediting agency or equivalent for international institutions;
2. A grade point average of 3.0 is required for regular admission to the MBA program. Grade point averages below 3.0 will be considered on a case by case basis, and are subject to the approval of the MCOB Director of Graduate Programs.
3. Three (3) reference letters attesting to the qualifications of the applicant for graduate business study.
4. Applicants must take a graduate admissions test (GMAT or GRE) and report the score to the University of South Alabama. The MCOB gives preference to GMAT scores but will accept GRE scores under certain circumstances. For details on this policy, check with the Office of Graduate Studies at the Mitchell College of Business.
5. A personal statement from the applicant explaining his/her career ambitions, the reasons for the applicant's application to the Mitchell College of Business and an explanation of why the applicant achieved the score that they achieved on the graduate admissions test.
6. Applicants may request a waiver of GMAT if they hold a regionally accredited (or equivalent) advanced degree or have a minimum of 3-5 years of demonstrated professional work experience in an applicable area. Applicants who are currently enrolled and in good standing in an advanced degree program in a business related field from an AACSB institution may also be considered.
7. International students must meet or exceed the University's standard for language proficiency.

There is a "non-degree seeking" category for registration. Students in this category must obtain permission of the Director of Graduate Studies before registering for any graduate courses in the Mitchell College of Business. A student must re-apply if no course work has been completed within one year after admission into the Master of Accounting or the Master of Business Administration programs.

MBA Prerequisite Requirements

Four courses in the MBA program are suggested for prospective students without sufficient prior academic training to complete preparation materials:

- MBA 502 requires ACC 211 or an equivalent course;
- MBA 503 requires ECO 215 or an equivalent course;
- MBA 505 requires MGT 300 or an equivalent course; and
- MBA 506 requires FIN 315 or an equivalent course.

We strongly recommend that all applicants, but especially those without business background or training, successfully complete the prerequisite requirements. Applicants may fulfill the prerequisite requirements by completing the undergraduate courses or self-study courses available from the University Bookstore. All applicants should check with the MCOB Office of Graduate Programs for clarification.

Requirements for Regular Standing

Applicants with a grade point average of 3.0 or higher are given Regular Standing on entry into the program. A Provisional Admission student will qualify for Regular Standing upon completion of a minimum of nine semester hours taken for graduate credit (500 level) toward degree requirements provided at least a "B" average is maintained in all such work attempted.

Academic Regulations

The following regulations apply to all graduate students and encompass all work taken as a graduate student including all graduate degree courses (core, elective, concentration, business and accounting).

1. All students must earn an overall GPA of 3.0 or better
2. Students receiving a second grade of C will be dismissed. A maximum of one course with a grade of "C" may be counted toward a degree program.
3. No D Grades will be awarded
4. Students receiving a grade of F will be dismissed
5. Students may not drop (WD) from any course more than one time.
6. Students may not repeat a course more than one time.

Transient Approval

Students enrolled in the Master of Business Administration Program and the Master of Accounting Program are expected to complete all requirements at the University of South Alabama. Once enrolled at USA, students are expected to complete the degree requirements at USA. Transient student requests will be approved only under the following conditions:

1. The student is graduating and the specific course requirement is not offered at USA during that term.
2. The student is moving from the Mobile area and can complete the degree requirements at another AACSB accredited institution.

Transient approval will not be granted for students to enroll in graduate classes at other local (non-AACSB accredited) institutions.

Time Limitation

All requirements for the MBA and MAcc programs must be completed within seven (7) calendar years from admission to the program.

Graduate Assistantships

Graduate Assistantships are awarded on an annual basis and are granted for the academic year. The stipend is for two semesters totaling \$8,000 and a tuition waiver of up to 12 semester credit hours per semester. Out of state fees are also waived. Any additional fees or cost are paid by the student.

Application forms can be obtained from the Office of Graduate Programs in the Mitchell College of Business.

Requirements for Degrees

MBA students must satisfactorily complete ten (10) three semester-hour graduate courses. Students seeking the Master of Accounting degree must complete ten (10) three semester-hour graduate accounting courses.

Doctor of Philosophy (PhD)

The Doctor of Philosophy (PhD) program in Management, Marketing, and Business Analytics is primarily designed for individuals desiring to

transition to an academic career or consulting. The program's weekend format is designed to allow students to complete classes in an intensive series of Friday through Sunday classes. The PhD degree is awarded in recognition of the student's demonstrated ability to conduct original, scholarly research at the highest levels without extensive supervision. The degree is not granted upon completion of a stated amount of course work, but rather after demonstration by the student of a comprehensive knowledge and research capability in a specialized field of study. The student must demonstrate this ability in writing and by defending the research component based upon the result of an original investigation.

Minimum Requirements for Admission

Applicants must have successfully completed an MBA, a specialized Master's degree in business, or a professional degree in related areas of study, from a nationally accredited program subject to the approval of the Director of Graduate Studies and the Admissions Committee.

Applicants must have a minimum of five years of professional experience in business or other professional fields. Instructors from business schools or colleges who want to upgrade their academic status with a doctoral degree are also eligible to apply. Classes are admitted once per year starting in May. International students must meet or exceed the University's standard for language proficiency.

Students may apply on-line at <http://www.southalabama.edu/colleges/mcob/dba/index.html> (<http://www.southalabama.edu/colleges/mcob/dba/>).

General Information

Required Credits

A minimum of 60 semester hours of approved graduate credit is required.

A comprehensive examination is scheduled for the summer of the third year of the doctoral program. Failure to complete the work within the periods specified will necessitate reevaluation of the student's program and may result in a recommendation for dismissal by the MCOB Director of Graduate Studies to the Graduate Dean.

Grade Requirements

1. All students must earn an overall GPA of 3.0 or better in the program in order to graduate.
2. Students receiving a second grade of "C" for a course taken within the first two years of study will be dismissed.
3. Students may not drop (WD) from any course more than one time.
4. Students may not repeat a course more than one time.

Requirements for Degree

PhD students must satisfactorily complete a minimum of sixty (60) semester-hour graduate credit.

Areas of Study

- Accounting (MAcc) (p. 808)
- Business Administration (MBA) (p. 808)
- Business Administration (PhD) (p. 809)

Courses

Accounting (ACC)

ACC 211 Financial Accounting 3 cr

The course provides an understanding of ways in which financial accounting information supports business decision-making. The focus is on the financial statements and the transactions and processes that produce them. ACC 211 and ACC 212 must be taken in sequence.

ACC 212 Managerial Accounting 3 cr

The course provides an understanding of ways in which managerial accounting information supports business decision-making. The focus is on identifying, measuring, analyzing, interpreting, and communicating financial information to managers for the pursuit of an organization's goals. ACC 211 and ACC 212 must be taken in sequence.

Prerequisite: ACC 211 Minimum Grade of C

ACC 310 Intro to Acc & Bus Software 3 cr

An introductory course in practical application and study of current accounting and business software. The course provides an overview of commonly used business and accounting software with practical applications.

Prerequisite: ACC 212 Minimum Grade of C

ACC 321 Acct for Entrepreneurial Bus 3 cr

A study of the analysis and use of accounting information by entrepreneurial businesses. Among the topic covered are typical financing sources of entrepreneurial businesses and valuation of closely held businesses. In addition, the course includes coverage of how financial statements can be used to: manage a business, monitor an entity's performance, determine credit decisions, manage cash flow, and prepare forecasted financial statements.

Prerequisite: ACC 212 Minimum Grade of C

ACC 331 Taxation of Individuals 3 cr

Basic federal income tax law and tax planning considerations relating to individuals.

Prerequisite: ACC 212 Minimum Grade of C

ACC 341 Accounting Information Systems 3 cr

The study of accounting as a comprehensive information system which provides for planning and control, special reports, and preparation of external financial statements.

Prerequisite: ACC 212 Minimum Grade of C and CIS 250 Minimum Grade of D

ACC 350 Financial Statement Analysis 3 cr

In-depth coverage of the principles and practices of effective analysis of the financial statements of firms for the purpose of understanding (1) the economic and financial characteristics and current conditions of the firm, (2) particular strategies the firm may select with which to compete, and (3) the accounting principles and procedures underlying the financial statements. The course integrates concepts from accounting, economics, finance and management. Credit cannot be received for both ACC 350 and FIN 350.

Prerequisite: ACC 212 Minimum Grade of C and (FIN 315 Minimum Grade of D or FIN 340 Minimum Grade of D)

Cross-Listed: FIN 350

ACC 371 Intermediate Accounting 1 3 cr

Accounting theory as related to income measurement; preparation of balance sheets and income statements; recognition, measurement, and reporting of assets.

Prerequisite: ACC 212 Minimum Grade of C and (MA 112 Minimum Grade of D or MA 120 Minimum Grade of D or MA 125 Minimum Grade of D or MA 126 Minimum Grade of D)

ACC 372 Intermediate Accounting II 3 cr

Includes measurement, recognition and reporting of liabilities, equities, investments, and deferred taxes; EPS; and the preparation of cash flow statements. Coverage of selected professional pronouncements.

Prerequisite: ACC 313 Minimum Grade of C or ACC 371 Minimum Grade of C

ACC 380 Cost Accounting for Managers 3 cr

Managers must use cost and revenue data to make decisions about which products or services to produce. This course teaches managers about cost-accounting theory and practice including job-order and process-cost systems, cost-volume-profit relationships, budgets, standard costs, variance analysis, direct costing, and cost allocation.

Prerequisite: ACC 212 Minimum Grade of C

Cross-Listed: ACC 381

ACC 381 Cost Accounting 3 cr

Includes cost-accounting theory and practice involving such topics as job-order and process-cost systems, cost-volume-profit relationships, budgets, standard costs, variance analysis, direct costing, and cost allocation.

Prerequisite: ACC 212 Minimum Grade of C

ACC 410 Forensic Accounting 3 cr

An intro to principles for forensic accounting and professional ethics. Civil and criminal procedures and litigation services are covered. The course introduces forensic accounting topics such as fraud, bankruptcy, digital forensics, and financial statement misrepresentation.

Prerequisite: ACC 372 Minimum Grade of C

ACC 415 Data Analytics for Accounting 3 cr

This course focuses on the use of data analytic tools in the accounting profession. Students will learn the fundamentals of data analysis in a variety of accounting disciplines, how to interpret the output, and ways to communicate the results. Students will work on projects aimed at enhancing their competency in critical thinking, problem-solving, written and oral communication, and data analytic skills.

Prerequisite: (ACC 331 Minimum Grade of C and ACC 341 Minimum Grade of C and ACC 372 Minimum Grade of C and ACC 381 Minimum Grade of C)

ACC 416 Int'l and Advanced Accounting 3 cr

Study of accounting in a global context including standards and issues and the roles and responsibilities of accountants. Additional topics include: business combinations, government accounting, interim and segmented reporting.

Prerequisite: ACC 314 Minimum Grade of C or ACC 372 Minimum Grade of C

ACC 432 Tax of Partnerships and Corps 3 cr

An examination of the federal tax treatment of partnerships and corporations. Topics include: tax aspects of the formation of the entity, elements of gross income, treatment of property dispositions, allowable deductions and credits, determination of entity and investor basis, and liquidation of the entity.

Prerequisite: (ACC 331 Minimum Grade of C or ACC 411 Minimum Grade of D) and (ACC 314 Minimum Grade of C or ACC 372 Minimum Grade of C)

ACC 451 Auditing - W 3 cr

Theory and application of the attest function, ethical issues, and written communication for accountants. Includes standards, objectives, review of internal control structures, tests of controls, substantive testing and reporting. Ethical issues and the preparation of written letters and formal reports are covered.

Prerequisite: (ACC 314 Minimum Grade of C or ACC 372 Minimum Grade of C) and MGT 305 Minimum Grade of D

ACC 452 Advanced Auditing & Analytics 3 cr

Advanced study of the application of auditing standards, internal control evaluations, applications of statistics, audits of information systems, internal and operational auditing, and legal and reporting obligations.

Prerequisite: ACC 451 Minimum Grade of C

ACC 461 Acc for Gov and Not-For-Profit 3 cr

A study of the concepts and procedures underlying fund accounting, budgetary control, and financial reporting requirements for governmental and not-for-profit entities.

Prerequisite: ACC 314 Minimum Grade of C or ACC 372 Minimum Grade of C

ACC 490 Special Topics 3 cr

Designed to provide senior students an opportunity to study selected topics of particular interest. A student may count no more than six hours of Special Topics in the concentration. Prerequisite: Approval of Department Chair.

ACC 494 Directed Studies 3 cr

Primarily designed to give superior students an opportunity to study some phase of accounting of particular interest. Conferences, a bibliography, and a formal research report are required. Requires permission of Department Chair, 2.5 GPA or better and junior or senior standing.

ACC 496 Accounting Internship 3 cr

The internship program is designed to give students practical experience in their field of study. Students complete directed projects under the supervision of Department Chair.

Prerequisite: ACC 314 Minimum Grade of C or ACC 372 Minimum Grade of C

ACC 510 Forensic Acc. & Litig. Svcs. 3 cr

An intro to forensic accounting from the CPA perspective, focusing on civil and criminal procedures, and litigation services. Includes topics such as fraud, bankruptcy, digital forensics, and financial statement misrepresentations.

ACC 511 Financial Accounting Theory 3 cr

The evolution of general accounting theory leading up to and including the Conceptual Framework will be discussed as well as the specific theory underlying certain accounting topics of current interest.

ACC 516 Advanced Financial Accounting 3 cr

Study of Business combinations, consolidation issues, interim and segmented reporting, inflation accounting. Coverage of selected professional pronouncements.

ACC 521 Advanced Managerial Accounting 3 cr

Advanced managerial and cost accounting topics. Tools for planning and control, development of cost information for decision making, cost allocation, inventory management systems, capital budgeting, performance measurement, transfer pricing and multi-national considerations.

ACC 531 Tax Planning and Research 3 cr

An examination of tax research tools, their utilization, and various tax planning considerations. Students are required to conduct research and tax planning upon assigned topics, and write a report on their findings.

ACC 532 Tax Partnerships/Corporations 3 cr

An examination of the federal tax treatment of partnerships and corporations. Topics include: tax aspects of the formation of the entity, elements of gross income, treatment of property dispositions, allowable deductions and credits, determination of entity and investor basis, and liquidation of the entity.

ACC 534 Tax of Gifts, Trusts & Estates 3 cr

An examination of the federal tax treatment of gratuitous transfers made during life and at death.

ACC 535 Multi Tax 3 cr

This course addresses the increased importance of international and multi-jurisdictional taxation in today's global environment. It introduces students to the principles guiding nexus, geographic allocation of income and the avoidance of double taxation. The course helps students develop an understanding of the U.S. tax rules that may apply to income involving the U.S. and other countries. It also helps students understand multistate tax rules. Students will develop an understanding of the tax implications resulting from business that is conducting electronically. Students will apply multi-jurisdictional tax principles and rules to solve case studies.

ACC 541 Advanced Accounting Systems 3 cr

Analysis of accounting information system case studies in order to expose students to real-world system problems and applications. Course work includes hands-on work with a variety of computer-based accounting application packages.

ACC 552 Advanced Auditing & Analytics 3 cr

Advanced study of the application of auditing standards, internal control evaluations, applications of statistics, audits of information systems, internal and operational auditing, and legal and reporting obligations.

ACC 561 Acc of Government and NFPE 3 cr

A study of the concepts and procedures underlying fund accounting, budgetary control, and financial reporting requirements for governmental and not-for-profit entities.

ACC 570 Professional Accounting I 3 cr

A study of issues and responsibilities relevant to the public accounting profession, including financial, regulation, assurance, and business considerations.

ACC 571 Professional Accounting II 3 cr

A study of contemporary issues and responsibilities relevant to the accounting profession, including ethical, legal and international considerations.

ACC 572 Fraud Ex 3 cr

Overview of the nature of occupational fraud and how it is committed included an introduction to the actions that can be taken to determine the presence of occupational fraud and procedures that can be implemented to deter fraud. Students will also learn how financial statement fraud and reporting occur, including investigation and financial fraud prevention techniques.

ACC 580 Emerging Issues in Accounting 3 cr

A study of current and emerging issues and responsibilities relevant to the accounting profession, with special emphasis on technology advancements, new services, regulatory changes, and international developments in accounting and business.

ACC 590 Special Topics 3 cr

Designed to provide graduate students an opportunity to study selected topics. Prerequisites: Permission of Department Chair. A student may count no more than three hours of Special Topics in the MBA degree program.

ACC 594 Independent Study in Account 3 cr

Readings and research on selected topics. Conference and formal research report required. Permission of department chair.

Business (BUS)**BUS 101 Prof Experience I 1 cr**

An introduction to career success tools including: personality and career interest inventories, steps to succeed basic resume preparation, business ethics, personal branding, university and community involvement and other career preparation activities. This course is designed for students in their first and second semester within the MCOB.

Prerequisite: EH 101 (may be taken concurrently) Minimum Grade of C or EH 102 (may be taken concurrently) Minimum Grade of C

BUS 150 Intro to Business and Mgt 3 cr

A survey of the field of business, including profit-seeking firms, not-for-profit organizations, and new businesses created by entrepreneurs. Emphasis on the business environment, organization and management, current economic and international issues, and career opportunities. Societal and ethical issues are also examined. Open to University of South Alabama freshmen only.

Prerequisite: EH 101 (may be taken concurrently) Minimum Grade of C or EH 102 (may be taken concurrently) Minimum Grade of C

BUS 201 Professional Experience II 1 cr

Continued introduction to Career success tools including: resume building activities, cover letter and references development, career for a day shadowing, speed branding, dress for success, networking, career fair tools for success, university and community involvement and other career preparation activities. Prerequisite: C or better in BUS 101, Sophomore standing.

Prerequisite: BUS 101 Minimum Grade of C

BUS 245 Data Analytics I 3 cr

An introduction to data analytics in business that includes analysis to make data driven business decisions. This course utilizes statistical applications in business problems solving using descriptive statistics, probability theory, sampling distributions, methods of estimation, and tests of hypotheses. The course introduces students to basic predictive business modeling, and the communication of analytical results.

Prerequisite: University test - Math 75 or MyMathTest 080 or ACT Math 23 or MA 112 Minimum Grade of D or MA 113 Minimum Grade of D or MA 115 Minimum Grade of D or MA 120 Minimum Grade of D or MA 121 Minimum Grade of D or MA 125 Minimum Grade of D or MA 126 Minimum Grade of D or MA 131 Minimum Grade of D or MA 132 Minimum Grade of D or MA 171 Minimum Grade of D or MA 172 Minimum Grade of D or MA 287 Minimum Grade of D

BUS 255 Data Analytics II 3 cr

A second course in quantitative data analytics in business decision making utilizing methods of analysis including statistical inference, predictive, modeling, forecasting, correlation and regression analysis. It further develops fundamental knowledge and skills for making data driven business decisions including the use of computer applications for problem solving. This course relies heavily on project based learning to provide students with experience of solving data based business problems.

Prerequisite: (BUS 245 Minimum Grade of C or ST 175 Minimum Grade of D or ST 210 Minimum Grade of D) and (University test - Math 75 or (MA 112 Minimum Grade of D or MA 171 Minimum Grade of D) or (MA 113 Minimum Grade of D or MA 172 Minimum Grade of D) or (MA 115 Minimum Grade of D or MA 121 Minimum Grade of D) or (MA 120 Minimum Grade of D or MA 287 Minimum Grade of D) or (MA 125 Minimum Grade of D or MA 132 Minimum Grade of D) or (MA 126 Minimum Grade of D or MA 233 Minimum Grade of D))

BUS 265 Legal Environ of Business I 3 cr

A study of the global legal environment in which contemporary American business functions, including a review of legal thought and ethical considerations and the foundations and impacts of governmental regulation in areas such as labor and employment, environmental concerns, consumer protection, and antitrust. Contemporary issues, domestic and international concepts and institutions, and social forces that shape the legal environment are emphasized. Requires sophomore standing

BUS 301 Professional Experience III 1 cr

Career success tools including: personal professional strategic plan development, mock interviewing, dining etiquette, personal and professional mentoring, job search, application, and acceptance, job search ethics, creating a career plan, university and community involvement and other career preparation activities. Prerequisite: C or better in BUS 201, Junior standing.

Prerequisite: BUS 201 Minimum Grade of C

BUS 302 Professional Preparation 3 cr

Career success tools including personal professional strategic plan development, interviewing, personal and professional mentoring, job search, application, creating a career plan, university and community involvement, and other career preparation activities. Prerequisite: Junior transfer standing. Business students only.

BUS 305 Data Analytics III 3 cr

A course in quantitative data analytics in business decision making utilizing methods of analysis including linear programming, network optimization, binary integer programming, nonlinear optimization, decision analysis, and deep learning. It further develops fundamental knowledge and skills for making data driven business decisions including the use of computer applications for problem solving. This course relies heavily on project based learning to provide students with the experience of solving data based business problems.

Prerequisite: BUS 255 Minimum Grade of C and CIS 250 Minimum Grade of D

BUS 430 Business Data Visualization: Concepts and Applications 3 cr

The course provides an overview of the purposes, methods, and techniques of data visualization, that includes planning, data gathering, data validation, data analysis, and visual presentation. Additionally, the course covers data mining, data storytelling, and the use of data to support decision-making.

Prerequisite: BUS 305 Minimum Grade of C

BUS 440 Bus in Reg and Emerg Markets-W 3 cr

A comprehensive analysis of the issues in starting and maintaining business in emerging and developing markets, building on data and research skills acquired in foundational international business courses.

Prerequisite: MKT 310 Minimum Grade of D and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C) and (ECO 330 Minimum Grade of D or ECO 363 Minimum Grade of D or FIN 332 Minimum Grade of D or MGT 334 Minimum Grade of D or MGT 336 Minimum Grade of D)

BUS 490 Special Topics 3 cr

Designed to provide senior students an opportunity to study selected topics of particular interest. A student may count no more than six hours of Special Topics in the concentration. Prerequisite: Approval of Department Chair.

BUS 496 MCOB Honors Sr Project I - H 3 cr

Applied business project and paper prepared under the direction of a project advisor plus two other persons selected by the advisor in consultation with the student. The student must have developed a proposal for the project and paper in consultation with the advisor and received permission from the committee to proceed. In addition, the student must be entering his or her senior year and be a major in the Mitchell College of Business. The project proposal must be formulated no later than the end of the first semester of the student's senior year and the project must be completed by the student's graduation date. The student must have maintained his or her standing in the university honors program to be eligible to enroll in this course in his or her last full semester in school. The course may be counted in one of two ways: 1) as an additional course not counting towards the business degree, or 2) in special cases, as a major or business elective, to be decided by the committee.

Prerequisite: (HON 399 Minimum Grade of D or HON 301 Minimum Grade of D) and BUS 305 Minimum Grade of D and (FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D) and (MGT 300 Minimum Grade of D or MGT 322 Minimum Grade of D) and (MGT 305 Minimum Grade of D or MGT 324 Minimum Grade of D) and (MGT 310 Minimum Grade of D or MGT 322 Minimum Grade of D or MGT 422 Minimum Grade of D) and (MGT 325 Minimum Grade of D or MGT 396 Minimum Grade of D) and (MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D)

BUS 497 MCOB Honors Sr Project II - H 3 cr

Applied business project and paper prepared under the direction of a project advisor plus two other persons selected by the advisor in consultation with the student. The student must have developed a proposal for the project and paper in consultation with the advisor and received permission from the committee to proceed. In addition, the student must be entering his or her senior year and be a major in the Mitchell College of Business. The project proposal must be formulated no later than the end of the first semester of the student's senior year and the project must be completed by the student's graduation date. The student must have maintained his or her standing in the university honors program to be eligible to enroll in this course. The student will formally enroll in the course in his or her last full semester in school. The course may be counted in one or two ways: 1) as an additional course not counting towards the business degree, or 2) in special cases, as a major or business elective, to be decided by the committee. Requires completion of the business core with the exception of MGT 485.

Prerequisite: BUS 496 Minimum Grade of C

BUS 498 Mitchell Scholars Sr Project 3 cr

Applied business project and presentation prepared under the direction of the instructor in consultation with the student. This course will have irregular meetings scheduled by the instructor and will have both a classroom component and a project component. The student must have maintained his/her standing in the Mitchell Scholars program and be a senior to be eligible to enroll in this course. This class will be counted in one of three ways: 1) as a business elective, 2) as an additional course not counting towards the business degree; or 3) in special cases, as a major elective to be decided by the major department's faculty. Requires completion of the business core with the exception of MGT 485 and approval of Associate Dean.

Prerequisite: Mitchell Scholars 10 and BUS 305 Minimum Grade of D and FIN 315 Minimum Grade of D and MGT 300 Minimum Grade of D and MGT 305 Minimum Grade of D and MGT 310 Minimum Grade of D and MGT 325 Minimum Grade of D and MKT 320 Minimum Grade of D

BUS 555 Study Abroad 3-6 cr

Examines issues in business administration in an international setting at the graduate level. Specific topics selected from the fields of accounting, economics, finance, information systems, management or marketing depending on the instructor's area of expertise. Part or all of the course will be conducted outside the United States. Prerequisite: Permission to enroll in a relevant Mitchell College of Business study abroad program.

BUS 601 Sem in Org. Behavior 3 cr

This seminar provides an introduction to established theories and emerging trends in the field of organizational behavior. The course explores the thoughts, emotions, and behaviors of individuals within the context of work, teams, organizations and society. The emphasis is an organizational theory and development.

BUS 614 Sem in Int'l Bus 3 cr

This course provides students with exposure to management concepts and theories that form the basis of literature separate from other seminars in the doctoral program. Given that cultural, law and politics shape the different business environments around the world, it is unsurprising that different management concepts and theories are found in other places as well. This seminar introduces doctoral students to those elements of the international business environment that have an impact on management theory and practice on other business environments.

BUS 622 Multivar Analysis 3 cr

The course is designed to broaden and enrich student's knowledge and understanding of statistical methodology as it pertains to the study of multivariate techniques used in behavioral research.

BUS 628 Regress Analysis 3 cr

A study of applications of regression analysis used in business research. Topics include: a review of basic regression concepts and applications, multiple regression, residual analysis, model building, regression limitations and assumptions, time series modeling and forecasting, and case studies using regression techniques.

BUS 630 Struct Equ Mod 3 cr

The course provides students with a functional understanding of the path analysis theory and procedures of structural equation modeling. Students will learn to specify, estimate, and evaluate models using AMOS software.

BUS 700 Fund of Research 3 cr

This course provides students with the tools and perspective necessary to succeed in the DBA program. Readings are drawn from several sources and provide participants with a better understanding of the way to approach their work.

BUS 702 Applied Stat and Reg 3 cr

This course provides an examination of statistical concepts used for business research. Topics include: fundamentals of probability, sampling, statistical estimation, test of hypotheses, analysis of variance, chi-square analysis and regression analysis. Emphasis is placed on the use of statistical techniques for business research applications.

BUS 704 Multivariate Analysis 3 cr

The course is designed to broaden and enrich a student's knowledge and understanding of statistical methodology as it pertains to the study of multivariate techniques used in behavioral research.

BUS 705 Seminars in Business Analytics 3 cr

This course introduces the foundations of Data Science and Business Analytics with focus on research design and data analytic methods in Accounting, Economics, Finance, Management, Marketing, and Real Estate.

BUS 706 Research Design and Methods 3 cr

This course focuses on the general concepts related to conducting academic research and the various research methods commonly used in business research, including quantitative and qualitative analysis.

BUS 708 Adv Stats & App Res 6 cr**BUS 710 Struct Equation Modeling 3 cr**

This course provides students with a functional understanding of path analysis theory and procedures of structural equation modeling. Students will learn to specify, estimate, and evaluate models using software packages designed for this purpose.

BUS 751 Python for Business Analytics 3 cr

Python programming for Business Analytics, with applications and examples from statistics, finance economics, marketing, management, accounting, and other business-related disciplines.

BUS 753 Applied Business Analytics I 3 cr

This course covers a variety of concepts and applied analytical methods useful in business research and analytics, such as big data, data measurement and preparation, multi-source modeling files, data analysis and machine learning.

BUS 754 Seminars Business Analytics II 3 cr

This course focuses on applied analytics. Students will complete the continuum of analytics including data source identification, data prep, descriptive and exploratory analytics, confirmatory and inferential analytics.

BUS 757 Computational Business Stats 3 cr

This course is designed for students who seek to develop skills in statistical computing using the R programming language. Students will learn how to use R for data manipulation, data visualization, writing statistical function, and optimizing statistical functions.

BUS 759 Machine Learning and AI 3 cr

Advanced statistical and machine learning algorithms/techniques/methods for Business Analytics with applications from statistics, finance, economics, marketing, management, accounting, and other business-related disciplines.

BUS 789 Res and Teaching Concepts 1 cr

Presentations and discussions related to teaching and research concepts.

BUS 799 Dissertation Research 3-6 cr

Independent research by the student under the sponsorship of the graduate faculty.

Prerequisite: BUS 699 Minimum Grade of S

Master of Business Administration (MBA)

MBA 501 Analysis using Info Sys 3 cr

Advanced management requires the ability to analyze datasets, interpret data with datasets and calculate statistics from data. This course covers all the process of building, interpreting, calculating data and finally making decisions on the outcomes of that process. A significant part of the grade in this course comes from decision making exercises.

MBA 502 Managing Accounting Info 3 cr

This course focuses on making decisions using Accounting information which includes how to generate relevant and appropriate data and how to use accounting analysis to enhance success in making decisions.

Prerequisite: ACC 211 Minimum Grade of C

MBA 503 Managing in the Bus. Env't 3 cr

The course evaluates managerial decisions in a business environment impacted by ethical considerations, sustainability, social responsibility and stakeholder interests. The course also focuses on developing student skills in communication.

Prerequisite: ECO 215 Minimum Grade of C

MBA 504 Customers & Supply Chains 3 cr

This MBA course focuses on the role of customers and vendors on organizations. The course uses projects and decision scenarios to address the issues that result from managing supply chains and customer relationships.

MBA 505 Managing People 3 cr

This MBA course emphasizes the role of people within an organization and the issues and the decisions related to managing human assets. The course develops a number of techniques and scenarios that emphasize the importance of effective human resource management.

Prerequisite: MGT 300 Minimum Grade of C

MBA 506 Managing Finance and Capital 3 cr

Business managers must have a strong grasp of the role of finance and capital in the organization. The course focuses on establishing a strong knowledge base and the key decisions needed to be a successful manager.

Prerequisite: FIN 315 Minimum Grade of C

Cross-Listed: FIN 509

MBA 507 Managing Strategic Decisions 3 cr

The MBA Capstone course emphasizes decision making in a strategic context and builds upon all the courses taken prior to and concurrently with the course. The course includes decisions at the strategy development and strategy execution level. The evaluation exercises include an assessment of ethical, socially, responsible, and sustainability issues.

Corequisite: MGT 599

MBA 590 Special Topics 3 cr

The MBA Program includes courses that are designed to allow students the opportunity to learn management skills and applications through non-traditional formats. This course is designed to achieve that objective.

Subject to the approval of the Director of Graduate studies.

Management (MGT)

MGT 300 Management Theory and Practice 3 cr

Theories of organizational structures, practices, and behavior, and the effective management of organizations. Emphasis on developing patterns and strategies of organizational management in a dynamic environment as affected by the interaction of material and human resources using the technique of applied social and management sciences.

MGT 305 Organizational Comm - W 3 cr

A study of written and oral communication of organizations. Emphasis is given to communication theory, including organization flows and barriers to organizational communication. The preparation of neutral, negative, and persuasive written messages as well as formal written reports is covered in depth. In addition, oral presentations and employment interviews are discussed.

Prerequisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C)

MGT 306 Organizational Comm Non Bus 3 cr

A study of written and oral communication in organizations. Emphasis is given to communication theory, including organization flows and barriers to organizational communication. The preparation of neutral, negative, and persuasive written messages as well as formal written reports is covered in depth. In addition, oral presentations and employment interviews are discussed. For non-business majors.

Prerequisite: EH 102 Minimum Grade of C or EH 105 Minimum Grade of C

MGT 311 Legal Environ of Bus II 3 cr

An advanced treatment of the law of agency, commercial transactions, business organizations, property, negotiable instruments, secured transactions, professional liability, debtor-creditor relations, including applicable sections of Uniform Commercial Code.

Prerequisite: BUS 265 Minimum Grade of D or (MGT 310 Minimum Grade of D or MGT 332 Minimum Grade of D or MGT 422 Minimum Grade of D)

MGT 325 Operations Management 3 cr

Addresses concepts, problems, and managerial approaches applicable to the management of manufacturing and service operations. The course will examine the strategic and tactical considerations that are involved in creating a systematic framework that supports the creation of competitive advantages through effective operations and the production of high quality products. Topics covered include the role of operations in the overall organization, operations strategy development and implementation, product design and process selection, location and capacity planning, facilities layout, quality management, inventory management, production planning, scheduling and control, and project management. An important component of the overall course is the incorporation of computer applications for problem solving and decision making in operations.

Prerequisite: (MGT 300 Minimum Grade of D or MGT 322 Minimum Grade of D) and (BUS 255 Minimum Grade of D or ST 275 Minimum Grade of D)

MGT 334 International Mgt 3 cr

This course exposes students to the challenges that confront the managers of organizations & individuals in global settings. Special focus is on dealing with and benefitting from the diversity that exists across international cultures, markets, economics, governments, and organizations

Prerequisite: MGT 300 Minimum Grade of D or MGT 322 Minimum Grade of D

MGT 340 Organizational Behavior - W 3 cr

A study of human and group behavior in the workplace and within society. The focus is on individual characteristics and processes such as personality, perception, and motivation; interpersonal processes such as group behavior, leadership, communication, and decision making; and organizational processes such as culture, structure, power, and change. Requires Junior Standing.

Prerequisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C) and (MGT 300 Minimum Grade of D or MGT 322 Minimum Grade of D) and (MGT 305 Minimum Grade of D or MGT 324 Minimum Grade of D)

MGT 341 Organizational Behavior 3 cr

This course provides a basic survey of the field of Organizational Behavior. Our objective is to cover important topics such as job attitudes, work motivation, group dynamics, leadership and organizational culture. For non-business majors.

Prerequisite: (MGT 300 Minimum Grade of D or MGT 305 Minimum Grade of D or MGT 306 Minimum Grade of D)

Cross-Listed: MGT 340

MGT 345 Creativity and Innovation 3 cr

This course provides a broad framework for understanding the nature of entrepreneurship in multiple organizational settings. The course introduces students to the innovation and idea generation process and helps students determine the most desirable educational path for them to achieve their career goals. Sophomore standing.

MGT 347 Franchising 3 cr

This course is designed for students who are interested in learning about the opportunities and threats that abound in the modern world of franchising. Students will study existing franchising from both a historical and theoretical context. The logic of this course is that franchising is one of the development models that minimize risk for the "small business" focused student. Some franchising oriented people may want to start a franchise and grow it rapidly. This option is often a first step into business ownership for inexperienced owners. We discuss the applicability, opportunities, challenges, and implementation of the franchising model for expanding existing businesses. The format consists of case study and lecture discussion sequenced with extensive background readings, occasional guest lecturers, and a term case-based project culminating in a transactional plan.

MGT 351 Human Resource Management 3 cr

Principles, policies, and practices used to develop a sound human resource management program in the business organization. Among the topics included are job analysis, employment, organization development, employee development and evaluation, wage and salary administration and labor relations.

Prerequisite: (MGT 300 Minimum Grade of D or MGT 322 Minimum Grade of D)

MGT 355 Leg & Fin Aspects of Entrepren 3 cr

This course provides an overview of the legal and financial issues most frequently encountered by entrepreneurs and others involved in start-ups and small closely held, or family businesses. The course covers various aspects of financing and entrepreneurial venture. Major topics attracting seed and growth capital from sources such as venture capital, investment banking, government, and commercial banks; creating, protecting and leveraging intellectual property. Among the issues discussed are valuing a company, going public, selling out, acquisitions, bankruptcy, different legal forms or organizations, partnerships, and taxes.

MGT 356 Strategic Issues in Family Bus 3 cr

This course examines a new discipline that has developed in the last ten years and focuses on the unique aspects of family businesses. Organizational behavior, law, finance, operations, and basic small business concepts are being integrated into this course. Students will have an opportunity to consult with and develop transition plans for a family firm in a live field project.

MGT 357 Leadership 3 cr

This course includes a review of traditional as well as current thinking in Leadership theory. Students will complete several self-assessment exercises designed to assess one's leadership style and ability as a leader. A series of successful leaders will be studied in-depth.

Prerequisite: Junior or senior standing.

MGT 390 Total Quality Management 3 cr

Total Quality Management (TQM) is a management philosophy which emphasizes customer focus, continuous improvement, and employee involvement throughout the organization. This course is an introductory course which examines these components and their integration into a comprehensive quality management system.

Prerequisite: (MGT 300 Minimum Grade of D or MGT 322 Minimum Grade of D) and (MGT 325 Minimum Grade of D or MGT 396 Minimum Grade of D)

MGT 396 DEI in Organizations 3 cr

This course will develop students' critical thinking regarding diversity, equity, and inclusion in organizations. Topics may include age, bias, culture, discrimination, equality, equity, ethnicity, gender, identity, inclusion, power, privilege, race, and sexual orientation.

Prerequisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C)

MGT 430 Operations Research 3 cr

Reviews selected operations research concepts; nonlinear optimization methods, linear programming; dynamic programming; model building; and simulation methods. The student is expected to understand the concepts of operations research and to be able to use computer procedure to solve problems.

Prerequisite: MGT 325 Minimum Grade of D or MGT 396 Minimum Grade of D

MGT 441 Service Operations 3 cr

This course will provide students the opportunity to learn about service operations management, including service strategies and operations considerations and imperatives for service enterprises and how service systems are structured and operated. Students will also learn about various tools and techniques for managing service operations such as how to forecast service demand, determine capacity requirements, schedule activities, coordinate operations, plan and schedule service activities, and evaluate system performance.

Prerequisite: (MGT 325 Minimum Grade of D or MGT 396 Minimum Grade of D)

MGT 450 Organizational Staffing 3 cr

A detailed study of the function of employee staffing in a modern work organization. Emphasis on job analysis, criterion development, development and use of employment tests, validation of selection techniques, and statistical methods for making fair employment decisions. Course work includes a comprehensive staffing project.

Prerequisite: MGT 351 Minimum Grade of D and (BUS 245 Minimum Grade of D or ST 175 Minimum Grade of D or ST 210 Minimum Grade of D)

MGT 451 Employee Training -Development 3 cr

An applied course which details the training and development function. Content areas of job analysis, training needs analysis, training program development and implementation, and program evaluation will be incorporated in a comprehensive training and development project.

Prerequisite: MGT 340 Minimum Grade of D and MGT 351 Minimum Grade of D

MGT 452 Employment Law 3 cr

Analysis of significant workplace torts and laws regulating the employment relationship including: Title VII, FMLA, AOA, ADEA, FLSA, OSHA and related state laws. Emphasis on federal legislation and developing case law.

Prerequisite: MGT 351 Minimum Grade of D and (BUS 265 Minimum Grade of D or MGT 310 Minimum Grade of D or MGT 332 Minimum Grade of D or MGT 422 Minimum Grade of D)

MGT 454 Compensation Administration 3 cr

A study of the fundamentals of compensation administration in organizations. Topics include job analysis, KSA determination, job evaluation, wage structure development, incentive pay systems, legal aspects of compensation and new developments in compensation. Comprehensive course project required.

Prerequisite: MGT 351 Minimum Grade of D

MGT 455 Labor - Management Relations 3 cr

An examination of the organizing, negotiation, and contract administration phases of union-management relations. Case analyses, federal legislation and case law in labor relations, significant current issues, and a collective bargaining simulation are featured.

Prerequisite: MGT 351 Minimum Grade of D

MGT 456 Strategic Issues on Family Bus 3 cr

This course examines a new discipline that has developed in the last ten years and focuses on the unique aspects of family businesses. Organizational behavior, law, finance, operations, and basic small business concepts are being integrated into this course. Students will have an opportunity to consult with and develop transition plans for a family firm in a live field project.

Prerequisite: MGT 345 Minimum Grade of C

MGT 460 Organiz Development and Change 3 cr

Provides insight into the theory and practice of organization change and development. It bridges the gap between theory and practice and emphasizes the process of improving both organizations and individuals. Topics covered encompass understanding organizations and how they change, intervention strategies and methods for improving organizations, quality of work-life approaches and strategic considerations in system-wide change.

Prerequisite: MGT 300 Minimum Grade of D or MGT 322 Minimum Grade of D

MGT 462 Negotiatn/Disp Resolutn in Bus 3 cr

This course provides theoretical background and practical applications in business negotiation, conflict management, and alternative dispute resolution. Areas covered include positional and interest-based bargaining, business and employment arbitration, organizational conflict management strategies, mediation, and effective communications for negotiators and ADR participants.

Prerequisite: (MGT 300 Minimum Grade of D or MGT 322 Minimum Grade of D)

MGT 465 New Venture Creation 3 cr

How new businesses are organized and planned. Objectives are 1) understanding the knowledge, skills and abilities required of entrepreneurs, 2) creating and developing opportunities for new ventures, and 3) planning resources to convert those opportunities into businesses. Students work in teams to develop a business plan for a new venture they have chosen.

Prerequisite: MGT 345 Minimum Grade of C or MGT 355 Minimum Grade of C

MGT 470 High Performance Organizations 3 cr

Course examines the role of organization culture, leadership, employee involvement, work teams, and human resource practices in developing and sustaining high performance organizations that practice the principles of total quality management. Senior Standing.

Prerequisite: (MGT 300 Minimum Grade of D or MGT 322 Minimum Grade of D)

MGT 475 Strategic HRM 3 cr

This is a capstone course in human resource management that reviews essential human resource management topics to prepare students for the SHRM Assurance of Learning Exam. Topics covered include strategic HR, ethics, recruiting and selection, employee and organizational development, performance management, employment law, compensation administration, workplace safety, employee relations, labor relations, and general management topics including motivation, individual differences, organizational culture, and leadership. In addition, the course covers state of the art issues in human resource management, which are new and not well developed in existing texts.

Prerequisite: MGT 351 Minimum Grade of D and (MGT 340 Minimum Grade of D or MGT 320 Minimum Grade of D)

MGT 483 Social Entrepreneurship 3 cr

The course provides a broad theoretical perspective and practical framework for understanding social entrepreneurs and the social ventures they create ranging from local social organizations to large international social ventures leading global change. The course introduces students to the possibilities of social entrepreneurship and an introduction to the entire social venture creation process and life cycle. This course is a service-learning based and all students will participate in term-based community-based projects with local non-profit organizations. Extensive work outside of the normal classroom hours is required for this course.

MGT 485 Bus Policy in Global Eco - W 3 cr

The culmination course in business and management education. Interdisciplinary and global in nature, the course uses the case method to develop a top management perspective in which all business disciplines are integrated into the organization's effective total functioning. Prerequisites: Seniors who have completed all core courses, have petitioned for graduation and are beginning the final semester.

Prerequisite: (BUS 305 Minimum Grade of D or MGT 350 Minimum Grade of D or ECO 453 Minimum Grade of D) and (FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D) and (MGT 305 Minimum Grade of D or MGT 324 Minimum Grade of D) and (MGT 310 Minimum Grade of D or BUS 265 Minimum Grade of D or MGT 332 Minimum Grade of D or MGT 422 Minimum Grade of D) and (MGT 325 Minimum Grade of D or MGT 396 Minimum Grade of D) and (MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D)

Corequisite: MGT 486

MGT 486 Undergraduate Comp Exam 0 cr

Comprehensive exam

Corequisite: MGT 485

MGT 490 Special Topics 3 cr

Designed to provide senior students an opportunity to study selected topics of particular interest. A student may count no more than six hours of Special Topics in the concentration. Prerequisite: Approval of Department Chair.

MGT 492 Management Analysis & Consult 3 cr

Designed to help students bridge the gap between management theory and the realities involved in the practice of management. Topics include (1) development of the human, social, and political skills of the student as an individual, (2) business ethics, (3) global management issues, and (4) current trends in society that affect business and management. Assignments include a project with a local organization to identify critical management issues, analyze alternatives, and present specific recommended solutions to company managers. Senior standing.

Prerequisite: (MGT 300 Minimum Grade of D or MGT 322 Minimum Grade of D) and (MGT 320 Minimum Grade of D or MGT 340 Minimum Grade of D) and MGT 351 Minimum Grade of D

MGT 494 Dir St in Management 1-3 cr

Primarily designed to give superior students an opportunity to study some phase of management of particular interest. Conferences, a bibliography, and a formal research report are required. Junior or senior standing, a cumulative GPA of 2.5 or better, and approval of the department chair following the evaluation of a written proposal.

MGT 496 Management Internship 3 cr

The internship program is designed to give students practical experience in their field of study. Students complete directed projects under the supervision of Department Chair. No more than three hours of internship credit may be counted toward a degree in the Mitchell College of Business. Prerequisites: Junior or Senior standing, declared major in management, overall GPA of at least 2.5, and Internship Agreement signed by department Chair.

MGT 510 Legal Environment of Business 3 cr

Detailed analysis of laws & regulations affecting contemporary business organizations. Emphasis on legal aspects of employment and labor relations, regulatory agencies, sales, warranties, products liability, consumer protection, anti-trust, securities, creditors' rights, and ethical considerations.

Prerequisite: MBA Prerequisites P

MGT 521 Data Analy for Bus Decisions 3 cr

An examination of basic statistical concepts used in business analysis. Topics include fundamental probability, sampling, statistical estimation, test of hypothesis, analysis of variance, and regression analysis. Emphasis is placed on the use of statistical techniques for business decision making.

MGT 522 Supply Chain & Operations Mgmt 3 cr

An integrative approach to the processes, operations, and information required to produce and transform resources into value-added outputs that maximize customer satisfaction. Particular emphasis is placed on strategic supply chain management, operations strategy, value chain analysis, demand management, process mapping, quality assurance, customer fulfillment strategies, order fulfillment processes, relationship and information management in supply networks, measuring operational performance, and analytical tools for managing operations and supply systems.

MGT 532 Legal & Ethical Environ of Bus 3 cr

Legal and Ethical Environment of Business is designed to develop an in-depth analytical understanding of selected legal/ethical issues and trends and their impact on management and other business functions. Students will analyze the legal and ethical implications of issues including products liability, professional regulations, corporate responsibility, workplace discrimination and harassment, privacy, workplace safety, restraints on trade, land use regulation, international law, and alternative dispute resolution.

MGT 562 MBA Exec Lect I 0 cr

The MBA Executive Lecture series exposes students to the thinking and analysis of distinguished visiting executives on such topics as economics and finance, strategic management, marketing, international business, and entrepreneurship. Seminars are held during fall and spring semesters.

Prerequisite: MGT 521 (may be taken concurrently) Minimum Grade of C or MGT 532 (may be taken concurrently) Minimum Grade of C

MGT 564 MBA Exec Lect II 0 cr

The MBA Executive Lecture series exposes students to the thinking and analysis of distinguished visiting executives on such topics as economics and finance, strategic management, marketing, international business, and entrepreneurship. Seminars are held during fall and spring semesters.

Prerequisite: ECO 506 (may be taken concurrently) Minimum Grade of C or MGT 530 (may be taken concurrently) Minimum Grade of C

MGT 570 MBA Exec Lect III 0 cr

The MBA Executive Lecture series exposes students to the thinking and analysis of distinguished visiting executives on such topics as economics and finance, strategic management, marketing, international business, and entrepreneurship. Seminars are held during fall and spring semesters.

Prerequisite: ACC 501 (may be taken concurrently) Minimum Grade of C or MKT 541 (may be taken concurrently) Minimum Grade of C

MGT 572 MBA Exec Lect IV 0 cr

The MBA Executive Lecture series exposes students to the thinking and analysis of distinguished visiting executives on such topics as economics and finance, strategic management, marketing, international business, and entrepreneurship. Seminars are held during fall and spring semesters.

Prerequisite: MGT 522 (may be taken concurrently) Minimum Grade of C or ACC 502 (may be taken concurrently) Minimum Grade of C

MGT 590 Sp Top - 3 cr

Designed to provide graduate students an opportunity to study selected topics. Approval of Department Chair. A student may count no more than three hours if Special Topics in the MBA degree program.

Prerequisite: MBA Prerequisites P

MGT 594 Independent Study - Management 3 cr

Readings and research on selected topics. Conferences and formal research report required. Prerequisites: Approval of Department Chair.

MGT 599 MBA Comprehensive Exam 0 cr

A corequisite course with MGT 580 with no credit hours which includes a graduate comprehensive business exam.

MGT 701 Sem in Org Behavior 3 cr

This seminar provides an introduction to established theories and emerging trends in the field of organizational behavior. The course explores the thoughts, emotions, and behaviors of individuals within the context of work, teams, organizations, and society. The emphasis is on organizational theory and development.

MGT 703 Seminar in Org Theory & Change 3 cr

This is a foundational overview seminar. The purposes of the seminar are to 1) provide an in-depth understanding of the dominant theoretical approaches used in organizational theory, 2) give a historical overview of the theories of organization change, and 3) develop student skills in evaluating, extending, and communicating ideas about organizational theory and/or change as it relates to the student's research.

MGT 705 Leadership 3 cr

This course includes a review of traditional as well as current thinking in leadership theory with a special emphasis on emotional and social intelligence and organizational citizenship behavior.

MGT 707 Strategic Management 3 cr

The course is designed to develop a thorough understanding of the primary frameworks of competitive strategy and corporate strategy. Topics covered in the course include: industry and competitive analysis, resource-based view of the firm, value chain analysis, competitive strategies, business models, scope of the firm, strategic alliances, and offensive and defensive strategies.

MGT 709 Sem. Sp. Topics 3 cr

This course will cover two broad areas. The first is a reprise and extension of Structural Equation Modeling (SEM). The second is an introduction to Game Theory (GT) and applications thereof.

MGT 799 Dissertation Research 1-6 cr

Independent Scholarship working with committee.

Accounting (MAcc)

Degree Requirements

Students seeking the Master of Accounting degree must complete ten (10)-three semester-hour graduate courses.

Students seeking the Master of Accounting degree are required to complete any of the following foundation courses as designated by the Director of Graduate Studies. In addition, students must complete 10 graduate accounting courses. All courses are required. The program is totally on-line beginning fall semester 2018.

Undergraduate Foundation Courses

Prerequisites

All courses must be taken as an undergraduate student or transferred into the university before admission will be granted to the MAcc program. Courses must have been passed with a minimum grade of "C" to complete a prerequisite requirement.

¹ This course is dual-listed with a 400-level course. Students may not repeat dual-listed courses completed at the 400-level.

CPA Eligibility

Persons seeking licensure as a CPA in the state of Alabama must have completed a minimum of 150 semester hours or 225 quarter hours of

postsecondary education, including (1) a baccalaureate degree from an accredited university, and (2) evidence that he or she has satisfied either one of the following:

- To sit for the CPA Examination in the State of Alabama, an individual must possess at least a baccalaureate degree that is accredited by one of the regional accrediting bodies, such as the Southern Association of Colleges and Schools (SACS) and have completed at least 120 semester hours of college work. The 120 semester hours must include at least 24 semester hours of general business courses other than accounting (i.e. marketing, management, finance, economics, etc.), at least 24 semester hours of accounting courses at the upper division (i.e. junior or senior level) and/or graduate level. Upon completing all four parts of the exam, the successful candidate will have 36 months to complete 3 additional hours of general business coursework and 9 additional hours of accounting courses at the upper division (i.e. junior or senior level) and/or graduate level. In addition, the candidate must have earned a total of at least 150 semester hours of college credit.
- Candidates who hold the Master of Accounting degree from an accounting program that is separately accredited in accounting by AACSB International (such as the University of South Alabama) are considered to meet all the educational requirements to be a CPA in the State of Alabama. They must also meet the experience requirement to be licensed.

If you need any further information, see the Chair of the Department of Accounting.

Business Administration (MBA)

Degree Requirements

The Mitchell MBA degree is accredited by the Association for the Advancement of Collegiate Schools of Business. It is a professional degree designed to enable individuals to study advanced concepts of business, industry, and government operations. The program is intended for the active manager or technical supervisor as well as the recent graduate who is interested in advanced study in the field of business. The business environment is constantly changing and the coursework in the MBA program is designed to facilitate decision making within ambiguous and changing conditions. The program requires ten (10) courses each carrying three semester hours of credit.

Business Administration (PhD)

Degree Requirements

Doctor of Philosophy (PhD)

The Doctor of Philosophy in Business Administration (PhD) program in Management or Marketing is designed for individuals in business desiring to transition to an academic career or build skills for consulting occupations. The program weekend format is designed to allow students to complete the program through an intensive series of Friday through Sunday classes. In the event a situation is not addressed below, the regulations governing that situation will be determined by the Graduate School.

Minimum Requirements for Admission

Applicants must have successfully completed an MBA, a specialized Master's degree in business, or a professional degree in related areas of study, from nationally accredited programs subject to the approval of the Director of Graduate Studies and the Admissions Committee; Applicants must have a minimum of five years of professional experience in business or other professional fields. Instructors from business schools or colleges who want to upgrade their academic status with a doctoral degree are also eligible to apply. Classes are admitted once each year, starting in May. Check the website for specific deadlines. International students must meet or exceed the University's standard for language proficiency.

Students may apply on-line at <https://www.southalabama.edu/colleges/mcob/dba/index.html> (<https://www.southalabama.edu/colleges/mcob/dba/>).

General Information

Required Credits

A minimum of 60 semester hours of approved graduate credit is required. Details about the curriculum are given below.

Transfer Credit

Graduate courses taken at another AACSB accredited university in the same (or closely related) subject as that of the PhD program, may be considered in the PhD plan of study up to a maximum of 12 semester hours. Only grades of "A" or "B" may be accepted as transfer credit. The transfer credit is approved by the Dean of the Graduate School only after completion of a minimum of 9 semester hours of graduate work in the doctoral program at USA.

Elective Substitution

With Director approval, up to three seminar elective and/or research methods may be substituted during the second year of courses.

Residence, Full-time Study, and Continuation Registration

A minimum of eight consecutive terms of full-time study in residence is required.

Time Limit

All requirements for the PhD degree must be completed within 36 months from the date of matriculation. A student who has not satisfactorily completed the research component in a three year period must apply for a defined extension to complete the degree. This request must be

recommended by the major professor, the Director of Graduate Studies, and approved by the Dean of the Graduate School.

A comprehensive examination is scheduled for the summer of the third year of the doctoral program. Failure to complete the work within the periods specified will necessitate reevaluation of the student's program and may result in a recommendation for dismissal by the Director of Graduate Studies to the Graduate Dean.

Doctor of Philosophy Degree Requirements

The Doctor of Philosophy (PhD) degree is awarded in recognition of the student's demonstrated ability to conduct original, scholarly research at the highest levels without extensive supervision. The degree is not granted upon completion of a stated amount of course work, but rather after demonstration by the student of a comprehensive knowledge and research capability in a specialized field of study. The student must demonstrate this ability in writing and by defending the research component based upon the result of an original investigation.

Grade Requirements

1. All students must earn an overall GPA of 3.0 or better in the program in order to graduate.
2. Students must pass a course with a grade of no less than a B.
3. Students may not drop (WD) from any course more than one time.
4. Students may not repeat a course more than one time.

Graduation Plan

Requirements for Degree

PhD students must satisfactorily complete a minimum of sixty (60) semester-hour graduate credit. A minimum of eight consecutive terms of full-time study is required.

PhD Degree in Marketing

To earn a PhD degree in Marketing from the University, a student must satisfactorily complete the following graduate courses and research assignments.

Pat Capps Covey College of Allied Health Professions

General Information

(251) 445-9250

College of Allied Health website

<https://www.southalabama.edu/colleges/alliedhealth> (<https://www.southalabama.edu/colleges/alliedhealth/>)

Allied Health Administrative Staff

Title	Name
Dean	Susan Gordon-Hickey
Interim Director of Graduate Studies	Elizabeth M. Adams
Interim Assistant Dean of Undergraduate Affairs	Charles Erwin
Coordinator of Student Services, Allied Health	Brittney Day
Academic Advisor II	Nancy Dunn, Ayo Atane

The Pat Capps Covey College of Allied Health Professions is dedicated to the provision of the highest quality in basic medical sciences and health professional education to meet healthcare needs and to contribute to new knowledge through research. Our programs vary in specialization and are either clinical or health science focused.

Clinical Programs and Accrediting Agency

- **Emergency Medical Services Paramedic & EMT Programs:**
Committee on Accreditation of Allied Health Educational Programs (CAAHEP) and the Committee on Accreditation for the EMS Professions (CoAEMSP)
- **Occupational Therapy (Master of Science in Occupational Therapy & Doctor of Occupational Therapy):**
Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA)
- **Physical Therapy (Doctor of Physical Therapy):**
Commission on Accreditation in Physical Therapy Education (CAPTE) for the American Physical Therapy Association (APTA)
- **Physician Assistant (Master of Health Sciences):**
Accreditation Review Commission on Education for the Physician Assistant, Inc. (ARC-PA)
- **Radiologic Sciences (Bachelor of Science Program):**
Joint Review Committee on Education in Radiologic Technology (JRCERT)
- **Speech-Language Pathology and Audiology Programs (Master of Science in Speech-Language Pathology and Doctor of Audiology):**
Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA)

The clinical programs are accredited by their national specialized accreditor and lead to certification and licensure in the United States. Upon graduation from a professional/clinical program, students are eligible to sit for their respective certification and licensure board examinations to enter professional practice in their chosen specialization.

The clinical programs in the Pat Capps Covey College of Allied Health Professions provide the scientific education and clinical education opportunities needed for clinical practice. Coursework and clinical placements for these programs are full-time. Students must be able to manage full-time clinical placements appropriate to the profession. Clinical placements may be weekdays or on the weekend. Students may need to be placed at clinical sites between semesters. Additionally, students are not guaranteed clinical placements in Mobile and should be prepared to commute.

Through University approval, and when deemed to be in the best interest of the students, the faculty of the College reserves the right to alter curricula and regulations as considered necessary.

Health Sciences Programs

- Biomedical Sciences (BS)
- Biomedical Sciences (MS)
- Communication Sciences and Disorders (Doctor of Philosophy)
- Professional Health Sciences (BS)
- Speech and Hearing Sciences (BS)

The health sciences programs prepare students for the health care workforce or for graduate-level clinical/professional programs.

Academic Advising

Students are encouraged to take full advantage of the academic advising services provided in the College of Allied Health Professions. The academic advisors are available throughout the academic year to assist undergraduate students and other persons seeking information about Allied Health Professions programs. First year students are advised in the Academic Advising and Transfer services office. Sophomores, Juniors, and Seniors are advised in the College of Allied Health Professions. The academic advisors are located in the Health Sciences Building, room 3028 (HAHN 3028), and the telephone number is (251) 445-9260. Undergraduate students in the professional component of their program and graduate students are advised by their respective departmental faculty advisors.

Computer Access Requirement

All students enrolled in the Pat Capps Covey College of Allied Health Professions are required to have access to a personal computer. This access must include a current version of the Microsoft Office[®] software suite including Word[®] and Excel[®], access to the University's e-mail system and access to the Internet for research purposes. Individual programs may have additional requirements specific to their curriculum.

General Requirements for Immunizations, Health Insurance, Background Checks, and Drug Screening

Students in clinical programs are required to provide documentation of immunizations. Confirmation of immunization and/or documentation that the immunization process is underway (e.g. multiple shot immunization process) is required prior to matriculation. Additionally, some immunizations will be confirmed annually (i.e. flu shot). Students will be required to meet the immunization requirements of clinics at

which they are completing clinical rotations. Some clinical sites may require updated paperwork and/or additional immunizations.

Students in clinical programs are required to have continuous health care coverage. As such, students in clinical programs are required to maintain health insurance throughout the program of study and bear all costs associated with their health care. Students applying for admission to clinical programs will need to provide proof of health insurance coverage before matriculation to the program and every year after matriculation.

Students in clinical programs are required to submit background checks and drug tests prior to being admitted to a clinical program. For clinical programs, acceptance, admission, and retention in the applicable program are contingent upon an acceptable background check for the profession. Drug tests may be randomly administered while in clinical programs. Students are informed of these requirements in the application process (i.e. admissions websites). Specific requirements for each program are listed in the respective departments' sections. Students are responsible for becoming familiar with individual requirements and regulations specific to their programs.

Students must adhere to the policies of the site at which they are completing clinical education experiences/rotations. This includes, but is not limited to, the immunization/vaccination policies, policies on reporting changes in background check status, and drug testing/result requirements. Change in the student's status should be reported by the student to their program director/department chair and to their direct supervisor at the clinical site. The site may choose to disallow the student's participation in clinical education activities at their site based on these results and/or change in status.

- Speech and Hearing Sciences Minor (p. 883)
- Speech-Language Pathology (MSSLP) (p. 884)

Admission to Professional Programs

The Dean of the Pat Capps Covey College of Allied Health Professions oversees the establishment and monitoring of the admission standards for the professional clinical degree programs. Each student must meet the admission standards of the program for which they are applying. However, because of limited capacities, admission is on a competitive basis. Notice of actions on applications for admission is provided by the respective departments. Any other correspondence between students and faculty members, department chairs, and/or administrative officers does not constitute nor does it imply admission to any specific program.

Application forms and other information may be obtained from each department's website or by contacting the department directly.

College Requirements

Undergraduate

Admission to Professional Programs

The Dean of the Pat Capps Covey College of Allied Health Professions oversees the establishment and monitoring of the admission standards for the professional clinical degree programs. Each student must meet the admission standards of the program for which they are applying. However, because of limited capacities, admission is on a competitive basis. Notice of actions on applications for admission is provided by the respective departments. Any other correspondence between students and faculty members, department chairs, and/or administrative officers does not constitute nor does it imply admission to any specific program.

Application forms and other information may be obtained from each department's website or by contacting the department directly.

Undergraduate Promotion Policies

For professional component undergraduate students in Radiologic Sciences, a minimum grade of "C" is required in each professional component course. This minimum grade of "C" reflects only the letter grade since many courses will require an 80% or 90% competency in order to be considered passing level. Students receiving less than a "C" in a professional course in Radiologic Sciences will not be allowed to proceed in the program (i.e. dismissed). Students not meeting this minimal requirement may apply for reinstatement by petitioning the respective departmental Student Evaluation and Promotions Committee. The student must petition in writing through the office of the Department Chair no later than five days prior to the beginning of the semester for which reinstatement is requested. If for any reason, a student must withdraw from the professional component of a program, readmission will require approval of the appropriate Department Chair and the Dean of the College. Undergraduate students majoring in Speech and Hearing Sciences must complete each SHS course with a grade of "C" or better.

Transient Course Work Credit

All students enrolled in the Pat Capps Covey College of Allied Health Professions must receive prior approval from their academic advisor, the Chair of the Department and the Dean before taking courses at another institution. Failure to obtain prior approval may result in loss of credit for the course work.

Graduate

Graduate Degree Programs

The Pat Capps Covey College of Allied Health Professions offers a Doctor of Philosophy (Ph.D.) in Communication Sciences and Disorders; three clinical doctoral degrees, the Doctor of Audiology (Au.D.), the Doctor of Occupational Therapy (DOT), and the Doctor of Physical Therapy (DPT); and 4 Masters degrees, the Master of Science in Biomedical Sciences (MS BMD), Master of Health Sciences (MHS), Master of Science in Occupational Therapy (MSOT), and Master of Science in Speech-Language Pathology (MSLP). These degrees are administered through the Department, the College, and the Graduate School. Program requirements for all graduate programs can be found under the respective departmental information.

Admission to Graduate Programs

In addition to the minimum requirements set by the Graduate School, students applying to the graduate programs in the Pat Capps Covey College of Allied Health Professions must meet the application requirements of the individual program. Submission of the GRE score and minimum GRE score required to apply for admission to each graduate program is established by the specific program's admissions committee. Interested students should check the specific requirements for the specific program.

Admission to the graduate programs in the Pat Capps Covey College of Allied Health Professions is competitive. The programs are limited access and students are admitted based on their credentials. Students are encouraged to refer to the departmental website for admissions criteria and information.

Documents Required for Admission

All documents required for admission review such as transcripts and test scores must be official. Transcripts must be transmitted from the home institution to the department. Scores from testing agencies must be sent directly to the University. These documents become the property of the University of South Alabama. Programs may use a Centralized Application System or other admissions process. Students may be asked to upload transcripts, test scores, and letters of recommendation to this system as well. If a student decides to apply to another program, a new application and processing fee must be submitted.

Grade Standards

The grading system for graduate-level includes "A", "B", "C", and "F". A minimum overall Grade Point Average (GPA) of 3.0 must be maintained throughout the program. A maximum of eight semester credits of courses with the grade of "C" may be counted toward a degree program. Additional details are provided in the Academic Dismissal section below. Students may, with approval of the departmental faculty, repeat a course in which a "C" has been earned. Any grade lower than a "C" in any course will result in academic dismissal from the program. Academic programs may establish more stringent grade requirements for program retention.

Students may appeal dismissal in accordance with the CAHP Appeals Process for Academic Dismissal, but reinstatement is not automatically granted and will be evaluated on a case-by-case basis.

Academic Dismissal

Any term in which a graduate student drops below an overall 3.0 GPA, the student is placed on probationary status and has a period of two terms to attain an overall 3.0 GPA or be dismissed.

Students who receive more than 8 credit hours of "C" in courses will be dismissed from their program. The student may appeal the dismissal

following the CAHP Appeals Process for Academic Dismissal. If the appeal is granted, the student may be allowed to retake up to one course in order to reduce the number of hours of "C" within the 8-hour limit. If the student cannot reach this limit by retaking only one course, they will be dismissed from the program. If the student is allowed to remain in the program by retaking one course, any "C" grades in the repeated course and future courses will also result in automatic dismissal from the program.

Any grade lower than a "C" will result in academic dismissal. A student who is academically dismissed from a program will not be allowed to re-apply to the same program.

Students may appeal dismissal in accordance with the CAHP Appeals Process for Academic Dismissal, but reinstatement is not automatically granted and will be evaluated on a case-by-case basis.

Academic Misconduct

A student dismissed from a graduate program as the result of an academic misconduct penalty will be automatically dismissed from the College and will not be eligible to apply for readmission.

Final Grade Grievance Policy

A student may initiate an inquiry under procedures set forth in The Lowdown (www.southalabama.edu/lowdown/ (<http://www.southalabama.edu/lowdown/>)).

Appeal Procedure

Students may appeal academic dismissal, academic misconduct dismissal and final grade grievance decisions under specified circumstances. Information concerning this procedure may be obtained from the office of the Dean of the College.

Transfer Credit

A maximum of twelve (12) semester hours of approved transfer credit from another institution is allowed for a master's degree, and a maximum of one half of the minimum hours required for the doctoral degree is normally allowed as transfer credit. Exceptions are allowed under unusual circumstances, but in no case will the number of transfer credit hours exceed two thirds of the minimum hours required for the degree. The decision to accept transfer credit resides with the program faculty and department chair. Programs in the College may accept transfer credit from a regionally accredited university and/or programs with specialized accreditation; however, programs may set a limit to the total transfer credit accepted and programs are not required to accept transfer credits. Prior approval of the Chair of the department and College Director of Graduate/Professional Studies is required. For specific information concerning Transfer Credit see appropriate section under Pat Capps Covey College of Allied Health Professions or contact the Chair of the specific program. Only courses with "A" or "B" grades are acceptable for transfer.

Student Responsibility

While the Pat Capps Covey College of Allied Health Professions will endeavor to provide timely and accurate advisement, it is the responsibility of the student to know and satisfy the degree requirements of the academic program, to be aware of the University and College academic calendar and to understand and comply with University and College academic policies and procedures.

Biomedical Sciences

Department Information

(251) 445-9265

Department of Biomedical Sciences website

<https://www.southalabama.edu/colleges/alliedhealth/biomedical>
(<https://www.southalabama.edu/colleges/alliedhealth/biomedical/>)

Biomedical Sciences Faculty

Title	Name
Chair	Nancy Rice
Professors	Rice
Professor Emeritus	Covey, Davis, Spector, Turens
Associate Professor Emeritus	Stanfield
Associate Professors	Mockett, Ravine, Shokolenko, Thulasiraman
Assistant Professors	Gorelik, Swiger
Instructors	Henry

The Department of Biomedical Sciences educates students for successful health-related careers by providing instruction in core scientific content, encouraging critical thinking and providing active collaboration; it engages in hypothesis-driven research, embraces global diversity, and guides students to become life-long learners dedicated to enriching the scientific and healthcare community. The curriculum offers students a strong general education in the humanities, arts, and social sciences, followed by in-depth study in one of three concentrations: Pre-Health Professional, Biotechnology, and Public and Global Health. The program offers an optional Honors Research Thesis (BMD 499) to qualified students consisting of a laboratory apprenticeship in biomedical research under the mentorship of a faculty scientist. Students interested in the Honors Research Thesis option should contact Dr. Robin Mockett for information.

Concentrations

Pre-Health Professional Sciences (PHP)

The PHP concentration provides a strong foundation in basic human sciences, with corollary work in chemistry, math, and statistics. The PHP concentration prepares students to pursue post baccalaureate educational experiences in any biomedical discipline, including medicine, dentistry, pharmacy, optometry, as well as a Ph.D. degree in a variety of health and science related fields. In addition, this concentration offers prerequisite coursework for students wishing to pursue programs in the Pat Capps Covey College of Allied Health Professions.

Biotechnology (BT)

The BT concentration provides a strong foundation in basic human sciences, with an emphasis on fundamental concepts of genetics, molecular biology, and recombinant DNA technology. The core requirements have a strong applied skill-based laboratory component that further reinforces theoretical concepts. The BT concentration prepares students for entry level biotechnology jobs or post-graduate (M.S. and Ph.D.) research programs.

Public And Global Health (PGH)

The PGH concentration offers students interested in healthcare careers with a foundational knowledge of those challenges that limit the provision of health care globally. This concentration provides a strong foundation in basic human sciences, corollary work in chemistry, math,

and statistics, and adds a multi-disciplinary exploration into key factors important to health and disease in resource limited areas. Students in the PGH concentration will gain knowledge of public health, global diseases, international healthcare systems, and introduction to epidemiology, as well as a basic knowledge of those social and environmental factors that impact health and disease in vulnerable populations. A BMD degree with a concentration in PGH prepares students for a tremendous diversity of graduate programs and careers in scientific research, public health, global health education, and jobs in industry and government laboratories (CDC).

Degrees, Programs, or Concentrations

- Biomedical Sciences (BS) (p. 819)
- Biomedical Sciences (MS) (p. 822)
- Biomedical Sciences Minor (p. 822)

Courses

Allied Health Profs (AHP)

AHP 101 Freshman Sem in Allied Health 2 cr

A course for first-time students that assists with maximizing the student's potential to achieve academic success and to adjust responsibly to the individual and interpersonal challenges presented by college life. Taught in small groups, the course provides an introduction to the nature of higher education with special emphasis on health-related disciplines. Appropriate reading and writing assignments will be required.
Cross-Listed: HSC 101

AHP 390 Special Topics 1-9 cr

The purpose of this course for the undergraduate student is to develop an improved understanding of culture, to recognize any cultural practices that affect health care, and to incorporate this understanding into the provision of care. Culture will be examined through writing, cultural experiences, and through collaboration.

AHP 401 Seminar in HP 3 cr

This course is designed to provide students with an overview of different health professions and their scope of practice and also to provide information about health administration.

AHP 510 IPE Autism Spectrum Disorders 1 cr

This foundational course is designed to prepare graduate students in OT, PT, SLP, MD and ED to provide high-quality services to individuals with autism spectrum disorder and other developmental disabilities. The emphasis will be on interprofessional education using team-based instruction to support effective interprofessional practice in both educational and health care settings. **ADDITIONAL RESTRICTION:** Students can only be enrolled following successful application and admission. Contact the course instructor for information on application.

AHP 550 IPE for Inclusive Pract in AHP 1-3 cr

This course will focus on advancing the ideals of diversity, equity, and inclusion in future allied health providers to develop inclusive practices, and will support the development of interprofessional collaborative practice skills. The course will provide students with opportunities to engage with members of various healthcare-focused graduate programs through both interprofessional education modules and interprofessional clinical laboratory experiences.

Cross-Listed: AHP 650

AHP 590 Special Topics 1-9 cr

Selected topics in Health Sciences. Requires special permission.

AHP 650 IPE for Inclusive Pract in AHP 1-3 cr

This course will focus on advancing the ideals of diversity, equity, and inclusion in future allied health providers to develop inclusive practices, and will support the development of interprofessional collaborative practice skills. The course will provide students with opportunities to engage with members of various healthcare-focused graduate programs through both interprofessional education modules and interprofessional clinical laboratory experiences.

Cross-Listed: AHP 550

Biomedical Sciences (BMD)**BMD 101 Orientation to BMD 1 cr**

An introduction to Biomedical Sciences that will establish an early and continuing working relationship between students and faculty, increase awareness of sciences and scientists and familiarize students with functions, policies and services of the University, College and Department. Taught Fall Semester.

BMD 102 Lab Skills Bootcamp 0 cr

Lab Skills Bootcamp is an intense one-week training program to provide first-time experience and practice in basic biomedical laboratory techniques for students who have little to no research or laboratory background. Skills include basic biosafety, calculations, preparing solutions, data interpretation, micropipetting, DNA isolation, and PCR. A minimum cumulative GPA of 3.0 is required.

BMD 110 Introduction to A & P I 4 cr

An introduction to the structure and function of the human body with an emphasis on anatomy. This course surveys anatomical terminology, basic chemistry, cell structure/function, tissues, skin skeleton, joints, muscles, and central nervous system.

BMD 111 Introduction to A & P II 4 cr

Topics include, peripheral/autonomic nervous system, endocrinology, cardiovascular system, blood, respiration, digestion, metabolism/nutrition, urinary system, and reproduction.

BMD 200 Career Planning 1 cr

Clinical Observations (Medicine, Dentistry, Optometry and Veterinary Medicine). This course gives the student clinical exposure to various health-care services. It is designed to help students make informed decisions when selecting a career in the health professions. A written report on the clinical experience or scenario dealing with "medical ethics" is required. May be repeated for a maximum of six hours' credit. Permission of the Director of Health Pre-Professional Program is required.

Prerequisite: CH 131 Minimum Grade of D and BLY 121 Minimum Grade of D

BMD 201 Seminars in Biomedical Science 1 cr

This course introduces students to contemporary biomedical research and career possibilities in the biomedical sciences. Students will use the resources of the Biomedical Library to perform a literature search.

BMD 210 Microbiology in Healthcare 3 cr

This course introduces concepts of human host-infectious microbe interactions that result in disease. Microorganisms examined include viruses, parasites, fungi, mycobacteria, and bacteria. Included topics are genetics, taxonomy, microbial metabolism, virulence factors, host defense/microbe evasion mechanisms, epidemiology, antimicrobial chemotherapy/resistance, merging/reemerging infectious diseases, and diagnostic criteria. Emphasis will be placed on the microbial infections of different body systems.

Prerequisite: BLY 101 Minimum Grade of C or BLY 121 Minimum Grade of C or CH 101 Minimum Grade of C or CH 131 Minimum Grade of C

BMD 210L Microbiology in Healthcare Lab 1 cr

Laboratory experience includes introduction to fundamental microbial techniques, including differential staining, biochemical identification techniques, and antimicrobial susceptibility testing. Patient case studies will be used to supplement learning experience.

Prerequisite: (BLY 101 Minimum Grade of C or BLY 121 Minimum Grade of C or CH 101 Minimum Grade of C or CH 131 Minimum Grade of C)

BMD 212 Introduction to Food Science 3 cr

This course is an introduction to digestion, absorption, transportation, and utilization of nutrients. It will discuss the integration of basic chemical, physical, microbiological and nutritional properties and components of food and their relationship to a healthy lifestyle. Lab exercises are completed in which students prepare foods and observe the chemical and physical properties that affect the product.

Corequisite: BMD 212L

BMD 212L Intro to Food Science Lab 1 cr

Laboratory experience includes an introduction to digestion, absorption, transportation, and utilization of nutrients. Lab exercises are completed in which students prepare foods and observe the chemical and physical properties that affect the product.

Corequisite: BMD 212

BMD 251 Human Anatomy & Physiology I 4 cr

This is the first of a two-course sequence that covers basic human anatomy and physiology, including the study of the structure and function of various body systems. Included is a study of basic principles of organism homeostasis, biochemical makeup, a study of cells and tissue, cellular metabolism, joints, the integumentary, and skeletal systems, muscular and nervous systems, and the senses. Laboratory experiences are provided through demonstration and interactive (virtual) laboratories.

Prerequisite: BLY 101 Minimum Grade of C or BLY 121 Minimum Grade of C or CH 100 Minimum Grade of C or CH 131 Minimum Grade of C

Cross-Listed: BMD 114

BMD 252 Human Anatomy & Physiology II 4 cr

A continuation of BMD 251. Topics include nervous, cardiovascular, lymphatic, immune, respiratory, digestive, and urinary systems. Additional topics may include blood, metabolism, immunology and reproduction. Laboratory experience is provided through demonstration and interactive (virtual) laboratories.

Prerequisite: BMD 251 Minimum Grade of C

Cross-Listed: BMD 115

BMD 290 Sp Top - H - 1-3 cr

Topics of current health interest.

BMD 311 Human Anatomy 3 cr

A course in human gross and microscopic anatomy in a systematic approach, with an emphasis on structure-function relationships at the cell, tissue and organ level. The topics include anatomy of integumentary, musculoskeletal, nervous, cardio-vascular, lymphatic, respiratory, digestive, urinary and reproductive systems. This course is lecture-based with no lab component.

Prerequisite: BLY 121 Minimum Grade of D

BMD 321 Biochemistry I-Molecular Biol 3 cr

The course covers different aspects of molecular biology including protein structure and function, carbohydrate, lipids, DNA replication, transcription and translation and applications to medical problems (i.e., forensic medicine, diagnosis of genetic diseases, etc).

Prerequisite: CH 201 Minimum Grade of D

BMD 322 Biochemistry II-Metabolism 3 cr

The course discusses the chemical basis of metabolism including the conversion of nutrients from digestion to either molecules of biological relevance or to energy. Genetic diseases affecting these pathways are described and discussed.

Prerequisite: (BMD 321 Minimum Grade of C or BLY 440 Minimum Grade of C or CH 440 Minimum Grade of C) and CH 201 Minimum Grade of D

BMD 323 Biochemistry Laboratory 2 cr

This laboratory is designed to provide hands-on experience on several biochemical techniques including cell fractionation, chromatography, DNA isolation, electrophoresis, determination of enzyme activity, etc.

Prerequisite: BMD 321 Minimum Grade of C

BMD 331 Biotechnology Skills I 4 cr

This course is designed to train students in fundamental biotechnology laboratory skills and applying the scientific method to create, test, and interpret new hypotheses. Students will collaborate with peers and faculty to generate publishable data, and present their findings in both written and oral form.

Prerequisite: (BMD 323 Minimum Grade of C and BMD 350 Minimum Grade of C)

BMD 334 Human Physiology I 3 cr

The objectives of this course are to study human physiology with emphasis on cellular physiology (cell structure, metabolism, and transport) and the endocrine and nervous systems and skeletal muscle. This course is the first of a 2 course sequence.

Prerequisite: BLY 121 Minimum Grade of C and CH 131 Minimum Grade of C and CH 132 Minimum Grade of C

BMD 335 Human Physiology II 3 cr

Study of human physiology with emphasis on the basic principles of organ system physiology. The course emphasizes muscle, cardiovascular, renal, respiratory, digestive, and reproductive physiology and an introduction to immunology. This is the second course in a 2 course sequence.

Prerequisite: BMD 334 Minimum Grade of C

BMD 336 Physiology Lab - W 2 cr

This laboratory is designed to provide students with hands-on laboratory experience in physiology, with emphasis on the musculoskeletal, cardiovascular, respiratory and nervous systems. Limited to BMD majors unless by special permission. Special fee.

Prerequisite: (BMD 334 Minimum Grade of C and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C))

Corequisite: BMD 335

BMD 350 Human Genetics and Genomics 3 cr

This course presents the principles and current information about classical, molecular, and population genetics. It gives an understanding of DNA, gene, gene function and regulation, genome, and the mechanisms of Mendelian and non-Mendelian inheritance. The focus is on human genetics by understanding the clinical applications of genetics and genomics in human health and disease, with special emphasis on chromosomal abnormalities, gene mutations, cancer genetics, and gene therapy.

Prerequisite: BMD 321 Minimum Grade of C or BLY 301 Minimum Grade of C or BLY 440 Minimum Grade of C

BMD 351 Global Health-W 3 cr

This course introduces students to the basic principles of global public health that are used to improve population health at all levels. Students will get an overview of the determinants of health and how health status is measured. Students will also review the burden of disease, who is most affected by different disease burdens, risk factors, and key measures to address the burden of disease in cost-effective, doable, sustainable, and fair ways. Special attention will be paid throughout the course to health systems issues. The course will cover key concepts and frameworks but be practical in orientation. The course will be global in coverage but with a focus on low- and middle-income countries, the health of the poor and health disparities. Particular attention will be paid throughout the course to the linkages between health and development.

BMD 390 Sp Top - 1-6 cr

Topics of current health interest.

BMD 401 Immunology 3 cr

This course presents the basic concepts of immunochemistry, immunobiology and host immune responses to disease. Antigens, antibodies, cells and structures of the immune system will be discussed as well as their roles in the processes of immunity, allergies, transplantation, and diseases.

Prerequisite: BMD 321 Minimum Grade of C

BMD 402 Medical Microbiology 4 cr

This course presents the concepts of pathogenicity and virulence as they relate to disease causing bacteria, mycobacteria, fungi, protozoans, and viruses. Mechanisms of pathogenicity, host interactions, epidemiology and diagnosis will be emphasized. General concepts of microbial physiology, taxonomy, genetics, host immune response, and antimicrobial therapy are also presented. The laboratory portion of the course will provide hands-on experience in the handling and identification of each microbe class. Special fee.

Prerequisite: (BMD 321 (may be taken concurrently) Minimum Grade of C or BLY 440 Minimum Grade of C or CH 440 Minimum Grade of C)

BMD 403 Molecular Basis of Cancer 3 cr

This course will focus on the biological and molecular features of oncogenesis and clinical cancer, with specific attention given to the molecular events underlying carcinogenesis, metastasis, and angiogenesis. Recent therapeutic advances and their implications for the field will be explored through reading of current scientific literature. Case study learning is integrated into the course to help students understand the societal implications of cancer. Credit cannot be received for BMD 403 and BMD 503.

Prerequisite: BMD 321 Minimum Grade of C or BLY 301 Minimum Grade of C or BLY 302 Minimum Grade of C

Cross-Listed: BMD 503

BMD 404 Neurobiology of Trauma and Recovery 3 cr

The objective of this course is to take the student to a greater level of understanding of the neurophysiology of the mind-body interaction and how, after trauma, this same mind-body interaction holds the potential for recovery, through a process of neurobiological restoration.

Prerequisite: (BLY 101 Minimum Grade of D and BLY 102 Minimum Grade of D) or (BLY 121 Minimum Grade of D and BLY 122 Minimum Grade of D)

BMD 410 Pathophysiology 3 cr

A systematic study of disease processes involving relationships between pathophysiological changes and clinical manifestations.

Prerequisite: BMD 321 Minimum Grade of C

BMD 415 Microscopic Anatomy 4 cr

A course in (human) microscopic anatomy with laboratory emphasizing recognition and utilizing traditional histologic techniques to process tissue for microscopic examination. Taught Fall Semester.

Prerequisite: BMD 311 Minimum Grade of D

BMD 420 Pharmacology 3 cr

An introduction to pharmacological concepts and effects and uses of major drug classes. Drug design, pharmacodynamics (receptors, mechanisms, dose-response) and pharmacokinetics (time action) are discussed in general (principles), and in particular, for selected classes of drugs. Credit cannot be received for BMD 420 and BMD 520.

Prerequisite: (BMD 321 Minimum Grade of C or BLY 440 Minimum Grade of C or CH 440 Minimum Grade of C)

Cross-Listed: BMD 520

BMD 430 Neurosciences 4 cr

A study of neuroscience which integrates neurochemistry, neuroanatomy, and neurophysiology, emphasizing cellular neurobiology, neural systems, and the neurobiology of behavior. Course includes laboratory experience. Credit cannot be received for BMD 430 and BMD 530.

Prerequisite: BMD 311 Minimum Grade of C and BMD 334 Minimum Grade of C

Cross-Listed: BMD 530

BMD 434 Human Physiology 6 cr

A study of human physiology from cells to systems. A strong foundation in biology and general chemistry is required. Special permission from instructor required. Prerequisites: BLY 121 and 122, CH 131 and 132.

Prerequisite: (BLY 121 Minimum Grade of D or BLY 141 Minimum Grade of D) and (BLY 122 Minimum Grade of D or BLY 142 Minimum Grade of D) and (CH 115 Minimum Grade of D or CH 131 Minimum Grade of D) and (CH 116 Minimum Grade of D or CH 132 Minimum Grade of D)

Cross-Listed: BMD 534

BMD 441 Epidemiology 3 cr

This course will cover a wide variety of topics along with providing students in-field examples of the use of epidemiology and statistics for public and global health. The goal is to become familiar with basic statistical concepts, epidemiologic terminology, outcome measures, and study designs; to appreciate application of epidemiology to subfields (e.g., infectious diseases, reproductive health, genetics); and to apply epidemiologic methods to current public health issues.

Prerequisite: (ST 210 Minimum Grade of D or ST 305 Minimum Grade of D)

BMD 450 Introduction to Research 2 cr

The purpose of this course is to relay the relevance of biomedical research to all medical practices. First, students will learn how to systematically read, analyze, and present primary biomedical science literature. Second, students will learn how to design a new research project. Written abstracts and oral classroom presentations are required.

Prerequisite: BMD 321 Minimum Grade of C

BMD 451 Biotechnology Skills II 4 cr

Students will learn the biological principles of genome editing and its applications in biotechnology. Emphasis will be on CRISPR/Cas technology in prokaryotic and eukaryotic biological systems. Students will perform CRISPR/Cas9 gene editing and collaborate with peers and faculty to generate a knock-out cell line.

Prerequisite: (BMD 331 Minimum Grade of C)

BMD 490 Special Topics 1-6 cr

Topics of current health interest.

BMD 493 Ethical Issues in Health - W 3 cr

This course will provide an open forum for discussion of current controversial issues in biomedical sciences. The topics will include research integrity, discussions on the impact of medical advances in society as well as issues of historical relevance.

Prerequisite: (BLY 121 Minimum Grade of C) and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C)

BMD 494 Directed Research Studies 1-3 cr

The student will perform a biomedical research project under the direction of a faculty mentor. This will include literature searches and presenting the project in a written format. Instructor Permission Required. Credit cannot be received for BMD 494 and BMD 594.

Prerequisite: BMD 321 Minimum Grade of C

Cross-Listed: BMD 594

BMD 499 Honors Research Thesis - W - H 1-6 cr

Literature survey and laboratory research experience under the direction of the faculty. Instructor permission required.

Prerequisite: BMD 311 Minimum Grade of C and BMD 322 Minimum Grade of C and BMD 323 Minimum Grade of C and BMD 335 Minimum Grade of C and BMD 336 Minimum Grade of C

BMD 500 Graduate Seminar 2 cr

Professional growth through in-depth experiences in the presentation of problems and formal papers, with emphasis on guided discussions and research criticism. A different topic of current health interest will be selected every semester for in-depth coverage and discussion. Various aspects of the selected topic will be presented by both faculty and students. Each presentation will focus on a single paper from the current biomedical literature.

BMD 501 Immunology 3 cr

This course presents the basic concepts of immunochemistry, immunobiology, and host immune responses to disease, antigens, antibodies, cells and structures of the immune system will be discussed as well as their roles in the process of immunity, allergies, transplantation and diseases. A term paper is required.

BMD 502 Medical Microbiology 4 cr

This course presents the concepts of pathogenicity and virulence as they relate to disease causing bacteria, mycobacteria, fungi, protozoans, and viruses. Mechanisms of pathogenicity, host interactions, epidemiology and diagnosis will be emphasized. General concepts of microbial physiology, taxonomy, genetics, host immune response, and antimicrobial therapy are also presented. The laboratory portion of the course will provide hands-on experience in the handling and identification of each microbe class. A term paper is required. Credit cannot be received for both BMD402 and BMD502

Cross-Listed: BMD 402

BMD 503 Molecular Basis of Cancer 3 cr

This course will be a discussion of the biological and molecular features of oncogenesis and clinical cancer focusing on the specific molecular events underlying carcinogenesis, metastasis, and angiogenesis. Case study learning will be integrated into the course to engage students in understanding the societal implications of cancer. A term paper is required. Credit cannot be received for both BMD 403 and BMD 503.

Cross-Listed: BMD 403

BMD 507 Advanced Physiology 4 cr

The foundation of the biomedical sciences in physiology - the study of the function of the human body. This course will cover advanced concepts in body function from the molecular, cellular, and organ levels. In addition, there will be a weekly focus on current literature reports that coordinate with recent lecture topics.

BMD 508 Human Gross Anatomy 4 cr

This is a course in gross anatomy of human body systems utilizing human cadavers and prosected specimens. Emphasis is placed on the relationships between structure and function. The lecture component of the course will be presented through live in person lectures and recorded video lectures on selected topics. The laboratory component will consist of dissection of human cadaver. Prosected material, skeleton models and diagnostic imaging will be introduced for each area of dissection.

BMD 520 Pharmacology 3 cr

This course will help students master the practical competencies of basic pharmacology. It will focus on the pharmacology of drugs including their classification and origin, pharmacokinetics, mechanism of action, indications, contraindications, adverse and side effects, drug interactions, and use in special patient populations. You will learn how drugs affect different biological systems, how the body responds to those drugs, and why one drug does not fit all. It is the responsibility of the student to go over the biochemistry and physiology concepts learned in previous courses to better understand this course.

Cross-Listed: BMD 420

BMD 530 Neurosciences 4 cr

A study of neuroscience which integrates neurochemistry, neuroanatomy, and neurophysiology, emphasizing cellular neurobiology, neural systems, and the neurobiology of behavior. Course includes laboratory experience. A term paper is required. Credit cannot be received for BMD 430 and BMD 530.

Cross-Listed: BMD 430

BMD 534 Human Physiology 6 cr

A study of human physiology from cells to systems. A strong foundation in cell biology and general chemistry is required. This course is restricted to pharmacy students or special permission from the instructor.

Prerequisites: BLY 121, BLY 122, CH 131, CH 132.

Prerequisite: (BLY 121 Minimum Grade of D or BLY 141 Minimum Grade of D) and (BLY 122 Minimum Grade of D or BLY 142 Minimum Grade of D) and (CH 115 Minimum Grade of D or CH 131 Minimum Grade of D) and (CH 116 Minimum Grade of D or CH 132 Minimum Grade of D)

Corequisite: BMD 536

BMD 536 Physiology Lab 1 cr

This laboratory is designed to provide hands-on laboratory experiments to accompany the lecture material in BMD 534. This course is restricted to pharmacy students or special permission from the instructor.

Corequisite: BMD 534.

Corequisite: BMD 534

BMD 594 Directed Studies 1-3 cr

With the guidance of a faculty mentor, students will complete an independent research project (quantitative or qualitative) that will include a complete literature search, hypothesis development and testing through either laboratory experiments or meta-analysis, and final written report and analysis. Approval by the mentor and/or Graduate Director is required.

Cross-Listed: BMD 494

Faculty

Faculty Name	Faculty Department	Faculty Position	Degrees Held
GORELIK, GABRIELA (ggorelik@southalabama.edu)	Biomedical Sciences	Assistant Professor	BS, Univ of Buenos Aires PHD, Univ of Buenos Aires
HENRY, ALISON K'ANN (ahenry@southalabama.edu)	Biomedical Sciences	Instructor	BS, Texas A & M University MS, Virginia Polytechnic Inst and EDD, University of South Alabama
MOCKETT, ROBIN JON (mockett@southalabama.edu)	Biomedical Sciences	Associate Professor	BS, Queens University PHD, Southern Methodist University
RAVINE, TERRENCE J. (travine@southalabama.edu)	Biomedical Sciences	Associate Professor	BSMT, University of Akron MS, University of Akron PHD, Virginia Commonwealth U
RENEA, PHOIBE (prenema@southalabama.edu)	Biomedical Sciences	Assistant Professor	BS, Pensacola Christian College PHD, University of South Alabama
RICE, NANCY ANN (nrice@southalabama.edu)	Biomedical Sciences	Professor	BS, Western Kentucky University PHD, Univ of Tenn Hlth Sci Center
SHOKOLENKO, INNA NIKOLAEVNA (ishokolenko@southalabama.edu)	Biomedical Sciences	Associate Professor	MS, Kiev State Linguistic Univ PHD, Univ of South Alabama - COM
SWIGER, BRAD M. (bswiger@southalabama.edu)	Biomedical Sciences	Assistant Professor	BS, University of South Alabama PHD, University of South Alabama
THULASIRAMAN, PADMALINI (pthulasiraman@southalabama.edu)	Biomedical Sciences	Associate Professor	BS, McGill University Quebec MS, University of Oklahoma-Norman

Degree Requirements

Code	Title	Hours
General Education Requirements		
Select General Education Requirements (p. 819)		56-58
Major Requirements		
<i>Biomedical Sciences Core</i>		
A. Complete the following:		
BMD 201	Seminars in Biomedical Science	1
BMD 321	Biochemistry I-Molecular Biol	3
BMD 322	Biochemistry II-Metabolism	3
BMD 323	Biochemistry Laboratory	2
B. Complete the following: see footnote table below (p. 819) ¹		
BMD 251	Human Anatomy & Physiology I	4-6
or BMD 311	Human Anatomy	
& BMD 334	and Human Physiology I	
C. Complete the following:		
BMD 210	Microbiology in Healthcare	4
& 210L	and Microbiology in Healthcare Lab	
or BMD 402	Medical Microbiology	
<i>Electives</i>		
A. Select 16-17 hours from the following:		16-17
BMD 210	Microbiology in Healthcare	
BMD 210L	Microbiology in Healthcare Lab	
BMD 212	Introduction to Food Science	
BMD 212L	Intro to Food Science Lab	
BMD 251	Human Anatomy & Physiology I	
BMD 252	Human Anatomy & Physiology II	
BMD 290	Sp Top - H -	
BMD 311	Human Anatomy	
BMD 331	Biotechnology Skills I	
BMD 334	Human Physiology I	
BMD 335	Human Physiology II	
BMD 336	Physiology Lab - W	
BMD 350	Human Genetics and Genomics	
BMD 351	Global Health-W	
BMD 390	Sp Top -	
BMD 401	Immunology	
BMD 402	Medical Microbiology	
BMD 403	Molecular Basis of Cancer	
BMD 410	Pathophysiology	
BMD 420	Pharmacology	
BMD 430	Neurosciences	
BMD 441	Epidemiology	
BMD 450	Introduction to Research	
BMD 451	Biotechnology Skills II	
BMD 490	Special Topics	
BMD 493	Ethical Issues in Health - W	
BMD 494	Directed Research Studies	
BMD 499	Honors Research Thesis - W - H	
BLY 301	Cell Biology	

BLY 411	Developmental Biology	
BLY 459	General Parasitology	
EMS 210	Medical Terminology	
<i>Concentration Options</i>		
Select one of the following options:		14-15
A. Pre-Health Professional (PHP) Option		
BMD 335	Human Physiology II	
BMD 336	Physiology Lab - W	
BMD 350	Human Genetics and Genomics	
BMD 401	Immunology	
BMD 4XX		
B. Public and Global Health (PGH) Option		
IS 100	Global Issues	
KIN 263	Intro to Nutrition	
BMD 351	Global Health-W	
BMD 441	Epidemiology	
HS 475	Public Health	
C. Biotechnology (BT) Option		
BMD 331	Biotechnology Skills I	
BMD 350	Human Genetics and Genomics	
BMD 451	Biotechnology Skills II	
BLY 445	Computational Genetics-W	
Minor Requirements		
A minor is not required for this degree program		0
Total Hours		103-109

Footnote

¹ Students enrolled in the Pre-Health Professional (PHP) concentration are required to complete BMD 311 and BMD 334.

General Education Requirements

Code	Title	Hours
Area I - Written Composition		
A. Complete the following:		
EH 101	English Composition I	3
B. Complete the following:		
EH 102	English Composition II	3
Area II - Humanities & Fine Arts		
A. Complete the following:		
CA 110	Public Speaking	3
B. Select one of the following:		
ARH 100	Survey of Art	
ARH 103	Art History I	
ARH 123	Art History II	
ARS 101	Art Appreciation	
DRA 110	Introduction to Theatre

REL 200	Old Testament/Hebrew Bible	
REL 201	Survey of the New Testament	
Area III – Natural Sciences & Mathematics		
A. Select 3-4 hours from the following:		3-4
MA 113	Precalculus Trigonometry	
MA 115	Precal Algebra-Trigonometry	
MA 120	Calculus and Its Applications	
MA 125	Calculus I	
MA 126	Calculus II	
MA 227	Calculus III	
MA 237	Linear Algebra I	
MA 238	Differential Equations I	
B. Complete the following:		
CH 131	General Chemistry I	4
& 131L	and General Chemistry I Lab	
CH 132	General Chemistry II	4
& 132L	and General Chemistry II Lab	
Area IV – History, Social & Behavioral Sciences see footnote table below (p. 821) ¹		
A. Select one of the following:		3
HY 101	HY of Western Civilization I	
HY 102	HY of Western Civilization II	
HY 121	World Civilization I	
HY 122	World Civilization II	
HY 135	US History to 1877	
HY 136	US History since 1877	
B. Select nine hours from the following:		9
AN 100	Intro to Cultural Anthropology	
AN 101	Intro Archaeology-Bio Anthro	
CA 100	Intro to Communication	
CA 211	Interpersonal Comm	
ECO 215	Prin of Microeconomics	
ECO 216	Prin of Macroeconomics	
GEO 114	People, Places, Environment	
GEO 115	World Regional Geography	
GS 101	Intro to Gender Studies	
HY 101	HY of Western Civilization I	
HY 102	HY of Western Civilization II	
HY 135	US History to 1877	
HY 136	US History since 1877	

IS 100	Global Issues	
IST 201	Seasons of Life	
NAS 101	Intro Native American Studies	
PSC 130	Intro to US Government	
PSY 120	Introduction to Psychology (see footnote table below (p. 821)) ²	
PSY 250	Life Span Development (see footnote table below (p. 821)) ²	
SY 109	Introductory Sociology (see footnote table below (p. 821)) ²	
SY 112	Social Problems (see footnote table below (p. 821)) ²	

Area V - Supporting Required Courses**A. Complete the following:**

BLY 121 & 121L	General Biology I and General Biology I Lab	4
CH 201 & 201L	Organic Chemistry I and Organic Chemistry I Lab	4

B. Select one of the following:

ST 210	Stat Reason and Application	3
ST 305	Applied Stat Health Sciences	

C. Complete the following: see footnote table below (p. 821)³

AN 121 & 121L	Biological Anthropology and Biological Anthropology Lab	4-5
or PH 114 & 114L	Physics with Algebra-Trig I and Alg-Trig Based Physics I Lab	

Total Hours **56-58**

Footnote

¹ Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102, HY 121 & HY 122, or HY 135 & HY 136).

² Recommended

³ Only students in the Public and Global Health (PGH) Concentration should enroll in AN 121 / AN 121L.

Notes:

- A maximum of 3 hours of BMD 450, BMD 494 or BMD 499 can count toward major electives
- Students interested in Health Professions (e.g., dental, medicine, pharmacy, etc.) and/or Ph.D. programs in Basic Medical Sciences may also need to enroll in General Biology II, Physics II, Organic Chemistry II and/or Calculus.
- All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major.
- Additional classes may be needed to reach the 120 total credit hours required for graduation.
- General electives can be chosen from any courses, except BMD, to reach the 120 total credits required for graduation.

Graduation Plan

(120 Hours)

Course	Title	Hours

¹ See General Education Requirements

² Not required, recommended for students pursuing Health Professions Programs or Graduate School

Notes

- (W) Writing-Intensive Course

Major Milestones

Effective for fall, 2016 Major Milestones are used in all concentrations of the Biomedical Sciences major to help students stay on track for timely graduation. Each regular semester in the Biomedical Sciences major is a tracking term. In order to remain on track, students must complete the milestone requirements for each tracking term. These requirements are viewable in the Milestone Notes above.

Major milestone requirements apply only to full-time, degree-seeking students who first entered Fall 2016 or later. Milestone requirements do not apply to transfer students in the Biomedical Sciences program.

The sample academic plan is designed to ensure graduation in the Biomedical Sciences major in four years. Several academic plans are available – consult with your academic advisor for the plan that is the best fit for you. For specific course requirements, refer to the program requirements above and the General Education requirement of the College of Allied Health Professions.

Biomedical Sciences (MS)

The Master of Science in Biomedical Sciences degree is a one-year, non-thesis degree designed to enhance the scientific foundation and academic credentials of students who seek further academic training or employment in the health and biomedical fields.

Each applicant must be qualified for admission to the University of South Alabama Graduate School with a bachelor's degree from an accredited institution of higher education. Additional requirements also include:

1. An undergraduate minimum GPA of 3.0 is required for regular admission. Conditional admission may be granted in certain cases for lower GPAs.
2. Undergraduate degrees should be from disciplines related to biomedical sciences or other STEM disciplines.
3. An appropriate advanced degree may be used in lieu of other requirements for Regular Standing.
4. Official transcripts from all institutions attended.
5. Two letters of recommendation attesting to the prospective student's scholarship and potential for success in a graduate program.
6. A Statement of Purpose that reflects the rationale for the chosen graduate program and includes examples of personal and professional experience relevant to the program.

Graduation Plan

Biomedical Sciences Minor Degree Requirements

A minor in Biomedical Sciences, requires 18 total credit hours, of which 12 must be completed in BMD.

Code	Title	Hours
Biochemistry I		
Select one of the following:		3
BMD 321	Biochemistry I-Molecular Biol	
CH 440	Biochemistry I	
BLY 440	Biochemistry I	
Human Physiology		
Select one of the following:		3-4
BMD 334	Human Physiology I	
BLY 350	Human Physiology	
BMD 251	Human Anatomy & Physiology I	
Human Anatomy		
BMD 311	Human Anatomy	3-4
or BMD 252	Human Anatomy & Physiology II	
BMD Electives		
Select 7-9 hours of electives. Recommended to include:		7-9
BMD 322	Biochemistry II-Metabolism	
CH 441	Biochemistry II	
BLY 441	Biochemistry II	
Total Hours		16-20

Emergency Medical Services

Department Information

(251) 461-1832

Department of Emergency Medical Services website
<https://www.southalabama.edu/colleges/alliedhealth/ems/index.html>
[\(https://www.southalabama.edu/colleges/alliedhealth/ems/\)](https://www.southalabama.edu/colleges/alliedhealth/ems/)

Department of Emergency Medical Services Faculty

Title	Name
Chair	Charles Erwin
Program Directors	Clifford, Elizie, McKenna
Medical Director	Steve Bowden, M.D.
Professor	Frazer
Instructors	Brooks, Clifford, Coaker, Ellzie, Erwin, McKenna
Academic Advisors	McKenna
Part-time Instructors	Payne
Clinical Coordinator, Instructor	McKenna
CME Coordinator	Montalban

The Department of EMS prepares students for careers in Emergency Medical Services. To meet the expanding role of prehospital providers, the Department of EMS offers three certificate programs, EMT, AEMT and Paramedic, as well as a Bachelor of Science in Emergency Medical Services.

Degrees, Programs, or Concentrations

- Advanced EMT (AEMT) Certificate Program (p. 828)
- Emergency Medical Services (BS) (p. 828)
- Emergency Medical Services Minor (p. 831)
- EMT Certification Program (p. 832)
- Paramedic Certificate Program (p. 832)
- Professional Health Sciences (BS) (p. 832)

Courses

Emergency Medical Svcs (EMS)

EMS 100 Cardiopulmonary Resuscitation 1 cr

Cardiopulmonary Resuscitation (CPR) emphasizes the scope and magnitude of cardiovascular disease causes of sudden death, and the effects of prudent heart living as a tool to reduce risk factors associated with cardiovascular disease. The skills component identifies and measures competence in one-person CPR, two person adult CPR, infant and child CPR, and management of airway obstruction. Course completion cards are issued by the American Heart Association.

EMS 104 First Aid/CPR 1 cr

This American Heart Association course includes the basics of First Aid and Cardiopulmonary Resuscitation (CPR) for Adults, Children and Infants. Course content includes instruction on recognition and management of medical and trauma emergencies including environmental emergencies. The skills component includes competence in one-person adult, infant and child CPR, and management of airway obstruction as well as skills associated with trauma and medical emergencies. Course completion cards are issued by the American Heart Association.

EMS 110 Emergency Medical Responder 3 cr

A skills approach in helping the student to intervene in any medical or traumatic emergency situation before emergency personnel arrive. Emphasis is placed on care of the airway, CPR, control of bleeding, splinting and bandaging, and overall management. Clinical rotations include emergency department and ambulance. American Heart Association Healthcare Provider CPR certification will be awarded. Successful completion of this course permits the student to sit for the National Registry exam for Emergency Medical Responder. Upon successful completion of the National Registry exam the student may apply for a license with the Alabama Department of Public Health as an Emergency Medical Responder.

EMS 112 EMT Emergency Care 6 cr

Includes all required modules of the 2009 National EMS Educational Standard Curriculum. Topics include pathophysiology, patient assessment, airway management, hemorrhage control, management of fractures, care of individuals with special needs, emergency childbirth, care of infants and children, medical emergencies, environmental emergencies, transportation of the sick and injured, operations and radio communications. Prerequisite: AHA BLS for Health Care Providers.

Corequisite: EMS 113, EMS 115

EMS 113 EMT Skills Lab 1 cr

Emergency Medical Technician Skills practicum, Designed to allow EMT students extensive practice of required psychomotor skills.

Corequisite: EMS 112, EMS 115

EMS 115 EMT Clinical Internship 1 cr

Pre-hospital care and transportation of the sick and injured using principles of basic life support, correlated with emergency department experience. Time distributed between emergency department and ambulance.

Corequisite: EMS 112, EMS 113

EMS 140 Advanced EMT 6 cr

This course includes theoretical concepts and competencies outlined in the National EMS Education Standards for Advanced EMT's. Major topical areas include EMS operations, airway management, assessment and management of the medical and trauma patient, pharmacology for the A-EMT, public health and life span development, among others.

Prerequisite: EMS 112 Minimum Grade of B and EMS 113 Minimum Grade of S and EMS 115 Minimum Grade of S and EMS 210 (may be taken concurrently) Minimum Grade of B

Corequisite: EMS 141, EMS 143

EMS 141 Advanced EMT Skills Lab 1 cr

This course is designed to integrate previously learned theory on advanced pre-hospital assessment, treatment and documentation of the medical and traumatic emergency patient. The course includes psychomotor skills and competencies outlined in the DOT's National EMS Education Standards for Advanced EMTs.

Prerequisite: (EMS 210 (may be taken concurrently) Minimum Grade of B or EMT 210 Minimum Grade of B) and (EMS 200 (may be taken concurrently) Minimum Grade of B or EMT 310 Minimum Grade of B) and (EMS 140 (may be taken concurrently) Minimum Grade of B or EMT 321 Minimum Grade of B) and (EMS 143 (may be taken concurrently) Minimum Grade of S or EMT 371 (may be taken concurrently) Minimum Grade of S)

EMS 143 Advanced EMT Internship 2 cr

Supervised clinical and field experiences emphasizing patient care in the hospital and out-of-hospital environments. Time distributed between hospital emergency departments, fire rescue departments, and ambulance services, among others.

Prerequisite: (EMS 210 (may be taken concurrently) Minimum Grade of B or EMT 210 Minimum Grade of B) and (EMS 200 (may be taken concurrently) Minimum Grade of B or EMT 310 Minimum Grade of B) and (EMS 140 (may be taken concurrently) Minimum Grade of B or EMT 321 Minimum Grade of B) and (EMS 141 (may be taken concurrently) Minimum Grade of S or EMT 361 Minimum Grade of S)

EMS 200 Human Systems/Pathophysiology 3 cr

An overview of the human body systems and disease processes. Emphasis is placed on the functions of human systems and subsystems relative to pathophysiology. Includes concepts of pathophysiology included in the National Standard Curriculum for the Paramedic and the requirements set forth by the Alabama Department of Public Health.

EMS 210 Medical Terminology 3 cr

Medical vocabulary including prefixes, suffixes and their etymological derivation. Proper pronunciation stressed as well as logic, grammar, and spelling. Course includes an overview of human anatomy and physiology.

EMS 212 Paramedic Foundations 3 cr

This course introduces issues related to the practice of pre-hospital advanced life support as a career, with a focus on issues common to all health care professions. Content areas include: paramedic roles and responsibilities, well-being of the paramedic, illness and injury prevention, medical-legal-ethical issues, therapeutic communication, pharmacology and advance airway management. Upon course completion, student will have met the objectives as outlined in the National Standard Curriculum for the Paramedic.

Prerequisite: (EMS 210 Minimum Grade of B or EMT 210 Minimum Grade of B) and (EMS 140 Minimum Grade of B or EMT 321 Minimum Grade of B) and (EMS 141 Minimum Grade of S or EMT 361 Minimum Grade of S) and (EMS 143 Minimum Grade of S or EMT 371 Minimum Grade of S) and (EMS 200 Minimum Grade of B or EMT 310 Minimum Grade of B) or (BMD 114 Minimum Grade of C or BLY 151 Minimum Grade of C or CLS 114 Minimum Grade of C) and (BMD 115 Minimum Grade of C or BLY 152 Minimum Grade of C or CLS 115 Minimum Grade of C) and (EMS 214 (may be taken concurrently) Minimum Grade of B or EMT 340 Minimum Grade of B) and (EMS 216 (may be taken concurrently) Minimum Grade of B or EMT 350 Minimum Grade of B) and (EMS 217 (may be taken concurrently) Minimum Grade of S or EMT 465 Minimum Grade of S)

EMS 214 Introduction to EMS Cardiology 3 cr

Rhythm interpretation in Lead II EKG. Rapid recognition, defibrillation and/or therapeutic management of potentially lethal rhythms and myocardial infarction. Objectives include twelve lead placement and basic rhythm recognition.

Prerequisite: (EMS 210 Minimum Grade of B or EMT 210 Minimum Grade of B) and (EMS 140 Minimum Grade of B or EMT 321 Minimum Grade of B) and (EMS 141 Minimum Grade of S or EMT 361 Minimum Grade of S) and (EMS 143 Minimum Grade of S or EMT 371 Minimum Grade of S) and (EMS 200 Minimum Grade of B or EMT 310 Minimum Grade of B) or ((BMD 114 Minimum Grade of C or BLY 151 Minimum Grade of C or CLS 114 Minimum Grade of C) and (BMD 115 Minimum Grade of C or BLY 152 Minimum Grade of C or CLS 115 Minimum Grade of C)) and EMS 212 Minimum Grade of C and (EMS 216 (may be taken concurrently) Minimum Grade of B or EMT 350 Minimum Grade of B) and (EMS 217 (may be taken concurrently) Minimum Grade of S or EMT 465 Minimum Grade of S)

EMS 216 Patient Assess/Mgt & EMS Oper 3 cr

Includes history taking, physical examination, clinical decision making, communications, documentation, assessment-based management of medical and trauma patients, ambulance operations, incident command rescue, Hazmat and crime scene awareness.

Prerequisite: (EMS 210 Minimum Grade of B or EMT 210 Minimum Grade of B) and (EMS 140 Minimum Grade of B or EMT 321 Minimum Grade of B) and (EMS 141 Minimum Grade of S or EMT 361 Minimum Grade of S) and (EMS 143 Minimum Grade of S or EMT 371 Minimum Grade of S) and (EMS 200 Minimum Grade of B or EMT 310 Minimum Grade of B) or ((BMD 114 Minimum Grade of C or BLY 151 Minimum Grade of C or CLS 114 Minimum Grade of C) and (BMD 115 Minimum Grade of C or BLY 152 Minimum Grade of C or CLS 115 Minimum Grade of C)) and EMS 212 (may be taken concurrently) Minimum Grade of B and (EMS 214 (may be taken concurrently) Minimum Grade of B or EMT 340 Minimum Grade of B) and (EMS 217 (may be taken concurrently) Minimum Grade of S or EMT 465 Minimum Grade of S)

EMS 217 Paramedic Clinical I 3 cr

Supervised clinical experiences emphasizing patient care in the hospital and outpatient clinical settings as outlined in the National Standard Curriculum for the Paramedic.

Prerequisite: (EMS 210 Minimum Grade of B or EMT 210 Minimum Grade of B) and (EMS 140 Minimum Grade of B or EMT 321 Minimum Grade of B) and (EMS 141 Minimum Grade of S or EMT 361 Minimum Grade of S) and (EMS 143 Minimum Grade of S or EMT 371 Minimum Grade of S) and (EMS 200 Minimum Grade of B or EMT 310 Minimum Grade of B) or ((BMD 114 Minimum Grade of B or BLY 151 Minimum Grade of B or CLS 114 Minimum Grade of B) and BMD 115 Minimum Grade of B or BLY 152 Minimum Grade of B or CLS 115 Minimum Grade of B)) and EMS 212 (may be taken concurrently) Minimum Grade of B and (EMS 214 (may be taken concurrently) Minimum Grade of B or EMT 340 Minimum Grade of B) and (EMS 216 (may be taken concurrently) Minimum Grade of B or EMT 350 Minimum Grade of B)

EMS 240 EMS Resp. Special Populations 3 cr

This course relates pathophysiology and assessment findings to the formation of field impressions and treatment plans specific to special populations. Subject matter will include gynecology, obstetrics, abuse and assault, neonatology, pediatrics, special needs and the geriatric community. Upon course completion, students will have met the objectives for special populations as outlined in the National Standard Curriculum for the Paramedic.

Prerequisite: EMS 212 Minimum Grade of B and (EMS 214 Minimum Grade of B or EMT 340 Minimum Grade of B) and (EMS 216 Minimum Grade of B or EMT 350 Minimum Grade of B) and (EMS 217 Minimum Grade of S or EMT 465 Minimum Grade of S) and (EMS 242 (may be taken concurrently) Minimum Grade of B or EMT 355 Minimum Grade of B) and (EMS 244 (may be taken concurrently) Minimum Grade of B or EMT 425 Minimum Grade of B) and (EMS 245 (may be taken concurrently) Minimum Grade of S or EMT 455 Minimum Grade of S) and (EMS 247 (may be taken concurrently) Minimum Grade of S or EMT 466 Minimum Grade of S)

EMS 242 Paramedic Emergency Care I 3 cr

Includes pathophysiology, assessment and management of patients suffering from pulmonary and cardiovascular diseases. Additional modules may be added in accordance to standards and guidelines in the National Standard Curriculum for the Paramedic and the American Heart Association. Student will receive an ACLS provider certification upon successful completion.

Prerequisite: EMS 212 Minimum Grade of B and (EMS 214 Minimum Grade of B or EMT 340 Minimum Grade of B) and (EMS 216 Minimum Grade of B or EMT 350 Minimum Grade of B) and (EMS 217 Minimum Grade of S or EMT 465 Minimum Grade of S) and (EMS 240 (may be taken concurrently) Minimum Grade of B or EMT 375 Minimum Grade of B) and (EMS 244 (may be taken concurrently) Minimum Grade of B or EMT 425 Minimum Grade of B) and (EMS 245 (may be taken concurrently) Minimum Grade of S or EMT 455 Minimum Grade of S) and (EMS 247 (may be taken concurrently) Minimum Grade of S or EMT 466 Minimum Grade of S)

EMS 244 Paramedic Emergency Care II 3 cr

Includes pathophysiology, assessment and management of patients suffering from medical emergencies not included in EMS 240 and EMS 242 in accordance to the National Standard Curriculum for the Paramedic.

Prerequisite: EMS 212 Minimum Grade of B and (EMS 214 Minimum Grade of B or EMT 340 Minimum Grade of B) and (EMS 216 Minimum Grade of B or EMT 350 Minimum Grade of B) and (EMS 217 Minimum Grade of S or EMT 465 Minimum Grade of S) and (EMS 240 (may be taken concurrently) Minimum Grade of B or EMT 375 Minimum Grade of B) and (EMS 242 (may be taken concurrently) Minimum Grade of B or EMT 355 Minimum Grade of B) and (EMS 245 (may be taken concurrently) Minimum Grade of S or EMT 455 Minimum Grade of S) and (EMS 247 (may be taken concurrently) Minimum Grade of S or EMT 466 Minimum Grade of S)

EMS 245 Paramedic Skills Lab 1 cr

Advanced out-of-hospital practicum. Designed to integrate all previously learned theory, management concepts and behavioral objectives as outlined in the National Standard Curriculum for the Paramedic.

Prerequisite: EMS 212 Minimum Grade of B and (EMS 214 Minimum Grade of B or EMT 340 Minimum Grade of B) and (EMS 216 Minimum Grade of B or EMT 350 Minimum Grade of B) and (EMS 217 Minimum Grade of S or EMT 465 Minimum Grade of S) and (EMS 240 (may be taken concurrently) Minimum Grade of B or EMT 375 Minimum Grade of B) and (EMS 242 (may be taken concurrently) Minimum Grade of B or EMT 355 Minimum Grade of B) and (EMS 244 (may be taken concurrently) Minimum Grade of B or EMT 425 Minimum Grade of B)

EMS 247 Paramedic Clinical II 2 cr

Supervised clinical experiences emphasizing patient care in the hospital and outpatient clinical settings as outlined in the National Standard Curriculum for the Paramedic.

Prerequisite: EMS 212 Minimum Grade of B and (EMS 214 Minimum Grade of B or EMT 340 Minimum Grade of B) and (EMS 216 Minimum Grade of B or EMT 350 Minimum Grade of B) and (EMS 217 Minimum Grade of S or EMT 465 Minimum Grade of S) and (EMS 240 (may be taken concurrently) Minimum Grade of B or EMT 375 Minimum Grade of B) and (EMS 242 (may be taken concurrently) Minimum Grade of B or EMT 355 Minimum Grade of B) and (EMS 244 (may be taken concurrently) Minimum Grade of B or EMT 425 Minimum Grade of B) and (EMS 245 (may be taken concurrently) Minimum Grade of S or EMT 455 Minimum Grade of S)

EMS 270 PALS 3 cr

Course based on American Heart Association's Emergency Cardiovascular Care program. Includes assessment and management of pediatric cardiovascular and respiratory emergencies. Upon successful completion, the student will receive PALS provider certification. Recommended for health care providers and health care provider students.

EMS 280 Advanced Cardiac Life Support 3 cr

Course based on American Heart Association's Emergency Cardiovascular Care program. Includes in-depth review of all cases required for a full ACLS course. Recommended for health care providers and health care provider students. Upon successful completion, the student will receive ACLS certification.

EMS 295 Paramedic Field Internship 4 cr

Supervised field experiences with an out-of-hospital advanced life support service emphasizing patient care and team leadership skills as outlined in the National Standard Curriculum for the Paramedic.

Prerequisite: (EMS 240 Minimum Grade of B or EMT 375 Minimum Grade of B) and (EMS 242 Minimum Grade of B or EMT 355 Minimum Grade of B) and (EMS 244 Minimum Grade of B or EMT 425 Minimum Grade of B) and (EMS 245 Minimum Grade of S or EMT 455 Minimum Grade of S) and (EMS 247 Minimum Grade of S or EMT 466 Minimum Grade of S) and (EMS 297 (may be taken concurrently) Minimum Grade of S or EMT 495 (may be taken concurrently) Minimum Grade of S)

EMS 296 Special Topics in EMS 1-3 cr

Selected topics in Emergency Medical Services and Emergency Response Training. Topics will vary according to needs and interest of students. Course may be repeated for credit when content varies.

EMS 297 Paramedic Comp Review/Exams 3 cr

Culmination of paramedic education. Includes practical skills lab designed to prepare the student for state licensure exams. A final practical and written exam will be administered as a final evaluation of student progress.

Prerequisite: (EMS 240 Minimum Grade of B or EMT 375 Minimum Grade of B) and (EMS 242 Minimum Grade of B or EMT 355 Minimum Grade of B) and (EMS 244 Minimum Grade of B or EMT 425 Minimum Grade of B) and (EMS 245 Minimum Grade of S or EMT 455 Minimum Grade of S) and (EMS 247 Minimum Grade of S or EMT 466 Minimum Grade of S) and (EMS 295 (may be taken concurrently) Minimum Grade of S or EMT 475 (may be taken concurrently) Minimum Grade of S)

EMS 298 Directed Studies in EMS 1-3 cr

Selected topics in Emergency Medical Services and Emergency Response Training. Topics will vary according to needs and interest of students. Course may be repeated for credit when content varies.

EMS 300 Human Systems/Pathophysiology 3 cr

An overview of the human body systems and disease processes. Emphasis is placed on the functions of human systems and subsystems relative to pathophysiology. Includes concepts of pathophysiology included in the National Standard Curriculum for the Paramedic and the requirements set forth by the Alabama Department of Public Health.

EMS 310 Intro to EMS Systems 3 cr

This course provides students with an introduction to Emergency Medical Services (EMS) Systems. Theoretical concepts and issues will be discussed and examined in order to provide students with a conceptual basis for understanding and analyzing EMS systems and organizations. Particular emphasis will be placed on system components, system integration and the roles and responsibilities of management and leadership in EMS organizations.

EMS 315 EMS Administration 3 cr

This course provides a general overview of management and administration functions required of EMS managers today including planning, directing, budgeting, staffing and evaluation. Particular emphasis will be placed on issues relating to human resources, EMS operations, and organizational planning.

EMS 320 EMS Law and Legal Issues-W 3 cr

This course will provide a general overview of the origins of law in the United States with particular emphasis on health laws and regulations affecting pre-hospital providers. Topics include issues relating to malpractice, litigation, consent and refusal of medical treatment, advanced directives, patient confidentiality, and expert witness preparation, among others.

EMS 325 Instructional Methods in EMS 3 cr

This course presents theoretical and practical foundations necessary for entry level EMS instructors and coordinators. Topics include instructor roles and responsibilities, learning theory, lesson plan development, test writing and validation, and program evaluation. Additional emphasis will be placed on instructional techniques for the adult learner.

EMS 340 Disaster Mgt & Event Planning 3 cr

Considerations of the theoretical and practical foundations necessary to manage incidents involving multiple casualties and multiple agencies as well as the planning and management of other large scale events. Topics include disaster planning, incident command, WMD, response issues, and scene control, among others.

EMS 350 Critical Care Paramedic 3 cr

This course provides paramedics with advanced skills and knowledge in critical care medicine. Students successfully completing this course and its subsequent internship (EMS 375) will be eligible to sit for national certification as a Critical Care Paramedic.

EMS 375 Crit Care Paramedic Internship 3 cr

An advanced clinical internship course for licensed paramedics who have successfully completed EMS 350. Internship is conducted in an approved critical care setting or facility. Successful completion of this course allows the student to sit for national certification examination as a Critical Care Paramedic.

EMS 401 Seminar in HP 3 cr

This course is designed to provide students with an overview of different health professions and their scope of practice and also to provide information about health administration.

EMS 410 Concepts of Prof Paramedic 6 cr

This bridge course is designed for licensed (or nationally certified) paramedics who are admitted to the Department's Paramedic to BS in EMS Track. This course provides critical updates and information related to paramedic practice and enhances the student's overall patient assessment and critical thinking skills. Focus of the course is on selected theories and concepts integrated throughout the curriculum. Additional emphasis will be on the professional roles of paramedics. Prerequisite: Paramedic to BSEMS Track.

EMS 440 Health Insurance/Managed Care 3 cr

This course provides an overview of the basic concepts and principles in the health insurance and managed care environments. Particular emphasis will be placed on issues relating to the costs, quality and access to emergency medical services. Topics include Medicare and Medicaid reimbursement, Managed Care contracting and EMS Quality Management, among others.

EMS 445 EMS Research - W 3 cr

An introduction to basic research methods and basic statistical procedures used in Emergency Medical Services research. Students will use this information in order to assist them with reading, interpreting and evaluating articles in the pre-hospital healthcare literature.

EMS 460 Issues and Trends in EMS 3 cr

Explores issues and trends at the federal, state and local levels facing EMS leaders and EMS organizations. Particular emphasis is on new and proposed programs, policies and practices which affect pre-hospital healthcare providers.

EMS 475 EMS Internship 3 cr

Structured field experience providing the student to work in an EMS administration, management or educational environment; observation of leadership processes within an EMS organization; application of EMS leadership theory and techniques.

EMS 494 Directed Studies 1-3 cr

Student completes an individual project in a specific EMS area under the guidance and supervision of an EMS faculty member.

EMS 495 EMS Comp/Review Exam 1 cr

The comprehensive examination is the capstone of the Emergency Medical Services degree program. A written examination based on the program objectives of the EMS degree program will be administered as a final evaluation of the student's progress.

Emergency Med Training (EMT)**EMT 100 Cardiopulmonary Resuscitation 1 cr**

Cardiopulmonary Resuscitation (CPR) emphasizes the scope and magnitude of cardiovascular disease, causes of sudden death, and the effects of prudent heart living as a tool to reduce risk factors associated with cardiovascular disease. The skills component identifies and measures competence in one-person CPR, two-person CPR, infant and child CPR, and management of airway obstruction. Course completion cards are issued by the American Heart Association.

EMT 110 First Responder 3 cr

A skills approach in helping the student to intervene in any medical or traumatic emergency situation before the emergency personnel arrive. Emphasis is placed on care of the airway, CPR, control of bleeding, splinting and bandaging, AED use, and overall management.

EMT 200 Basic Emergency Care 6 cr

Includes all required modules of the 1994 EMT Basic National Standard Curriculum. Assessment of patients, airway management, AED use, hemorrhage control, management of fractures, care of special injuries, emergency childbirth, environmental emergencies, transportation of the sick and injured, and radio communications.

EMT 205 Basic Emergency Clinic Intern 1 cr

Pre-hospital care and transportation of the sick and injured using principles of basic life support, correlated with emergency room experience. Time distributed between emergency room, ambulance, communications center, and interfacility transport vehicle.

EMT 206 Basic Skills Lab 1 cr

Basic Emergency Medical Technician Skill Practicum. Designed to allow Basic EMT students extensive practice of required psychomotor skills.

EMT 210 Medical Terminology 3 cr

Medical vocabulary including prefixes, suffixes and their etymological derivation. Proper pronunciation stressed as well as logic, grammar, and spelling.

EMT 255 Hazardous Environment Management 3 cr

Theory behind management of hazardous environment emergencies with some application of theory in a practical setting. Instruction on chemical and physical nature of hazardous materials relative to control of emergency situations involving chemical spills.

EMT 290 Special Topics - 1-3 cr

Selected topics in Emergency Medical Services and Emergency Response Training. May be repeated for credit when course content varies.

EMT 310 Human Systems-Disease Process 3 cr

An overview of the human body and its systems. Emphasis is placed on the understanding of the functions of human systems and subsystems. Includes concepts of pathophysiology included in the 1998 DOT Paramedic Curriculum.

EMT 315 EMS Pharmacology I 3 cr

Introduction to pharmacology for the EMS professional. Includes drug classification, dosage calculations, routes and methods of administration, and IV access.

EMT 321 Advanced EMT 6 cr

This course includes theoretical concepts and competencies outlined in the National EMS Education Standards for Advanced EMT's. Major topical areas include EMS Operations, Airway Management, Assessment and Management of the Medical and Trauma Patient, Pharmacology for the A-EMT, Public Health and Life Span Development, among others.

Prerequisite: EMT 200 Minimum Grade of B and EMT 210 (may be taken concurrently) Minimum Grade of B and EMT 310 (may be taken concurrently) Minimum Grade of B or (BMD 114 Minimum Grade of C or BLY 151 Minimum Grade of C or CLS 114 Minimum Grade of C) and (BMD 115 (may be taken concurrently) Minimum Grade of C or BLY 152 (may be taken concurrently) Minimum Grade of C or CLS 115 (may be taken concurrently) Minimum Grade of C)

Corequisite: EMT 361, EMT 371

EMT 335 Essentials of Paramedicine 3 cr

Preparatory course for ALS EMS students. Includes airway management, EMS Systems, therapeutic communications, responsibilities, injury prevention, and legal issues.

EMT 340 Introduction to EMS Cardiology 3 cr

Rhythm interpretation in Lead II EKG. Rapid recognition, defibrillation and therapeutic management of potentially lethal rhythms and myocardial infarction. Twelve lead placement and basic recognition.

EMT 345 EMS Pharmacology II 3 cr

Advanced course with emphasis on specific drugs within classifications, drug names, actions, indications, contraindications, side effects, precautions, dosages, clinical applications and listings of prescriptions and over-the-counter medications.

EMT 350 Patient Assessment-Management 3 cr

Includes history taking, physical examination, clinical decision making, communications, documentation and assessment based management of medical and trauma patients.

EMT 355 Paramedic Emergency Care I 3 cr

Includes pulmonary and cardiology, including ACLS. Additional modules may be added in accordance with State and Department of Transportation guidelines.

EMT 361 Advanced EMT Skill Lab 1 cr

This course is designed to integrate previously learned theory on advanced pre-hospital assessment, treatment and documentation of the medical and traumatic emergency patient. The course includes psychomotor skills and competencies outlined in the DOT's National EMS Education Standards for Advanced EMTs.

Corequisite: EMT 321, EMT 371

EMT 365 Advanced Trauma Management 3 cr

Includes trauma systems, mechanism of injury, management of hemorrhage, shock, burns, soft tissue, head and facial, spinal, thoracic, abdominal and musculoskeletal trauma.

EMT 371 Advanced EMT Internship 2 cr

Supervised clinical and field experiences emphasizing patient care in the hospital and out-of-hospital environments. Time distributed between hospital emergency departments, fire rescue departments, and ambulance services, among others.

Corequisite: EMT 321, EMT 361

EMT 375 EMS Response Women-Children 3 cr

The unique problems for the EMS provider when responding to women or children. Includes gynecology, obstetrics, abuse and assault, pediatrics and neonatology.

EMT 394 Directed Studies - 1-3 cr

Directed study, under the guidance of a faculty advisor, of a topic in the fields of Emergency Medical Services or Emergency Response Training. Requires permission of Department Chair.

EMT 425 Paramedic Emergency Care II 3 cr

Includes all medical emergency modules of the National Paramedic Curriculum not included in EMT 355 and 375.

EMT 440 EMS Op and Sp Considerations 3 cr

Includes special circumstances regarding geriatric patient, abuse and assault, patients with special challenges, acute interventions for the chronic care patient, ambulance operations, incident command, rescue, hazmat, and crime scene awareness.

EMT 455 Paramedic Skills Laboratory 1 cr

Advanced skills practicum. Designed to integrate all previously learned theory, management concepts and behavioral objectives of the 1999 National Standard Paramedic training curriculum.

Prerequisite: EMT 210 Minimum Grade of B and EMT 315 Minimum Grade of B and EMT 335 Minimum Grade of B and EMT 340 Minimum Grade of B and EMT 345 Minimum Grade of B

EMT 465 Paramedic Clinical Intern I 3 cr

The first of two clinical internship courses required of paramedic students. Supervised clinical experiences emphasizing patient care in the hospital and outpatient clinical settings.

Prerequisite: EMT 210 Minimum Grade of B and EMT 315 Minimum Grade of B and EMT 335 Minimum Grade of B and EMT 340 Minimum Grade of B and EMT 345 Minimum Grade of B

EMT 466 Paramedic Clinical Intern II 3 cr

The second of two clinical internship courses required of paramedic students. Supervised clinical experiences emphasizing patient care in the hospital and outpatient clinical settings.

Prerequisite: EMT 355 Minimum Grade of B and EMT 375 Minimum Grade of B

EMT 475 Paramedic Field Internships 6 cr

Supervised field experiences with an out of hospital advanced life support service emphasizing patient care and team leadership skills.

Prerequisite: EMT 350 Minimum Grade of B and EMT 466 Minimum Grade of S

EMT 485 Advanced Cardiac Life Support 3 cr

Course based on American Heart Association's ACLS Program. Includes in depth review of all cases required for a full ACLS course. Recommended for health care providers and health care provider students.

EMT 490 Special Topics - 1-3 cr

Selected topics in Emergency Medical Services and Emergency Response Training. Topics will vary according to needs and interests of students. Course may be repeated for credit when content varies.

EMT 494 Directed Studies - 1-3 cr

Directed study, under the guidance of a faculty advisor, of a topic in the fields of Emergency Medical Services or Emergency Response Training. Requires the permission of department chair.

Advanced EMT (AEMT) Certificate Program

Degree Requirements

The EMT certificate program can be completed in one academic semester and is a prerequisite to the Advanced EMT (AEMT) certificate program. The AEMT certificate program can be completed in one academic semester and is a prerequisite to the Paramedic certificate program. The Paramedic certificate program can be completed in three academic semesters. Together, these programs can be completed in five semesters. Students may, however, elect to complete only the EMT level of education, or the AEMT level of education.

After successful completion of each level of education, the student is eligible to sit for the National Registry of EMT's (NREMT) certification examination. Successful completion of this examination is mandatory for licensure to practice in the State of Alabama. State licensure as an EMT is required to apply for AEMT education. Those who complete any level of education and licensure are qualified to work in escalating roles (by level) in many areas of out-of-hospital emergency medical care, including

EMT 495 Comprehensive Review-Exam 1 cr

Culmination of paramedic education. Includes practical skills labs designed to prepare the graduate for state licensure exams. A final practical and written exam will be administered as a final evaluation of student progress.

Prerequisite: EMT 350 Minimum Grade of B and EMT 466 Minimum Grade of S

Area V

A. Complete the following:

CIS 150	Intro to Computer Applications (or pass computer proficiency exam)	0-3
---------	--	-----

B. Complete the following:

MGT 300	Management Theory and Practice	3
---------	--------------------------------	---

Total Hours 47-52

Footnote

¹ Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136).

Notes

- If students have passed BMD 252 with a grade of B or higher, they are exempt from taking EMS 200
- All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student’s major or minor.
- EMS 410 - Concepts of Professional Paramedics, 6 credits (Bridge Course). Required. This track is designed especially for licensed paramedics who have earned their paramedic education elsewhere. In addition to the EMS 410 course, students are required to meet all admissions requirements. Upon completion of EMS 410, up to 40 semester hours will be awarded to the student’s previous paramedic training during the final semester before graduation.

EMT Certification Program Degree Requirements

The EMT certificate program can be completed in one academic semester and is a prerequisite to the Advanced EMT (AEMT) certificate program. The AEMT certificate program can be completed in one academic semester and is a prerequisite to the Paramedic certificate program. The Paramedic certificate program can be completed in three academic semesters. Together, these programs can be completed in five semesters. Students may, however, elect to complete only the EMT level of education, or the AEMT level of education. After successful completion of each level of education, the student is eligible to sit for the National Registry of EMT's (NREMT) certification examination. Successful completion of this examination is mandatory for licensure to practice in the State of Alabama. State licensure as an EMT is required to apply for AEMT education. State licensure as an AEMT is required to apply for Paramedic education. Those who complete any level of education and licensure are qualified to work in escalating roles (by level) in many areas of out-of-hospital emergency medical care, including ambulance services, fire rescue departments, and industrial health and safety settings.

Department of Occupational Therapy Staff

Title	Name
Chair	Donna A. Wooster, PhD.
Associate Professor	Wooster
Assistant Professors	Brock, Deacy, O'Connor, Somerville, Taylor, Thompson
Instructors	

Mission Statement

To provide high-quality, socially relevant, and evidence-based occupational therapy education, to discover and disseminate new knowledge in the field, and to provide professional and volunteer service in order to reduce health disparities, improve health and quality of life, and meet the occupational needs of the community

Vision Statement

Our vision is to become a highly regarded, well-recognized, inclusive occupational therapy program through the provision of innovative and effective educational opportunities, scholarly contributions to the profession, and service to underserved populations in the greater Gulf Coast community.

Introduction

Occupational Therapy is a healthcare profession devoted to providing skilled treatment that helps individuals achieve independence in all aspects of their lives. Occupational therapists work with persons with acute and chronic physical, psychosocial, mental, and developmental

disabilities. An occupational therapist may aid in the growth and development of premature babies; create a learning environment for physically and mentally challenged children; adapt home environments for persons with stroke, cerebral palsy, spinal cord injury, and other disabilities; or create activities that are designed to restore mental health for persons with emotional, mental, or substance abuse problems. Occupational therapy focuses on "skills for the job of living" which includes all of the necessary skills for individuals to "live life to its fullest" and lead independent and satisfying lives.

The Occupational Therapy Doctorate Degree (OTD) is an entry-level professional program designed to enable the student to develop advanced critical reasoning skills and to prepare the graduate for professional practice in a variety of settings. Graduates will also have the capability of assuming responsibilities in the areas of administration, program development, consultation, clinical practice, and research in occupational therapy.

The program consists of 114 semester hours and is eight consecutive semesters in length. This includes 24 weeks of full-time Level II Fieldwork as required by accreditation standards. Level II Fieldwork is available in a variety of medical and community sites representing a diverse range of learning opportunities for students. Students must meet the specific site requirements (immunizations, training, background checks, drug screens, etc.) for each clinical fieldwork site in order to be eligible to attend these sites. All Level II Fieldwork must be completed within 12 months following completion of academic requirements.

This program also includes the required 14-week doctoral capstone experience and project which affords a variety of options for continued professional development. We strive to provide a high-quality, socially relevant, and evidence-based occupational therapy education that cultivates student competence. This must be completed within 12 months following completion of all level II fieldwork and academic requirements.

The program is designed to accommodate applicants who have an earned baccalaureate degree in another field.

See the Occupational Therapy Department website for specifics regarding semester-by-semester course requirements for graduation.

Accreditation Status: Candidacy Status Achieved

ACOTE Address:

c/o Accreditation Department
Accreditation Council for Occupational Therapy Education (ACOTE)

The Master of Science in Occupational Therapy (MSOT) is an entry-level professional program designed to enable the student to develop advanced critical reasoning skills and to prepare the graduate for professional practice in a variety of settings. Graduates will also have the capability of assuming responsibilities in the areas of administration, program development, consultation, and research in occupational therapy.

The program consists of 95 semester hours and is seven consecutive semesters in length. This includes 24 weeks of full-time Level II Fieldwork as required by accreditation standards. Level II Fieldwork is available in a variety of medical and community sites representing a diverse

range of learning opportunities for students. All Level II Fieldwork must be completed within 12 months following completion of academic requirements.

The program is designed to accommodate applicants who have a baccalaureate degree in another field.

Accreditation by:

The University of South Alabama Occupational Therapy Program is Accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA)

Status is: Currently accredited until 2032

ACOTE Address:

- Occupational Therapy (OTD) (p. 842)
- Rehabilitation Science in Occupational Therapy (MS) (p. 844)

Courses

Occupational Therapy (OT)

OT 201 Intro to Occupational Therapy 3 cr

An introduction to the occupational therapy profession and the scope of occupational therapy practice. Includes self assessment and development strategies to enhance students' readiness for the professional component of the occupational therapy curriculum. Familiarizes students with the functions, policies and services of the University, College and Department and includes an exploration of related allied health professions.

OT 499 Senior Honors Project - H - W 3-6 cr

Under the advice and guidance of a faculty mentor, honors students will identify and carry out a research project relevant to the field of Occupational Therapy study that will lead to a formal presentation at the annual Honors Student Colloquium. The senior project will be judged and graded by three faculty members chaired by the honors mentor. This course is required for Honors recognition and may be repeated for up to 6 credit hours.

OT 500 Occupation in Context 3 cr

An in depth study of human occupation in context with emphasis on analysis of the person, the environment, and the task utilizing official occupational therapy documents. Includes an introduction to the evidence-based occupational science literature and discussion of the impact of occupation on health and wellbeing.

OT 501 Occupational Development 4 cr

This course will include the study of typical human development throughout the life span with emphasis on best practice screening and assessment, theories of development, and normative and non-normative influences on development.

OT 504 Neurosci Basis of Occ Perform 3 cr

Study of the neural development, chemistry, structure, function and pathology of the nervous system. Emphasizes the application of basic science knowledge as it relates to human occupational performance.

OT 505 Scientific Inquiry I 2 cr

An introduction to qualitative and quantitative research concepts and statistical methods with emphasis on evidence-based practice and outcomes research. Includes library search strategies, critical analysis of scientific literature, application of statistical methods and research designs, and scientific writing skills.

OT 506 Research Design 1 cr

An introduction to writing a research design proposal. Students will work in small groups and be mentored by faculty to complete a research proposal.

OT 507 ADL/IADL Eval & Intervention 2 cr

Occupational therapy best practice assessment and evidence-based interventions to improve participation in ADL/IADL skills in children and adolescence.

OT 508 Experiential Learning-Peds 2 cr

This course will consist of experiential learning activities focused on occupational therapy evaluation and interventions for ADL and IADL participation in children and adolescence.

OT 509 OT Foundations 3 cr

This course will promote student knowledge of the theories, frames of reference, historical and sociopolitical influences, and professional documents guiding the profession of occupational therapy. Active participation in OT professional organizations will be encouraged.

OT 511 Neuromusculoskeletal Assessmen 1 cr

This course is a study of the structure and function of human body in order to enhance foundational knowledge for evaluation of occupational performance. Instruction include an emphasis on biomechanical assessment of limb range of motion and manual muscle testing.

OT 513 Neuromusculoskeletal Experient 2 cr

This course will provide experiential learning of the structure and function of the human body and assessment of limb range of motion and muscle strength. Students will learn to administer assessments of client factors using appropriate and safe procedures and protocols.

OT 515 Psychosocial Eval & Intervent 3 cr

This course will promote OT best practice evaluation and evidence-based psychosocial interventions for individual and groups to promote occupational performance in various environments.

OT 517 Occupational Evaluation I 3 cr

An overview of the evaluation process in occupational therapy. Includes the theoretical basis of evaluation, selection of appropriate data gathering methods, use of standardized and non-standardized assessment tools, interpretation of results and documentation of evaluation findings.

OT 521 Practicum I 1 cr

Observation and limited participation in clinical and community-based settings. Emphasis on assessment and intervention in performance of occupations.

OT 525 Documentation 3 cr

Overview of basic professional writing skills including: reporting evaluation data, intervention plans, progress notes, and discharge summaries. Includes understanding the varied purposes of documentation as well as legal and ethical issues in documentation.

OT 526 OT for Adults 2 cr

This course explores conditions and provides instruction on occupational therapy assessments and interventions for adults with acquired impairments and disabilities affecting self-care, ADL, and IADL skills. The course will take a life span approach with emphasis on occupational performance components and context. Therapeutic interventions will emphasize current evidence and student problem-solving, critical reasoning, and performance synthesis to enhance occupational performance and adaptation.

OT 528 Adult Experiential Learning 2 cr

This course will consist of hands on experiences with student reflection focusing on occupational therapy assessments and interventions for adults with acquired impairments and disabilities affecting ADLs and IADLS. This course will require students to synthesize information and apply evidence-based interventions to enhance occupational performance and adaptation.

OT 529 Profess Developmt Seminar II 1 cr

Seminar preparing the student for group work in fieldwork settings. The role of fieldwork in education, the role of the student and fieldwork supervisor will be discussed. Problem-solving strategies will be used to facilitate professional growth. Group dynamics will be emphasized.

OT 531 Practicum II 1 cr

Observation and limited participation in clinical and community-based settings. Emphasis on assessment and intervention in performance of occupations.

OT 535 Foundations Low Vision Rehab 2 cr

An in-depth examination of conditions causing low vision and the assessment and evidence-based intervention planning in low vision rehabilitation. Includes the conditions causing low vision, assessments used in the evaluation, interpretation of assessment results and documentation of evaluation findings in intervention planning of low vision rehabilitation.

OT 539 Professional Dev Seminar 1 cr

Designed to facilitate students' transition from didactic and part-time fieldwork components of the curriculum to the required full-time fieldwork experience. Emphasizes professional behavior, clinical reasoning and ethical issues.

OT 545 Scientific Inquiry II 2 cr

The application of qualitative and quantitative research concepts and statistical methods in the development and implementation of a scholarly project. Includes data collection and preliminary analysis.

OT 547 Research Implementation 1 cr

Students will work in small groups with faculty mentor to conduct research study and collect data. The focus will be seeking participants, obtaining informed consent, and conducting data collection. It will include creation of spreadsheets and conducting preliminary data analysis based on data collected to date.

OT 548 Advanced Technology in OT 2 cr

An introduction to microcomputer utilization in Occupational Therapy. Includes an examination of software, hardware and peripheral devices that facilitate computer access and productivity. Uses of computer technology in Occupational Therapy evaluation, treatment and administration will be explored. Special fee.

OT 549 Profess Developmt Seminar IV 1 cr

Designed to facilitate students' transition from didactic and part-time fieldwork components of the curriculum to the required full-time fieldwork experience.

OT 550 Level II Fieldwork - A 6 cr

A directed experience in evaluation, planning and implementing occupational therapy services under the supervision of an experienced, certified occupational therapist. Designed to emphasize clinical reasoning, entry-level skill acquisition and integration of didactic knowledge with practice.

OT 551 Pract. IV Psych/Soc 1 cr

Observation and limited participation in clinical and community-based settings serving clients with psychosocial and behavioral needs. Students will study evidence-based interventions that promote performance of various age appropriate and culturally relevant occupations. Emphasis will be placed on the behavioral, psychological and/or social factors promoting or hindering performance.

OT 552 OT School-Based Practice 3 cr

This course will focus on Occupational Therapy in School-Based Practice Settings. Emphasis will be on evidence-based practices to enhance occupational performance in the context of school. Therapeutic interventions will emphasize problem-solving, critical reasoning, and occupational performance synthesis to enhance occupational performance and adaptation. This course will explore current legislation impacting the role of OT in the schools, the evaluation process and assessment tools for this environment and populations, working within various educational team models, transition planning, and promotion of life skill development.

OT 553 OT and the Older Adult 2 cr

This course focuses on the practice of occupational therapy with the older adult. Course content includes conceptual foundations in gerontology, age-related changes affecting occupational performance, evidence-based interventions, the gerontological continuum of care and the intradisciplinary and interprofessional collaborations that impact the delivery of services to this population.

OT 554 OT & the Older Adult Exp Learn 2 cr

This course focuses on the practice of occupational therapy with the older adult. Course content includes demonstration and analysis of assessments and evidence-based interventions used with the older adult population. This course also applies the OT process inside the gerontological continuum of care and emphasizes the intradisciplinary and interprofessional collaborations that impact the delivery of services to this population.

OT 555 Level II Fieldwork - B 6 cr

A directed experience in evaluation, planning and implementing occupational therapy services under the supervision of an experienced, certified occupational therapist. Designed to emphasize clinical reasoning, entry-level skill acquisition and integration of didactic knowledge with practice.

OT 557 OT for the Young Child 3 cr
